## EVAPORATION

Evaporation of solution droplets in a high-temperature medium --- potassium carbonate MHD flow properties

13 p0046 A77-13254

Evaporation of a drop of solution in a high-temperature medium --- potassium carbonate MHD flow properties

15 p0263 A77-31534

## EVAPORATIVE COOLING

The problem of use of solar energy specific features of radiative, heat, and mass transfer in solar installations

13 p0057 A77-16204

Statistical investigation of the operational efficiency of solar and evaporative cooling devices in Turkmenian conditions

15 p0286 A77-33435

A structured surface for high performance evaporative heat transfer

[AIAA PAPER 77-778]

15 p0312 A77-37283

Statistical investigation into the effectiveness of solar- and evaporative-cooler operation under the conditions of Turkmenia

16 p0427 A77-45548

Atmospheric impacts of evaporative cooling systems

[ANL-ES-53]

15 p0367 A77-24643

## EVAPORATORS

Heat exchangers for the Ocean Thermal Energy Power Plant

14 p0176 A77-24219

Internal heat transfer experiments in a simulated CTEC evaporator tube

[APL/JHU/ARO-76-066]

16 p0521 A77-29611

## EXCAVATION

Thermocorer for geothermal applications

16 p0456 A77-48811

## EXHAUST DIFFUSERS

Diffuser augmentation of wind turbines

16 p0490 A77-49093

## EXHAUST GASES

General Motors Sulfate Dispersion Experiment - Assessment of the EPA HIWAY model

13 p0071 A77-18882

Applications of the rapid devolatilization of coal in MHD power cycles

14 p0141 A77-21249

Reduction of atmospheric pollution due to the automobile and energy savings

14 p0162 A77-22948

Water induction in hydrogen-powered IC engines

14 p0171 A77-23721

Raman scattering and the characterisation of atmospheric aerosol particles

15 p0262 A77-31487

Automotive sulfate emissions

15 p0290 A77-34629

Volkswagen develops a diesel

15 p0290 A77-34630

The interaction of automotive-engine efficiency and exhaust pollution

15 p0296 A77-35922

A multigas analyzer for automobile exhausts

15 p0297 A77-36026

An application of the economic-environmental power dispatch --- decision approach for controlling air pollution emission from electric power generation

15 p0317 A77-38121

Optimization of automotive engine fuel economy and emissions

15 p0320 A77-38373

Aviation transportation and atmospheric pollution [ONERA, TP NO. 1977-79]

15 p0321 A77-38533

Devolatilization of pulverized coal during rapid heating --- in exhaust gases of combustion driven MHD generators

15 p0331 A77-39566

The oxidant formation potential of emissions from catalyst-equipped vehicles

15 p0333 A77-39596

Emission and deposition of petrol engine exhaust Pb. I - Deposition of exhaust Pb to plant and soil surfaces

15 p0333 A77-39655

Hydrogen peroxide emission levels from a hydrogen fueled combustion engine

16 p0399 A77-40644

Energy reduction in cleaning exhausts containing particulates and noxious gases

16 p0414 A77-42740

MHD combustor effluent chemistry measurements using Raman scattering

16 p0425 A77-44825

NOx from fuel nitrogen in two-stage combustion

16 p0439 A77-48169

In situ optical measurement of automobile exhaust gas particulate size distributions - Regular fuel and methanol mixtures

16 p0440 A77-48173

Environmental aspects of low Btu gas combustion --- nitrogen oxide emissions from power plants

16 p0440 A77-48178

Exhaust and evaporative emission from a Brazilian Chevrolet fueled with ethanol-gasoline blends

16 p0444 A77-48708

A ceramic heat exchanger for exhaust fired gas turbine power cycles

16 p0445 A77-48719

Eliminate source emission codes for coal-refuse fired power plants

16 p0504 A77-51128

Status of sulfur dioxide removal systems for the electric utility industry

16 p0504 A77-51144

Optical measurements of mean particle size in the exhaust of a coal-fired MHD generator

[WSS/CI PAPER 76-53]

16 p0508 A77-51611

Protocol to characterize gaseous emissions as a function of fuel and additive composition

[PB-253363/6]

13 p0084 A77-10221

Chemical and physical characterization of automotive exhaust particulate matter in the atmosphere

[PB-253375/0]

13 p0092 A77-10715

Reduction of gaseous pollutant emissions from gas turbine combustors using hydrogen-enriched jet fuel

[NASA-CR-149146]

13 p0094 A77-11198

An evaluation of high altitude engine modification devices (econo-kit)

[PB-255556/3]

13 p0101 A77-11589

Investigation and assessment of light-duty-vehicle evaporative emission sources and control

[PB-255813/8]

13 p0102 A77-11603

Emissions and performance of catalysts for gas turbine catalytic combustors

[NASA-TN-X-73543]

13 p0104 A77-12406

The impact of JP-4/JP-8 conversion on aircraft engine exhaust emissions

[AD-A026546]

13 p0112 A77-13234

Pollutant potential of raw and chemically fixed hazardous industrial wastes and flue gas desulfurization sludges

[PB-256691/7]

13 p0133 A77-15540

Cooperative study of heavy duty diesel emission measurement methods

[PB-257137/0]

13 p0133 A77-15541

Environmental protection measuring technique. Sensor for automatic continuous emission control of gases

[BMFT-PB-T-76-03]

14 p0209 A77-16467

Methanol engine: A transportation strategy for the post-petroleum era

[UCRL-52041]

14 p0219 A77-19469

Control of waste and water pollution from power plant flue gas cleaning systems

[PB-259211/1]

14 p0227 A77-19953

Hydrogen-enrichment-concept preliminary evaluation

[NASA-CR-152814]

15 p0340 A77-22290

Fuel consumption, emissions, and power characteristics of the 1975 Ford 140-CID automotive engine, experimental data

[PB-261771/0]

15 A77-22725

Size distribution and mass output of particulates from diesel engine exhausts

[PB-261416/2]

15 A77-22732

Emissions and total energy consumption of a multicylinder piston engine running on gasoline and a hydrogen-gasoline mixture

[NASA-TN-D-8487]

15 p0353 A77-23114

Effect of automotive parts on vehicle and engine emissions. Phase 1: Original equipment

[PB-264057/1]

15 p0368 A77-24672

Chemical characterization of diesel exhaust particulates

[PERC/RI-77/5]

## SUBJECT INDEX

## FUEL COMBUSTION

- Anodic oxidation of ethylene glycol with noble metal alloy catalysts --- in fuel cell  
15 p0260 A77-31171
- Influence of bonding and filling agents on the activity of tungsten carbide hydrogen electrodes  
15 p0260 A77-31173
- Improvement in phosphoric acid cell powerplant technology  
[AIAA 77-1011] 16 p0403 A77-41558
- Economic assessment of the utilization of fuel cells in electric utility systems  
[AIAA 77-1012] 16 p0403 A77-41559
- The interaction of batteries and fuel cells with electrical distribution systems - Line commutated converter interface  
16 p0414 A77-42634
- The interaction of batteries and fuel cells with electrical distribution systems - Force commutated converter interface  
16 p0414 A77-42635
- Hybrid simulation of fuel cell power conversion systems  
16 p0414 A77-42636
- On the application of radioisotope techniques for the study of phthalocyanine catalyzed electrochemical processes in fuel cells  
16 p0425 A77-45151
- Porous electrodes for Zn/air alkaline battery  
16 p0431 A77-46722
- ERDA fuel cell programs  
16 p0447 A77-48734
- Advanced fuel cell technology and applications  
16 p0447 A77-48735
- ERDA Fuel Cell Applied Research Program  
16 p0447 A77-48736
- Molten carbonate fuel cell model  
16 p0447 A77-48737
- 4.8-megawatt fuel cell module demonstrator  
16 p0447 A77-48738
- Post-test analysis of Li/Pes2 compact cells  
16 p0448 A77-48739
- Energy savings through on-site fuel cells in industrial applications  
16 p0449 A77-48752
- Thermal efficiency of solid electrolyte fuel cells with mixed conduction  
16 p0500 A77-50199
- Research on electrochemical energy conversion systems  
[AD-A023689] 13 p0090 N77-10681
- Fuel cell stacks  
[AD-A024216] 13 p0090 N77-10684
- Evaluation of potassium titanate as a component of alkaline fuel cell matrices  
[NASA-TN-D-8341] 13 p0094 N77-11175
- Development of fuel cell CO detection instruments for use in a mine atmosphere  
[PB-254823/8] 13 p0095 N77-11380
- Solid Polymer Electrolyte (SPE) fuel cell technology, program review, phase 2

## SUBJECT INDEX

## FUSION REACTORS

Ignition of flammable gases in crude-oil tankers  
as a result of metal fracture  
[AD-A027411] 13 p0127 N77-15121

Automotive hydride tank design 14 p0244 N77-21637

**FUEL TESTS**

Recent tests of industrial gas turbine combustors  
fueled with simulated low heating value coal gas  
[ASME PAPER 76-WA/GT-3] 14 p0185 A77-26459

Experimental results using methanol and  
methanol/gasoline blends as automotive engine fuel  
[BERC/R1-76/15] 15 p0389 N77-27245

**FUEL-AIR RATIO**

Studies on realization of normal combustion of  
hydrogen in spark-ignition engines by reduction  
of temperature of residual burnt gases  
14 p0195 A77-28050

Soot and gaseous pollutant formation in a burning  
fuel spray in relation to pressure and air/fuel  
ratio 15 p0293 A77-35186

Burner design criteria for control of NOx from  
natural gas combustion. Volume 1: Data  
analysis and summary of conclusions  
[PB-254167/0] 13 p0091 N77-10686

**FUELS**

Fuels from biomass - Energy outlay versus energy  
returns: A critical appraisal 15 p0322 A77-38673

Study of the feasibility of federal procurement of  
fuels produced from solid wastes  
[PB-255695/9] 13 p0096 N77-11513

Systems study of fuels from sugar cane, sweet  
sorghum, and sugar beets  
[TID-27032] 14 p0211 N77-17570

An evaluation of methanol, ethanol, the propanols,  
and the butanols as ship propulsion fuels  
[AD-A033483] 15 p0354 N77-23277

Systems study of fuels from sugarcane, sweet  
sorghum, sugar beets, and corn  
[TID-27336] 15 p0377 N77-26324

Operation of military field heating equipment  
using solid fuels  
[AD-A037121] 15 p0388 N77-27152

Parametric study of critical fuel costs for solar  
heating in North America  
[CONF-76C842-12] 15 p0392 N77-27533

Energy and US agriculture. 1974 data base, volume  
1. Part A: US series of energy tables. Part  
B: State series of energy tables  
[PB-264449/0] 15 p0395 N77-27562

Hydrocarbon fuels from solar energy via the alga  
Botryococcus brauni  
[ARL/MECB-ENG-148] 16 p0513 N77-28576

System study of fuels from grains and grasses  
[DSE/3729-1] 16 p0519 N77-29318

Energy fact book, 1977 --- energy sources,  
technology, and conservation  
[AD-A038802] 16 p0522 N77-29624

An economic evaluation of a process to separate  
raw urban refuse into its metal, mineral, and  
energy components  
[PB-267629/4] 16 p0531 N77-31046

Alternate petroleum based fuels for naval fleet  
usage: potential availability, cost, and system  
impact  
[AD-A041980] 16 p0551 N77-33372

DoD energy R and D. Part 2: Military fuel  
operations. Performance and R and D implications  
[AD-A042272] 16 p0554 N77-33617

**FULL SCALE TESTS**

Superconducting machinery for Naval ship propulsion  
14 p0144 A77-21361

General Electric prepares the LM5000 for testing  
16 p0505 A77-51169

**FUNCTIONAL ANALYSIS**

Focused solar collector analysis with axially  
varying input due to shadowing from adjacent  
collectors  
[SAND-76-5061] 15 p0345 N77-22635

**FURNACES**

Laboratory investigation of high temperature alloy  
failure mechanisms 15 p0271 A77-32608

**FUSION (HEATING)**

An immiscible fluid - Heat of fusion energy  
storage system 16 p0493 A77-49113

## FUSION REACTORS

Fusion power --- nuclear energy technology  
development 13 p0005 A77-11034

Muon catalysed fusion for pellet ignition  
13 p0012 A77-11468

Current status of the magnetic fusion program  
13 p0035 A77-12792

PACER - A practical fusion power concept  
13 p0035 A77-12793

The migma high energy advanced fuel direct  
conversion fusion power plant 13 p0035 A77-12794

Concept of a fusion burner 13 p0061 A77-17014

World survey of major facilities in controlled  
fusion research --- Book 13 p0067 A77-18264

Heat transfer problems associated with laser fusion  
13 p0068 A77-18441

Superconducting induction coil for a doublet  
Tokamak experimental fusion power reactor  
14 p0144 A77-21376

Overview of energy research and development  
administration inertial confinement fusion program  
14 p0146 A77-21744

Status and outlook of controlled nuclear fusion  
14 p0163 A77-23095

Possibility of medium energy neutral beam  
injection into stellarator reactor  
14 p0184 A77-26093

Review of the conceptual design of a doublet  
fusion experimental power reactor  
[ASME PAPER 76-WA/NE-9] 14 p0188 A77-26494

Design considerations for a migma advanced fuel  
fusion reactor 15 p0334 A77-39747

Update on the development of 120-keV  
multi-megawatt neutral beam source 15 p0335 A77-39749

Applications of superconducting magnets to energy  
with particular emphasis on fusion power  
16 p0411 A77-42161

Symposium on Engineering Problems of Fusion  
Research, 6th, San Diego, Calif., November  
18-21, 1975, Proceedings 16 p0425 A77-44975

Review of toroidal theta-pinch theory 16 p0427 A77-45628

Symposium on Clean Fusion, 1st, Washington, D.C.,  
April 30, 1976, Proceedings 16 p0435 A77-47355

Clean fusion concepts and efforts - A survey  
16 p0435 A77-47356

The 1976 status of the Migma program of controlled  
fusion 16 p0435 A77-47360

Advanced fuel fusion experimentation with  
Migmacells II and III - Orbit diagnostics and  
lifetime measurements 16 p0436 A77-47362

Methods of 'tailoring' ion distributions in phase  
space /'morphodynamics'/ --- in Migma-type  
fusion reactors 16 p0436 A77-47364

Conditions for a boron fusion reactor in the MeV  
range 16 p0436 A77-47366

Generalized criterion for controlled fusion  
16 p0436 A77-47368

Unified criterion for proximity to controlled fusion  
16 p0436 A77-47369

Electron beam heated solenoid reactors for fusion  
power and fissile fuel breedings 16 p0459 A77-48827

Fusion energy option  
[BNWL-SA-5802] 14 p0213 N77-17891

Technical and economic feasibility of US district  
heating systems using waste heat from fusion  
reactors 14 p0232 N77-20606

Fusion. The future energy source  
[AROI-10] 15 p0397 N77-27951

Cost estimation for a theta-pinch reactor  
[ANL-CTR-TN-40] 16 p0549 N77-32888

Environmental cost/benefit analysis for fusion  
power plants 16 p0549 N77-32893

[BNWL-2028]

## GRAINS (FOOD)

- Grain drying in stationary bins with solar heated air  
13 p0019 A77-12411
- GRAPHITE**  
Silicon solar cells on zone-melted silicon/graphite substrates  
16 p0426 A77-45303  
Carbon oxidation catalyst mechanism study for fuel cells  
[PB-256420/1] 13 p0115 N77-13551  
Preliminary assessment of a geothermal energy reservoir formed by hydraulic fracturing  
[LA-UR-76-1672] 14 p0221 N77-19597
- GRAPHITE-EPOXY COMPOSITE MATERIALS**  
Composites for large space structures  
[IAF PAPER 77-65] 16 p0507 A77-51416
- GRAPHS (CHARTS)**  
Experiences with a 400 watt solar cell array in the Netherlands in the period December 1974-December 1975  
14 p0154 A77-21850  
Thermal accumulators --- latent heat storage system design  
15 p0264 A77-31673  
Combustion research at Sandia Laboratories  
[SAND-76-8511] 15 p0377 N77-26253
- GRASSES**  
System study of fuels from grains and grasses  
[DS-3729-1] 16 p0519 N77-29318
- GRATINGS (SPECTRA)**  
On the theory and solar application of inductive grids --- wave diffraction modeling and far IR measurement  
16 p0419 A77-43556
- GRAVELS**  
Gravel and liquid storage system for solar thermal power plants  
16 p0491 A77-49101
- GRAVITATIONAL EFFECTS**  
Photovoltaic, gravitationally-stabilized solid-state, satellite solar power station  
[GSS4ES/ [ATAA PAPER 77-511] 14 p0173 A77-23927  
Application of gravitational energy exchange to tracked urban transit systems  
14 p0200 A77-29468
- GRAVITY ANOMALIES**  
Gravity and ground magnetic surveys of the central mineral mountains, Utah, volume 6  
[PB-268423/1] 16 p0544 N77-32578
- GRAVITY GRADIENT SATELLITES**  
Gravitationally stabilized satellite solar power station in orbit  
14 p0196 A77-28421
- GREAT BASIN (US)**  
Geothermal studies in northern Nevada  
13 p0029 A77-12742
- GREAT BRITAIN**  
Windmills change direction --- British system utilizing offshore windmills and depleted North Sea fields  
13 p0060 A77-16620  
Energy policies of France, Britain, and Germany compared  
15 p0263 A77-31572
- GREAT PLAINS CORRIDOR (NORTH AMERICA)**  
Wind energy statistics for large arrays of wind turbines - New England and Central U.S. regions  
16 p0490 A77-49091
- GREENHOUSE EFFECT**  
Windowed versus windowless solar energy cavity receivers  
13 p0037 A77-12808
- GREENLAND**  
The Greenland hydropower as a source of electrolytic hydrogen  
15 p0285 A77-33416
- GRIDS**  
On the analysis and design of grid structures for p-n junction solar cells  
16 p0497 A77-49156
- GROOVES**  
Effects of one-sided heat input and removal on axially grooved heat pipe performance  
[ATAA PAPER 77-191] 14 p0135 A77-19887  
Re-entrant groove heat pipe --- computerized design for OAO applications  
[ATAA PAPER 77-773] 15 p0312 A77-37280

## Axially grooved heat pipes - 1976

- [ATAA PAPER 77-747] 15 p0324 A77-39512  
The effect of non-direct insolation on the radiative performance of trapezoidal grooves used as solar energy collectors  
16 p0502 A77-50214

## GROUND EFFECT (AERODYNAMICS)

- The spacing of wind turbines in large arrays  
16 p0416 A77-42893

## GROUND HANDLING

- Some early perspectives on ground requirements of liquid hydrogen air transports  
15 p0281 A77-33391  
Some early perspectives on ground requirements of liquid hydrogen air transports  
14 p0243 N77-21628

## GROUND OPERATIONAL SUPPORT SYSTEM

- Braxton isotope power system. Phase 1: (Ground demonstration system) Configuration Control Document (CCD)  
[TID-27252] 15 p0380 N77-26644

## GROUND STATIONS

- Satellite communications for off-shore oil operations using WESTAR  
13 p0053 A77-15130  
A small but important contribution to the German-American solar research programme 'Helios'  
15 p0323 A77-39125  
Preliminary assessment of the potential for medium and large capacity wind generators used as fuel savers for ac diesel based power systems in Ontario  
16 p0489 A77-49085

## GROUND WATER

- Ground water as energy carrier  
15 p0302 A77-36347  
Proceedings of Second Geopressured Geothermal Energy Conference. Volume 4: Surface technology and resource utilization  
[CONP-760222-P4] 14 p0248 N77-21675  
Contamination of groundwater by heavy metals from the land disposal of fly ash  
[COO-2727-4] 15 p0357 N77-23631
- GROUND WIND**  
Wind structure in strong winds below 150 m  
16 p0410 A77-42071

## GROWTH

- Proceedings of the Workshop on Analysis of 1974 and 1975 Power Growth  
[EPRI-EA-318-SR] 16 p0536 N77-31633

## GULF OF MEXICO

- Black magnetic spherule fallout in the eastern Gulf of Mexico  
13 p0052 A77-14890  
Geology and potential uses of the geopressure resources of the Gulf Coast  
[UCID-17163] 14 p0215 N77-18562  
Preliminary investigation. Nonproducing gas reserves onshore United States and in the Gulf of Mexico offshore state area, as reported in Federal Commission form 15  
[PB-263434/3] 15 p0355 N77-23597  
Proceedings of a workshop on environmental oceanography of the Gulf of Mexico  
[ORO-5017-1] 15 p0386 N77-26787  
Numerical simulation of United States Gulf Coast geothermal geopressured reservoirs  
16 p0545 N77-32585

## GULF STREAM

- Gulf Stream OTEC resource potential and environmental impact assessment overview --- Ocean Thermal Energy Conversion  
16 p0485 A77-49048

## GUNN DIODES

- High-efficiency and high-peak-power InP transferred-electron oscillators  
15 p0289 A77-34366

## H

## HABITABILITY

- Where do we locate the moon base --- considering polar regions as preferred lunar observatory sites  
16 p0504 A77-51023

## HALITES

- A survey of salt deposits and salt caverns: Their relevance to the strategic petroleum reserve  
[PB-255948/2] 13 p0105 N77-12500

## HALL EFFECT

- Electric power fluctuations in a MHD generator  
15 p0269 A77-32432
- Investigation of the Hall effect in the plasma of  
an inductive high-frequency discharge  
15 p0297 A77-36088
- The influence of finite electrode segmentation on  
electrical performances of the Faraday HD  
generator  
15 p0309 A77-36936
- Study of the maximum Hall voltages and  
interelectrode breakdown in the channel of an  
open-cycle MHD generator - A joint U.S.-U.S.S.R.  
experiment on the UO2 facility MHD generator  
15 p0329 A77-39554
- Coupled electrical and fluid calculations in the  
cross plane in linear MHD generators  
15 p0329 A77-39557
- Elimination of current concentration due to Hall  
effect by variable resistive electrodes  
16 p0418 A77-43119
- Effect of two-dimensional inhomogeneities on the  
properties of framed MHD channels  
16 p0428 A77-46088

## HALL GENERATORS

- Performance theory of diagonal conducting wall MHD  
generators  
13 p0001 A77-10202
- MHD power generation with fully ionized seed  
16 p0443 A77-48571

## HALOGEN COMPOUNDS

- Hydrogen production by means of reactor heat using  
halogens and reversible electrochemical methods  
in a closed cycle process  
15 p0276 A77-33350

## HALOGENS

- Hydrogen-halogen energy storage system:  
Preliminary feasibility and economic assessment  
[BNL-22164]  
16 p0537 N77-31635

## HANDBOOKS

- Handbook of gasifiers and gas treatment systems  
[FE-1772-11]  
13 p0088 N77-10658
- Flat-plate solar collector handbook. A survey of  
principles, technical data and evaluation results  
[UCID-17C86]  
13 p0105 N77-12506
- Solar cell array design handbook, volume 1  
[NASA-CR-149364]  
13 p0118 N77-14193
- Solar cell array design handbook, volume 2  
[NASA-CR-149365]  
13 p0118 N77-14194
- EPA Van operational manual  
[PB-259177/4]  
14 p0233 N77-20608
- Site energy handbook. Volume 1: Methodology for  
energy survey and appraisal  
[ERDA-76-131/1]  
15 p0355 N77-23607
- The analysis of subsidence associated with  
geothermal development. Volume 1: Handbook  
[PB-263692/6]  
15 p0369 N77-24714
- Energy analysis handbook. CAC document 214  
[COO-2865-1]  
15 p0372 N77-25635
- Energy fact book, 1977 --- energy sources,  
technology, and conservation  
[AD-A038802]  
16 p0522 N77-29624
- Energy interrelationships. A handbook of tables  
and conversion factors for combining and  
comparing international energy data  
[PB-269034/5]  
16 p0559 N77-33675

## HARMONICS

- Element rating and coupling harmonics in a  
superconductive energy transfer system  
16 p0411 A77-42164

## HARTMANN FLOW

- Two-phase Hartmann flows in the MHD generator  
configuration  
[AD-A036452]  
16 p0518 N77-28948

## HAWAII

- Geothermal energy in Hawaii - Hydrothermal systems  
13 p0029 A77-12741
- Status report: Lawrence Livermore Laboratory wind  
energy studies  
[UCID-17157-1]  
14 p0221 N77-19588
- A coordinated exploration program for geothermal  
sources on the island of Hawaii  
[PB-261691/0]  
15 p0350 N77-22685
- Hawaii technology utilization experiment  
[UCID-17343]  
15 p0398 N77-28038

## HAZARDS

- Development status and environmental hazards of  
several candidate advanced energy systems  
16 p0452 A77-48776

- Small scale tests on control methods for some  
liquefied natural gas hazards  
[AD-A033522]  
15 p0341 N77-22293

## HEALTH PHYSICS

- Occupational radiation exposure at light water  
cooled power reactors, 1969-1975  
[PB-257054/7]  
13 p0125 N77-14740

## HEAT BALANCE

- Contribution of the heat carried by solar  
radiation to the thermal balance of a room  
during the cold season and its effect on  
domestic fuel consumption  
13 p0063 A77-17558

## HEAT EXCHANGERS

- Heat-pipe regenerator for gas turbine engine  
13 p0020 A77-12528
- Multipurpose insulation system for a radioisotope  
fueled Mini-Brayton Heat Source Assembly  
13 p0022 A77-12678
- Investigation of heat exchanger flow arrangement  
on performance and cost in a geothermal binary  
cycle  
13 p0029 A77-12746
- Direct contact heat exchangers for geothermal  
power plants  
13 p0029 A77-12747
- Fluidized bed heat exchangers for geothermal  
applications  
13 p0029 A77-12748
- Heat pipe heat exchanger design considerations  
13 p0031 A77-12765
- Analysis of parameters and characteristics of a  
bypass turbojet engine operating in a cycle with  
stepwise heat removal  
13 p0063 A77-17765
- Heat exchangers for the Ocean Thermal Energy Power  
Plant  
14 p0176 A77-24219
- Operational modes of solar heating and cooling  
systems  
14 p0180 A77-25899
- Optimal overall efficiency for a solar radiation  
collector utilizing a two fluid Rankine Cycle to  
generate electrical power  
14 p0182 A77-26056
- Design and costs of high temperature thermal  
storage devices using salts or alloys  
[ASME PAPER 76-WA/HT-34]  
14 p0187 A77-26481
- Heat transfer considerations of a nonconvecting  
solar pond heat exchanger  
[ASME PAPER 76-WA/SOL-4]  
14 p0188 A77-26509
- Automotive hydride tank design  
15 p0282 A77-33399
- Development of low-power gas turbines with  
regenerative heat exchangers at MTU. I  
15 p0289 A77-34122
- Application of heat pipes to ground storage of  
solar energy  
[AIAA PAPER 77-729]  
15 p0324 A77-39507
- Argon contamination associated with ceramic  
regenerative heat exchangers for closed cycle MHD  
15 p0326 A77-39536
- A heat capacitor for MHD electric power generation  
systems  
15 p0331 A77-39571
- Metal dusting corrosion in coal gasification  
environments  
15 p0337 A77-40042
- Perspectives on implementing OTEC power --- Ocean  
Thermal Energy Conversion  
[AIAA 77-1024]  
16 p0404 A77-41564
- A ceramic heat exchanger for exhaust fired gas  
turbine power cycles  
16 p0445 A77-48719
- The design of a sodium sulfate decahydrate heat  
exchanger for coolness storage --- in  
solar-powered air conditioning system  
16 p0450 A77-48760
- Molten salt thermal energy storage for utility  
peaking loads  
16 p0451 A77-48765
- Liquid fluidized bed heat exchanger - Horizontal  
configuration experiments and data correlations  
--- for geothermal applications  
16 p0455 A77-48799
- Studies of biofouling in ocean thermal energy  
conversion plants  
16 p0484 A77-49044

## HEAT FLUX

## SUBJECT INDEX

- Design of low-cost aluminum heat exchangers for OTEC plant-ships --- Ocean Thermal Energy Conversion 16 p0485 A77-49046
- Metallurgical evaluation of materials for geothermal power plant applications 16 p0499 A77-49700
- A design procedure for solar air heating systems 16 p0501 A77-50209
- Analysis of a heat pipe exchanger 13 p0112 A77-13355
- Comparative evaluation of solar heating alternatives [COO-2703-2] 13 p0129 A77-15498
- Investigation of heat exchanger flow arrangement on performance and cost in a geothermal binary cycle [UCRL-78390] 14 p0221 A77-19587
- Working fluid selection and preliminary heat exchanger design for a Rankine cycle geothermal power plant [PB-261564/9] 15 p0349 A77-22684
- Regenerative vapor cycle with isobutane as working fluid [PB-262704/0] 15 p0356 A77-23622
- Ceramic heat pipe heat exchangers [LA-6514-MS] 15 p0361 A77-24431
- A numerical model to evaluate the behavior of a regenerative heat exchanger at high temperature --- for magnetohydrodynamic generator [TH-76-F-66] 15 p0377 A77-26439
- Preliminary failure modes, effects and criticality Analysis (FMECA) of the Erayton Isotope Power System (BIPS) ground demonstration system [TID-27301] 15 p0392 A77-27526
- Solar Collection Module Test Facility, instrumentation fluid loop number one [SAND-76-0425] 16 p0535 A77-31619
- HEAT FLUX**
- Optimal control of flow in low temperature solar heat collectors 13 p0019 A77-12409
- Geothermal flux through palagonitized tephra, Surtsey, Iceland - The Surtsey temperature-data-relay experiment via Landsat-1 13 p0048 A77-13648
- Irradiation field formation on the receiver of 'precise' and 'unprecise' solar concentrators 13 p0057 A77-16209
- A study of the economic feasibility of a thermal energy storage system for solar heating applications using a PCM --- Phase Change Material [ASME PAPER 76-WA/HT-63] 14 p0187 A77-26490
- Circumferential variations of bore heat flux and outside surface temperature for a solar collector tube 16 p0429 A77-46426
- HEAT GENERATION**
- Retorting of single oil shale blocks with nitrogen and air 13 p0024 A77-12696
- Increase in the efficiency of heat and power systems using large artificial accumulators of heat 13 p0064 A77-17939
- Performance of two fixed-mirror solar concentrators for process heat 13 p0074 A77-19065
- Combined gas/steam cycle power and heat generating plants 14 p0155 A77-22023
- Energy assessment and possibilities of remote heat supply 15 p0338 A77-40350
- Feasibility study of an Integrated Energy/Utility System at the University of Florida 16 p0449 A77-48751
- Supercorroding alloys for generating heat and hydrogen gas 16 p0458 A77-48820
- Flywheel-heat engine power for an energy-economic personal vehicle [BNWL-2006] 14 p0214 A77-18448
- Investigation of the feasibility of using windpower for space heating in colder climates. The final design and manufacturing phase of the project [ERDA/NSF-00603/75/T1] 14 p0215 A77-18561
- Two-phase flow in geothermal energy sources [TID-27129] 14 p0250 A77-21689
- Energy conservation on campus. Volume 2: Case studies [PB-266212/0] 16 p0524 A77-29637
- HEAT MEASUREMENT**
- Results of some geothermal studies in Singhbhum thrust belt, India 13 p0013 A77-11499
- Calorimetry of large solar concentrators 13 p0038 A77-12814
- HEAT OF COMBUSTION**
- Fluidized-bed combustion of anthracite refuse 16 p0454 A77-48793
- HEAT OF DISSOCIATION**
- Feasibility of hydrogen production by direct water splitting at high temperature 14 p0240 A77-21606
- HEAT OF VAPORIZATION**
- Energy from humid air [AIAA PAPER 77-730] 15 p0311 A77-37253
- HEAT PIPES**
- Heat-pipe regenerator for gas turbine engine 13 p0020 A77-12528
- Design analyses of a methane-based chemical heat pipe 13 p0028 A77-12737
- The potential of the heat pipe in coal gasification processes 13 p0031 A77-12763
- Heat pipes for fluid-bed gasification of coal - Metallurgical condition of heat pipes after tests in process environment 13 p0031 A77-12764
- Heat pipe heat exchanger design considerations 13 p0031 A77-12765
- Cooling arrays of circuit cards using heat pipes and forced air diffusers 13 p0031 A77-12766
- VBP heat pipes for energy storage --- Vapor Bubble Pumping 13 p0032 A77-12767
- Heat pipe nuclear reactor for space power 13 p0036 A77-12797
- Economic optimization of the energy transport component of a large distributed solar power plant 13 p0037 A77-12807
- Study of the properties of heat pipes with liquid-metal heat-transfer agents in low-temperature regimes 13 p0046 A77-13243

[AIAA PAPER 77-773] 15 p0312 A77-37280

Controllability analysis for passively and actively controlled heat pipes  
[AIAA PAPER 77-776] 15 p0312 A77-37281

A precise satellite thermal control system using cascaded heat pipes  
[AIAA PAPER 77-777] 15 p0312 A77-37282

A structured surface for high performance evaporative heat transfer  
[AIAA PAPER 77-778] 15 p0312 A77-37283

Study of the characteristics of convective heat transfer in cylindrical solar energy receivers by solving the conjugate problem of heat exchange  
15 p0316 A77-37771

Investigation of the 'crisis' of heat and mass transfer in low-temperature wickless heat pipes  
15 p0316 A77-37927

Application of heat pipes to ground storage of solar energy  
[AIAA PAPER 77-729] 15 p0324 A77-39507

Axially grooved heat pipes - 1976  
[AIAA PAPER 77-747] 15 p0324 A77-39512

Development of a low temperature phase change material package --- for spacecraft thermal control  
[AIAA PAPER 77-762] 15 p0325 A77-39514

An analytical study of the maximal heat-carrying capacity of heat pipes  
16 p0411 A77-42260

A tubular evacuated solar collector utilizing a heat pipe as absorber  
16 p0417 A77-42961

Investigation of convective heat-transfer characteristics in cylindrical solar receivers by solution of the conjugate heat-exchange problem  
16 p0437 A77-47427

Thermal energy management techniques in spacecraft design and their potential for terrestrial applications  
16 p0439 A77-47969

Heat pipes for hostile environments in energy conservation applications  
16 p0450 A77-48758

Demand sensitive energy storage in molten salts  
16 p0491 A77-49102

Investigation of the effective heat conductivity of metal-fiber wicks for low-temperature heat pipes  
16 p0500 A77-49988

An investigation of condensation heat transfer in a closed tube containing a soluble noncondensable gas  
[NASA-CR-149095] 13 p0085 N77-10465

Test program for transmitter experiment package and heat pipe system for the communications technology satellite  
[NASA-TN-X-3455] 13 p0095 N77-11268

Investigation of performance limits in axial groove heat pipes  
[NASA-CR-137912] 13 p0095 N77-11340

Heat pipe materials compatibility  
[NASA-CR-135069] 13 p0103 N77-12182

Analysis of a heat pipe exchanger  
13 p0112 N77-13355

Flight data analysis and further development of variable-conductance heat pipes  
[NASA-CR-137953] 13 p0118 N77-14374

Computer program grade 2 for the design and analysis of heat-pipe wicks  
[NASA-CR-137954] 13 p0118 N77-14375

Heat pipes, volume 2 --- conference proceedings, Bologna, 31 Mar. - 2 Apr. 1976  
[ESA-SP-112-VOL-2] 13 p0119 N77-14378

Extended cryogenic performance of Lobar Wick heat pipe/radiator  
13 p0119 N77-14379

Operation peculiarities of low temperature heat pipes with crimped capillary structure  
13 p0119 N77-14380

Heat pipes for the temperature range from 200 to 600 C --- noting sulfur with iodine additive as working fluid  
13 p0119 N77-14381

Some features of start-up of alkali metal heat pipes  
13 p0119 N77-14383

Investigations of nonsteady-state processes at cryogenic heat pipe operation --- filled with ammonia and Freon-22  
13 p0119 N77-14384

Transfer function analysis of heat pipes  
13 p0119 N77-14385

Wetting and surface properties of refrigerants to be used in heat pipes --- surface tension and wall contact angles  
13 p0119 N77-14386

Heat pipes with a non-condensable gas and their application in nuclear apparatus and instruments  
13 p0120 N77-14387

Heat pipes for the trans-Alaska pipeline  
13 p0120 N77-14388

The International Heat Pipe Experiment --- Black Brant sounding rocket payload zero gravity experiment  
13 p0120 N77-14389

Development of space applications of heat pipes at Aerospatiale  
13 p0120 N77-14390

Heat pipe and space radiator developments  
13 p0120 N77-14391

Development of thermal control methods for specialized components and scientific instruments at very low temperatures (follow-on)  
[NASA-CR-150152] 13 p0127 N77-15347

Thermodynamic analysis of alternate energy carriers, hydrogen and chemical heat pipes  
14 p0240 N77-21608

An investigation of electrohydrodynamic heat pipes  
[NASA-CR-151977] 15 p0342 N77-22422

Design considerations for capillary heat pipes at cryogenic temperatures  
[ORNL-MIT-28] 15 p0361 N77-24430

Ceramic heat pipe heat exchangers  
[LA-6514-MS] 15 p0361 N77-24431

Heat transportation by hot water pipe-lines at 90 deg C  
[AD-A038301] 16 p0512 N77-28453

Flexible cryogenic heat pipe development program  
[NASA-CR-152027] 16 p0520 N77-29451

Gas-interface studies in large horizontal heat pipes  
[LA-6646-MS] 16 p0520 N77-29455

Use of heat pipes in electronic hardware  
16 p0526 N77-30293

Development of a jet pump-assisted arterial heat pipe  
[NASA-CR-152015] 16 p0527 N77-30415

Heat-pipe bismuth laser; examination of laser action at 4722 A in bismuth vapor  
[AD-A039568] 16 p0533 N77-31495

Demonstration testing of a Vuilleumier cryocooler with an integral  
[AD-A042786] 16 p0547 N77-32599

Thermal energy storage demonstration unit for Vuilleumier cryogenic cooler  
[AD-A040895] 16 p0553 N77-33613

**HEAT PUMPS**

# SUBJECT INDEX

# HYDROGEN OXYGEN FUEL CELLS

Liquid hydrogen as propellant for commercial aircraft  
[DGLR PAPER 76-188] 13 p0059 A77-16534

Hydrogen as a fuel in compression ignition engines 13 p0071 A77-18932

The thermal efficiency and cost of producing hydrogen and other synthetic aircraft fuels from coal 14 p0171 A77-23718

Water induction in hydrogen-powered IC engines 14 p0171 A77-23721

Reactions in the ZnSe thermochemical cycle for hydrogen production 14 p0178 A77-24854

Studies on realization of normal combustion of hydrogen in spark-ignition engines by reduction of temperature of residual burnt gases 14 p0195 A77-28050

Prospects for pipeline delivery of hydrogen as a fuel and as a chemical feedstock 14 p0200 A77-29437

Thermochemical production of hydrogen - Myth or reality 15 p0270 A77-32593

World Hydrogen Energy Conference, 1st, Miami Beach, Fla., March 1-3, 1976, Proceedings. Volumes 1, 2 & 3 15 p0273 A77-33326

Balance and optimization procedure for thermochemical cycles for hydrogen production 15 p0276 A77-33345

Thermochemical cycles utilizing sulfur for hydrogen production from water 15 p0276 A77-33353

Microbial hydrogen production 15 p0278 A77-33367

A study of the efficiency of hydrogen liquefaction --- jet aircraft applications 15 p0279 A77-33377

A system consideration of the cryogenic storage tank for liquid hydrogen fueled vehicles and the resulting tank concept for a passenger car 15 p0279 A77-33378

Technical and environmental aspects of underground hydrogen storage 15 p0279 A77-33379

Hydrogen storage on highway vehicles - Update '76 15 p0280 A77-33380

Hydrogen vehicular fuel storage as a step in a water splitting cycle 15 p0280 A77-33381

Methods of on-board generation of hydrogen for vehicular use 15 p0280 A77-33383

Automotive fuel-saving system with on-board hydrogen generation and injection into I. C. engines 15 p0280 A77-33384

A consideration of catalytic effects on Pt-Pt/Rh thermocouples in combustion systems involving hydrogen as a fuel 15 p0283 A77-33407

Reciprocating pump for conversion of liquid hydrogen to high pressure gaseous hydrogen 15 p0284 A77-33409

A simplified equilibrium model of the U.S. energy-economic system and its use in comparing alternatives 15 p0285 A77-33421

A comparison of operational economics of transportation vehicles operated on gasoline and coal-generated hydrogen 15 p0302 A77-36343

Hydrogen peroxide emission levels from a hydrogen fueled combustion engine 16 p0399 A77-40644

Alternate fuels for future aircraft 16 p0444 A77-48709

The liquid hydrogen option for the subsonic transport - A status report 16 p0458 A77-48819

An exploratory study to determine the integrated technological air transportation system ground requirements of liquid-hydrogen-fueled subsonic, long-haul civil air transports [NASA-CR-2699] 13 p0083 A77-10033

Hydrogen-fueled subsonic aircraft: A perspective 13 p0084 A77-10344

Hydrogen-rich gas generator [NASA-CASE-NPO-13560-1] 13 p0086 A77-10636

Hydrogen energy conversion --- for thermodynamic efficiency and cost effectiveness [AD-A030370] 14 p0218 A77-18601

A system consideration of the cryogenic storage tank for liquid hydrogen fueled vehicles and the resulting tank concept for a passenger car 14 p0240 A77-21612

Hydrogen vehicular fuel storage as a step in a water splitting cycle 14 p0242 A77-21615

Hydrogen-powered highway vehicles: Applications and optimum form of fuel storage 14 p0242 A77-21616

Methods of on-board generation of hydrogen for vehicular use 14 p0242 A77-21617

First World Hydrogen Energy Conference proceedings, volume 3 14 p0243 A77-21626

The thermal efficiency and cost of producing hydrogen and other synthetic aircraft fuels from coal 14 p0243 A77-21627

Fuel subsystem characteristics for LH2 aircraft 14 p0243 A77-21630

Water induction in hydrogen-powered IC engines 14 p0243 A77-21631

Development of a liquid hydrogen car 14 p0244 A77-21632

Dynamic tests of hydrogen-powered IC engines --- for mass transit vehicles 14 p0244 A77-21633

Modification techniques and performance characteristics of hydrogen-powered IC engines: State of the art, 1975 14 p0244 A77-21634

Crash test of a liquid hydrogen automobile 14 p0244 A77-21635

Prototype hydrogen automobile using a metal hydride 14 p0244 A77-21636

Automotive hydride tank design 14 p0244 A77-21637

A hydrogen-powered mass transit system 14 p0244 A77-21638

Use of hydrogen in automotive engines 14 p0244 A77-21639

Hydrogen safety problems 14 p0245 A77-21640

Technical prospects for commercial and residential distribution and utilization of hydrogen 14 p0245 A77-21642

A consideration of catalytic effects on Pt-Pt/Rh thermocouples in combustion systems involving hydrogen as a fuel 14 p0245 A77-21645

Performance characteristics of turbo-rockets and turbo-ramjets using high energy fuel 15 p0339 A77-22131

Hydrogen-enrichment-concept preliminary evaluation [NASA-CR-152814] 15 p0340 A77-22290

Emissions and total energy consumption of a multicylinder piston engine running on gasoline and a hydrogen-gasoline mixture [NASA-TN-D-8487] 15 p0353 A77-23114

Guide for the conversion to and maintenance of hydrogen-fueled, spark-ignited engines [TR8E-1036] 16 p0511 A77-28324

The hydrogen economy: A preliminary technology assessment [PB-266607/1] 16 p0512 A77-28329

**HYDROGEN OXYGEN ENGINES**

Hydrogen as a fuel in compression ignition engines 13 p0071 A77-18932

Near-term chemically-propelled space transport systems --- to space colonies 15 p0295 A77-35810

**HYDROGEN OXYGEN FUEL CELLS**

Titanium-containing Raney nickel catalyst for hydrogen electrodes in alkaline fuel cell systems 13 p0064 A77-18019

Air electrodes for H2-air fuel cells with alkali electrolyte 13 p0065 A77-18196

A comparison of porous silver catalysts in oxygen electrodes of alkaline fuel cells 13 p0067 A77-18350

Hydrogen from solar energy via water electrolysis  
13 p0032 A77-12771

Experimental demonstration of an iron chloride  
thermochemical cycle for hydrogen production  
13 p0032 A77-12772

Energy transmission from ocean thermal energy  
conversion plants  
13 p0032 A77-12773

Metal hydrides of improved heat transfer  
characteristics  
13 p0033 A77-12775

Some useful relationships between the physical and  
thermodynamic properties of metal hydrides  
13 p0033 A77-12776

Survey of hydrogen energy application projects  
13 p0033 A77-12778

A guide for the conversion to and maintenance of  
hydrogen-fueled, spark-ignited engines  
13 p0033 A77-12779

Performance of a hydrogen-powered  
transit vehicle  
13 p0033 A77-12781

Nuclear driven water decomposition plant for  
hydrogen production  
13 p0035 A77-12791

Radiolytic hydrogen production from a laser fusion  
system  
13 p0035 A77-12795

A hydride compressor  
13 p0046 A77-13336

Stage efficiency in the analysis of thermochemical  
water decomposition processes  
13 p0047 A77-13538

A new hydrogen storage electrode  
13 p0047 A77-13539

Hydrogen production using solar radiation  
13 p0048 A77-13540

Hydrogen production via thermochemical cycles  
based on sulfur chemistry  
13 p0048 A77-13541

Hydrogen storage via iron-titanium for a 26 MW/e/  
peaking electric plant  
13 p0048 A77-13543

Alternate fuels for road vehicles of the future  
13 p0051 A77-14584

Hydrogen production using nuclear  
heat  
13 p0057 A77-16211

Hydrogen production from water by means of  
chemical cycles  
13 p0058 A77-16471

The storage of energy in future energy supply  
systems  
[DGLR PAPER 76-182] 13 p0059 A77-16533

Solar production of hydrogen as a means of storing  
solar energy  
13 p0075 A77-19072

On the storage of solhydrogen  
13 p0075 A77-19073

Thermo-chemical production of hydrogen  
13 p0075 A77-19074

Solar energy utilization - The photochemical  
approach  
13 p0075 A77-19076

Conversion of solar energy by photosynthetic  
production of molecular hydrogen  
14 p0143 A77-21316

Entropy production, efficiency, and economy in the  
case of the thermochemical production of  
synthetic fuels - The sulfuric acid-hybrid  
process for thermochemical water decomposition  
14 p0145 A77-21544

Details of hydrogen-burning thermonuclear reactions  
14 p0168 A77-23457

International cooperation on development of  
hydrogen technologies  
14 p0171 A77-23717

Hydrogen producing cycles using electricity and  
heat - Hydrogen halide cycles: Electrolysis of HBr  
14 p0171 A77-23719

Hydrogen technology for energy --- Book  
14 p0180 A77-25824

Largest ever liquefaction plant will test H-coal  
process  
14 p0184 A77-26289

Evaluation of the practical aspects of the use of  
coal derived synthetic fuels  
[ASME PAPER 76-WA/APC-6] 14 p0184 A77-26411

Hydrogen cycle peak-shaving on the New York State  
Grid using fuel cells  
14 p0199 A77-29094

New hydrogen process is in the works  
14 p0205 A77-29789

Performance data for a terrestrial solar  
photovoltaic/water electrolysis experiment  
15 p0256 A77-30321

Influence of bonding and filling agents on the  
activity of tungsten carbide hydrogen electrodes  
15 p0260 A77-31173

Hydrogen production with HOT ELLY --- high  
temperature vapor phase-electrolysis of water  
15 p0269 A77-32404

The impact of the new energy technologies  
15 p0272 A77-33124

World Hydrogen Energy Conference, 1st, Miami  
Beach, Fla., March 1-3, 1976, Proceedings.  
Volumes 1, 2 & 3  
15 p0273 A77-33326

Hydrogen production process by means of nuclear  
energy  
15 p0273 A77-33327

The concept of 'nuclear hydrogen production' and  
progress of work in the Nuclear Research Center  
Juelich  
15 p0273 A77-33328

The aqueous homogeneous reactor as a source of  
hydrogen and of process heat  
15 p0274 A77-33329

Water splitting - A progress report --- hydrogen  
production using high temperature gas-cooled  
reactor  
15 p0274 A77-33330

Hydrogen production from nuclear waste energy  
15 p0274 A77-33331

Peak power and heavy water production from  
electrolytic H<sub>2</sub> and O<sub>2</sub> using CANDU reactors  
15 p0274 A77-33332

- Water-splitting-system synthesized by photochemical and thermoelectric utilizations of solar energy 15 p0274 A77-33334
- Synthetic fuels from solid wastes and solar energy 15 p0275 A77-33336
- The manufacture of hydrogen from coal 15 p0275 A77-33337
- Hydrogen production from coal using a nuclear heat source 15 p0275 A77-33339
- The calcium-iodine cycle for the thermochemical decomposition of water 15 p0275 A77-33340
- Progress in the Los Alamos Scientific Laboratory Program to develop thermochemical processes for hydrogen production 15 p0275 A77-33341
- Feasibility studies of chemical reactions for thermochemical water splitting cycles of the iron-chlorine-, iron-sulfur- and manganese-sulfur-families 15 p0275 A77-33342
- Discovery of reaction sequences for thermochemical water splitting --- in hydrogen production cycles 15 p0275 A77-33343
- Effective conversion processes between thermal and chemical energies - Thermodynamic study of multistep water decomposition processes 15 p0275 A77-33344
- A thermochemical data bank for cycle analysis --- water decomposition for hydrogen production 15 p0276 A77-33346
- The compatibility of containment materials for thermochemical hydrogen production 15 p0276 A77-33347
- Laboratory investigations on thermochemical hydrogen production 15 p0276 A77-33348
- Hydrogen production by means of reactor heat using halogens and reversible electrochemical methods in a closed cycle process 15 p0276 A77-33350
- Definition and analysis of thermochemical processes for hydrogen production based on iron-chlorine reactions 15 p0276 A77-33351
- Hydrogen production by water decomposition using a combined electrolytic-thermochemical cycle 15 p0277 A77-33356
- Recent developments of large electrolytic hydrogen generators 15 p0277 A77-33358
- Prospects for hydrogen production by water electrolysis to be competitive with conventional methods 15 p0277 A77-33359
- Water electrolysis under pressure - Improvement of energy efficiency by temperature increase 15 p0277 A77-33360
- Performance characteristics of a high-pressure, moderate temperature, electrolysis system --- for hydrogen-based energy storage 15 p0277 A77-33361
- Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries 15 p0278 A77-33363
- Hydrogen production plants using electrolytic cells with low cost electrodes built into pressure tanks 15 p0278 A77-33365
- A farm energy system employing hydrogen storage 15 p0278 A77-33366
- Thermodynamic analysis of alternate energy carriers, hydrogen and chemical heat pipes 15 p0279 A77-33374
- Ocean thermal energy delivery systems based on chemical energy carriers 15 p0279 A77-33375
- A wind energy system utilizing high pressure electrolysis as a storage mechanism 15 p0279 A77-33376
- Hydrogen-powered highway vehicles - Applications and optimum form of fuel storage 15 p0280 A77-33382
- Methods of on-board generation of hydrogen for vehicular use 15 p0280 A77-33383
- Titanium alloy hydrides - Their properties and applications 15 p0280 A77-33385
- A thermodynamic analysis of H<sub>2</sub>CO<sub>2</sub>, a hydrogen conversion and storage system 15 p0280 A77-33387
- A simple approach to metal hydride alloy optimization 15 p0281 A77-33388
- Potential structural material problems in a hydrogen energy system 15 p0281 A77-33389
- Selection of structural materials for hydrogen pipelines and storage vessels 15 p0281 A77-33390
- Some early perspectives on ground requirements of liquid hydrogen air transports 15 p0281 A77-33391
- New potentials for conventional aircraft when powered by hydrogen-enriched gasoline 15 p0281 A77-33392
- Fuel subsystem characteristics for LH<sub>2</sub> aircraft 15 p0281 A77-33393
- Development of a liquid hydrogen car 15 p0282 A77-33394
- Dynamic tests of hydrogen-powered IC engines 15 p0282 A77-33395
- Modification techniques and performance characteristics of hydrogen-powered IC engines - State of the art, 1975 15 p0282 A77-33396
- Crash test of a liquid hydrogen automobile 15 p0282 A77-33397
- Prototype hydrogen automobile using a metal hydride 15 p0282 A77-33398
- A hydrogen-powered mass transit system 15 p0282 A77-33400
- Use of hydrogen in automotive engines 15 p0283 A77-33401
- Hydrogen safety problems --- fuel systems hazard prevention 15 p0283 A77-33402

# SUBJECT INDEX

# INDUCTION MOTORS

- Ignition of droplets of liquid fuels solvent  
extracted from coal 16 p0508 A77-51588
- IGNITION LIMITS**  
Thermal explosion of moving reacting fluids of  
variable viscosity 13 p0052 A77-14980  
Utilization of disposed petroleum products and  
industrial wastes as fuels 14 p0167 A77-23404  
Ignition of flammable gases in crude-oil tankers  
as a result of metal fracture [AD-A027411] 13 p0127 N77-15121
- IGNITION SYSTEMS**  
Performance and NOx emissions modeling of a jet  
ignition prechamber stratified charge engine  
[SAE PAPER 760161] 13 p0016 A77-12150
- ILLINOIS**  
The air quality and economic implications of  
supplementary control systems in Illinois ---  
considering electric power plant fuels  
[PB-255699/1] 13 p0101 N77-11588  
Isotopic characterization of Illinois natural gas  
13 p0113 N77-13484  
Sources of energy data for Illinois  
[PB-262562/2] 15 p0350 N77-22686
- ILLUMINANCE**  
Computational program for accurate  
predetermination of irradiance and illuminance  
in connection with solar energy utilization  
14 p0147 A77-21777
- ILLUMINATING**  
Energy conservation on campus. Volume 2: Case  
studies [PB-266212/0] 16 p0524 N77-29637
- ILLUMINATION**  
Enhancement of diffusion length in RFG ribbon  
solar cells under illumination --- Edge-defined  
Film-fed Grown 16 p0503 A77-50293
- IMAGE RESOLUTION**  
Computing residuals in geothermal research by I.R.  
scanning 16 p0431 A77-46768
- IMMOBILIZATION**  
Progress on the selective removal of H<sub>2</sub>S from  
gasified coal using an immobilized liquid membrane  
15 p0318 A77-38146
- IMPACT RESISTANCE**  
Analysis of ceramic materials for impact members  
in isotopic heat sources [BNI-X-670] 14 p0210 N77-17246  
Crash test of a liquid hydrogen automobile  
14 p0244 N77-21635
- IMPACT TESTS**  
Crash test of a liquid hydrogen automobile  
15 p0282 A77-33397
- IMPERIAL VALLEY (CA)**  
Cost and performance comparison of flash binary  
and steam turbine cycles for the Imperial  
Valley, California --- in geothermal resources  
exploitation 16 p0455 A77-48801  
Energy in an oasis: Geothermal resource  
development in the Imperial Valley of California  
16 p0552 N77-33598
- INCENTIVE TECHNIQUES**  
The financial incentives for the fabrication of  
improved absorption coatings for the flat plate  
collector 16 p0487 A77-49066
- INCENTIVES**  
The effectiveness of solar energy incentives at  
the state and local level [PB-263371/7] 15 p0375 N77-25670
- INCIDENT RADIATION**  
Computation of solar radiation design curves  
13 p0072 A77-19049
- INCINERATORS**  
Solid waste incineration and energy recovery in  
hospitals 15 p0272 A77-33283  
Energy recovery by the incineration of solid waste  
- Development, present status and experiences in  
Germany 15 p0334 A77-39675

- Environmental considerations of selected energy conserving manufacturing process options. Volume 5: Pulp and paper industry report [PB-264271/8] 15 p0384 N77-26682
- Environmental considerations of selected energy conserving manufacturing process options. Volume 6: Olefins industry report [PB-264272/6] 15 p0384 N77-26683
- Environmental considerations of selected energy conserving manufacturing process options. Volume 7: Ammonia industry report [PB-264273/4] 15 p0384 N77-26684
- Environmental considerations of selected energy conserving manufacturing process options. Volume 8: Alumina/aluminum industry report [PB-264274/2] 15 p0384 N77-26685
- Environmental considerations of selected energy conserving manufacturing process options. Volume 9: Textile industry report [PB-264275/9] 15 p0384 N77-26686
- Environmental considerations of selected energy conserving manufacturing process options. Volume 10: Cement industry report [PB-264276/7] 15 p0384 N77-26687
- Environmental considerations of selected energy conserving manufacturing process options. Volume 11: Glass industry [PB-264277/5] 15 p0384 N77-26688

## SUBJECT INDEX

## INDUSTRIES

- Environmental considerations of selected energy conserving manufacturing process options.  
Volume 12: Chlor-alkali industry report  
[PB-264278/3] 15 p0385 N77-26689
- Environmental considerations of selected energy conserving manufacturing process options.  
Volume 13: Phosphoric acid industry report  
[PB-264279/1] 15 p0385 N77-26690
- Environmental considerations of selected energy conserving manufacturing process options.  
Volume 14: Primary copper industry report  
[PB-264280/9] 15 p0385 N77-26691
- Environmental considerations of selected energy conserving manufacturing process options.  
Volume 15: Fertilizer industry report  
[PB-264281/7] 15 p0385 N77-26692
- Utilization of low and intermediate BTU gas from coal for iron ore pelletizing  
[PB-264702/2] 15 p0389 N77-27247
- Oil, gas, uranium, and thorium: Supply and depletion, with special reference to California  
[UCRL-52180] 16 p0536 N77-31628
- Europe's changing energy relations  
[R-2086-ISA] 16 p0553 N77-33610
- INDUSTRIAL MANAGEMENT**
- Electric load management and energy conservation  
14 p0137 A77-20685
- Alternatives to oil and gas through energy management  
[AIAA 77-1006] 16 p0403 A77-41553
- Solar collector manufacturing activity, January-June 1976  
[PB-258865/5] 14 p0208 N77-16455
- Energy use patterns in metallurgical and nonmetallic mineral processing (Volume 1, Phase 6: Energy data and flow sheets, low-priority commodities)  
[PB-261150/7] 15 p0346 N77-22644
- Energy use patterns in metallurgical and nonmetallic mineral processing (Volume 1, Phase 9: Areas where alternative technologies should be developed to lower energy use in production of high-priority commodities), supplement  
[PB-261153/1] 15 p0346 N77-22645
- INDUSTRIAL PLANTS**
- Compilation of an inventory for particulate emissions in Belgium  
13 p0009 A77-11271
- Water requirements for an integrated SNG plant and mine operation  
13 p0060 A77-16651
- Superalloys for advanced energy systems  
13 p0061 A77-16824
- All-round technical and economic investigations of open-cycle industrial MHC generator channels and superconducting magnet systems  
14 p0142 A77-21266
- Environmental aspects of coal conversion plant siting and cost of pollution control  
14 p0192 A77-27293
- Hydrogen production plants using electrolytic cells with low cost electrodes built into pressure tanks  
15 p0278 A77-33365
- Technologies lead to conservation --- in munition plants  
15 p0305 A77-36634
- Designing gas turbines for the industrial and marine field  
16 p0429 A77-46404
- Stimulation of the solar industry by way of the Federal Buildings Program  
16 p0462 A77-48850
- Preliminary research on Ocean Energy Industrial Complexes  
16 p0484 A77-49042
- Maritime and construction aspects of Ocean Thermal Energy Conversion (OTEC) plant ships, detailed report  
[PB-257444/0] 13 p0116 N77-13554
- Characterization and evaluation of wastewater sources United States Steel Corporation, Clairton Works, Pittsburgh, Pennsylvania, 28-31 January 1976  
[PB-255586/0] 13 p0116 N77-13566
- Techniques for the analysis of total energy and labor of industrial plants  
[PB-264221/3] 15 p0385 N77-26697
- Technoeconomic analysis of large scale thermonuclear production of hydrogen  
[EPRI-EM-287] 16 p0532 N77-31336
- Study of gasoline vapor emission controls at small bulk plants  
[PB-267096/6] 16 p0549 N77-32638
- INDUSTRIAL SAFETY**
- Laws and regulations affecting coal with summaries of Federal, State, and local laws and regulations pertaining to air and water pollution control, reclamation, diligence and health and safety, part 1  
[PB-255927/6] 13 p0110 N77-12592
- Occupational radiation exposure at light water cooled power reactors, 1969-1975  
[PB-257054/7] 13 p0125 N77-14740
- INDUSTRIAL WASTES**
- Energy from wastes  
13 p0006 A77-11038
- Clean air protection and industrial development  
13 p0010 A77-11303
- Atmospheric ice nuclei - No detectable effects from a coal-fired powerplant plume  
13 p0054 A77-15780
- Some considerations in determining oxides of nitrogen in stack gases by chemiluminescence analyzer  
13 p0062 A77-17541
- Utilization of disposed petroleum products and industrial wastes as fuels  
14 p0167 A77-23404
- Waste economy and recycling: Problems and practice --- German book  
15 p0273 A77-33303
- Energy recovery from low heating value industrial waste  
15 p0292 A77-35160
- State of the art of particulate and SO2 removal on coal fired boilers  
15 p0293 A77-35167
- Energy recovery from municipal and industrial waste  
15 p0305 A77-36605
- Disposal of toxic wastes. I - Electroplating and electrochemical machining wastes. II - Poisonous and radioactive wastes  
15 p0305 A77-36608
- Strategy of pollution control --- Book  
16 p0400 A77-40673
- 600 kW Organic Rankine Cycle Waste Heat Power Conversion System  
16 p0459 A77-48829
- Compilation of air pollutant emission factors. Supplement  
[PB-254274/4] 13 p0093 N77-10731
- Selected aspects of waste heat management  
[PB-254401/3] 13 p0109 N77-12568
- Characterization and evaluation of wastewater sources United States Steel Corporation, Clairton Works, Pittsburgh, Pennsylvania, 28-31 January 1976  
[PB-255586/0] 13 p0116 N77-13566
- Pollutant potential of raw and chemically fixed hazardous industrial wastes and flue gas desulfurization sludges  
[PB-256691/7] 13 p0133 N77-15540
- Control of oxides of sulfur from stationary sources in the south coast air basin of California  
[PB-261754/6] 15 p0348 N77-22668
- Environmental assessment sampling and analytical strategy program --- industrial wastes  
[PB-261259/6] 15 p0352 N77-23021
- Energy requirements for air pollution control in the primary aluminum industry  
[PB-264483/9] 15 p0375 N77-25684
- Characterization of substances in products effluents and wastes from synthetic fuel production tests  
[BNWL-2131] 16 p0540 N77-31675
- Destroying chemical wastes in commercial scale incinerators. Facility report no. 2, Surface Combustion Division, Midland-Ross Corporation  
[PB-268232/6] 16 p0542 N77-32051
- Energy and protein production from pulp mill wastes  
[COO-2983-2] 16 p0557 N77-33645
- INDUSTRIES**
- User's guide to petroleum industry survey data type  
[PB-256635/4] 13 p0098 N77-11544

- Energy use in the contract construction industry.  
Appendix A: Study methodology  
[PB-245423/9] 13 p0099 N77-11558
- Energy use in the contract construction industry.  
Appendix B: Assessment of construction  
equipment availability, energy requirements, and  
construction industry capacity to support  
Project Independence

quantitative heat loss at Dartmouth College,  
Hanover, New Hampshire  
[AD-A031803] 14 p0228 N77-20393
- INFRARED SPECTRA**
- Infrared extinction spectra of some common liquid  
aerosols  
15 p0290 A77-34561
- Classification of oils by the application of  
pattern recognition techniques to infrared spectra  
[AD-A039387] 16 p0531 N77-30841
- INGOTS**
- Thermal energy storage using large hollow steel  
ingots  
16 p0492 A77-49106
- INHIBITORS**
- Inhibited ethylene glycol as the solar nexus  
15 p0270 A77-32601
- INJECTORS**
- The 120-keV beam direct conversion system for TFTR  
injectors  
[UCRL-52137] 15 p0355 N77-23610

## SUBJECT INDEX

## INTERNAL COMBUSTION ENGINES

## INLET FLOW

Molecular gas performance of a disk generator with swirl 15 p0326 A77-39534

## INORGANIC COATINGS

Investigation of high temperature performance of thin film, solar-thermal energy converters [PB-265554/6] 16 p0516 N77-28613

## INORGANIC COMPOUNDS

Storage of solar energy by inorganic oxide/hydroxides 16 p0492 A77-49109

Molten salt thermal energy storage systems: Salt selection [COO-2888-1] 15 p0365 N77-24609

Research on electrochemical energy conversion systems [AD-A034454] 15 p0367 N77-24632

## INORGANIC MATERIALS

Industrial development in zero-G 15 p0295 A77-35812

Inorganic phase change materials for energy storage in solar thermal program 16 p0492 A77-49103

## INORGANIC SULFIDES

Development status of lithium-silicon/iron sulfide load leveling batteries 16 p0448 A77-48741

Improved negative electrodes for lithium/iron sulfide batteries 16 p0448 A77-48742

## INPUT/OUTPUT ROUTINES

The intersectoral feedback model [PB-255859/1] 13 p0125 N77-14950

Energy input-output modelling: Problems and prospects [PB-261925/2] 15 p0349 N77-22679

## INSOLATION

Calculation of the radiation entering a 'hot box' type solar set-up 13 p0051 A77-14581

Survey of quantitative data on the solar energy and its spectra distribution 13 p0072 A77-19044

Autonomous station for the acquisition and concentration of heliometric data 13 p0072 A77-19046

An automatic solar disk tracking system for incident energy measurements 14 p0138 A77-20749

A mathematical model for the digital computation of the hours of sunshine on an inclined plane 14 p0166 A77-23382

Calculation of radiation entering 'hot box' solar unit 15 p0291 A77-34975

A solar flux density calculation for a solar tower concentrator using a two-dimensional Hermite function expansion 16 p0405 A77-41578

Calculation of monthly average insolation on tilted surfaces 16 p0422 A77-44476

Validity of the isotropic-distribution approximation in solar energy estimations 16 p0422 A77-44477

Autocorrelation and stochastic modelling of insolation sequences --- for solar thermal systems 16 p0422 A77-44479

Correlation equation for hourly diffuse radiation on a horizontal surface --- insolation on solar collectors 16 p0422 A77-44481

Experience in constructing a solar energy cadastral survey 16 p0443 A77-48525

Deterministic insolation estimates for solar total energy systems 16 p0462 A77-48847

Insolation data for solar energy conversion derived from satellite measurements of earth radiance 16 p0471 A77-48930

Experimental and theoretical studies on solar energy for energy conversion 16 p0471 A77-48932

Methods for estimating total flux in the direct solar beam at any time 16 p0471 A77-48934

Insolation and temperature statistics and their influence on the design of solar heating systems and the electric utility interface 16 p0479 A77-49000

The determination of hourly insolation on an inclined plane using a diffuse irradiance model based on hourly measured global horizontal insolation 16 p0501 A77-50206

The solar spectrum at typical clear weather days --- for optimal energy conversion cell performance 16 p0501 A77-50212

Solar energy and the residence - Some systems aspects 16 p0502 A77-50213

The effect of non-direct insolation on the radiative performance of trapezoidal grooves used as solar energy collectors 16 p0502 A77-50214

Precision insolation measurement under field conditions 14 p0219 N77-19113

Regional variations of solar radiation with application to solar energy system design, user's manual [PB-259378/8] 14 p0234 N77-20676

Instrumentation for measuring direct and diffuse insolation in testing thermal collectors [CONF-760832-23] 15 p0394 N77-27545

## INSTITUTIONS

Some institutional problems of residential solar heating 16 p0495 A77-49130

Economic and institutional rationale for solar retrofitting - Case example: 'Project Sunshower' 16 p0495 A77-49131

## INSTRUMENT COMPENSATION

Accelerated response of thermopile pyranometers 13 p0019 A77-12405

## INSTRUMENT ERRORS

A consideration of catalytic effects on Pt-Pt/Rh thermocouples in combustion systems involving hydrogen as a fuel 15 p0283 A77-33407

## INSULATION

Design, fabrication, testing, and delivery of a solar energy collector system for residential heating and cooling [NASA-CR-150032] 13 p0086 N77-10638

Development and characterization of materials for open cycle MHD [BNWL-2004-3] 16 p0541 N77-31969

## INTERFACIAL TENSION

Interfacial effects in the recovery of residual oil by displacement: Studies at Northwestern University [COO-0019-5] 13 p0122 N77-14595

## INTERMETALLICS

Intermetallic compounds - Background and results of twenty years of research 13 p0014 A77-11600

Some useful relationships between the physical and thermodynamic properties of metal hydrides 13 p0033 A77-12776

Hydrogen storage by binary and ternary intermetallics for energy applications: A review [UCRL-52110] 15 p0394 N77-27548

## INTERNAL COMBUSTION ENGINES

Performance and NOx emissions modeling of a jet ignition prechamber stratified charge engine [SAE PAPER 760161] 13 p0016 A77-12150

Onboard hydrogen generation for automobiles 13 p0020 A77-12663

Application of a shunt motor and a 2 cylinder gasoline engine as a hybrid drive for an automobile 13 p0025 A77-12703

Energy saving potential of engine-electric vehicular drives 13 p0025 A77-12708

A guide for the conversion to and maintenance of hydrogen-fueled, spark-ignited engines 13 p0033 A77-12779

A comparison between the primary energy consumption of electric and gasoline powered vehicles 14 p0159 A77-22885

Water induction in hydrogen-powered IC engines 14 p0171 A77-23721

## INTERNAL CONVERSION

## SUBJECT INDEX

- Studies on realization of normal combustion of hydrogen in spark-ignition engines by reduction of temperature of residual burnt gases 14 p0195 A77-28050
- Dynamic tests of hydrogen-powered IC engines 15 p0282 A77-33395
- Modification techniques and performance characteristics of hydrogen-powered IC engines - State of the art, 1975 15 p0282 A77-33396
- A hydrogen-powered mass transit system 15 p0282 A77-33400
- Use of hydrogen in automotive engines 15 p0283 A77-33401
- Running out of steam. III --- alternatives to internal combustion engine 15 p0310 A77-36984
- New developments on VW-FCI and VW-PCV stratified charge engine concepts --- Pre-Chamber-Injection and Pre-Chamber-Valve combustion processes 16 p0401 A77-41257
- Hybrid drive with kinetic energy store as vehicle drive [UCRL-TRANS-11018] 13 p0120 N77-14486
- Research plan for achieving reduced automotive energy consumption [PB-255929/2] 13 p0121 N77-14495
- Hydrogen storage on highway vehicles: Update 1976 14 p0242 N77-21614
- Automotive fuel saving system with on-board hydrogen generation and injection into IC engines 14 p0242 N77-21618
- Water induction in hydrogen-powered IC engines 14 p0243 N77-21631
- Dynamic tests of hydrogen-powered IC engines --- for mass transit vehicles 14 p0244 N77-21633
- Modification techniques and performance characteristics of hydrogen-powered IC engines: State of the art, 1975 14 p0244 N77-21634
- Prototype hydrogen automobile using a metal hydride 14 p0244 N77-21636
- A hydrogen-powered mass transit system 14 p0244 N77-21638
- Use of hydrogen in automotive engines 14 p0244 N77-21639
- Performance of Army engines with unleaded gasoline-field study evaluation [AD-A032075] 15 p0342 N77-22490
- Fuel consumption, emissions, and power characteristics of the 1975 Ford 140-CID automotive engine, experimental data [PB-261771/0] 15 N77-22725
- Combustion research at Sandia Laboratories [SAND-76-8511] 15 p0377 N77-26253
- Guide for the conversion to and maintenance of hydrogen-fueled, spark-ignited engines [TREE-1036] 16 p0511 N77-28324
- Feasibility test on compounding the internal combustion engine for automotive vehicles, task 2 [COO-2690-1] 16 p0512 N77-28495
- INTERNAL CONVERSION**
- Reciprocating pump for conversion of liquid hydrogen to high pressure gaseous hydrogen 14 p0245 N77-21647
- INTERNATIONAL COOPERATION**
- The future of air transportation - Economic association considerations [AIAA PAPER 77-286] 13 p0065 A77-18222
- Joint test of an U.S. electrode system in the U.S.S.R. U-02 facility 14 p0139 A77-21215
- International cooperation on development of hydrogen technologies 14 p0171 A77-23717
- A small but important contribution to the German-American solar research programme 'Helios' 15 p0323 A77-39125
- The second joint test of a U.S. electrode system in the U.S.S.R. U-02 facility 15 p0327 A77-39540
- Report on United States international cooperation in solar energy technology development 16 p0495 A77-49132
- Program plan for ERDA's participation in the IEA working party on energy conservation research and development [ERDA-77-57] 16 p0557 N77-33648
- INTERNATIONAL LAW**
- National Meeting on Air and Space Law, 7th, Universidad Nacional de Cordoba, Cordoba and La Falda, Argentina, August 13-16, 1975, Proceedings 13 p0053 A77-15050
- INTERNATIONAL RELATIONS**
- Trends in world oil prices and production [PB-268411/6] 16 p0547 N77-32607
- INTERNATIONAL TRADE**
- OPEC and the monopoly price of world oil (World Oil Project) 16 p0518 N77-29001
- Europe's changing energy relations [R-2086-ISA] 16 p0553 N77-33610
- INTERPLANETARY SPACECRAFT**
- A new cycle for optimum energy storage in interplanetary missions [IAF PAPER 77-141] 16 p0507 A77-51444

- Effects of thermal pollution on certain aquatic invertebrates [PB-263488/9] 15 p0368 N77-24673
- INVERTED CONVERTERS (DC TO AC)**
- Windmills stage a comeback --- review 13 p0048 A77-13624
- Some results of an investigation with the U-25 experimental-industrial facility, aimed at raising its parameters to the design level --- MHD generator energy converter 14 p0136 A77-20105
- INVERTERS**
- Curve of current delivered from MHD generator to a conventional power grid by inverter system 14 p0141 A77-21253
- Hybrid simulation of fuel cell power conversion systems 16 p0414 A77-42636
- INVESTMENTS**
- Daedalophobia - Diagnosis and prognosis --- solar energy utilization obstacles in Canada 16 p0494 A77-49121
- Investment planning in the energy sector [LBL-4474] 13 p0125 N77-14948
- Operation cough drop 14 p0247 N77-21665
- Technology transfer from foreign direct investment in the United States. Report of a seminar series [PB-263012/7] 15 p0358 N77-24018
- ION ACCELERATORS**
- Systems analysis of accelerator and storage ring systems for inertial fusion 15 p0334 A77-39744
- ION BEAMS**
- Ignition of a pulsed thermonuclear reaction by high-current ion beams 14 p0164 A77-23106
- Design considerations for a migma advanced fuel fusion reactor 15 p0334 A77-39747
- Solar array maximum power tracking with closed-loop control of a 30-centimeter ion thruster [NASA-TN-X-73643] 15 p0376 N77-26222
- ION CURRENTS**
- Electric power fluctuations in a MHD generator 15 p0269 A77-32432
- ION DISTRIBUTION**
- Methods of 'tailoring' ion distributions in phase space /'morphodynamics'/ --- in Migma-type fusion reactors 16 p0436 A77-47364

## ION ENGINES

- UK, T5 ion engine thrust vector control considerations  
[ATAA PAPER 76-1064] 13 p0045 A77-13030  
Advanced fuel fusion application to manned space propulsion 16 p0436 A77-47367

## ION IMPLANTATION

- Silicon solar cells by high-speed low-temperature processing 15 p0258 A77-30728  
Low energy production processes in manufacturing of silicon solar cells 16 p0486 A77-49055

## ION SOURCES

- Update on the development of 120-keV multi-megawatt neutral beam source 15 p0335 A77-39749

## IONIC MOBILITY

- Practical reasons for investigating ion transport in high temperature insulating materials --- for energy conversion efficiency [CONF-760831-2] 14 p0227 A77-19935

## IONIZATION

- Field ionization for laser isotope separation [EPRI-NP-334] 16 p0552 A77-33512

## IONOSPHERIC DISTURBANCES

- Optimizing a low cost satellite energy system 16 p0465 A77-48877

## IONOSPHERIC HEATING

- Space-borne power conversion into a microwave beam and its impact on the environment of the upper atmosphere 16 p0464 A77-48875

## IRAN

- Prospects for solar energy utilization in Iran - Photothermal methods 13 p0013 A77-11532

## IRELAND

- Domestic hot water and solar energy in Ireland 16 p0430 A77-46608

## IRON

- Finite length effects in linear induction machines with different iron contours 16 p0413 A77-42629  
Environmental considerations of selected energy conserving manufacturing process options. Volume 3: Iron and steel industry report [PB-264269/2] 15 p0384 A77-26680

## IRON ALLOYS

- Metallurgical considerations in the production and use of FeTi alloys for hydrogen storage 13 p0033 A77-12777  
Hydrogen storage via iron-titanium for a 26 MW/e/peaking electric plant 13 p0048 A77-13543

## IRON CHLORIDES

- Experimental demonstration of an iron chloride thermochemical cycle for hydrogen production 13 p0032 A77-12772  
Definition and analysis of thermochemical processes for hydrogen production based on iron-chlorine reactions 15 p0276 A77-33351

## IRON COMPOUNDS

- Development of compact lithium/iron disulfide electrochemical cells 13 p0026 A77-12715  
The behavior of iron titanium hydride test beds - Long-term effects, heat transfer and modeling 15 p0280 A77-33386  
On the application of radioisotope techniques for the study of phthalocyanine catalyzed electrochemical processes in fuel cells 16 p0425 A77-45151  
Development status of lithium-silicon/iron sulfide load leveling batteries 16 p0448 A77-48741  
Feasibility studies of chemical reactions for thermochemical water splitting cycles of the iron-chlorine-, iron-sulfur- and manganese-sulfur families 14 p0238 A77-21572  
Physical metallurgy of FeTi-hydride and its behavior in a hydrogen storage container 14 p0242 A77-21620  
The behavior of iron titanium hydride test beds: Long-term effects, heat transfer and modeling 14 p0242 A77-21621

## IRON ORES

- Utilization of low and intermediate BTU gas from coal for iron ore pelletizing [PB-264702/2] 15 p0389 A77-27247

## IRON OXIDES

- Desulfurization of flue gases with iron/III/ oxide on porous carrier material - Theoretical and experimental investigation concerning the modelling of semicontinuous solid bed reactors with gas-solid reactions --- German book 13 p0080 A77-19184  
Photoelectrolysis with  $\text{FeO}_3$  electrodes --- water splitting using solar energy 16 p0399 A77-40553

## IRRADIANCE

- Computational program for accurate predetermination of irradiance and illuminance in connection with solar energy utilization 14 p0147 A77-21777  
Experimental and theoretical studies on solar energy for energy conversion 16 p0471 A77-48932  
The determination of hourly insolation on an inclined plane using a diffuse irradiance model based on hourly measured global horizontal insolation 16 p0501 A77-50206

## IRREVERSIBLE PROCESSES

- Irreversibilities, heat penalties, and economics for the methanol/sulfuric acid process --- for hydrogen production 16 p0457 A77-48814  
Irreversibilities in thermochemical cycles for hydrogen production by water decomposition 16 p0457 A77-48816

## IRRIGATION

- Solar water pump for lift irrigation 13 p0019 A77-12406  
Turntable solar arrays 16 p0483 A77-49033  
Beneficial uses of geothermal energy description and preliminary results for phase 1 of the Raft River irrigation experiment [TREE-1048] 16 p0547 A77-32609

## ISLANDS

- Numerical solutions for steady free convection in island geothermal reservoirs 14 p0174 A77-24205

## ISOCYANATES

- Fabrication of solar energy concentrators based on polyurethane foams using new polyol and isocyanate compounds 15 p0271 A77-32973

## ISOMERIZATION

- The use of functionalized polymers as photosensitizers in an energy storage reaction 16 p0501 A77-50208

## ISOTHERMAL LAYERS

- Isothermal surface in a radiation field --- in solar thermal energy devices 13 p0014 A77-11918

## ISOTHERMAL PROCESSES

- An isothermal etchback-regrowth method for high-efficiency Ga/1-x/Al/x/As-GaAs solar cells 15 p0257 A77-30372

## ISOTOPE EFFECT

- Isotopic composition of steam samples from Lanzarote, Canary Islands 13 p0013 A77-11497  
Locating interesting geothermal areas in the Tuscany region /Italy/ by geochemical and isotopic methods 13 p0013 A77-11498

## ISOTOPE SEPARATION

- Study of a solar assisted diffusion separation process for isotopic mixtures 16 p0483 A77-49030  
Energy and technology review [UCID-52000-76-2] 13 p0131 A77-15508  
Field ionization for laser isotope separation [EPRI-NP-334] 16 p0552 A77-33512

## ISOTOPES

- Combined studies of the sun and isotope ecology 15 p0271 A77-32868

## ITALY

- Remote sensing of geothermic activities of the volcanoes Aetna, Stromboli and Vesuv by means of infra-red NOAA-VHRR-satellite data --- Italy 13 p0104 A77-12485

Trends in refinery capacity and utilization:  
Petroleum refineries in the United States;  
foreign refinery exporting centers  
[PB-256966/3] 13 p0132 N77-15523

## J

## JAPAN

Studies on the energy system of Hokkaido. I -  
First attempt: Model-I. II - Various data and  
their basis. III - Simulations by Model-I  
15 p0287 A77-33526

## JET AIRCRAFT

A simplified method in flight test techniques for  
the determination of the range performance of  
jet aircraft 13 p0060 A77-16600  
Fuel consumption of civil jet transport aircraft  
13 p0062 A77-17234  
Best-range flight conditions for cruise-climb  
flight of a jet aircraft 13 p0085 N77-10379  
The intermittent jet for supersonic conditions  
increased with passage to operating in a ramjet  
- A low cost engine 15 p0339 N77-22130

## JET ENGINE FUELS

A preliminary engineering assessment of jet fuel  
production from domestic coal and shale derived  
oils 13 p0023 A77-12690  
Jet fuel quality considerations 15 p0272 A77-33273  
A study of the efficiency of hydrogen liquefaction  
--- jet aircraft applications 15 p0279 A77-33377  
The military utility of very large airplanes and  
alternative fuels 16 p0434 A77-47271  
Alternate fuels for future aircraft 16 p0444 A77-48709  
An exploratory study to determine the integrated  
technological air transportation system ground  
requirements of liquid-hydrogen-fueled subsonic,  
long-haul civil air transports [NASA-CR-2699]  
13 p0083 N77-10033  
National petroleum product supply and demand, 1976  
- 1978 [PB-254969/9] 13 p0084 N77-10224  
Synthesis and analysis of jet fuel from shale oil  
and coal syncrudes [NASA-CR-135112] 13 p0103 N77-12230  
Some cost, energy, environmental, and resource  
implications of synthetic fuels produced from  
coal for military aircraft [AD-A026667] 13 p0118 N77-14271  
Impact of fuel properties on jet fuel availability  
[AD-A029493] 14 p0219 N77-19278  
A study of the efficiency of hydrogen liquefaction  
14 p0240 N77-21611  
Performance characteristics of turbo-rockets and  
turbo-ramjets using high energy fuel 15 p0339 N77-22131  
Petroleum market shares - A report on sales of  
refined petroleum products, 1972 through 1975:  
Aviation gasoline, jet fuels, middle distillate  
fuel oils, residual fuel oil, motor gasoline  
[PB-262726/3] 15 p0360 N77-24321  
Thermal stability of some aircraft turbine fuels  
derived from oil shale and coal [NASA-TN-X-3551] 15 p0370 N77-25345  
Effect of nitrogenous bases on the thermal  
stability of jet fuels [NASA-TN-75131] 15 p0388 N77-27243  
The potential role of technological modifications  
and alternative fuels in alleviating Air Force  
energy problems [AD-A039597] 16 p0525 N77-30261  
An evaluation of very large airplanes and  
alternative fuels [AD-A040532] 16 p0532 N77-31334  
An evaluation of very large airplanes and  
alternative fuels: Executive summary [AD-A042112] 16 p0550 N77-33154

**JET ENGINES**  
Effect of ceramic coating of JT8D combustor liner  
on maximum liner temperatures and other  
combustor performance parameters [NASA-TN-X-73581] 13 p0126 N77-15037

The pros and cons of variable geometry turbines  
15 p0340 N77-22140

## JET FLAPS

Static and wind-on tests of an upper-surface-blown  
jet-flap nozzle arrangement for use on the Quiet  
Clean Short-haul Experimental Engine (QCSEE)  
[NASA-TN-D-8476] 15 p0370 N77-25086

## JET FLOW

Performance and NOx emissions modeling of a jet  
ignition prechamber stratified charge engine  
[SAB PAPER 760161] 13 p0016 A77-12150  
The influence of the Reynolds number on the  
profiles of velocity and concentration in free  
jets of different density 13 p0069 A77-18500

## JET PUMPS

Development of a jet pump-assisted arterial heat  
pipe [NASA-CR-152015] 16 p0527 N77-30415

## JET THRUST

Development of a small, low cost turbojet engine  
with thrust augmentation --- for RPV 16 p0434 A77-47347

## JP-4 JET FUEL

The impact of JP-4/JP-8 conversion on aircraft  
engine exhaust emissions [AD-A026546] 13 p0112 N77-13234  
JP-4 and JP-9 fuel toxicity studies using water  
fish and aufwuchs [AD-A027594] 13 p0127 N77-15213  
Evaluation of methods to produce aviation turbine  
fuels from synthetic crude oils, phase 2, volume 2  
[AD-A036190] 16 p0511 N77-28325

## JP-5 JET FUEL

Electrostatic properties of JP-5 jet fuel from  
alternate sources [AD-A025684] 13 p0103 N77-12232  
Evaluation of a JP-5 type fuel derived from oil  
shale [AD-A025417] 13 p0112 N77-13231  
Development of high stability fuel. Executive  
summary [AD-A039977] 16 p0533 N77-31339

## JP-8 JET FUEL

The impact of JP-4/JP-8 conversion on aircraft  
engine exhaust emissions [AD-A026546] 13 p0112 N77-13234

## JUNCTION DIODES

Spectral response of a laterally illuminated p-n  
junction --- as photodetector or photovoltaic  
energy converter 13 p0062 A77-17478

## K

## KANSAS

Assessment of fuel-conservation potential of a  
ground-transportation system due to full  
utilization of its mass transportation  
capabilities [PB-262125/8] 15 p0347 N77-22657

## KAPTON (TRADEMARK)

Use of Lexan and Kapton honeycombs to increase  
solar collector efficiency 13 p0068 A77-18448

## KENTUCKY

Strategic petroleum reserve draft environmental  
impact statement for Central Rock Mine  
[PB-262390/8] 15 p0362 N77-24572

## KEROGEN

Thermal alteration of young kerosene in relation to  
petroleum genesis 13 p0053 A77-15044  
Development of the modified in situ oil-shale  
process 14 p0193 A77-27342  
Soluble-salt processes for in-situ recovery of  
hydrocarbons from oil shale 16 p0441 A77-48412

## KEROSENE

Evaluation of a JP-5 type fuel derived from oil  
shale [AD-A025417] 13 p0112 N77-13231  
Impact of fuel properties on jet fuel availability  
[AD-A029493] 14 p0219 N77-19278

**KINETIC ENERGY**

Superflywheel energy storage and nonsynchronous AC/DC/AC electric transmission supplements power system operation

13 p0002 A77-10638

Energy storage --- quality, duration, methods and forms

13 p0006 A77-11040

Hybrid drive with kinetic energy store as vehicle drive

[UCRL-TRANS-11018] 13 p0120 N77-14486

Energy equivalents for current and prospective automotive fuels in Canada

[AD-A026155] 13 p0124 N77-14609

**KINETIC THEORY**

Theoretical work on reaction sequences in the gasification of coke by carbon dioxide and by steam in conditions remote from equilibrium

14 p0198 A77-28776

**KRYPTON 85**

An assessment of the materials needs for a Kr-85 fuel capsule

16 p0462 A77-48855

**KURILE ISLANDS**

The nature and characteristics of the distribution of helium and argon isotopes in the geothermal waters of the Kuril Islands and Kamchatka

13 p0048 A77-13589

**L****LABORATORIES**

ERDA Interlaboratory Work for Data Exchange (IWGDE) [LBL-5329]

15 p0352 N77-22998

**LAKES**

Effects of thermal pollution on certain aquatic invertebrates

[PB-263488/9] 15 p0368 N77-24673

**LAMINAR BOUNDARY LAYER**

Boundary-layer separation from the electrode wall of an MHD generator

13 p0048 A77-13711

**LAMINAR FLOW**

Investigation of the flow and the temperature distribution in the vapor duct of a high-temperature heat pipe

15 p0306 A77-36708

Study of the characteristics of convective heat transfer in cylindrical solar energy receivers by solving the conjugate problem of heat exchange

15 p0316 A77-37771

Investigation of convective heat-transfer characteristics in cylindrical solar receivers by solution of the conjugate heat-exchange problem

16 p0437 A77-47427

**LAND USE**

Utilization of remote sensing techniques to detect land use effects on wildland water quality

13 p0071 A77-18984

Does solar energy demand more land surface, and more materials or energy investment than nuclear energy or fossil fuels - A preliminary study

14 p0155 A77-21857

Growth effects of major land use projects. Volume 2: Compilation of land use based emission factors

[PB-255302/2] 13 p0092 N77-10709

The 29950 Earth Resource Technology Satellite (ERTS-A) sensor data for mineral resource sector development and regional land use survey, March - August 1976 --- Bolivia

[E77-10028] 13 p0096 N77-11491

Draft environmental assessment of application by ERDA for a special land use permit for use of public lands in Wyoming for in situ coal gasification experiments

[UCID-17011] 13 p0100 N77-11572

Development of a multi-disciplinary ERTS user program in the state of Ohio

[E77-10045] 13 p0104 N77-12475

Interpretation of Pennsylvania agricultural land use from ERTS-1 data

[E77-10111] 14 p0215 N77-18525

Proceedings of a Symposium on Offshore Oil Potential and Related Land Use Impacts in the Central California Coastal Zone

[PB-259074/3] 14 p0215 N77-18547

A process for coastal resource management and impact assessment

[PB-264811/1] 15 p0376 N77-26004

Regional land use and energy modeling

[BNL-21809] 15 p0378 N77-26595

Western energy/environment monitoring study:

Planning and coordination summary

[PB-266256/7] 16 p0523 N77-29632

Land use, energy flow and policy making in society. SIHPAC handbook. A guide to the modeling of socio-economic phenomena

[PB-267134/5] 16 p0530 N77-30637

Early use of solar energy in buildings. A study of barriers and incentives to the widespread use of solar heating and cooling systems

[PB-267832/4] 16 p0554 N77-33618

**LANDSAT SATELLITES**

Use of Landsat data for the detection of marine oil slicks --- for oil exploration and pollution control

15 p0267 A77-32244

Space: A resource for earth - An AIAA review --- Book

15 p0269 A77-32440

An application of ERTS technology to the evaluation of coal strip mining and reclamation in the northern Great Plains

[NASA-CR-149208] 13 p0104 N77-12486

LANDSAT (ERTS) used as a basis for geological volcanological mapping in the central Andes

[NASA-TM-75024] 15 p0390 N77-27474

**LANDSAT 1**

Geothermal flux through palagonitized tephra, Surtsey, Iceland - The Surtsey

temperature-data-relay experiment via Landsat-1

13 p0048 A77-13648

**LANTHANUM COMPOUNDS**

Electrode-connecting material as a central component of high-temperature fuel cells. II - Investigation of selected high-conductivity mixed oxides

13 p0056 A77-15817

**LARGE SPACE STRUCTURES**

Large-scale space operations for Solar Power Satellites

[AIAA PAPER 77-1031] 16 p0413 A77-42483

SEP full-scale wing technology development

16 p0463 A77-48860

Composites for large space structures

[IAF PAPER 77-65] 16 p0507 A77-51416

**LASER ANEMOMETERS**

Laser anemometry in high velocity, high temperature boundary layers

15 p0288 A77-33708

**LASER APPLICATIONS**

The use of lasers for the inspection of heliotechnical reflectors

15 p0286 A77-33432

Using lasers to inspect solar-energy reflectors

16 p0427 A77-45545

Use of a carbon dioxide laser in remote detection of petroleum oil pollution at sea

16 p0433 A77-47080

Energy and technology review

[UCID-52000-76-2] 13 p0131 N77-15508

Abstracts: 1976 AFOSR Contractors' meeting on MHD Power Generation and Lasers

[AD-A027654] 13 p0133 N77-15845

Investigation of beamed energy concepts for propulsion. Volume 1: Systems studies

[AD-A034995] 15 p0377 N77-26491

Gas-interface studies in large horizontal heat pipes

[LA-6646-MS] 16 p0520 N77-29455

Field ionization for laser isotope separation

[EPRI-NP-334] 16 p0552 N77-33512

**LASER CAVITIES**

Influence of the spatial inhomogeneity of the field and amplifying medium on the energy characteristics of a gas laser

15 p0289 A77-34221

Commercial application of laser fusion

[LA-UR-76-1459] 14 p0227 N77-19872

**LASER FUSION**

Prospects of generating power with laser-driven fusion

13 p0002 A77-10634

Radiolytic hydrogen production from a laser fusion system

13 p0035 A77-12795

Shaping of laser pulses in an amplifying system receiving input signals with a variable spectrum

13 p0053 A77-15237

# SUBJECT INDEX

# LIQUID COOLING

High level concentration of sunlight on silicon solar cells 15 p0267 A77-32208

Combination of focusing concentrators and focusing lenses 15 p0286 A77-33431

Combination of focons and ioclines with radiation receivers 16 p0427 A77-45544

**LENSES**

Assembly and testing of a 1.8 by 3.7 meter Fresnel lens solar concentrator [NASA-CR-150300] 15 p0378 N77-26610

**LEXAN (TRADEMARK)**

Use of Lexan and Kapton honeycombs to increase solar collector efficiency 13 p0068 A77-18448

**LIFE (DURABILITY)**

Efficiency calculations for Al<sub>1-x</sub>Ga<sub>1-x</sub>As-GaAs heteroface solar cells 15 p0257 A77-30720

Advanced fuel fusion experimentation with Migmacells II and III - Orbit diagnostics and lifetime measurements 16 p0436 A77-47362

**LIFE SUPPORT SYSTEMS**

Space construction base support requirements for environmental control and life support systems [ASME PAPER 77-ENAS-44] 16 p0432 A77-46885

**LIFT**

Numerical solution for the unsteady lifting characteristics of variable pitch cross-flow wind turbines 13 p0044 A77-12871

**LIFT AUGMENTATION**

Evaluation of propulsive lift enhancement and variable cycle engines for advanced tactical aircraft [AIAA PAPER 77-885] 15 p0321 A77-38575

**LIGHT AIRCRAFT**

Study of small turbofan engines applicable to single-engine light airplanes [NASA-CR-137944] 13 p0093 N77-11054

**LIGHT SOURCES**

Solar electricity - The hybrid system approach 16 p0413 A77-42556

Socio-economic determinants of a program for lunar industrialization in support of space light development Lunetta and Soletta [IAP PAPER A-77-66] 16 p0507 A77-51533

**LIGHT TRANSMISSION**

Use of transparent heat reflecting coatings in solar energy converters 15 p0285 A77-33430

Concentration of scattered radiation --- by solar collectors 15 p0316 A77-37768

Heat mirrored solar energy receivers [AIAA PAPER 77-728] 15 p0324 A77-39506

Utilization of transparent heat-reflecting coatings in solar-energy converters 16 p0426 A77-45543

Concentration of diffuse radiation --- by solar collectors 16 p0437 A77-47424

Thermoelectronic laser energy conversion for power transmission in space 16 p0464 A77-48876

**LIGHT WATER BREEDER REACTORS**

Energy storage in the form of latent heat 14 p0157 A77-22350

Energy investment in nuclear and solar power plants 15 p0257 A77-30599

Occupational radiation exposure at light water cooled power reactors, 1969-1975 [PB-257054/7] 13 p0125 N77-14740

An initial comparative assessment of orbital and terrestrial central power systems [NASA-CR-152688] 15 p0343 N77-22612

Conceptual design study for a laser fusion hybrid [UCRL-78682] 15 p0397 N77-27926

**LIGHTING EQUIPMENT**

Lumiducts for Ecopclis --- urban solar light collection and transmission system 13 p0079 A77-19116

Lighting with sunlight using sun tracking concentrators 15 p0260 A77-31245

**LIMESTONE**

Isotopic composition of steam samples from Lanzarote, Canary Islands 13 p0013 A77-11497

**LIMITS (MATHEMATICS)**

Limiting mechanisms in MHD generator performance [AD-A025949] 13 p0111 N77-14879

**LINEAR ARRAYS**

Simulation of the performance of a solar energy plant using uniaxial parabolic collectors, with a one-degree-of-freedom pointing system, at different latitudes 14 p0164 A77-23297

**LINEAR PROGRAMMING**

The application of linear programming methods to the problem of choosing required reserves of energy for controlled plants 14 p0196 A77-28255

Simplex optimization of carbon electrodes for the hydrogen oxygen membrane fuel cell 16 p0500 A77-50200

A linear economic model of fuel and energy use in the United States. Volume 1: Model Description and results [PB-252485/8] 13 p0088 N77-10662

**LINEAR SYSTEMS**

Internal problem for the end effect in a linear asynchronous MHD-machine operating at an arbitrary current load 15 p0295 A77-35799

**LINING PROCESSES**

Effect of ceramic coating of JT8D combustor liner on maximum liner temperatures and other combustor performance parameters [NASA-TM-X-73581] 13 p0126 N77-15037

**LIPIDS**

Analysis of steranes and triterpanes in geolipid extracts by automatic classification of mass spectra 15 p0260 A77-31262

**LIQUEFACTION**

A study of the efficiency of hydrogen liquefaction 14 p0240 N77-21611

**LIQUEFIED NATURAL GAS**

Risk management of liquefied natural gas installations 13 p0002 A77-10451

Applications of cryogenic technology. Volume 8 --- Book 14 p0159 A77-22868

Liquefied natural gas for California 14 p0183 A77-26083

Political and economic justification for immediate realization of a syn fuels industry 14 p0191 A77-27276

The importation of liquefied natural gas 14 p0194 A77-27607

Ship steel weldments for low temperature service [PB-256997/8] 13 p0103 N77-12203

A study to obtain verification of Liquid Natural Gas (LNG) tank loading criteria [AD-A025716] 13 p0120 N77-14492

Bibliography on Liquefied Natural Gas (LNG) safety [NASA-TM-X-73408] 13 p0127 N77-15208

Small scale tests on control methods for some liquefied natural gas hazards [AD-A033522] 15 p0341 N77-22293

Economic feasibility: Fuel grade methanol from coal [TID-27156] 15 p0345 N77-22630

Supply of liquefied natural gas to the Northeast [BNL-50556] 15 p0392 N77-27521

Assessment of the role of the liquefied petroleum gas (LPG) engine in stage carriage service vehicles [TT-7605] 16 p0519 N77-29320

The strategic petroleum reserve and liquefied natural gas supplies [PB-265488/7] 16 p0520 N77-29598

**LIQUID AMMONIA**

Gasification of coals treated with non-aqueous solvents. I - Liquid ammonia treatment of a bituminous coal 14 p0198 A77-28778

**LIQUID COOLING**

Water requirements for an integrated SMG plant and mine operation 13 p0060 A77-16651

MHD systems with low cooling requirements 15 p0332 A77-39575

- The high temperature water cooled gas turbine in combined cycle with integrated low Btu gasification  
[ASME PAPER 77-JPGC-GT-7] 16 p0509 A77-51624

- Study of the properties of heat pipes with liquid-metal heat-transfer agents in low-temperature regimes 13 p0046 A77-13243
- Investigation of two-phase liquid-metal magnetohydrodynamic power systems 13 p0057 A77-16212
- Liquid-metal MHD coupled to coal-fired fluidized-bed combustors 14 p0143 A77-21269
- The long term stability of magnetic liquids for energy conversion devices 14 p0177 A77-24573
- Experimental investigation of energy conversion efficiency during the interaction of a conducting-fluid piston with a magnetic field 14 p0204 A77-29618
- Initial generator tests with revised ambient-temperature liquid-metal MHD facility 15 p0326 A77-39538
- Sodium-nitrogen liquid-metal MHD facility initial test results 15 p0327 A77-39539
- An environmental assessment of liquid metal topping cycles --- in coal-fired fluidized bed processors for electric power generation 16 p0452 A77-48780
- Experimental two-phase liquid-metal magnetohydrodynamic generator program  
[AD-A035245] 15 p0387 A77-26988
- LIQUID NITROGEN**  
Magnetic suspension densimeter for measurements on fluids of cryogenic interest 13 p0007 A77-11093
- LIQUID PHASES**  
Upgrading coal liquids to gas turbine fuels. II - Compatibility of coal liquids with petroleum fuels 14 p0177 A77-24852
- Upgrading coal liquids to gas turbine fuels. III - Exploratory process studies 14 p0178 A77-24853
- LIQUID SODIUM**  
Liquid-metal magnetohydrodynamic system evaluation --- coal-fired designs 13 p0034 A77-12784
- Central station solar electric power using liquid metal heat transport 13 p0037 A77-12806
- Design of sodium-cooled, central receiver solar power plant 16 p0461 A77-48843
- LIQUID SURFACES**  
Spectral response and efficiency relations in semiconductor liquid junction solar cells 15 p0264 A77-31823
- LIQUID-SOLID INTERFACES**  
Gas release during long-term operation of heat pipes 13 p0050 A77-14328
- A method of comparing flat-plate air and liquid solar collectors for use in space heating applications 16 p0472 A77-48941
- Development of nondestructive evaluation methods for coal-conversion systems  
[CONF-760472-2] 14 p0216 A77-18567
- LIQUID-VAPOR EQUILIBRIUM**  
Vapor-liquid equilibrium of hydrogen/tetralin system at elevated temperatures and pressures 16 p0412 A77-42406
- LIQUID-VAPOR INTERFACES**  
Excess liquid in heat-pipe vapor spaces  
[AIAA PAPER 77-748] 15 p0311 A77-37261
- LITHIUM**  
Development of compact lithium/iron disulfide electrochemical cells 13 p0026 A77-12715
- Lithium-aluminum/metal sulfide batteries  
[AIAA PAPER 77-483] 14 p0172 A77-23903

# SUBJECT INDEX

# LUNAR PROGRAMS

- Post-test analysis of Li/FeS<sub>2</sub> compact cells  
16 p0448 A77-48739
- Measured performance of a 3 ton LiBr absorption  
water chiller and its effect on cooling system  
operation  
[NASA-TM-X-73496] 13 p0105 A77-12518
- LITHIUM ALLOYS**  
Performance characteristics of solid  
lithium-aluminum alloy electrodes  
13 p0007 A77-11107
- Development status of lithium-silicon/iron sulfide  
load leveling batteries  
16 p0448 A77-48741
- Improved negative electrodes for lithium  
sulfide batteries  
16 p0448 A77-48742
- LITHIUM COMPOUNDS**  
Ambient temperature electric vehicle batteries  
based on lithium and titanium disulfide  
13 p0025 A77-12706
- Design and testing of lithium/iron sulfide  
batteries for electric-vehicle propulsion  
14 p0161 A77-22910
- Measured performance of a 3-ton LiBr absorption  
water chiller and its effect on cooling system  
operation  
16 p0498 A77-49165
- Cooling subsystem design in CUS solar house 3  
[COO-2858-1] 16 p0514 A77-28592
- LITHIUM HYDROXIDES**  
The lithium-water-air battery for automotive  
propulsion  
14 p0162 A77-22915
- LOADS (FORCES)**  
A study to obtain verification of Liquid Natural  
Gas (LNG) tank loading criteria  
[AD-A025716] 13 p0120 A77-14492
- LOCOMOTIVES**  
Evolution of thermal traction - From the diesel  
engine to the gas turbine  
13 p0004 A77-10976
- Will electricity power tomorrow's trains  
14 p0199 A77-29088
- LONG TERM EFFECTS**  
Gas release during long-term operation of heat pipes  
13 p0050 A77-14328
- The behavior of iron titanium hydride test beds -  
Long-term effects, heat transfer and modeling  
15 p0280 A77-33386
- The behavior of iron titanium hydride test beds:  
Long-term effects, heat transfer and modeling  
14 p0242 A77-21621
- LOUISIANA**  
Strategic petroleum reserve. Final environmental  
impact statement for Bayou Choctaw Salt Dome  
[PB-261584/9] 15 p0341 A77-22294
- LOW COST**  
Solar energy concentration with liquid lenses  
14 p0158 A77-22649
- Performance of low cost solar reflectors for  
transferring sunlight to a distant collector  
14 p0180 A77-25896
- Solar-optical analyses of a mass-produced plastic  
circular Fresnel lens  
14 p0181 A77-25906
- Low cost dynamic energy conversion systems  
14 p0196 A77-28171
- Development of a low capital cost electrolyzer ---  
for hydrogen production  
15 p0277 A77-33362
- Development of a small, low cost turbojet engine  
with thrust augmentation --- for RPV  
16 p0434 A77-47347
- Optimizing a low cost satellite energy system  
16 p0465 A77-48877
- Self sufficient energy integrated design and  
construction method for low cost-self help  
housing programs  
16 p0495 A77-49137
- On the study of applications of solar thermal  
energy for mobile homes  
16 p0501 A77-50204
- Low cost solar energy collection system  
[NASA-CASE-NPO-13579-3] 14 p0229 A77-20566
- Development of a low capital cost electrolyzer  
14 p0239 A77-21596
- Research and development of low cost processes for  
integrated solar arrays  
[COO-2721-76-1] 15 p0383 A77-26670
- Development of low cost, high energy-per-unit-area  
solar cell modules  
[NASA-CR-153977] 16 p0528 A77-30605
- Solar silicon via improved and expanded  
metallurgical silicon technology  
[NASA-CR-153415] 16 p0528 A77-30606
- LOW PRESSURE**  
Underground gasification --- of coal for deep  
deposit in situ processing  
15 p0308 A77-36813
- LOW TEMPERATURE**  
The utilization and economics of low temperature  
geothermal water for space heating  
13 p0030 A77-12756
- Development of thermal control methods for  
specialized components and scientific  
instruments at very low temperatures (follow-on)  
[NASA-CR-150152] 13 p0127 A77-15347
- Solar energy storage  
[AD-A028083] 14 p0213 A77-17605
- LOW TEMPERATURE PHYSICS**  
Design considerations for capillary heat pipes at  
cryogenic temperatures  
[ORNL-MIT-28] 15 p0361 A77-24430
- Low-temperature thermal energy storage  
[ORNL-TM-5795] 16 p0536 A77-31631
- LOW TEMPERATURE TESTS**  
Development of a low temperature phase change  
material package --- for spacecraft thermal  
control  
[AIAA PAPER 77-762] 15 p0325 A77-39514
- Preparation of porous carbon electrodes for low  
temperature H<sub>2</sub>-O<sub>2</sub> fuel cells  
16 p0420 A77-44059
- Flexible cryogenic heat pipe development program  
[NASA-CR-152027] 16 p0520 A77-29451
- LUBRICANT TESTS**  
Investigation of the causes of stuck servovalves  
in U.S. Army hydraulic systems using MIL-H-46170  
'Hydraulic Fluid, Rust Inhibited, Fire  
Resistant, Synthetic Hydrocarbon Base'  
[ASLE PREPRINT 77-AH-2A-1] 15 p0296 A77-35956
- LUBRICANTS**  
Waste POL disposal through energy recovery  
[AD-A031783] 14 p0235 A77-20957
- Antivear additives, wear studies on chemical  
addition agents for imparting an effective  
lubricating response in polysiloxane (silicone)  
fluids  
[AD-A033527] 15 p0340 A77-22270
- LUBRICATING OILS**  
Thermally induced migration of hydrocarbon oil  
15 p0268 A77-32375
- Fuels and lubricants --- an evaluation of military  
fuels and lubricants  
[AD-A032842] 15 p0359 A77-24314
- LUMINOUS INTENSITY**  
High-sensitivity detection procedures and devices  
for angular variations - Application to  
automatic control of a solar furnace heliostat  
14 p0166 A77-23386
- Composite concentrators with spherical radiation  
sources  
14 p0179 A77-25359
- Composite concentrators with spherical radiation  
sources --- in solar heating systems  
16 p0409 A77-41909
- Characteristics of the concentrated solar flux  
produced by the FMSC prototype --- Fixed Mirror  
Solar Concentrator  
16 p0474 A77-48953
- LUNAR BASES**  
Where do we locate the moon base --- considering  
polar regions as preferred lunar observatory sites  
16 p0504 A77-51023
- LUNAR ENVIRONMENT**  
Environmental impact of space manufacturing  
[AIAA PAPER 77-539] 15 p0266 A77-32062
- LUNAR OBSERVATORIES**  
Where do we locate the moon base --- considering  
polar regions as preferred lunar observatory sites  
16 p0504 A77-51023
- LUNAR PROGRAMS**  
Socio-economic determinants of a program for lunar  
industrialization in support of space light  
development Lunetta and Soletta  
[IAF PAPER A-77-66] 16 p0507 A77-51533

## LUNAR ROCKS

Energy and technology review --- measurement of lunar subsurface temperature and monitoring of atmospheric ozone  
[UCRL-52000-76-11] 15 p0396 N77-27651

## LUNAR TEMPERATURE

Energy and technology review --- measurement of lunar subsurface temperature and monitoring of atmospheric ozone  
[UCRL-52000-76-11] 15 p0396 N77-27651

## M

## MAGMA

Heat transport in geothermal systems 14 p0174 A77-24203  
Magma energy research project, volume 2, no. 2  
[SAND-76-0264-VOL-2-NO-2] 15 p0372 N77-25638

## MAGNESIUM ALLOYS

Supercorroding alloys for generating heat and hydrogen gas 16 p0458 A77-48820

## MAGNESIUM OXIDES

Hydration-dehydration cycling of MgO-Mg(OH)2 for application to solar heat storage systems  
[AI-ERDA-13178] 15 p0381 N77-26654

## MAGNET COILS

High speed superconducting generator 14 p0144 A77-21383  
Superconducting a.c. generators - Progress on the design of a 1300 MW, 3000 rev/min generator 14 p0144 A77-21386  
Power loss problems in EXTRAP coil systems [TRITA-PFU-77-02] 16 p0549 N77-32910

## MAGNETIC ANOMALIES

Gravity and ground magnetic surveys of the central mineral mountains, Utah, volume 6  
[PB-268423/1] 16 p0544 N77-32578

## MAGNETIC COILS

Superconducting induction coil for a doublet Tokamak experimental fusion power reactor 14 p0144 A77-21376  
Armature of the MIT-EPRI superconducting generator 14 p0157 A77-22575  
Element rating and coupling harmonics in a superconductive energy transfer system 16 p0411 A77-42164  
Superconducting magnetic energy storage [LA-UR-76-2047] 15 p0397 N77-27933

## MAGNETIC CONTROL

Thermonuclear fusion power 15 p0296 A77-35920  
Superconducting magnet development for the MHD program 15 p0331 A77-39569  
Nuclear fusion - Focus on Tokamak 16 p0407 A77-41645

## MAGNETIC EFFECTS

Explosively driven MHD generator power systems for pulse power applications 15 p0299 A77-36300  
The physics of magnetic separation 15 p0323 A77-39119

## MAGNETIC FIELD CONFIGURATIONS

PULSAR, an unconventional topping stage --- MHD generation with metallic armature produced magnetic flux compression 13 p0034 A77-12788  
Reduction of the transverse edge effect in linear machines with homogeneous secondary armature by changing the air gap configuration 15 p0310 A77-36939  
Predicted and measured finite-width effects in linear induction machines 16 p0413 A77-42628  
Review of toroidal theta-pinch theory 16 p0427 A77-45628

## MAGNETIC FIELDS

Calculation of the electric fields and currents in a plasma flowing in a spatially periodic magnetic field --- for MHD generator 15 p0295 A77-35798  
The magnetic energy storage system used in ZT-1 --- toroidal plasma pinch experiment 15 p0299 A77-36314  
Field-reversed mirror as a D-T power reactor [UCRL-78082] 15 p0351 N77-22967

Economics and organization of metallurgical production: Effectiveness of the use of magnetic fields in melting alloy steels [BLL-M-25473-(5828.4F)] 15 p0359 N77-24245

## MAGNETIC FLOW

PULSAR - A flux compression stage for coal-fired power plants 14 p0190 A77-26544  
Predicted and measured finite-width effects in linear induction machines 16 p0413 A77-42628  
Finite length effects in linear induction machines with different iron contours 16 p0413 A77-42629

## MAGNETIC INDUCTION

Induction devices - A new type of magnetohydrodynamic converter 14 p0198 A77-28786  
Two-dimensional analysis of end effects in diagonal type nonequilibrium plasma MHD generator 15 p0297 A77-36097  
Finite length effects in linear induction machines with different iron contours 16 p0413 A77-42629

## MAGNETIC LEVITATION VEHICLES

Large-scale applications of superconductivity 16 p0412 A77-42475

## MAGNETIC MATERIALS

Black magnetic spherule fallout in the eastern Gulf of Mexico 13 p0052 A77-14890

## MAGNETIC MIRRORS

Assessment of the role of magnetic mirror devices in fusion power development 14 p0213 N77-17872  
Evaluation of the technical and economic feasibility of mirror fusion devices [UCRL-13695] 15 p0386 N77-26977

## MAGNETIC PUMPING

Supplementary plasma heating studies in the atomic energy commission, France 13 p0064 A77-17819  
Magnetic heat pumping [NASA-CASE-LEW-12508-2] 16 p0543 N77-32435

## MAGNETIC RESONANCE

Hydrogen atoms: Rare earth ions: Magnetic resonance studies on polycrystalline solids and surface systems relevant to catalysis and other energy-related research 13 p0117 N77-13798

## MAGNETIC SURVEYS

Geothermal significance of magnetotelluric sounding in the eastern Snake River Plain-Yellowstone region 15 p0310 A77-36999

## MAGNETIC SUSPENSION

Magnetic suspension densimeter for measurements on fluids of cryogenic interest 13 p0007 A77-11093  
Flywheel energy storage. II - Magnetically suspended superflywheel 15 p0323 A77-39315

## MAGNETIC SWITCHING

Progress in switching technology for MTS systems --- Magnetic Energy Transfer and Storage 15 p0303 A77-36377

## MAGNETIC TAPES

ERDA energy information data base: Magnetic tape description [TID-4581-R3] 13 p0102 N77-11695

## MAGNETOHYDRODYNAMIC FLOW

Non-equilibrium MHD power generation using non-seeded argon plasma 13 p0004 A77-11022  
Slag interaction phenomena on MHD generator electrodes [AIAA PAPER 77-109] 14 p0135 A77-19833  
Engineering aspects of magnetohydrodynamics; Proceedings of the Fifteenth Symposium, University of Pennsylvania, Philadelphia, Pa., May 24-26, 1976 14 p0139 A77-21214  
Investigation of two-dimensional electric effects in a sectional MHD-channel 15 p0317 A77-37930  
Electron concentration measurements in combustion MHD flows by submillimeter laser interferometry 16 p0425 A77-44821

## MAGNETOHYDRODYNAMIC GENERATORS

- Performance theory of diagonal conducting wall MHD generators 13 p0001 A77-10202
- Effect of nonuniform conductivity in the boundary layer at the electrode wall on local characteristics of an MHD generator with a diagonal electrode configuration and a subsonic stream 13 p0001 A77-10423
- Study of the ionization of the additive in MHD installations 13 p0002 A77-10424
- Non-equilibrium MHD power generation using non-seeded argon plasma 13 p0004 A77-11022
- Energy conservation with advanced power generating systems 13 p0026 A77-12723
- MHD power generation - 1976 Status Report --- coal-fired design 13 p0033 A77-12782
- Investigation of direct coal-fired MHD power generation 13 p0034 A77-12783
- Liquid-metal magnetohydrodynamic system evaluation --- coal-fired designs 13 p0034 A77-12784
- Liquid-metal MHD - Cycle studies and generator experiments 13 p0034 A77-12785
- System studies of coal fired-closed cycle MHD for central station power plants 13 p0034 A77-12786
- PULSAR, an unconventional topping stage --- MHD generation with metallic armature produced magnetic flux compression 13 p0034 A77-12788
- MHD - Energy transformation by burning coal 13 p0045 A77-12940
- Calculation of turbulent magnetohydrodynamic boundary layers in MHD generator channels 13 p0046 A77-13242
- Evaporation of solution droplets in a high-temperature medium --- potassium carbonate MHD flow properties 13 p0046 A77-13254
- Influence of various losses on the characteristics of high-power MHD generators 13 p0046 A77-13258
- Boundary-layer separation from the electrode wall of an MHD generator 13 p0048 A77-13711
- Experiment on MHD generator with a large-scale superconducting magnet /ETL Mark V/ 13 p0049 A77-13728
- Diffuse thermal model of electrode erosion for MHD generators 13 p0049 A77-14319
- Study of cathode spots in the presence of slag films on the electrodes of an open-cycle MHD generator 13 p0053 A77-15005
- Shock tube for investigations of high-temperature MHD generators 13 p0054 A77-15665
- Study of the electrical characteristics of the boundary layer on the metal surfaces in the channels of an open cycle MHD generator 13 p0054 A77-15666
- Acoustic properties of subsonic MHD channel 13 p0054 A77-15668
- Investigation of two-phase liquid-metal magnetohydrodynamic power systems 13 p0057 A77-16212
- Schlieren measurements of a high density z-pinch 13 p0060 A77-16697
- Limiting capabilities with respect to electric power generation of a pulsed MHD generator operating at a resistive load 13 p0064 A77-17917
- Construction of two-dimensional steady-state solution of equations of a nonequilibrium magnetized plasma 13 p0065 A77-18130
- Slag interaction phenomena on MHD generator electrodes [AIAA PAPER 77-109] 14 p0135 A77-19833
- Some results of an investigation with the U-25 experimental-industrial facility, aimed at raising its parameters to the design level --- MHD generator energy converter 14 p0136 A77-20105
- Measurement of the excess oxidant ratio in the combustion products of an MHD-generator 14 p0136 A77-20107
- Engineering aspects of magnetohydrodynamics; Proceedings of the Fifteenth Symposium, University of Pennsylvania, Philadelphia, Pa., May 24-26, 1976 14 p0139 A77-21214
- Joint test of an U.S. electrode system in the U.S.S.R. U-02 facility 14 p0139 A77-21215
- In-channel observations on coal slag --- in MHD generators 14 p0139 A77-21222
- Replenishment processes and flow train interaction --- in MHD generators 14 p0139 A77-21223
- Slag layers in direct coal-fired MHD power generation 14 p0139 A77-21224
- Test results on the spinel electrode module in laboratory and simulated MHD environment 14 p0140 A77-21227
- Crystallization and vaporization studies on synthetic coal slag compositions 14 p0140 A77-21228
- Thermionic emission characteristics of seeded coal slags 14 p0140 A77-21229
- Utilization of Western coal for MHD energy conversion 14 p0140 A77-21230
- Influence of coal type and drying upon MHD power plants and components 14 p0140 A77-21231
- Development of a baseline reference design for an open cycle MHD power plant for commercial service 14 p0140 A77-21232
- The technology base for large MHD superconducting magnets 14 p0140 A77-21233
- Progress on the Mark VI long-duration MHD generator 14 p0141 A77-21237
- Experimental investigation on a direct coal-fired MHD generator 14 p0141 A77-21238
- Effects of devolatilization kinetics and ash behavior on coal fired MHD combustor design 14 p0141 A77-21248
- Applications of the rapid devolatilization of coal in MHD power cycles 14 p0141 A77-21249
- Recent experimental studies of the interaction of potassium seed with coal slag in a direct-coal fired MHD generator 14 p0141 A77-21250
- Kinetics of regeneration of spent seed from MHD power generation systems 14 p0141 A77-21251
- Voltage consolidation and control circuits for multiple-electrode MHD generators 14 p0141 A77-21252
- Curve of current delivered from MHD generator to a conventional power grid by inverter system 14 p0141 A77-21253
- Progress on the testing of refractories for directly-fired MHD air heater service 14 p0142 A77-21254
- Joint US-USSR experimental studies of the dependence of plasma electrical conductivity on plasma temperature performed in the Avco Mark VI MHD facility 14 p0142 A77-21257
- Consideration of three-dimensional effects in MHD power generators 14 p0142 A77-21261
- All-round technical and economic investigations of open-cycle industrial MHD generator channels and superconducting magnet systems 14 p0142 A77-21266
- System studies of coal fired-closed cycle MHD for central station power plants 14 p0142 A77-21267

- ECAS MHD system studies --- Energy Conversion Alternatives Study 14 p0142 A77-21268
- Liquid-metal MHD coupled to coal-fired fluidized-bed combustors 14 p0143 A77-21269
- Problems of analysis of the power characteristic of a high capacity magnetohydrodynamic power station 14 p0143 A77-21270
- Air Force applications of lightweight superconducting machinery 14 p0144 A77-21360
- Superconducting magnets for an MHD test facility and base load power plant 14 p0144 A77-21379
- The minimum combustion gas recirculation ratio for fuel gas conversion in a MHD cycle 14 p0157 A77-22552
- The long term stability of magnetic liquids for energy conversion devices 14 p0177 A77-24573
- The Tethered Balloon Current Generator - A space shuttle-tethered subsatellite for plasma studies and power generation 14 p0184 A77-26200
- Induction devices - A new type of magnetohydrodynamic converter 14 p0198 A77-28786
- Experimental investigation of energy conversion efficiency during the interaction of a conducting-fluid piston with a magnetic field 14 p0204 A77-29618
- Evaporation of a drop of solution in a high-temperature medium --- potassium carbonate MHD flow properties 15 p0263 A77-31534
- Effect of various losses on the characteristics of powerful MHD generators 15 p0263 A77-31538
- Calculation of thermal stresses in ceramic elements of the refractory channel walls of a magnetohydrodynamic generator 15 p0263 A77-31540
- Investigation of a coaxial explosion-type MHD generator 15 p0268 A77-32313
- Electric power fluctuations in a MHD generator 15 p0269 A77-32432
- Cathode spots on metallic electrodes of an MHD-channel 15 p0269 A77-32518
- Experimental study of accelerating MHD-generator jets with supersonic flow distortion 15 p0269 A77-32519
- Influence of flow nonuniformity on plasma instability at the channel wall 15 p0269 A77-32520
- Processing of experimental data with the U-25 facility with the aid of a data measuring system --- MHD generator 15 p0269 A77-32521
- Laser anemometry in high velocity, high temperature boundary layers 15 p0288 A77-33708
- Boundary layer measurements of temperature and electron number density profiles in a combustion MHD generator 15 p0288 A77-33710
- Conductivity of seeded combustion products of acetylene systems 15 p0288 A77-34039
- Materials utilization in a direct coal-fired MHD generator system 15 p0292 A77-35151
- Structure of the electric field in the near-end space of a cylindrical electrode 15 p0295 A77-35607
- Calculation of the electric fields and currents in a plasma flowing in a spatially periodic magnetic field --- for MHD generator 15 p0295 A77-35798
- Internal problem for the end effect in a linear asynchronous MHD-machine operating at an arbitrary current load 15 p0295 A77-35799
- Investigation of the Hall effect in the plasma of an inductive high-frequency discharge 15 p0297 A77-36088
- Two-dimensional analysis of end effects in diagonal type nonequilibrium plasma MHD generator 15 p0297 A77-36097
- Explosively driven MHD generator power systems for pulse power applications 15 p0299 A77-36300
- Design of closed-cycle MHD generator with nonequilibrium ionization and system 15 p0303 A77-36381
- Improvements in fluid machines and systems for energy conversion. Volume 4 --- Book 15 p0309 A77-36815
- Non equilibrium ionization in a linear magnetohydrodynamic generator, using a high pressure supersonic argon flow 15 p0309 A77-36817
- The influence of finite electrode segmentation on electrical performances of the Faraday MHD generator 15 p0309 A77-36936
- Reduction of the transverse edge effect in linear machines with homogeneous secondary armature by changing the air gap configuration 15 p0310 A77-36939

- Synthetic carbonaceous fuel and feedstock using nuclear power, air and water 15 p0321 A77-38532
- Investigation of factors influencing potassium seed recovery in a direct coal-fired generator system 15 p0331 A77-39510
- Energy and resource recovery from solid wastes 16 p0434 A77-47215
- Modern incineration - A proven way for recovery of energy and metals 16 p0434 A77-47220
- Thermal processing of municipal solid waste for resource and energy recovery --- Book 16 p0438 A77-47951
- Science and technology of oil shale --- Book 16 p0444 A77-48502

## SUBJECT INDEX

## MATHEMATICAL MODELS

Resource recovery technology for urban decision-makers  
[PB-252458/5] 13 p0093 A77-10964

An economic evaluation of a process to separate raw urban refuse into its metal, mineral, and energy components  
[PB-267629/4] 16 p0531 A77-31046

Systems studies of energy conservation: Methane produced from coalbeds, volume 1  
[MERC/CR-77/4-VOL-1] 16 p0558 A77-33660

Reliability study of vapor recovery systems at service stations  
[PB-267613/8] 16 p0560 A77-33700

**MATERIALS SCIENCE**

Intermetallic compounds - Background and results of twenty years of research 13 p0014 A77-11600

Electric vehicle batteries - Opportunities for materials improvement 13 p0049 A77-13736

**MATERIALS TESTS**

Practical aspects of solar heating - A review of materials use in solar heating applications 13 p0049 A77-13743

Oxidation-erosion of materials in high velocity hot gases 15 p0270 A77-32604

The compatibility of containment materials for thermochemical hydrogen production 15 p0276 A77-33347

Generator wall slag coating and material corrosion experiments 15 p0327 A77-39542

Contribution to procedures for testing Silazane resin coatings --- for solar concentrators 16 p0443 A77-48522

The weatherability of solar energy utilization materials - Preliminary discussions 16 p0487 A77-49070

**MATHEMATICAL MODELS**

Energy: Mathematics and models; Proceedings of the Conference, Alta, Utah, July 7-11, 1975 13 p0008 A77-11233

Modeling residential energy use 13 p0027 A77-12726

Parametric studies of the thermal trap flat plate collector 13 p0068 A77-18443

A system model for the investigation of alternative energy strategies --- German book 13 p0080 A77-19181

All-round technical and economic investigations of open-cycle industrial MHD generator channels and superconducting magnet systems 14 p0142 A77-21266

Testing of collectors on the solar simulator - Fitting to the theoretical model and extrapolation 14 p0149 A77-21794

Efficiency of photovoltaic cells employing Schottky diodes 14 p0151 A77-21815

Mathematical simulation of the fixed-bed pressurized gasification process 14 p0164 A77-23097

A mathematical model for the digital computation of the hours of sunshine on an inclined plane 14 p0166 A77-23382

Free thermal convection in geothermal fields - Physical understanding and mathematical modeling 14 p0174 A77-24204

A direct convertor based upon space charge effects 14 p0184 A77-26160

Design and simulation studies for the Shenandoah Community Center large-scale solar cooking demonstration [ASME PAPER 76-WA/SOL-15] 14 p0189 A77-26520

Mathematical modeling of in situ oil shale retorting 14 p0196 A77-28434

Energy demands: Modeling methods and techniques --- French book 15 p0264 A77-31595

Critical comments concerning the application of the availability concept in power plant technology 15 p0265 A77-31850

Use of a Lowry-type spatial allocation model in an urban transportation energy study 15 p0265 A77-31899

A simplified equilibrium model of the U.S. energy-economic system and its use in comparing alternatives 15 p0285 A77-33421

A parametric analysis of the structure of international energy consumption 15 p0298 A77-36242

A simple model for solar energy economics in the U.K. 15 p0298 A77-36245

International energy demand model - Twenty OECD country models 15 p0318 A77-38215

International energy evaluation system 15 p0319 A77-38216

A derived demand model of energy demand in the transportation sector 15 p0319 A77-38217

Energy R&D modeling for budgetary decisions 15 p0319 A77-38218

A United States energy model economically driven by a global growth simulation 15 p0319 A77-38220

The Energy Supply Planning Model - A working tool for regional analysis of alternative national energy policies 15 p0319 A77-38221

Heat and mass transfer analysis of Bacon-type hydrogen-oxygen fuel cells - The volume average velocity 15 p0321 A77-38531

Mark VI MHD generator studies 15 p0325 A77-39528

Calculation of end effects in open-cycle MHD power generators 15 p0329 A77-39558

Modelling of entrained-bed pulverized coal gasifiers 16 p0401 A77-41321

An econometric analysis of energy over the next 75 years 16 p0414 A77-42637

Mathematical method for determining reaction networks in chemical systems 16 p0418 A77-43093

A two-stage forecasting methodology for developing a national energy policy 16 p0419 A77-43144

On the theory and solar application of inductive grids --- wave diffraction modeling and far IR measurement 16 p0419 A77-43556

Atmospheric pollution due to multi-stack emissions of medium and large-capacity thermal or thermoelectric plants 16 p0420 A77-44178

Validity of the isotropic-distribution approximation in solar energy estimations 16 p0422 A77-44477

Calculation of a three-dimensional model for a conduction MHD machine with frame-type electrodes 16 p0425 A77-44694

Quasi-analog models of large systems of algebraic equations 16 p0433 A77-46959

Molten carbonate fuel cell model 16 p0447 A77-48737

Deterministic insolation estimates for solar total energy systems 16 p0462 A77-48847

A new mathematical model for Stirling cycle machines 16 p0465 A77-48884

Performance of air-cooled flat plate collectors 16 p0472 A77-48942

A generalized numerical model for predicting energy transfers and performance of large solar ponds 16 p0482 A77-49025

Model calculations for metal-insulator-semiconductor solar cells 16 p0500 A77-50050

Mathematical simulation and empirical determination of the aerochemical and thermal atmospheric pollution resulting from energy conversion processes [DLR-IE-553-75/1] 13 p0091 A77-10700

Mathematics for energy [PB-252463/5] 13 p0098 A77-11543

Flight data analysis and further development of variable-conductance heat pipes [NASA-CR-137953] 13 p0118 A77-14374

- Precipitation scavenging of fossil-fuel effluents  
[PB-256649/5] 13 p0124 N77-14630
- Regional energy system for the planning and  
optimization of national scenarios (RESPONS).  
Clean coal energy: Source-to-use economics  
project  
[ERDA-76-109] 14 p0222 N77-19602
- Preliminary report on simulation of a heliostat  
field  
[ERDA-TR-158] 14 p0226 N77-19782
- Energy model data base program  
[BNL-21545] 14 p0250 N77-21687
- Stochastic modelling of site wind characteristics  
[PB-261178/8] 15 p0351 N77-22775
- Mathematical models for use in planning regional  
water resources and energy systems  
[PB-261364/4] 15 p0352 N77-23022
- Development and adaptation of field modulated  
generator systems for wind energy applications  
[PB-263604/1] 15 p0357 N77-23625
- Summary description of the BOOM1 model ---  
simulating power plant impact on isolated  
communities  
[LA-6424-MS] 15 p0369 N77-25010
- A numerical model to evaluate the behavior of a  
regenerative heat exchanger at high temperature  
--- for magnetohydrodynamic generator  
[TH-76-E-66] 15 p0377 N77-26439
- Energy use for building construction  
[COO-2791-2] 15 p0391 N77-27509
- Energy Model Data Base (EMDB) using system 2000  
[BNL-21854] 16 p0541 N77-31814
- MATRICES (CIRCUITS)**  
The influence of parameter dispersion of  
electrical cells on the array power output  
16 p0420 A77-44264
- MATRICES (MATHEMATICS)**  
Project Independence Evaluation System (PIES)  
documentation. Volume 15: Standard data tables  
for PIES  
[PB-265195/8] 16 p0523 N77-29629
- MCDONNELL DOUGLAS AIRCRAFT**  
The next-generation subsonic transport  
[SAWE PAPER 1127] 13 p0016 A77-12195
- MEASURING INSTRUMENTS**  
Cooperative study of heavy duty diesel emission  
measurement methods  
[PB-257137/0] 13 p0133 N77-15541
- Precision insulation measurement under field  
conditions  
14 p0219 N77-19113
- MECHANICAL DEVICES**  
An assessment of mechanical energy storage for  
solar systems  
16 p0460 A77-48839
- MECHANICAL DRIVES**  
Self-starting, intrinsically controlled Stirling  
engine  
13 p0041 A77-12844
- Rotor/generator isolation for wind turbines  
[AIAA 77-372] 14 p0180 A77-25782
- Flywheel hybrid power trains. I - Component and  
drive selection. II - Numerical optimization and  
operation  
16 p0438 A77-47968
- Mechanical thermal motor  
[NASA-CASE-MFS-23062-1] 13 p0104 N77-12402
- Increased fuel economy in transportation systems  
by use of energy management: Second year's  
program. Executive summary  
[PB-256117/3] 13 p0108 N77-12536
- Mount for continuously orienting a collector dish  
in a system adapted to perform both diurnal and  
seasonal solar tracking  
[NASA-CASE-MFS-23267-1] 14 p0228 N77-20401
- MECHANICAL ENGINEERING**  
Improved engineering-economic model of residential  
energy use  
[ORNL-COR-8] 16 p0557 N77-33644
- MECHANICAL OSCILLATORS**  
Thermal oscillators --- free piston valveless  
closed cycle Stirling or Ericsson cycle thermal  
machines  
16 p0465 A77-48879
- MECHANICAL PROPERTIES**  
Fiber glass super flywheels  
14 p0157 A77-22143
- Collectors, pipelines, and heat storage units made  
of plastics  
14 p0202 A77-29567
- Consideration of encapsulants for photovoltaic  
arrays in terrestrial applications  
14 p0203 A77-29580
- Fabrication of solar energy concentrators based on  
polyurethane foams using new polyol and  
isocyanate compounds  
15 p0271 A77-32973
- Investigation of the mechanism of cleaning heating  
surfaces by the pulsation method  
[BLL-M-25448-(5828.4F)] 13 p0112 N77-13235
- MEDICAL SCIENCE**  
Dimensions, volume 61, no. 5  
[PB-267321/8] 16 p0542 N77-32027
- MELTING**  
Demand sensitive energy storage in molten salts  
16 p0491 A77-49102
- MEMBRANE STRUCTURES**  
Progress on the selective removal of H<sub>2</sub>S from  
gasified coal using an immobilized liquid membrane  
15 p0318 A77-38146
- MERCURY VAPOUR**  
Mercury emissions from geothermal power plants  
15 p0289 A77-34428
- MESAS**  
Cooperative geochemical resource assessment of the  
Mesa Geothermal system  
[PB-257225/3] 13 p0132 N77-15520
- METABOLISM**  
The palaeothermophilic origin of energy metabolism  
--- chemiosmotic precursor to phototrophism in  
estuarine cellular organisms  
13 p0064 A77-17895
- METAL AIR BATTERIES**  
Porous electrodes for Zn/air alkaline battery  
16 p0431 A77-46722
- An assessment of wind-powered generators for  
navigational aids  
16 p0468 A77-48900
- Heat transfer analysis of metal hydrides in  
metal-hydrogen secondary batteries  
14 p0239 N77-21597
- METAL COATINGS**  
A new Chrome Black selective absorbing surface ---  
for solar radiation  
16 p0406 A77-41585
- Considerations in the development of a high  
performance per unit cost solar collector  
16 p0487 A77-49067
- Fundamental studies of black chrome for solar  
collector use  
16 p0498 A77-49160
- Solar cell collector and method for producing same  
--- indium alloy coatings  
[NASA-CASE-LEW-12552-1] 14 p0211 N77-17564
- Radiative characteristics of metallic particle  
coatings and their applications in selective  
solar energy collectors  
16 p0545 N77-32587
- METAL COMPOUNDS**  
Investigation of metal fluoride thermal energy  
storage materials  
16 p0451 A77-48767
- METAL FIBERS**  
Structural heat conductivity of fiber metal wicks  
for heat pipes  
13 p0050 A77-14326
- Investigation of the effective heat conductivity  
of metal-fiber wicks for low-temperature heat  
pipes  
16 p0500 A77-49988
- METAL FILMS**  
Particulate nature of solar absorbing films - Gold  
black  
14 p0163 A77-22982
- Wavelength-selective surfaces for solar energy  
utilization  
14 p0204 A77-29583
- METAL FOILS**  
A geometrical spectral selective window --- for  
conversion of solar energy into heat  
14 p0148 A77-21793
- METAL HYDRIDES**  
An evaluation of the use of metal hydrides for  
solar thermal energy storage  
13 p0028 A77-12739

- HYCSOS - A solar heating, cooling and energy conversion system based on metal hydrides  
13 p0029 A77-12740
- Energy storage via calcium hydride production  
13 p0032 A77-12774
- Metal hydrides of improved heat transfer characteristics  
13 p0033 A77-12775
- Some useful relationships between the physical and thermodynamic properties of metal hydrides  
13 p0033 A77-12776
- Metallurgical considerations in the production and use of FeTi alloys for hydrogen storage  
13 p0033 A77-12777
- Performance of a hydrogen-powered transit vehicle  
13 p0033 A77-12781
- A hydride compressor  
13 p0046 A77-13336
- Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries  
15 p0278 A77-33363
- Titanium alloy hydrides - Their properties and applications  
15 p0280 A77-33385
- A thermodynamic analysis of HYCSOS, a hydrogen conversion and storage system  
15 p0280 A77-33387
- A simple approach to metal hydride alloy optimization  
15 p0281 A77-33388
- Prototype hydrogen automobile using a metal hydride  
15 p0282 A77-33398
- Metalhydrides  
[OUEL-1146/76]  
13 p0094 A77-11158
- Metal hydrides as hydrogen storage media and their applications  
[BNL-21648]  
14 p0231 A77-20589
- Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries  
14 p0239 A77-21597
- A thermodynamic analysis of HYCSOS, a hydrogen conversion and storage system  
14 p0242 A77-21622
- A simple approach to metal hydride alloy optimization  
14 p0243 A77-21624
- Prototype hydrogen automobile using a metal hydride  
14 p0244 A77-21636
- METAL MATRIX COMPOSITES**  
Evaluation of potassium titanate as a component of alkaline fuel cell matrices  
[NASA-TN-D-8341]  
13 p0094 A77-11175
- METAL OXIDE SEMICONDUCTORS**  
Heterostructures for silicon solar cells  
14 p0151 A77-21817
- Open-circuit voltage of silicon solar cells  
14 p0151 A77-21820
- Technology of GaAs metal-oxide-semiconductor solar cells  
15 p0259 A77-30739
- Thermionic converter studies at Thermo Electron  
16 p0466 A77-48887
- Thermionic converter performance with oxide collectors  
16 p0466 A77-48888
- Solar cell collector and method for producing same --- indium alloy coatings  
[NASA-CASE-LEW-12552-1]  
14 p0211 A77-17564
- High-efficiency thin-film GaAs solar cells  
[PB-258493/6]  
14 p0212 A77-17599
- METAL OXIDES**  
Advanced thermionic converter development  
13 p0043 A77-12862
- Electrode-connecting material as a central component of high-temperature fuel cells. II - Investigation of selected high-conductivity mixed oxides  
13 p0056 A77-15817
- Comparative kinetics of high-temperature reaction between H<sub>2</sub>S and selected metal oxides  
16 p0424 A77-44608
- Storage of solar energy by inorganic oxide/hydroxides  
16 p0492 A77-49109
- Reversible oxidation of metal oxides for thermal energy storage  
16 p0492 A77-49110
- Thermal efficiency of solid electrolyte fuel cells with mixed conduction  
16 p0500 A77-50199
- METAL PARTICLES**  
Black magnetic spherule fallout in the eastern Gulf of Mexico  
13 p0052 A77-14890
- Recovering metal from trash  
15 p0287 A77-33529
- METAL PLATES**  
Corrosion prevention in aluminum solar systems  
15 p0270 A77-32602
- Metallurgical analysis of a plain carbon-steel plate after long-term service in a coal gasifier [PB-268106/2]  
16 p0543 A77-32295
- METAL SHEETS**  
Energy conditions of welding with solar radiation  
16 p0421 A77-44274
- METAL SURFACES**  
Gas release during long-term operation of heat pipes  
13 p0050 A77-14328
- Study of the electrical characteristics of the boundary layer on the metal surfaces in the channels of an open cycle MHD generator  
13 p0054 A77-15666
- The Alcoa 655 selective surface for aluminum --- for solar collectors  
16 p0487 A77-49063
- METAL VAPORS**  
Study of the properties of heat pipes with liquid-metal heat-transfer agents in low-temperature regimes  
13 p0046 A77-13243
- Measurements of Sc I gf-values --- absorption spectroscopy using heat pipe oven  
13 p0058 A77-16270
- Investigation of the flow and the temperature distribution in the vapor duct of a high-temperature heat pipe  
15 p0306 A77-36708
- METAL WORKING**  
Studies of technological processes by solar energy under cosmic simulated conditions  
[IAF PAPER 77-54]  
16 p0506 A77-51411
- METAL-GAS SYSTEMS**  
Hydrogen absorption in Ti3Al  
16 p0506 A77-51372
- Ceramic coatings for components exposed to coal-gas environments: A review  
[ANL-76-124]

## MODULES

## SUBJECT INDEX

MIUS systems analysis: Initial comparisons of modular-sized integrated utility systems and conventional systems  
[ORNL-HUD-MIUS-6] 14 p0249 N77-21684

Design techniques for modular integrated utility systems --- energy production and conversion efficiency  
[NASA-TM-X-58189] 14 p0253 N77-22005

Program document for Energy Systems Optimization Program 2 (ESOP2). Volume 1: Engineering manual  
[NASA-CR-151422] 15 p0372 N77-25631

Preliminary design study of a baseline MIUS  
[NASA-TM-X-58193] 16 p0561 N77-34050

**MODULES**  
Smith multimodule solar-electric plant  
16 p0482 A77-49023

**MOJAVE DESERT (CA)**  
Wind power prediction models  
[NASA-CR-149235] 13 p0105 N77-12509

**MOLECULAR FLOW**  
Molecular gas performance of a disk generator with swirl  
15 p0326 A77-39534

**MOLECULAR GASES**  
Conversion of solar energy by photosynthetic production of molecular hydrogen  
14 p0143 A77-21316

**MOLECULAR INTERACTIONS**  
Exploration of molecular sieve zeolites for the cooling of building with solar energy  
[PB-266055/3] 16 p0517 N77-28620

**MOLECULAR STRUCTURE**  
Fractionation and structural characterization of coal liquids  
13 p0069 A77-18582

**MOLECULAR THEORY**  
Report of the subcommittee on energy-related atomic and molecular science  
[PB-264052/2] 15 p0375 N77-25673

**MONITORS**  
Microcomputer processor for monitoring of solar heated buildings  
16 p0481 A77-49015

Monitoring fluid flow by using high-frequency electromagnetic probing  
[UCRL-51579] 13 p0120 N77-14393

Design modification of Pemco Model 702909 wireless ground monitor --- for use in strip mining  
[PB-262858/4] 15 p0360 N77-24371

Design of minimum-weight diffusion batteries  
[PB-266217/9] 16 p0518 N77-28645

**MONTANA**  
Assessing low sulfur coal resources in Montana and Wyoming  
13 p0058 A77-16374

Alluvial valley floors in east-central Montana and their relation to strippable coal reserves. A reconnaissance report  
[PB-267280/6] 16 p0540 N77-31725

**MORPHOLOGY**  
Morphological analysis as a design aid: An application to solar energy conversion processes --- French book  
16 p0429 A77-46467

**MOSAICS**  
Thermographic mosaic of Yellowstone National Park  
p0001 A77-10121

**MOTOR VEHICLES**  
Alternate fuels for road vehicles of the future  
13 p0051 A77-14584

Wind tunnel investigation of devices to reduce bus aerodynamic drag  
[AIAA PAPER 77-367] 13 p0066 A77-18232

Hybrid propulsion system for motor vehicles with predominantly intermittent mode of operation  
14 p0171 A77-23900

Hybrid drive with kinetic energy store as vehicle drive  
[UCRL-TRANS-11018] 13 p0120 N77-14486

Increased fuel economy in transportation systems by use of energy management - second year's program  
[PB-257177/6] 13 p0133 N77-15930

A system consideration of the cryogenic storage tank for liquid hydrogen fueled vehicles and the resulting tank concept for a passenger car  
14 p0240 N77-21612

Hydrogen storage on highway vehicles: Update 1976  
14 p0242 N77-21614

Hydrogen vehicular fuel storage as a step in a water splitting cycle  
14 p0242 N77-21615

Hydrogen-powered highway vehicles: Applications and optimum form of fuel storage  
14 p0242 N77-21616

Methods of on-board generation of hydrogen for vehicular use  
14 p0242 N77-21617

Dynamic tests of hydrogen-powered IC engines --- for mass transit vehicles  
14 p0244 N77-21633

Evaluation of rail rapid transit and express bus service in the urban commuter market  
[PB-265236/0] 15 p0398 N77-28046

Overview and review of motor gasoline desulfurization, volume 1  
[BERC/RI-76/17-VOL-1] 16 p0551 N77-33377

Motor gasoline desulfurization study, volume 2  
[BERC/RI-76/17-VOL-2] 16 p0551 N77-33378

**MOTORS**  
Mechanical thermal motor  
[NASA-CASE-MPS-23062-1] 13 p0104 N77-12402

**MULTIPHASE FLOW**  
Pressure drawdown and buildup analyses in geothermal reservoirs  
13 p0030 A77-12753

**MUONS**  
Muon catalysed fusion for pellet ignition  
13 p0012 A77-11468

## N

**N-TYPE SEMICONDUCTORS**  
Technology of GaAs metal-oxide-semiconductor solar cells  
15 p0259 A77-30739

The theory of hydrogen production in a photoelectrochemical cell  
15 p0279 A77-33370

N-indium tin oxide/p-indium phosphide solar cells  
15 p0317 A77-38049

Theoretical treatment of the photoelectrochemical production of hydrogen --- semiconductor electrode for solar applications  
15 p0321 A77-38530

Analysis of the fill factor for n-CdS/p-CdTe solar cells  
16 p0402 A77-41433

Efficient sprayed In2O3:Sn n-type silicon heterojunction solar cell  
16 p0503 A77-50292

Effectiveness of heat-emitting coatings with variable degree of blackness  
13 p0111 N77-12893

**NAPHTHALENE**  
Vapor-liquid equilibrium of hydrogen/tetralin system at elevated temperatures and pressures  
16 p0412 A77-42906

Impact of fuel properties on jet fuel availability  
[AD-A029493] 14 p0219 N77-19278

**NASA PROGRAMS**  
Energy - Ecospace --- space law aspects of U.S. and U.S.S.R. solar power proposals  
[IAF PAPER ISL-76-59] 13 p0004 A77-10970

NASA thermionic-conversion program  
13 p0043 A77-12863

NASA electric propulsion program  
[AIAA PAPER 76-1068] 13 p0045 A77-13033

Status of the NASA Space Power Program  
[AIAA PAPER 77-505] 14 p0173 A77-23922

The NASA Hydrogen Energy Systems Technology study - A summary  
15 p0284 A77-33413

The NASA Energy Conservation Program  
[AIAA PAPER 77-1005] 16 p0405 A77-41571

Aerospace and HVACER: Spinoff '77 - Reaping the dividends --- Heating, Ventilation, Air Conditioning, and Refrigeration  
16 p0427 A77-45918

Space and energy; Proceedings of the Twenty-sixth International Astronautical Congress, Lisbon, Portugal, September 21-27, 1975  
16 p0432 A77-46787

The NASA thermionic-conversion /TEC-ART/ program  
16 p0438 A77-47960

NASA Thermionic-Conversion program  
16 p0466 A77-48886

## SUBJECT INDEX

## NATURAL GAS

- Synchronization of the ERDA-NASA 100 Kw wind turbine generator with large utility networks  
[NASA-TM-X-73613] 14 p0220 N77-19580
- Space Benefits: The secondary application of aerospace technology in other sectors of the economy  
[NASA-CR-152685] 15 p0352 N77-23010
- NASA Quiet Clean General Aviation Turbofan (QCGAT) program status  
[NASA-TM-X-73564] 15 p0353 N77-23109
- JPL basic research review --- research and advanced development  
[NASA-CR-152689] 15 p0357 N77-23894
- NASA authorization, 1978, volume 1, part 2  
[GPO-92-082] 16 p0542 N77-32031
- NASA authorization, 1978, volume 1, part 3  
[GPO-92-294] 16 p0542 N77-32032
- Spinoff 1977: An annual report  
[NASA-TM-74908] 16 p0561 N77-34049
- NATURAL GAS**
- Energy and the gas industry 13 p0005 A77-11032
- Method of accounting for the ambiguity of initial information in the optimization of regional fuel/energy balance 13 p0020 A77-12657
- Solar SNG - Large-scale production of SNG by anaerobic digestion of specially grown plant matter --- Synthetic Natural Gas 13 p0021 A77-12671
- Catalytic coal gasification for SNG production --- Synthetic Natural Gas 13 p0022 A77-12683
- The pressure divider - A device for reducing gas-pipe-line pumping-energy requirements 13 p0028 A77-12735
- The minimum combustion gas recirculation ratio for fuel gas conversion in a MHD cycle 14 p0157 A77-22552
- On the production of town gas from off-gases of the chemical processing industry 14 p0164 A77-23099
- Environmental considerations of converting fossil-fueled power plants from oil or natural gas to coal 14 p0181 A77-26043
- Gas-fired heat pumps - An emerging technology 14 p0195 A77-27891
- Unconventional petroleum and natural gas resources. II - Additional gas resources 14 p0198 A77-28760
- New hydrogen process is in the works 14 p0205 A77-29789
- Gas economy - Gas technology --- energy supply and utilization 15 p0263 A77-31576
- The role of gas utilization in environmental protection 15 p0265 A77-31849
- Synthesis of substitute natural gas on the basis of coal 15 p0268 A77-32249
- Burnout of gaseous fuel in a tube combustion chamber with longitudinally distributed air supply 15 p0272 A77-33170
- Economics of crude oil and natural gas - Cost of adding production 15 p0300 A77-36327
- Fuel gas production via Koppers-Totzek gasification - An economic analysis 15 p0301 A77-36336
- Approaches to extracting potentially recoverable hydrocarbons --- nuclear explosive mining of natural gas and crude oil 15 p0322 A77-38786
- Wolfersberg - A subterranean storage place for natural gas at a depth of 3000 m 15 p0334 A77-39669
- Natural gas storage in salt caverns 15 p0334 A77-39670
- The supply of the Federal Republic of Germany and Western Europe with energy, giving particular consideration to the oil and gas potential of the North Sea 15 p0334 A77-39673
- Hydrocarbon deposits beyond the shelf edge of the oceans 16 p0400 A77-40682
- Hydrogen by electrolysis to supplement pipeline gas supplies Technical and economic aspects  
[AIChE 77-1032] 16 p0405 A77-41569
- Helicopter offshore operations --- oil and gas exploration and production 16 p0421 A77-44437
- Testing the annular combustor of the NK-8 aero-engine on natural gas --- for stationary gas turbine installation 16 p0426 A77-45325
- Firing systems for combustion of natural gas, crude oil and bunker C-oil - Selection of parameters for thermal power station units and the applied systems of steam generation 16 p0439 A77-48092
- Utilizing methane from coalbeds 16 p0444 A77-48710
- Helium resources of the United States, 1973  
[PB-252473/4] 13 p0085 N77-10623
- The long-run marginal costs of energy  
[PB-252504/6] 13 p0085 N77-10625
- Burner design criteria for control of NOx from natural gas combustion. Volume 1: Data analysis and summary of conclusions  
[PB-254167/0] 13 p0091 N77-10686
- User's guide to petroleum industry survey data type  
[PB-256635/4] 13 p0098 N77-11544
- Isotopic characterization of Illinois natural gas 13 p0113 N77-13484
- Burner design criteria for control of NOx from natural gas combustion. Volume 2: Raw data and experimental results  
[PB-256806/1] 13 p0115 N77-13549
- Analysis of LANDSAT B imagery as a tool for evaluating, developing, and managing the natural resources of New Mexico  
[E77-10C90] 14 p0214 N77-18511
- Development of an assessment methodology for geopressured zones of the upper Gulf Coast based on a study of abnormally pressured gas fields in South Texas  
[COO-2687-4] 14 p0215 N77-18564

- Analysis of solar energy system for the GSA demonstration office building at Manchester, New Hampshire  
[PB-254179/5] 13 p0091 N77-10687
- Detecting structural heat losses with mobile infrared thermography. Part 4: Estimating quantitative heat loss at Dartmouth College, Hanover, New Hampshire  
[AD-A031803] 14 p0228 N77-20393

## NEW MEXICO

- Analysis of LANDSAT B imagery as a tool for evaluating, developing, and managing the natural resources of New Mexico  
[E77-10090] 14 p0214 N77-18511
- Preliminary assessment of a geothermal energy reservoir formed by hydraulic fracturing  
[LA-UR-76-1672] 14 p0221 N77-19597
- Shallow solar ponds for industrial process heat: The ERDA-SOHIO project  
[UCRL-78288] 14 p0232 N77-20601
- United States special format report: Performance of the Schio Solar Water Heating System using large area plastic collectors (Grants, New Mexico)  
[SAN/1038-76/1] 15 p0365 N77-24606
- Solar radiation availability for New Mexico  
[SAND-77-0004] 16 p0558 N77-33654

## NEW YORK

- Hydrogen cycle peak-shaving on the New York State Grid using fuel cells  
14 p0199 A77-29094
- Electric energy alternatives appraisal for New York State  
16 p0413 A77-42632
- Electric energy supply alternatives for New York. Phase 2: An appraisal of electrical energy alternatives available to the State of New York  
[PB-249887/4] 13 p0101 N77-11575
- An analysis of the feasibility of windmills for power generation in New York State  
[RPT-TA-17] 15 p0380 N77-26638
- Solar energy applications and related legislation  
[PB-267901/7] 16 p0539 N77-31666

## NEW ZEALAND

- Wave power --- potentially available in New Zealand  
16 p0418 A77-43011

## NICKEL

- Optical properties of selectively absorbing Ni/Al<sub>2</sub>O<sub>3</sub> composite films --- of solar collectors  
16 p0502 A77-50281

## NICKEL ALLOYS

- Titanium-containing Raney nickel catalyst for hydrogen electrodes in alkaline fuel cell systems  
13 p0064 A77-18019
- A new family of hydrogen storage alloys based on the system nickel-mischmetal-calcium  
16 p0457 A77-48817
- Proceedings of 2nd Workshop on Materials Problems Associated with the Development of Geothermal Energy Systems  
[PB-261349/5] 14 p0252 N77-21725

## NICKEL CADMIUM BATTERIES

- Small space station electrical power system design concepts  
13 p0040 A77-12835
- Rechargeable batteries in Japan --- Book  
16 p0431 A77-46783
- Review of electrochemical impregnation for nickel cadmium cells --- aerospace applications  
[NASA-CR-155155] 16 p0552 N77-33601

## NICKEL COATINGS

- Improved black nickel coatings for flat plate solar collectors  
14 p0204 A77-29585
- Ellipsometry in the study of selective radiation-absorbing surfaces --- for solar energy  
16 p0406 A77-41581
- Solar absorption characteristics of several coatings and surface finishes --- for solar energy collectors  
[NASA-TM-X-3509] 14 p0229 N77-20567

## NICKEL HYDROGEN BATTERIES

- Oxygen accumulation and electrolyte loss in nickel hydrogen cells  
14 p0195 A77-28157
- Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries  
15 p0278 A77-33363

## NICKEL ZINC BATTERIES

- Advances in component technology for nickel-zinc cells  
13 p0025 A77-12710
- The nickel-zinc battery - A viable alternative for vehicle powering  
14 p0160 A77-22894
- Near-term advanced electric vehicle batteries  
14 p0161 A77-22909

Development of large size nickel-zinc cells for electric vehicles  
14 p0161 A77-22911

Development of nickel-zinc batteries for aircraft  
14 p0195 A77-28148

New separators for nickel-zinc batteries  
[NASA-TM-X-3465] 13 p0121 N77-14585

Fabrication and testing of large size nickel-zinc cells  
[NASA-CR-135200] 16 p0529 N77-30610

Design and cost study of a zinc/nickel oxide battery for electric vehicle propulsion  
[ANL-K-76-3543-1] 16 p0556 N77-33635

## NIOBIUM ALLOYS

Power transmission project  
[BNL-22202] 16 p0551 N77-33426

## NIOBIUM STABILITIES

Comparative cost study of the processes for producing niobium-tin (Nb<sub>3</sub>Sn) superconducting tapes for their application to power transmission lines  
[ERDA-76-160] 15 p0387 N77-26999

Design of multifilamentary Nb<sub>3</sub>Sn superconductor tailored to the requirements of a dc superconducting power transmission line  
[LA-UR-77-99] 15 p0389 N77-27311

## NITROGEN

The formation of nitrogen oxides from fuel nitrogen  
[PB-252462/7] 13 p0092 N77-10717

## NITROGEN COMPOUNDS

Effects of nitrogen fertilizers and combustion on the stratospheric ozone layer  
15 p0290 A77-34895

Conversion and storage of wind energy as nitrogenous fertilizer  
16 p0450 A77-48762

Effect of nitrogenous bases on the thermal stability of jet fuels  
[NASA-TM-75131] 15 p0388 N77-27243

## NITROGEN DIOXIDE

Stratospheric heating due to absorption of solar radiation by NO<sub>2</sub>  
13 p0013 A77-11568

Heat transfer and resistance in the flow of nonequilibrium dissociating nitrogen dioxide  
13 p0058 A77-16213

## NITROGEN OXIDES

Performance and NO<sub>x</sub> emissions modeling of a jet ignition prechamber stratified charge engine  
[SAE PAPER 760161] 13 p0016 A77-12150

Some considerations in determining oxides of nitrogen in stack gases by chemiluminescence analyzer  
13 p0064 A77-17541

Water induction in hydrogen-powered IC engines  
14 p0171 A77-23721

Thermodynamic analysis of the formation of the oxides of nitrogen and sulfur in fuel combustion products  
15 p0269 A77-32506

Formation of sulfuric anhydride and nitrogen oxides in boilers at variable operating modes  
15 p0272 A77-33174

Chemical reduction of SO<sub>3</sub>, particulates and NO<sub>x</sub> emissions  
15 p0294 A77-35188

Symposium on Combustion /International/, 16th, Massachusetts Institute of Technology, Cambridge, Mass., August 15-20, 1976, Proceedings  
16 p0439 A77-48158

NO<sub>x</sub> from fuel nitrogen in two-stage combustion  
16 p0439 A77-48169

Environmental aspects of low Btu gas combustion --- nitrogen oxide emissions from power plants  
16 p0440 A77-48178

Burner design criteria for control of NO<sub>x</sub> from natural gas combustion. Volume 1: Data analysis and summary of conclusions  
[PB-254167/0] 13 p0091 N77-10686

The proceedings of the NO<sub>x</sub> Control Technology Seminar  
[PB-253661/3] 13 p0092 N77-10707

The formation of nitrogen oxides from fuel nitrogen  
[PB-252462/7] 13 p0092 N77-10717

Proceedings: Symposium on Flue Gas Desulfurization, volume 1  
[PB-255317/0] 13 p0110 A77-12597

- Burner design criteria for control of NOx from natural gas combustion. Volume 2: Raw data and experimental results  
[PB-256806/1] 13 p0115 N77-13549
- Burner criteria for NOx control. Volume 1: Influence of burner variables on NOx in pulverized coal flames  
[PB-259911/6] 14 p0234 N77-20639
- Technology and economics of flue gas NOx oxidation by ozone  
[PB-261917/9] 15 p0350 N77-22700
- NITROSIL CHLORIDES**
- Hydrogen production by means of reactor heat using halogens and reversible electrochemical methods in a closed cycle process  
15 p0276 A77-33350
- Hydrogen production by means of reactor heat using halogens and reversible electrochemical methods in a closed cycle process  
14 p0238 N77-21582
- NITROUS OXIDES**
- Production of atmospheric nitrous oxide by combustion  
13 p0061 A77-16922
- Effects of nitrogen fertilizers and combustion on the stratospheric ozone layer  
15 p0290 A77-34895
- NOAA SATELLITES**
- Remote sensing of geothermal activities of the volcanoes Aetna, Stromboli and Vesuv by means of infra-red NOAA-VHRR-satellite data --- Italy  
13 p0104 N77-12485
- NOISE GENERATORS**
- Noise mechanism separation and design considerations for low tip-speed, axial-flow fans  
13 p0046 A77-13339
- NOISE MEASUREMENT**
- Development of cumulative noise measure for the prediction of general annoyance in an average population  
15 p0320 A77-38497
- NOISE POLLUTION**
- Emissions from compressor stations --- noise pollution  
15 p0287 A77-33545
- Development of cumulative noise measure for the prediction of general annoyance in an average population  
15 p0320 A77-38497
- NONAQUEOUS ELECTROLYTES**
- Solid polymer electrolyte (SPE) fuel cell technology program, phase 1/1A --- design and fabrication  
[NASA-CR-151506] 16 p0553 N77-33605
- Solid polymer electrolyte (SPE) fuel cell technology program, phase 2/2A --- testing and evaluations  
[NASA-CR-151507] 16 p0553 N77-33606
- NONDESTRUCTIVE TESTS**
- Development of nondestructive evaluation methods for coal-conversion systems  
[CONF-760472-2] 14 p0216 N77-18567
- NONEQUILIBRIUM IONIZATION**
- Design of closed-cycle MHD generator with nonequilibrium ionization and system  
15 p0303 A77-36381
- Non equilibrium ionization in a linear magnetohydrodynamic generator, using a high pressure supersonic argon flow  
15 p0309 A77-36817
- NONEQUILIBRIUM PLASMAS**
- Non-equilibrium MHD power generation using non-seeded argon plasma  
13 p0004 A77-11022
- Construction of two-dimensional steady-state solution of equations of a nonequilibrium magnetized plasma  
13 p0065 A77-18130
- Two-dimensional analysis of end effects in diagonal type nonequilibrium plasma MHD generator  
15 p0297 A77-36097
- Ionization instability in non-equilibrium MHD generators  
16 p0416 A77-42894
- On the construction of plane stationary solutions of equations for nonequilibrium magnetized plasma  
16 p0420 A77-43705
- NONLINEAR PROGRAMMING**
- An optimization approach to the design of the preheater for a magnetohydrodynamic powerplant  
15 p0318 A77-38207
- NONUNIFORM FLOW**
- Influence of flow nonuniformity on plasma instability at the channel wall  
15 p0269 A77-32520
- NONUNIFORM PLASMAS**
- Ohm's law for plasmas with non-isotropic inhomogeneities and its effects on the performance of MHD generators  
15 p0329 A77-39555
- NORTH AMERICA**
- North American freight transportation - Near or incipient chaos  
16 p0410 A77-41943
- Perpetually renewable biomass prospects - A comparison of U.S. and Canadian ecosystem carrying capacities vs needs  
16 p0489 A77-49084
- A parametric study of critical fuel costs for solar heating in North America  
16 p0493 A77-49118
- Crude oil supply alternatives for the Northern Tier states  
[PB-255991/2] 13 p0107 N77-12530
- NORTH CAROLINA**
- Evaluation and targeting of geothermal energy resources in the southeastern United States  
[VPI-SU-5103-1] 14 p0225 N77-19642
- An economic and performance design study of solar preheaters for domestic hot water heaters in North Carolina  
[NASA-CR-2813] 14 p0228 N77-20559
- NORTH SEA**
- The supply of the Federal Republic of Germany and Western Europe with energy, giving particular consideration to the oil and gas potential of the North Sea  
15 p0334 A77-39673
- Antenna design for offshore satellite links  
16 p0442 A77-48493
- NORTHERN HEMISPHERE**
- Power resource estimate of ocean surface waves  
13 p0071 A77-18790
- NOZZLE DESIGN**
- Experimental study of accelerating MHD-generator jets with supersonic flow distortion  
15 p0269 A77-32519
- NOZZLE FLOW**
- The influence of the Reynolds number on the profiles of velocity and concentration in free jets of different density  
13 p0069 A77-18500
- NUCLEAR AUXILIARY POWER UNITS**
- Radioisotope power sources in the terrestrial and marine environment  
14 p0196 A77-28170
- NUCLEAR DEVICES**
- Approaches to extracting potentially recoverable hydrocarbons --- nuclear explosive mining of natural gas and crude oil  
15 p0322 A77-38786
- NUCLEAR ELECTRIC POWER GENERATION**
- PACER - A practical fusion power concept  
13 p0035 A77-12793
- The nuclear spinner for Satcom applications --- comparing nuclear and solar power supplies  
13 p0041 A77-12838
- Does solar energy demand more land surface, and more materials or energy investment than nuclear energy or fossil fuels - A preliminary study  
14 p0155 A77-21857
- The principles of system studies in nuclear energy research  
14 p0157 A77-22342
- Economics of alternative energy sources  
15 p0288 A77-33755
- Energy supply of the Federal Republic of Germany  
16 p0419 A77-43566
- A comparison of the economics of nuclear and solar power  
16 p0485 A77-49049
- Nuclear-powered Hysat spacecraft: Comparative design study  
[ERDA-SHS-3063-8] 13 p0094 A77-11108
- Costs of alternative sources of electricity  
[PB-255765/0] 13 p0107 N77-12528

# SUBJECT INDEX

# NUCLEAR FUSION

Nuclear unit productivity analysis  
 [PB-257553/8] 13 p0132 N77-15528  
 Chemical engineering side of nuclear fusion power  
 [PPPL-1303] 15 p0376 N77-25965  
 Energy technologies for the West: Fission as an  
 option  
 [TID-27432] 16 p0538 N77-31647  
 Regional economic impacts of nuclear power plants  
 [BNL-50562] 16 p0540 N77-31676  
 Environmental cost/benefit analysis for fusion  
 power plants  
 [BNWL-2028] 16 p0549 N77-32893  
 Public acceptance of nuclear power  
 [IAEA-CN-36/507] 16 p0555 N77-33630  
 Role of nuclear power in meeting future U.S.  
 energy needs  
 [IAEA-CN-36/396] 16 p0560 N77-33677  
 Technical and economic studies of small reactors  
 for supply of electricity and steam  
 [IAEA-CN-36/398] 16 p0560 N77-33678  
 Nuclear power aspects in an oil and coal producing  
 country  
 [IAEA-CN-36/175] 16 p0560 N77-33681  
 Survey of nuclear fuel cycle economics: 1970 - 1985  
 [ORNL-TM-5703] 16 p0561 N77-33968  
**NUCLEAR ELECTRIC PROPULSION**  
 ERDA's Bicentennial Thermionic Research and  
 Technology Program 13 p0042 A77-12861  
**NUCLEAR ENERGY**  
 Fusion power --- nuclear energy technology  
 development 13 p0005 A77-11034  
 Problems involved in improving the industrial fuel  
 and energy balance 13 p0012 A77-11347  
 Nuclear power - Compared to what --- energy  
 alternatives for electric power generation  
 13 p0017 A77-12234  
 Is nuclear energy economically viable ---  
 competition with coal 13 p0045 A77-12933  
 Air, water, nuclear power make gasoline 13 p0045 A77-12935  
 Environment and energy production after the year  
 2000 13 p0056 A77-16203  
 Economics of nuclear-electrolytic hydrogen  
 15 p0285 A77-33419  
 Statistical utility theory for comparison of  
 nuclear versus fossil power plant alternatives  
 15 p0291 A77-35015  
 Comparative energy policies of France, England,  
 and Germany. II - Electricity and nuclear energy  
 15 p0324 A77-39505  
 The significance of nuclear energy for satisfying  
 future energy requirements 15 p0333 A77-39649  
 Energy resources available to man 16 p0402 A77-41422  
 Some impacts of restricting nuclear energy  
 availability 16 p0415 A77-42857  
 Generalized criterion for controlled fusion  
 16 p0436 A77-47368  
 Synthetic carbonaceous fuels and feedstocks from  
 oxides of carbon and nuclear power 16 p0444 A77-48711  
 Critical materials problems in energy production  
 --- Book 16 p0509 A77-51627  
 Hydrogen production process by means of nuclear  
 energy 14 p0237 N77-21553  
 Competitively priced hydrogen via high-efficiency  
 nuclear electrolysis 14 p0237 N77-21558  
 Hydrogen production from coal using a nuclear heat  
 source 14 p0238 N77-21568  
 Energy storage possibilities of atomic hydrogen  
 14 p0245 N77-21643  
 Economics of nuclear - electrolytic hydrogen  
 14 p0247 N77-21659  
 Report of the National Research Council Committee  
 on Nuclear and Alternative Energy Systems  
 [PB-263595/1] 15 p0367 N77-24633

**NUCLEAR FISSION**  
 Energy technologies for the West: Fission as an  
 option  
 [TID-27432] 16 p0538 N77-31647  
**NUCLEAR FUELS**  
 The reprocessing of nuclear fuels 13 p0055 A77-15807  
 Concept of a fusion burner 13 p0061 A77-17014  
 Advanced fuels for inertial confinement --- in  
 laser fusion 13 p0061 A77-17016  
 Combined utilization of nuclear and organic fuels  
 15 p0272 A77-33159  
 Comparative breeding characteristics of fusion and  
 fast reactors 15 p0297 A77-36124  
 Design considerations for a mixed advanced fuel  
 fusion reactor 15 p0334 A77-39747  
 Symposium on Clean Fusion, 1st, Washington, D.C.,  
 April 30, 1976, Proceedings 16 p0435 A77-47355  
 Studies of deuterium-fueled Tokamak reactors  
 16 p0435 A77-47357  
 Advanced fuel nuclear reaction feasibility using  
 laser compression. I 16 p0435 A77-47358  
 Advanced fuel nuclear reaction feasibility using  
 laser compression. II 16 p0435 A77-47359  
 Impact of advanced fuel fusion on electric power  
 transmission 16 p0436 A77-47361  
 Advanced fuel fusion experimentation with  
 wigwag cells II and III - Orbit diagnostics and  
 lifetime measurements 16 p0436 A77-47362  
 Conditions for a boron fusion reactor in the MeV  
 range 16 p0436 A77-47366  
 Advanced fuel fusion application to manned space  
 propulsion 16 p0436 A77-47367  
 Unified criterion for proximity to controlled fusion  
 16 p0436 A77-47369  
 An assessment of the materials needs for a Kr-85  
 fuel capsule 16 p0462 A77-48855  
 Gaseous fuel reactors for power systems 16 p0468 A77-48906  
 Environmental survey of the reprocessing and waste  
 management portions of the LWR fuel cycle: A  
 task force report  
 [PB-258316/9] 14 p0209 N77-16879  
 ENFORM: An energy information system  
 [BNWL-2195] 16 p0542 N77-32016  
 Role of nuclear power in meeting future U.S.  
 energy needs  
 [IAEA-CN-36/396] 16 p0560 N77-33677  
 Survey of nuclear fuel cycle economics: 1970 - 1985  
 [ORNL-TM-5703] 16 p0561 N77-33968

# SUBJECT INDEX

# OCEAN THERMAL ENERGY CONVERSION

Gaseous fuel reactors for power systems  
16 p0468 A77-48906

Will the large-scale production of hydrogen be  
part of the energy problem or part of its solution  
[UCRL-76444] 13 p0687 N77-10652

The contribution of nuclear technology toward the  
solution of energy problems  
[INIS-MF-1867] 13 p0100 N77-11565

Heat pipes with a non-condensable gas and their  
application in nuclear apparatus and instruments  
13 p0120 N77-14387

Energy storage and transfer with homopolar machine  
for a linear theta-pinch hybrid reactor  
[LA-6174] 14 p0214 N77-17892

Hydrogen production by water decomposition using a  
combined electrolytic thermochemical cycle  
14 p0238 N77-21589

An examination of the stirred reactor as a tool  
for the determination of rate constants of the  
H2-O2 combustion reactions  
14 p0245 N77-21644

Will the large-scale production of hydrogen be  
part of the energy problem or part of its  
solution?  
14 p0246 N77-21654

Internalizing social costs in power plant siting:  
Some examples for coal and nuclear plants in the  
United States  
[CONF-761103-16] 15 p0386 N77-26816

Some thoughts on optimizing long-distance heat  
transport systems and their storage facilities  
[AD-A038253] 16 p0516 N77-28608

National Research Council Committee on Nuclear and  
Alternative Energy Systems  
[TID-27435] 16 p0538 N77-31655

**NUCLEAR RESEARCH**  
World survey of major facilities in controlled  
fusion research --- Eck  
13 p0067 A77-18264

Electron beam research at Sandia Laboratories, USA  
--- for inertial confinement fusion  
14 p0138 A77-20706

The national laser-fusion program  
14 p0168 A77-23502

Prospects for fusion energy  
14 p0178 A77-24928

The concept of 'nuclear hydrogen production' and  
progress of work in the Nuclear Research Center  
Juelich  
15 p0273 A77-33328

Adapting the experience of DOD/Industry to  
developing fusion power reactors  
[AIAA 77-1019] 16 p0404 A77-41561

Symposium on Engineering Problems of Fusion  
Research, 6th, San Diego, Calif., November  
18-21, 1975, Proceedings  
16 p0425 A77-44975

**NUCLEAR RESEARCH AND TEST REACTORS**  
Review of the state of the art with Tokamaks in USSR  
[EJR-CEA-FC-839-TR] 16 p0541 N77-31981

**NUCLEONICS**  
The NASA thermionic-conversion /TEC-ART/ program  
16 p0438 A77-47960

**NUMERICAL ANALYSIS**  
Numerical solutions for steady free convection in  
island geothermal reservoirs  
14 p0174 A77-24205

Reduction of the transverse edge effect in linear  
machines with homogeneous secondary armature by  
changing the air gap configuration  
15 p0310 A77-36939

Wind power studies: Field measurement priorities  
for numerical analysis of wind energy  
[UCRL-50034-76-3] 14 p0249 N77-21681

Wind power studies: Regional wind energy  
measurements  
[UCRL-50034-76-4] 15 p0392 N77-27527

Large scale scientific computation via minicomputer  
[PB-267575/9] 16 p0541 N77-31823

Numerical simulation of United States Gulf Coast  
geothermal geopressured reservoirs  
16 p0545 N77-32585

**NUMERICAL CONTROL**  
Transport systems guarantee efficient utilization  
of energy resources  
13 p0053 A77-15048

## NUMERICAL WEATHER FORECASTING

The influence of subsurface energy storage on  
seasonal temperature variations  
13 p0067 A77-18351

## 0

## OASES

Energy in an oasis: Geothermal resource  
development in the Imperial Valley of California  
16 p0552 N77-33598

## OCEAN BOTTOM

Submarine geothermal resources  
13 p0010 A77-11322

## OCEAN CURRENTS

Energy from the oceans - Requirements and  
capabilities  
15 p0272 A77-33141

## OCEAN SURFACE

Power resource estimate of ocean surface waves  
13 p0071 A77-18790

Hydrodynamic basis of wave-energy converters of  
channel form  
15 p0267 A77-32211

Use of Landsat data for the detection of marine  
oil slicks --- for oil exploration and pollution  
control  
15 p0267 A77-32244

Wave power --- potentially available in New Zealand  
16 p0418 A77-43011

Ocean wave power  
16 p0499 A77-49349

## OCEAN THERMAL ENERGY CONVERSION

The atmosphere and the oceans as energy sources  
13 p0005 A77-11036

Power production from high temperature geothermal  
waters  
13 p0030 A77-12751

The utilization and economics of low temperature  
geothermal water for space heating  
13 p0030 A77-12756

Energy transmission from ocean thermal energy  
conversion plants  
13 p0032 A77-12773

OTEC - Aerospace and ocean engineering in  
partnership --- Ocean Thermal Energy Conversion  
[AIAA PAPER 77-296] 13 p0066 A77-18227

Thermal energy of oceans  
14 p0153 A77-21833

Electricity from the thermal power of the sea  
14 p0176 A77-24218

Heat exchangers for the Ocean Thermal Energy Power  
Plant  
14 p0176 A77-24219

Solar power from the oceans --- ocean thermal  
energy conversion  
14 p0190 A77-26724

Energy from the oceans - Requirements and  
capabilities  
15 p0272 A77-33141

Design of an ocean thermal energy plant ship to  
produce ammonia via hydrogen  
15 p0274 A77-33335

Ocean thermal energy delivery systems based on  
chemical energy carriers  
15 p0279 A77-33375

The OTEC answer to OPEC - Solar sea power  
15 p0303 A77-36409

Sea water - The energy elixir --- ocean thermal,  
tide and wave energy conversion  
15 p0320 A77-38446

Perspectives on implementing OTEC power --- Ocean  
Thermal Energy Conversion  
[AIAA 77-1024] 16 p0404 A77-41564

The oceans as a source of electricity  
16 p0412 A77-42401

Technical and economic feasibility of Ocean  
Thermal Energy Conversion  
16 p0481 A77-49018

Economic aspects of Ocean Thermal Energy Conversion  
16 p0484 A77-49041

Preliminary research on Ocean Energy Industrial  
Complexes  
16 p0484 A77-49042

Studies of biofouling in ocean thermal energy  
conversion plants

- Management plan for enhanced oil recovery. Volume 1: Program strategy  
[ERDA-77-15/1-VOL-1] 16 p0536 N77-31629
- Research and development in enhanced oil recovery. Part 1: Overview  
[ERDA-77-20/1] 16 p0537 N77-31637
- National benefits/costs of enhanced oil recovery research  
[FE-2021-4] 16 p0538 N77-31649
- Research and development in enhanced oil recovery. Part 2: The program  
[ERDA-77-20/2] 16 p0538 N77-31650
- Research and development in enhanced oil recovery. Part 3: The methodology  
[ERDA-77-20/3] 16 p0538 N77-31651
- Thermodynamic analysis of an oil reclamation process  
[PB-268524/6] 16 p0548 N77-32614
- OIL SLICKS**
- Use of Landsat data for the detection of marine oil slicks --- for oil exploration and pollution control  
15 p0267 A77-32244
- Use of a carbon dioxide laser in remote detection of petroleum oil pollution at sea  
16 p0433 A77-47080
- Tests of oil recovery devices in broken ice fields, phase 2  
[AD-A025748] 13 p0110 N77-12572
- OILS**
- Storage in oil of off-peak thermal energy from large power stations  
13 p0027 A77-12730
- Oil and fat absorbing polymers  
[NASA-CASE-NPO-11609-2] 16 p0532 N77-31308
- ONBOARD EQUIPMENT**
- Methods of on-board generation of hydrogen for vehicular use  
15 p0280 A77-33383
- Automotive fuel-saving system with on-board hydrogen generation and injection into I. C. engines  
15 p0280 A77-33384
- OPERATING TEMPERATURE**
- The analysis of the temperature regimes of the operation of a gas-regulated heat pipe  
13 p0064 A77-17924
- Solar energy for the Australian food processing industry  
14 p0181 A77-25900

# OPERATIONAL HAZARDS

# SUBJECT INDEX

Optimum solar collector operation for maximizing cycle work output  
15 p0255 A77-30313

**OPERATIONAL HAZARDS**  
Relative hazard of nuclear power stations and fossil-fuel power stations to the environment  
13 p0067 A77-18323  
Hydrogen safety problems --- fuel systems hazard prevention  
15 p0283 A77-33402

**OPERATIONAL PROBLEMS**  
Experience in putting the Kiskadee hydroelectric power plant on line  
13 p0010 A77-11301  
North American freight transportation - Near or incipient chaos  
16 p0410 A77-41943  
Studies of biofouling in ocean thermal energy conversion plants  
16 p0484 A77-49044  
Nuclear unit productivity analysis [PB-257553/8]  
13 p0132 A77-15528  
Research into the impact on electrical equipment from variable speed operation of pumped-storage plants [PB-268323/3]  
16 p0548 A77-32618

**OPERATIONS RESEARCH**  
Trade-off analyses for multi-objective transportation plans  
13 p0102 A77-11911  
Analysis of information systems for hydropower operations [NASA-CR-149373]  
13 p0129 A77-15497  
Operations research investigations of satellite power stations [NASA-TM-X-73372]  
14 p0236 A77-21547  
Energy models and large-scale systems optimization [AD-A033736]  
15 p0365 A77-24619

**OPTICAL COUPLING**  
Development of 20 percent efficient solar cell [PB-255903/7]  
13 p0108 A77-12548

**OPTICAL EQUIPMENT**  
Geometric katoptrics - Applications to solar energy  
14 p0166 A77-23383  
High-sensitivity detection procedures and devices for angular variations - Application to automatic control of a solar furnace heliostat  
14 p0166 A77-23386  
Solar collectors using total internal reflections  
14 p0204 A77-29596

**OPTICAL MEASUREMENT**  
Investigation of p-Al/x/Ga/1-x/As-n-GaAs heterojunction cells by means of optical measurements and photoluminescence spectra  
14 p0143 A77-21311  
Evaluation of cadmium stannate films for solar heat collectors  
14 p0198 A77-29021  
The use of lasers for the inspection of heliotechnical reflectors  
15 p0286 A77-33432  
Using lasers to inspect solar-energy reflectors  
16 p0427 A77-45545  
In situ optical measurement of automobile exhaust gas particulate size distributions - Regular fuel and methanol mixtures  
16 p0440 A77-48173

**OPTICAL MEASURING INSTRUMENTS**  
Optical measurements of mean particle size in the exhaust of a coal-fired MHD generator [WSS/CI PAPER 76-53]  
16 p0508 A77-51611

**OPTICAL PROPERTIES**  
Effect of optical properties of a surface exposed to solar radiation on the radiation balance  
13 p0052 A77-14928  
Study and materialization of a selective surface designed for direct thermal conversion of solar energy - Application to medium temperature range  
13 p0069 A77-18496  
An inflatable solar concentrator for a high temperature storage system  
13 p0074 A77-19064  
Double-reflection solar energy concentrators  
13 p0074 A77-19067  
Optical and thermal properties of Compound Parabolic Concentrators  
14 p0157 A77-22641

Selective behavior and selective layer deposition in the case of light-transparent covers --- for solar collectors  
14 p0202 A77-29564

Wavelength-selective surfaces for solar energy utilization  
14 p0204 A77-29583

Optical properties of selectively absorbing Ni/Al<sub>2</sub>O<sub>3</sub> composite films --- of solar collectors  
16 p0502 A77-50281

Cast polycrystalline silicon Schottky-barrier solar cells  
16 p0503 A77-50295

Symposium on the Fundamental Optical Properties of Solids Relevant to Solar Energy Conversion [PB-256615/6]  
13 p0108 A77-12538

The optical properties of chromium oxide films and the high temperature stabilization of silver films for photothermal solar energy conversion  
13 p0128 A77-15484

Optical study of fixed spherical solar collectors [LAS-PRC-76-01]  
15 p0373 A77-25653

**OPTICAL PUMPING**  
Analysis of the sun pumped laser cone optics [AD-A034284]  
15 p0361 A77-24483

**OPTICAL REFLECTION**  
A novel cover slide for solar cells  
14 p0148 A77-21789  
The geometry of catoptric light. II - An application to solar energy  
16 p0417 A77-42959  
Use of calculated displaced shapes to define the reflected light pattern from a focused collector  
16 p0473 A77-48948  
Lightweight reflector assembly [NASA-CASE-WPO-13707-1]  
16 p0518 A77-28933

**OPTICAL TRACKING**  
Performance of two fixed-mirror solar concentrators for process heat  
13 p0074 A77-19065  
Experimental evaluation of a stationary spherical reflector tracking absorber solar energy collector [ASME PAPER 76-WA/HT-10]  
14 p0186 A77-26470

**OPTICAL WAVEGUIDES**  
Characteristics of a system for transmitting concentrated solar radiation  
13 p0051 A77-14578  
Features of systems for transmission of concentrated solar radiation  
15 p0290 A77-34972

**OPTICS**  
Geometric katoptrics - Applications to solar energy  
14 p0166 A77-23383  
Optics in solar energy utilization II; Proceedings of the Seminar, San Diego, Calif., August 24, 25, 1976  
14 p0203 A77-29576

**OPTICAL CONTROL**  
Optimal control of flow in low temperature solar heat collectors  
13 p0019 A77-12409  
A new method for collector field optimization --- computerized simulation of solar tower facility  
13 p0074 A77-19070  
Influence of the intended use of an aircraft on the optimal parameters of gas-turbine power plants  
15 p0266 A77-32086  
Optimization of automotive engine fuel economy and emissions  
15 p0320 A77-38373  
An algorithm for solving the problem of the optimal control of transient processes in an electrical energy system  
16 p0437 A77-47752  
Optimization of confinement in a toroidal plasma subject to strong radial electric fields  
16 p0438 A77-47958  
Automatic optimization of operating modes in thermionic electrical power generators [IAF PAPER 77-142]  
16 p0507 A77-51445

**OPTIMIZATION**  
Optimization of current source operation in pulse mode --- for electrochemical generators [IAF PAPER 76-255]  
13 p0003 A77-10952  
Optimization criteria for solar and wind power systems  
13 p0015 A77-11923

# SUBJECT INDEX

# ORGANIC MATERIALS

Method of accounting for the ambiguity of initial information in the optimization of regional fuel/energy balance 13 p0020 A77-12657

The use of program GEOTHEM to design and optimize geothermal power cycles 13 p0031 A77-12758

Economic optimization of the energy transport component of a large distributed solar power plant 13 p0037 A77-12807

Collector field optimization for a solar thermal electric power plant 13 p0038 A77-12811

Optimizing solar cooling systems 13 p0047 A77-13502

Dual optimum aerodynamic design for a conventional windmill 13 p0048 A77-13704

Optimization of the geometry of switching buses for thermoelements in thermoelectric generators 13 p0052 A77-14951

Theoretical aspects of optimization of aviation gas turbine engine design variables 13 p0063 A77-17762

Method of investigation, experimental results, and optimization criteria for photoelectrochemical converters 14 p0151 A77-21814

Optimization of the sizing of a solar power plant in order to obtain a minimal kWh cost 14 p0154 A77-21845

Simulation and cost optimization of solar heating of buildings in adverse solar regions 14 p0180 A77-25897

Windmill optimization 14 p0183 A77-26086

Solar thermal electric power systems - Manufacturing cost estimation and systems optimization [ASME PAPER 76-WA/HT-14] 14 p0186 A77-26474

Solar heating in the United States [ASME PAPER 76-WA/SOL-8] 14 p0188 A77-26513

Optimal mass flow rates through flat plate solar collector panels [ASME PAPER 76-WA/SOL-19] 14 p0190 A77-26524

Principles and application of systems in engineering as rational aid for economy, state, and research; Meeting, Bonn, West Germany, November 9, 10, 1976, Communications 14 p0191 A77-27032

Optimum solar collector operation for maximizing cycle work output 15 p0255 A77-30313

Optimization of composite flywheel design 15 p0260 A77-31044

Optimal tap water heating 15 p0261 A77-31375

Performance optimization of an air-to-air missile design 15 p0289 A77-34298

An optimization approach to the design of the preheater for a magnetohydrodynamic powerplant 15 p0318 A77-38207

Multiparameter optimization studies on geothermal energy cycles 16 p0456 A77-48804

Simplex optimization of carbon electrodes for the hydrogen oxygen membrane fuel cell 16 p0500 A77-50200

Pumped storage optimization in generation systems 16 p0506 A77-51284

Optimized selective coatings for solar collectors [NASA-TM-X-73498] 13 p0097 A77-11529

Burner criteria for NOx control. Volume 1: Influence of burner variables on NOx in pulverized coal flames [PB-259911/6] 14 p0234 A77-20639

A simple approach to metal hydride alloy optimization 14 p0243 A77-21624

Optimization of fusion-driven fissioning systems [FPPI-12E5] 15 p0342 A77-22469

An economic analysis of solar water and space heating [DSE/2322-1] 15 p0363 A77-24588

Optimization technique for geothermal power plants using a binary fluid cycle [BNWL-2155] 15 p0394 A77-27546

Optimization models for planning economic development [AD-A039165] 16 p0531 A77-31024

Power loss problems in EXTRAP coil systems [TRITA-PP0-77-02] 16 p0549 A77-32910

## ORBITAL ASSEMBLY

The construction of satellite solar power stations from non-terrestrial materials [AIAA PAPER 77-354] 13 p0066 A77-18259

Fabrication and assembly of large composite structures in space [AIAA PAPER 77-543] 15 p0266 A77-32065

New options for satellite power systems /SPS/ [AIAA PAPER 77-1028] 16 p0419 A77-43392

Power satellite construction location considerations --- orbital assembly for solar energy conversion 16 p0463 A77-48869

Solar power satellite construction - Issues and needed technology 16 p0464 A77-48873

Space construction base operations in support of solar power satellite development 16 p0468 A77-48907

The assembly of large structures in space --- radio astronomy telescope and microwave antenna 16 p0524 A77-29770

## ORBITAL MECHANICS

Space-based solar power conversion and delivery systems study. Volume 2: Engineering analysis of orbital systems [NASA-CR-150147] 13 p0129 A77-15495

Technology requirements for advanced earth-orbital transportation systems: Summary report --- single stage to orbit vehicles [NASA-CR-2867] 16 p0550 A77-33255

## ORBITAL SPACE STATIONS

Solar electric power generating stations in space - XXI century energy or a utopia 15 p0269 A77-32470

A preliminary cost benefit analysis of space colonization 16 p0431 A77-46771

A space station for the 1980's - A look at the next generation of operational systems and their functional requirements [ASME PAPER 77-ENAS-37] 16 p0432 A77-46878

Space station systems analysis study. Part 1, volume 1: Executive study [NASA-CR-151102] 13 p0094 A77-11084

Space station systems analysis study. Part 1, volume 2: Technical report [NASA-CR-151103] 13 p0094 A77-11085

An initial comparative assessment of orbital and terrestrial central power systems [NASA-CR-152688] 15 p0343 A77-22612

## ORGANIC CHEMISTRY

Thermal alteration of young kerogen in relation to petroleum genesis 13 p0053 A77-15044

A petroleum substitute - Active CO2 14 p0200 A77-29325

## ORGANIC COMPOUNDS

Organic Rankine Cycle Engine development and solar energy utilization 13 p0077 A77-19096

Thermal alteration experiments on organic matter from recent marine sediments in relation to petroleum genesis 15 p0298 A77-36254

The potential of lignocellulosic materials for the production of chemicals, fuels, and energy [PB-264458/1] 15 p0385 A77-26698

Photon energy storage in organic materials: The case of linked anthracenes [AD-A039702] 16 p0535 A77-31615

## ORGANIC COOLED REACTORS

Reactor hybrid-Organic Rankine Cycle Electric Power Systems /ORCEPS/ for space applications 16 p0463 A77-48858

## ORGANIC LIQUIDS

Solution of silica in Green River oil shale 14 p0169 A77-23558

## ORGANIC MATERIALS

A preliminary assessment of the feasibility of deriving liquid and gaseous fuels from grown and waste organics 13 p0021 A77-12673

- Startup solvent selection for the liquefaction of lignite 13 p0059 A77-16472
- ORGANIC WASTES (FUEL CONVERSION)**
- A preliminary assessment of the feasibility of deriving liquid and gaseous fuels from grown and waste organics 13 p0021 A77-12673
- Fuel gas recovery from controlled landfilling of municipal wastes 13 p0070 A77-18739
- Demonstration of pyrolysis and materials recovery in San Diego, California 14 p0137 A77-20521
- Energy balance for anaerobic digestion 14 p0138 A77-20999
- Heat and mass transfer problems associated with alternative energy production 14 p0176 A77-24216
- Methane gas recovery from sanitary landfills in Southern California 14 p0182 A77-26077
- Recovery of energy from solid waste - An answer to some of Southern California's problems 14 p0182 A77-26078
- Energy from bio-conversion for developing countries 15 p0270 A77-32592
- Energy from wood wastes 15 p0273 A77-33301
- Torrax - A system for recovery of energy from solid waste. P. J. Page 15 p0293 A77-35163
- Decision making in the utilisation of the organic fraction of municipal wastes 15 p0299 A77-36272
- Economic feasibility of the conversion of organic waste to fuel oil and pipeline gas 15 p0302 A77-36346
- Wastes and biomass as energy resources - An overview 15 p0313 A77-37654
- Resource recovery and flash pyrolysis of municipal refuse 15 p0313 A77-37657
- SWG from refuse and sewage sludge by the BIOGAS process 15 p0314 A77-37659
- Synthetic natural gas from animal wastes by anaerobic fermentation 15 p0314 A77-37660
- Federal Fuels from Biomass Energy Program 15 p0315 A77-37670
- Large scale hydrogen production utilizing carbon in renewable resources 15 p0321 A77-38527
- Producer gas from agricultural wastes - Its production and utilization in a converted oil-fired boiler 15 p0323 A77-39106
- Packed bed digestion of solid wastes 15 p0323 A77-39107
- Photosynthetic solar energy - Rediscovering biomass fuels 16 p0421 A77-44396
- Waste resources - Problems and promise --- for urban energy conversion [ASME PAPER 77-ENAS-49] 16 p0432 A77-46890
- Energy and resource recovery from solid wastes 16 p0434 A77-47215
- Methane production from solid waste 16 p0434 A77-47218
- Anaerobic sludge digestion - A potential energy source 16 p0439 A77-47970
- Methane production through bioconversion of agriculture residues 16 p0489 A77-49081
- A bioenvironmental study of emissions from refuse derived fuel [AD-A024661] 13 p0110 N77-12571
- Energy recovery through biogasification of municipal solid wastes and utilization of thermal wastes from an energy-urban-agro-waste complex 15 p0358 N77-24008
- Method and equipment for the introduction of liquid waste fuels into a fluidized layer [BLL-BTS-10400] 15 p0359 N77-24205
- Heat treatment of refuse for increasing anaerobic biodegradability 16 p0550 N77-32995
- Reclamation of energy from solid waste: Theory and practice. A selected, annotated bibliography for Pennsylvania local government officials [PB-267800/1] 16 p0555 N77-33621
- ORGANIZATIONS**
- General Electric Company survey to define impact of statewide building codes on solar HVAC systems, commercial buildings. National Solar Demonstration Program [COO-2683-76-11] 15 p0383 N77-26674
- ORGANOMETALLIC COMPOUNDS**
- High-efficiency GaAlAs/GaAs heterostructure solar cells grown by metalorganic chemical vapor deposition 16 p0408 A77-41741
- Investigation of acid-resistant electrocatalysts for fuel cells [NASA-TT-P-17367] 14 p0207 N77-16444
- ORTHO PARA CONVERSION**
- A study of the efficiency of hydrogen liquefaction --- jet aircraft applications 15 p0279 A77-33377
- OSCILLATING FLOW**
- A comparison between experimental and numerical investigations of the motion of the water surface in a model surge tank 16 p0505 A77-51257
- Experimental research of oscillations in the discharge gap of plasma accelerator [IAP PAPER 77-104] 16 p0507 A77-51431
- OSMOSIS**
- The Osmotic power plant 13 p0021 A77-12668
- The palirrhrotrophic origin of energy metabolism --- chemosmotic precursor to phototropism in estuarine cellular organisms 13 p0064 A77-17895
- OTTO CYCLE**
- An Otto for the automobile. II --- comparing engines utilizing different configurations and thermodynamic cycles 15 p0273 A77-33302
- OXIDATION**
- A combined cycle with a partial-oxidation reactor 13 p0062 A77-17534
- Anodic oxidation of ethylene glycol with noble metal alloy catalysts --- in fuel cell 15 p0260 A77-31171
- Further studies on the oxidation of sulfur dioxide in coal-fired power plant plumes 15 p0333 A77-39657
- Tropospheric oxidation H2S 16 p0411 A77-44254
- Catalytic action of combustion-product deposits in the oxidation of SO2 to SO3 within the combustion chambers and exhaust channels of thermoelectric plants 16 p0420 A77-44179
- Reversible oxidation of metal oxides for thermal energy storage 16 p0492 A77-49110
- Carbon oxidation catalyst mechanism study for fuel cells [PB-256420/1] 13 p0115 N77-13551
- Technology and economics of flue gas NOx oxidation by ozone [PB-261917/9] 15 p0350 N77-22700
- Oxidation of sulfur dioxide in power plant plumes [BNL-21698] 15 p0386 N77-26713
- OXIDATION-REDUCTION REACTIONS**
- Electrical conductivity of molten coal slags containing potassium seed 15 p0330 A77-39565
- The Redox flow system for solar photovoltaic energy storage [NASA-TN-X-73562] 13 p0106 N77-12522
- An improved electrolyte for direct oxidation fuel cells [AD-A026164] 13 p0131 N77-15518
- OXIDE FILMS**
- Operation of ITO/Si heterojunction solar cells 13 p0014 A77-11762

Study of cathode spots in the presence of slag films on the electrodes of an open-cycle MHD generator 13 p0053 A77-15005

Improving MIS silicon solar cells by HF-treatment of the insulating oxide layer 14 p0151 A77-21819

Tunnel MIS solar cells 14 p0163 A77-22979

Temperature dependence of the 10.6-microns reflectivity of ITO-coated silicon --- selective absorber for solar energy conversion application 14 p0200 A77-29246

Indium-tin-oxide-silicon heterojunction photovoltaic devices 15 p0259 A77-30735

Intensity effects in SnO<sub>2</sub>-Si heterojunction solar cells 15 p0259 A77-30736

Oxidation-erosion of materials in high velocity hot gases 15 p0270 A77-32604

The sawtooth coverslide - A new means of coupling light into solar cells 15 p0298 A77-36263

Analytical and experimental treatment of a spray-on selective coating - Application to collector design 16 p0487 A77-49064

Optical properties of selectively absorbing Ni/Al<sub>2</sub>O<sub>3</sub> composite films --- of solar collectors 16 p0502 A77-50281

Efficient sprayed In<sub>2</sub>O<sub>3</sub>:Sn n-type silicon heterojunction solar cell 16 p0503 A77-50292

Stainless steel panel for selective absorption of solar energy and the method of producing said panel [NASA-CASE-RFS-23518-2] 16 p0535 A77-31611

**OXIDIZERS**

Solar energy depot --- using liquid hydrogen as fuel and oxygen as oxidizer [AIAA PAPER 77-726] 15 p0311 A77-37251

The oxidant formation potential of emissions from catalyst-equipped vehicles 15 p0333 A77-39596

**OXYGEN**

Oxygen accumulation and electrolyte loss in nickel hydrogen cells 14 p0195 A77-28157

Considerations on coal gasification 15 p0266 A77-32169

An examination of the stirred reactor as a tool for the determination of rate constants of the H<sub>2</sub>-O<sub>2</sub> combustion reactions 15 p0283 A77-33406

Multi-stage activation of brown-coal chars with oxygen 16 p0401 A77-41319

**OXYGEN COMPOUNDS**

Electric current from the direct conversion of low molecular weight C,H,O-compounds 13 p0055 A77-15814

**OXYGEN CONSUMPTION**

Pace and grade related to the oxygen and energy requirements, and the mechanics of treadmill running 15 p0396 A77-27689

**OXYGEN PLASMA**

Estimates of optimal generating conditions for hydrogen-oxygen cesium-seeded magneto-hydrodynamic power generator [NASA-TN-D-8374] 14 p0213 A77-17852

**OXYGEN PRODUCTION**

Hydrogen and oxygen from water 16 p0430 A77-46573

**OZONATES**

Technology and economics of flue gas NO<sub>x</sub> oxidation by ozone [PB-261917/9] 15 p0350 A77-22700

**OZONE**

Stratospheric heating due to absorption of solar radiation by NO<sub>2</sub> 13 p0013 A77-11568

**OZONOMETRY**

Energy and technology review --- measurement of lunar subsurface temperature and monitoring of atmospheric ozone [UCRL-52000-76-11] 15 p0396 A77-27651

## OZONOSPHERE

Effects of nitrogen fertilizers and combustion on the stratospheric ozone layer 15 p0290 A77-34895

## P

## P-I-N JUNCTIONS

Amorphous silicon solar cells 15 p0259 A77-30733

## P-N JUNCTIONS

Influence of doped-layer parameters on photoelectric characteristics of silicon photovoltaic cells 13 p0014 A77-11916

Spectral response of a laterally illuminated p-n junction --- as photodetector or photovoltaic energy converter 13 p0062 A77-17478

An analysis of silicon solar cell parameters for terrestrial applications 13 p0076 A77-19081

Investigation on the crystalline structure of Cu<sub>x</sub>/S-CdS solar cells 14 p0149 A77-21803

Optimal parameters for solar cell films 14 p0150 A77-21805

Efficiency of photovoltaic cells employing Schottky diodes 14 p0151 A77-21815

Heterostructures for silicon solar cells 14 p0151 A77-21817

Increase of diffusion lengths of minority carriers under the effect of a width gradient of the forbidden band 14 p0151 A77-21823

Analysis of silicon solar cells with stripe geometry junctions 14 p0156 A77-22079

High efficiency n-CdS/p-InP solar cells prepared by the close-spaced technique 14 p0156 A77-22081

Improved theory of the silicon p-n junction solar cell 14 p0166 A77-23364

Performance of n/+/-p silicon solar cells in concentrated sunlight 15 p0258 A77-30729

Silicon solar cells on unidirectionally recrystallized metallurgical silicon 15 p0258 A77-30731

Fabrication and characterization of thin-film silicon solar cells on alumina ceramic 15 p0258 A77-30732

Photovoltaic energy conversion with n-CdS-p-CdTe heterojunctions and other II-VI junctions 15 p0259 A77-30741

Photovoltaic properties and junction formation in CuInSe<sub>2</sub> 15 p0305 A77-36584

N-indium tin oxide/p-indium phosphide solar cells 15 p0317 A77-38049

CuInS<sub>2</sub> thin-film homojunction solar cells 16 p0399 A77-40567

High-efficiency GaInAs/GaAs heterostructure solar cells grown by metalorganic chemical vapor deposition 16 p0408 A77-41741

Hydrogen and electricity from water and light 16 p0430 A77-46609

On the analysis and design of grid structures for p-n junction solar cells 16 p0497 A77-49156

Studies of silicon p-n junction solar cells --- open circuit photovoltage [NASA-CR-149669] 14 p0215 A77-18557

## P-TYPE SEMICONDUCTORS

The theory of hydrogen production in a photoelectrochemical cell 15 p0279 A77-33370

N-indium tin oxide/p-indium phosphide solar cells 15 p0317 A77-38049

Theoretical treatment of the photoelectrochemical production of hydrogen --- semiconductor electrode for solar applications 15 p0321 A77-38530

Analysis of the fill factor for n-CdS/p-CdTe solar cells 16 p0402 A77-41433

## PACIFIC NORTHWEST (US)

Pacific Northwest geothermal: 1976 review, 1977 outlook

15 p0335 A77-39817

Pacific northwest regional assessment program

[BNWL-2084]

16 p0540 A77-31674

## PACKAGING

The potential for reusable homogeneous containers

[PB-265100/8]

16 p0518 A77-29007

## PAKISTAN

Hydel and solar power for Pakistan --- hydroelectric power

13 p0079 A77-19121

## PAPERS

Environmental considerations of selected energy conserving manufacturing process options.

Volume 5: Pulp and paper industry report

[PB-264271/8]

15 p0384 A77-26682

## PARABOLIC BODIES

Reduced drag, paraboloid type, solar energy collectors

16 p0473 A77-48951

## PARABOLIC REFLECTORS

Ideal concentrators for finite sources and restricted exit angles --- parabolic solar collector

13 p0003 A77-10835

Radiant-vector distribution in the radiant field of a parabolocylindric concentrator

13 p0015 A77-11920

Calculations on an optimized faceted solar concentrator

13 p0015 A77-11921

Performance analysis of a cylindrical parabolic focusing collector and comparison with experimental results

13 p0019 A77-12410

Development of compound parabolic concentrators for solar-thermal electric and process heat applications

13 p0038 A77-12812

Double-reflection solar energy concentrators

13 p0074 A77-19067

Efficiency tests on a linear parabolic concentrator for medium and high temperatures

13 p0077 A77-19103

Optical and thermal properties of Compound Parabolic Concentrators

14 p0157 A77-22641

Method of designing profiles of focusing concentrators and focusing wedges --- for parabolic solar concentrators

14 p0179 A77-25355

Development of compound parabolic concentrators for solar thermal applications [ASME PAPER 76-WA/SOL-11]

14 p0189 A77-26516

Concentration of scattered radiation --- by solar collectors

15 p0316 A77-37768

Analysis of a faceted concentration system

15 p0316 A77-37769

Conceptual design of a parabolic dish solar collector using simulation techniques

15 p0318 A77-38211

Method for calculating the profiles of focones and foclines --- for parabolic solar concentrators

16 p0409 A77-41905

Design of pointed solar concentrators

16 p0417 A77-42954

Optical performance of fixed zenith-moving azimuth parabolocylindrical concentrator

16 p0417 A77-42955

On the performance of cylindrical parabolic solar concentrators with flat absorbers

16 p0422 A77-44084

Concentration of diffuse radiation --- by solar collectors

16 p0437 A77-47424

Analyzing multifacet concentrating systems --- solar energy application

16 p0437 A77-47425

Shortened focusing concentrators and focusing wedges --- solar energy technology

16 p0442 A77-48521

Optimum operating conditions for a cylindrical parabolic focusing collector/Rankine power generation cycle system

16 p0468 A77-48905

A compound parabolic concentrator array optimized for northern climates --- cold weather effects on solar collectors

16 p0474 A77-48958

Development of lightweight compound parabolic concentrators for solar thermal electric and process heat applications

16 p0483 A77-49031

Prisms with total internal reflection as solar reflectors

16 p0488 A77-49071

On the use of solid-dielectric compound parabolic concentrators with photovoltaic devices

16 p0488 A77-49073

A note of the economics of deep cylindrical mirror concentrating collectors

16 p0502 A77-50218

Sun tracking solar energy collector

[NASA-CASE-WPO-13921-1]

15 p0363 A77-24590

## PARABOLOID MIRRORS

Energetic calculation of the concentrating capacity of paraboloidal facets

13 p0051 A77-14579

Standard-size facets for the reflecting surface of a solar concentrator

13 p0063 A77-17557

A Cassegrain system for solar radiation

13 p0063 A77-17561

Design and fabrication of solar concentrators

13 p0074 A77-19062

An inflatable solar concentrator for a high temperature storage system

13 p0074 A77-19064

Experimental evaluation of a cylindrical parabolic solar collector

[ASME PAPER 76-WA/HT-13]

14 p0186 A77-26473

Solar flux density distributions on central tower receivers

15 p0256 A77-30318

Non-focussing solar concentrators of easy manufacture

15 p0256 A77-30322

The use of lasers for the inspection of heliotechnical reflectors

15 p0286 A77-33432

Paraboloid-hyperboloid concentrating systems and their accuracy

15 p0286 A77-33433

Energy computation of concentrating capability of paraboloidal facets

15 p0290 A77-34973

1-MW solar boiler tested

15 p0303 A77-36349

Using lasers to inspect solar-energy reflectors

16 p0427 A77-45545

Paraboloid-hyperboloid concentrating systems and their accuracy

16 p0427 A77-45546

The cylindrical parabolic mirror as reflector for solar collectors. Efficiencies and optimization [DLR-PB-76-55]

14 p0233 A77-20607

The cylindrical parabolic mirror as reflector for solar collectors-efficiencies and optimization [ESA-TT-365]

15 p0365 A77-24615

## PARAFFINS

Fiat petrol engine performance with a mixture of basil extract with petrol

14 p0179 A77-25196

Two component thermal energy storage material [PB-252592/1]

13 p0090 A77-10675

Research on solar energy storage subsystems utilizing the latent heat of phase change of paraffin hydrocarbons for the heating and cooling of buildings [PB-254665/3]

13 p0091 A77-10689

## PARASITIC FREQUENCY CONVERTERS

New modes of operation for avalanche diodes - Frequency multiplication and upconversion

13 p0049 A77-14261

## PARKS

Photovoltaic applications for the National Park Service

16 p0460 A77-48837

## PARTIAL PRESSURE

Investigation of gas-controlled heat pipes with reservoirs of constant and variable volume

13 p0050 A77-14327

**PARTICLE ACCELERATORS**

Particle Accelerator Conference: Accelerator Engineering and Technology, Chicago, Ill., March 16-18, 1977, Proceedings

15 p0334 A77-39742

**PARTICLE EMISSION**

Influence of heavy fuel oil composition and boiler combustion conditions on particulate emissions

13 p0008 A77-11162

Chemical characterization of diesel exhaust

particulates  
[PERC/R1-77/5]

16 p0540 N77-31671

**PARTICLE ENERGY**

A direct converter based upon space charge effects

14 p0184 A77-26160

**PARTICLE SIZE DISTRIBUTION**

Influence of heavy fuel oil composition and boiler combustion conditions on particulate emissions

13 p0008 A77-11162

Black magnetic spherule fallout in the eastern Gulf of Mexico

13 p0052 A77-14890

Composition and size distribution of in-stack particulate material at a coal-fired power plant

14 p0139 A77-21018

Particulate nature of solar absorbing films - Gold black

14 p0163 A77-22982

Particle size distributions of dusts in the flue gas of power plants and in atmospheric air

15 p0265 A77-31889

In situ optical measurement of automobile exhaust gas particulate size distributions - Regular fuel and methanol mixtures

16 p0440 A77-48173

Optical measurements of mean particle size in the exhaust of a coal-fired MHD generator

16 p0508 A77-51611

Design of minimum-weight diffusion batteries

16 p0518 N77-28645

**PARTICLES**

Size distribution and mass output of particulates from diesel engine exhausts

[PB-261416/2] 15 N77-22732

Development of procedures for the measurement of fugitive emissions

[PB-263592/0] 15 p0368 N77-24671

EPA and ERCA high-temperature/high-pressure particulate control programs

[PB-266231/0] 16 p0517 N77-28644

**PARTICULATE SAMPLING**

Compilation of an inventory for particulate emissions in Belgium

13 p0009 A77-11271

Composition and size distribution of in-stack particulate material at a coal-fired power plant

14 p0139 A77-21018

Particulate sampling at high temperature and high pressure --- of coal conversion processes

15 p0293 A77-35172

**PASSENGER AIRCRAFT**

Application of advanced technology to future long-range aircraft

[SAWE PAPER 1126] 13 p0016 A77-12194

The technical concept of the IL-62M. II - Fuel system

14 p0156 A77-22120

**PASSIVITY**

Heat pipe materials compatibility

[NASA-CR-135069] 13 p0103 N77-12182

**PATENT APPLICATIONS**

Auxiliary power system for activity cooled aircraft

[NASA-CASE-LAR-11626-1] 13 p0103 N77-12332

**PATTERN RECOGNITION**

Classification of oils by the application of pattern recognition techniques to infrared spectra

[AD-A039387] 16 p0531 N77-30841

**PAYLOADS**

Air New Zealand's methods of flying the DC-10

[AIAA PAPER 77-1255] 16 p0421 A77-44343

The International Heat Pipe Experiment --- Black Brant sounding rocket payload zero gravity experiment

13 p0120 N77-14389

**PDP 11/40 COMPUTER**

Computer model of a solar-assisted heating design approach implemented on a minicomputer installation

15 p0318 A77-38178

**PENDULUMS**

Whirl stability of the pendulously supported flywheel system

[ASME PAPER 77-APM-20] 15 p0343 A77-38837

**PENNSYLVANIA**

Application of LANDSAT-2 data to the implementation and enforcement of the Pennsylvania Surface Mining Conservation and Reclamation Act

[E77-10007] 13 p0085 N77-10590

Characterization and evaluation of wastewater sources United States Steel Corporation,

Clairton Works, Pittsburgh, Pennsylvania, 28-31 January 1976

[PB-255586/0] 13 p0116 N77-13566

Interpretation of Pennsylvania agricultural land use from ERTS-1 data

[E77-10111] 14 p0215 N77-18525

Impact of a suburban rapid transit line of fuel consumption and cost for the journey-to-work.

Analysis of the Philadelphia-Lindenwold high-speed line

[PB-263048/1] 15 p0370 N77-25014

**PERFORMANCE PREDICTION**

Performance theory of diagonal conducting wall MHD generators -

13 p0001 A77-10202

Solar thermal electric power plants - Their performance characteristics and total social costs

13 p0037 A77-12804

Long term performance prediction of residential solar energy heating systems

13 p0039 A77-12822

A simplified method in flight test techniques for the determination of the range performance of jet aircraft

13 p0060 A77-16600

Optimal material selection for flat-plate solar energy collectors utilizing commercially available materials

13 p0068 A77-18444

Axial conduction in a flat-plate solar collector

13 p0068 A77-18447

Arrays of fixed flat-plate solar energy collectors - Performance comparisons for differing individual component orientations

13 p0068 A77-18449

General Motors Sulfate Dispersion Experiment - Assessment of the EPA HIWAY model

13 p0071 A77-18882

Performance of an annular cylindrical solar collector

13 p0073 A77-19059

Heterojunctions in photovoltaic devices

14 p0162 A77-22977

Method for estimating solar heating and cooling system performance

14 p0170 A77-23653

Generalized analysis of thermoelectric device configurations

14 p0177 A77-24572

Analysis of the wind-driven reciprocator

14 p0183 A77-26088

Performance of flat-plate collectors with planar reflectors

[ASME PAPER 76-WA/HT-27] 14 p0186 A77-26478

Performance measurements of a cylindrical glass honeycomb solar collector compared with predictions

[ASME PAPER 76-WA/SOL-3] 14 p0188 A77-26508

The consideration of climatic data in the prediction of solar-system performance --- for energy conversion

14 p0202 A77-29569

Calculation of long term solar collector heating system performance

15 p0255 A77-30311

Comparison of long-term flat-plate solar collector performance calculations based on averaged meteorological data

15 p0256 A77-30315

Matching of solar cells and performance of a solar battery

15 p0256 A77-30316

Fundamental electronic mechanisms limiting the performance of solar cells

15 p0257 A77-30710

Performance limitations of silicon solar cells

15 p0257 A77-30711

# PERFORMANCE TESTS

# SUBJECT INDEX

Collection efficiency of heterojunction solar cells  
15 p0258 A77-30722

Modification techniques and performance characteristics of hydrogen-powered IC engines - State of the art, 1975  
15 p0282 A77-33396

Performance optimization of an air-to-air missile design  
15 p0289 A77-34298

Conceptual design of a parabolic dish solar collector using simulation techniques  
15 p0318 A77-38211

The influence of parameter dispersion of electrical cells on the array power output  
16 p0420 A77-44264

Autocorrelation and stochastic modelling of insolation sequences --- for solar thermal systems  
16 p0422 A77-44479

Comparison of predicted performance of constant outlet temperature and constant mass flow rate collectors --- for solar energy conversion  
16 p0423 A77-44489

The development of a 150 kW /200 HP/ Stirling engine for medium duty automotive application - A status report  
[SAE PAPER 770081]  
16 p0424 A77-44559

Coal gasification combined-cycle pilot plant system analysis  
16 p0446 A77-48724

The design of a sodium sulfate decahydrate heat exchanger for coolness storage --- in solar-powered air conditioning system  
16 p0450 A77-48760

Combined diesel-organic Rankine-cycle power plant  
16 p0459 A77-48830

Solar powered steam generation  
16 p0459 A77-48832

Dynamic modeling and sensitivity analysis of solar thermal energy conversion systems  
16 p0461 A77-48845

Deterministic insolation estimates for solar total energy systems  
16 p0462 A77-48847

Some contributions to aerodynamic theory for vertical axis wind turbines  
16 p0467 A77-48897

An averaging technique for predicting the performance of a solar energy collector system  
16 p0480 A77-49008

Solar energy for process heat  
16 p0481 A77-49020

Shallow solar ponds for industrial process heat - The ERDA-Sohio project  
16 p0482 A77-49024

A generalized numerical model for predicting energy transfers and performance of large solar ponds  
16 p0482 A77-49025

Experience with a prototype solar pond for space heating  
16 p0482 A77-49026

Assuring the performance of fossil energy programs  
16 p0503 A77-50499

Investigation of performance limits in axial groove heat pipes  
[NASA-CR-137912]  
13 p0095 A77-11340

Method for estimating solar heating and cooling system performance  
[AD-A026041]  
13 p0116 A77-13557

Cell and module test procedures seen from the manufacturer and the user point of view  
16 p0527 A77-30537

Recommendations for the performance rating of flat plate terrestrial photovoltaic solar panels  
16 p0527 A77-30539

DoD energy R And D. Part 2: Military fuel operations. Performance and R and D implications  
[AD-A042272]  
16 p0554 A77-33617

**PERFORMANCE TESTS**

A method of testing for rating solar collectors based on thermal performance  
13 p0019 A77-12408

Selection of driving cycles for electric vehicles of the 1990's  
13 p0024 A77-12702

Baseline test data for the EVA electric vehicle --- low energy consumption automobiles  
13 p0025 A77-12704

A unique Rankine-cycle heat pump system  
13 p0036 A77-12799

Comparative performance of solar thermal power generation concepts  
13 p0036 A77-12803

Design and performance of thermal storage water tank  
13 p0075 A77-19079

Efficiency tests on a linear parabolic concentrator for medium and high temperatures  
13 p0077 A77-19103

Effects of one-sided heat input and removal on axially grooved heat pipe performance  
[AIAA PAPER 77-191]  
14 p0135 A77-19887

Joint test of an U.S. electrode system in the U.S.S.R. U-02 facility  
14 p0139 A77-21215

Progress on the Mark VI long-duration MHD generator  
14 p0141 A77-21237

The ONERSOL collector and its performance --- solar energy conversion  
14 p0150 A77-21809

Performance rating of photovoltaic solar generators for terrestrial applications  
14 p0153 A77-21837

User experience with the Enfield car --- electric motor vehicle  
14 p0159 A77-22884

On-the-road evaluation of the efficiency of propulsion system of city vans  
14 p0160 A77-22888

The M.A.N. electrobus experience gained in large-scale tests  
14 p0160 A77-22900

Electric delivery vans above the 45th parallel in North America  
14 p0162 A77-22917

Initial test results for a solar-cooled townhouse in the mid-Atlantic region  
14 p0170 A77-23655

Experimental measurements and system implications of the performance of flat plate solar collector configurations  
[ASME PAPER 76-WA/SOL-14]  
14 p0189 A77-26519

Analysis of thermal performance of 'Solaris' water-trickle solar collector  
[ASME PAPER 76-WA/SOL-21]  
14 p0190 A77-26526

The determination of the performance characteristics of solar collectors  
14 p0203 A77-29573

Progress in channel development for direct coal fired MHD  
16 p0458 A77-48824

Tests and evaluation of multihundred watt thermoelectric generators at JPL  
16 p0462 A77-48854

Performance and analysis of 'Solaris' water-trickle solar collector  
16 p0472 A77-48939

Performance of an evacuated tubular collector using non-imaging reflectors  
16 p0472 A77-48940

Performance of air-cooled flat plate collectors  
16 p0472 A77-48942

Predicted daily and yearly average radiative performance of optimal trapezoidal groove solar energy collectors  
16 p0472 A77-48943

Thermal, fluid flow and mechanical performance characteristics of a subatmospheric pressure, distributed flow flat plate collector  
16 p0473 A77-48945

A proposed method of rating the thermal performance of solar collectors  
16 p0473 A77-48946

An analytical and experimental evaluation of the plano-cylindrical Fresnel lens solar concentrator  
16 p0473 A77-48952

The performance of a stationary reflector/tracking absorber solar concentrator  
16 p0474 A77-48954

Standardized performance tests of collectors of solar thermal energy - A flat-plate copper collector with parallel mylar striping  
[NASA-TN-X-73553]  
13 p0114 A77-13535

Standardized performance tests of collectors of solar thermal energy: An evacuated flatplate copper collector with a serpentine flow distribution  
[NASA-TN-X-73415]  
13 p0114 A77-13536

- Effect of ceramic coating of JT8D combustor liner on maximum liner temperatures and other combustor performance parameters  
[NASA-TN-X-73581] 13 p0126 N77-15037
- Comparing the electric lead-acid battery vehicle with a hydrogen fueled vehicle incorporating an Fe-Ti hydride storage unit  
[BNL-20990] 14 p0211 N77-17577

Advanced technologies for photovoltaic cell fabrication 14 p0165 A77-23300

A rationale for large space-based solar power systems [AIAA PAPER 77-510] 14 p0173 A77-23926

Photovoltaic, gravitationally-stabilized solid-state, satellite solar power station /GSS4PS/ [AIAA PAPER 77-511] 14 p0173 A77-23927

Design considerations for high-intensity solar cells 14 p0179 A77-25591

Status of silicon solar cell technology 14 p0184 A77-26392

Development of compound parabolic concentrators for solar thermal applications [ASME PAPER 76-WA/SOL-11] 14 p0189 A77-26516

Solar generators - Utilization of solar energy for supply of electric power 14 p0197 A77-28681

Photovoltaic properties of n-CdS/p-CdTe heterojunctions prepared by spray pyrolysis 14 p0198 A77-29023

Photovoltaic energy conversion using concentrated sunlight 14 p0203 A77-29579

GaAs solar cells for very high concentrations 14 p0204 A77-29581

Matching of solar cells and performance of a solar battery 15 p0256 A77-30316

Performance data for a terrestrial solar photovoltaic/water electrolysis experiment 15 p0256 A77-30321

Photovoltaic energy conversion with n-CdS-p-CdTe heterojunctions and other II-VI junctions 15 p0259 A77-30741

Photovoltaic systems, --- solar energy conversion research for military applications 15 p0288 A77-34112

Photovoltaic properties of GaSe and InSe junctions 15 p0289 A77-34117

Stable semiconductor liquid junction cell with 9 percent solar-to-electrical conversion efficiency 15 p0290 A77-34429

Photovoltaic energy conversion using concentrated sunlight 16 p0402 A77-41516

Silicon solar photovoltaic power stations [AIAA 77-1021] 16 p0404 A77-41563

Cost studies on terrestrial photovoltaic power systems with sunlight concentration 16 p0405 A77-41579

A comparison of GaAs and Si hybrid solar power systems 16 p0406 A77-41584

Solar electricity - The hybrid system approach 16 p0413 A77-42556

Environmental impact of major solar power development 16 p0452 A77-48773

Considerations for using solar concentrators in photovoltaic systems 16 p0460 A77-48835

Photovoltaic applications for the National Park Service 16 p0460 A77-48837

The evolution of the photovoltaic, gravitationally stabilized, solid-state satellite solar power station 16 p0464 A77-48874

Design considerations of solar arrays for terrestrial applications 16 p0485 A77-49053

Residential application of photovoltaic energy systems 16 p0497 A77-49155

Status of the ERDA/NASA photovoltaic tests and applications project [NASA-TN-X-73567] 13 p0114 A77-13537

Composite material structures for thermophotovoltaic conversion radiator [AD-A026859] 13 p0132 A77-15519

Photovoltaic system test facility electromagnetic interference measurements [NASA-TN-X-73640] 15 p0343 A77-22608

ERDA/Lewis research center photovoltaic systems test facility [NASA-TN-X-73641] 15 p0343 A77-22609

PHOTOVOLTAIC EFFECT

Photovoltaic effect applications 13 p0075 A77-19080

Meeting electric power needs with photovoltaic power systems 13 p0076 A77-19091

Investigation of a TiO2/electrolyte solar cell and the photocatalytic water decomposition 13 p0077 A77-19094

Miniature applications for photovoltaic generators 14 p0155 A77-21853

Photovoltaic properties and junction formation in CuInSe2 15 p0305 A77-36584

Navy applications for terrestrial photovoltaic solar power [AD-A030529] 14 p0218 A77-18590

PHTHALOCYANINE

On the application of radioisotope techniques for the study of phthalocyanine catalyzed electrochemical processes in fuel cells 16 p0425 A77-45151

Manufacturing and evaluation of phthalocyanines as catalysts for fuel cells [BMFT-PB-T-76-25] 13 p0114 A77-13540

PHYSICAL CHEMISTRY

Feasibility study of a nuclear power-sewage treatment system for the conservation and reclamation of water resources [PB-255630/6] 13 p0126 A77-14960

PHYSICAL FACTORS

Solar energy application considerations for housing in depressed communities 16 p0494 A77-49126

PHYSICAL PROPERTIES

The influence of the properties of coals on their conversion into clean fuels 13 p0009 A77-11245

Theoretical, numerical, and physical techniques for characterizing power plant plumes [PB-253099/6] 13 p0101 A77-11599

Energy and physics [ERDA-TN-225] 15 p0386 A77-26916

PILOT PLANTS

Design of a 100 BPD pilot plant to convert methanol to gasoline using the Mobil process 13 p0023 A77-12691

A study on solar tower power system 14 p0152 A77-21832

How six coal gasification processes compare economically 14 p0165 A77-23308

Gasification of Rhenish brown coal as mined 14 p0175 A77-24213

Design studies of the hydrogasification of coal 14 p0175 A77-24214

Description of thermal storage sub-system designs for ERDA's 10-MWe Solar Central Receiver Pilot Plant [ASME PAPER 76-WA/HT-68] 14 p0187 A77-26491

The SYNTHANE process - Current status --- coal gasification 14 p0192 A77-27286

The H-Coal Process --- liquefaction 14 p0192 A77-27289

The Riley-Morgan gasifier 14 p0193 A77-27298

Hydrogen production process by means of nuclear energy 15 p0273 A77-33327

Solar tower characteristics 15 p0274 A77-33333

Water electrolysis under pressure - Improvement of energy efficiency by temperature increase 15 p0277 A77-33360

16 p0443 A77-48570  
Estimates of optimal generating conditions for hydrogen-oxygen cesium-seeded magneto-hydrodynamic power generator [NASA-TN-D-8374]  
14 p0213 A77-17852
- PLASMA PINCH**  
Schlieren measurements of a high density z-pinch  
13 p0060 A77-16697  
The magnetic energy storage system used in ZT-1 --- toroidal plasma pinch experiment  
15 p0299 A77-36314
- PLASMA POTENTIALS**  
Investigation of two-dimensional electric effects in a sectional MHD-channel  
15 p0317 A77-37930
- PLASMA POWER SOURCES**  
Limiting capabilities with respect to electric power generation of a pulsed MHD generator operating at a resistive load  
13 p0064 A77-17917  
Threshold capabilities of a pulsed MHD converter for the production of electric power with a resistive load  
16 p0399 A77-40591
- PLASMA RADIATION**  
Experimental fluctuation analysis in a noble gas MHD generator  
15 p0326 A77-39535  
Plasma luminosity fluctuations as a diagnostic tool --- for coal-fired MHD facility  
15 p0328 A77-39547
- PLASMA TEMPERATURE**  
Study of the electrical characteristics of the boundary layer on the metal surfaces in the channels of an open cycle MHD generator  
13 p0054 A77-15666  
Joint US-USSR experimental studies of the dependence of plasma electrical conductivity on plasma temperature performed in the Avco Mark VI MHD facility  
14 p0142 A77-21257  
Electrode phenomena in slagging MHD channels  
15 p0330 A77-39561
- PLASMA-PARTICLE INTERACTIONS**  
Muon catalysed fusion for pellet ignition  
13 p0012 A77-11468
- PLASMA GUIDES**  
Effect of two-dimensional inhomogeneities on the properties of framed MHD channels  
16 p0428 A77-46088
- PLASMAS (PHYSICS)**  
Tokamak hybrid study [PPPL-1284]  
15 p0358 A77-23942  
Applied research in the general area of charged particle chemistry related to coal-fired MHD [PB-263873/2]  
15 p0387 A77-26987  
Superconducting magnetic energy storage [LA-UR-76-2047]  
15 p0397 A77-27933
- PLASMA TUBES**  
Status of research on advanced thermionic converters  
16 p0466 A77-48889
- PLASTIC COATINGS**  
Plastics in systems of solar technology - A survey  
14 p0197 A77-28677  
Consideration of encapsulants for photovoltaic arrays in terrestrial applications  
14 p0203 A77-29580  
Contribution to procedures for testing Silazane resin coatings --- for solar concentrators  
16 p0443 A77-48522  
Development of plastic honeycomb flat-plate solar collectors [SAN/1081-76/1]  
15 p0372 A77-25640
- PLASTICS**  
Plastics for solar-energy collectors. I - General aspects, hot-water collectors, design variants  
13 p0009 A77-11267  
Plastics for solar-energy collectors. II - Typical operational data and model parameters, functional diagrams, optimization of layer thicknesses  
13 p0009 A77-11269  
Solar-optical analyses of a mass-produced plastic circular Fresnel lens  
14 p0181 A77-25906

## SUBJECT INDEX

## POLLUTION CONTROL

- Collectors, pipelines, and heat storage units made of plastics 14 p0202 A77-29567
- Plastics in systems of solar technology 15 p0336 A77-39979
- PLATINUM**
- Optimization of PT-doped Kocite (trademark) electrodes in H3 PO4 fuel cells [AD-A025326] 13 p0107 A77-12529
- PLUMES**
- Further studies on the oxidation of sulfur dioxide in coal-fired power plant plumes 15 p0333 A77-39657
- Theoretical, numerical, and physical techniques for characterizing power plant plumes [PB-253099/6] 13 p0101 A77-11599

## PRESSURE VESSELS

A pressurized liquid concept for solar-thermal energy storage for the 24-hour continuous operation of an energy conversion system [ASME PAPER 76-WA/HT-38] 14 p0187 A77-26484  
Selection of structural materials for hydrogen pipelines and storage vessels 15 p0281 A77-33390

Hydrogen production plants using electrolytic cells with low cost electrodes built into pressure tanks 14 p0239 A77-21599

## PRESSURIZING

Preliminary analysis of electric generation utilizing geopressured geothermal fluids 13 p0030 A77-12752  
Pressurized fluidized-bed coal combustion 16 p0454 A77-48788

## PRIMARY BATTERIES

Power Sources Symposium, 27th, Atlantic City, N.J., June 21-24, 1976, Proceedings 14 p0195 A77-28126

## PRINTED CIRCUITS

Encapsulation of solar cell modules 13 p0076 A77-19092

## PRISMS

Transmission solar focusing collector 15 p0334 A77-39671  
Study of the feasibility of exploiting the galloping phenomenon as energy source 16 p0407 A77-41722  
Prisms with total internal reflection as solar reflectors 16 p0488 A77-49071  
Prisms with total internal reflection as solar reflectors [ANL-SOL-76-04] 15 p0345 A77-22629

## PROBABILITY DISTRIBUTION FUNCTIONS

Composition method for constructing guaranteed-output curves of solar- and wind-power plants utilized jointly 14 p0201 A77-29534  
A method for evaluating SO<sub>2</sub> abatement strategies 15 p0293 A77-35169

## PROCEEDINGS

Proceedings of the ERDA Semiannual Solar photovoltaic Program Review Meeting [CONF-760837-P2] 16 p0555 A77-33628

## PRODUCT DEVELOPMENT

The quality category in solar engineering 14 p0143 A77-21310  
Review of world experience and properties of materials for encapsulation of terrestrial photovoltaic arrays [NASA-CR-149451] 13 p0106 A77-12524  
Heat pipe and space radiator developments 13 p0120 A77-14391  
Sodium chloride battery development program for load leveling [PB-257570/2] 14 p0208 A77-16456  
Fuel cell stacks [AD-A030375] 14 p0213 A77-17603  
A study of geothermal prospects in the western United States [NASA-CR-149812] 14 p0220 A77-19575  
Central receiver solar thermal power system, collector subsystem [SAN/1111-75/1] 14 p0230 A77-20576

## PRODUCTION

Solar silicon via improved and expanded metallurgical silicon technology [NASA-CR-153415] 16 p0528 A77-30606

## PRODUCTION ENGINEERING

A sulfuration process for the preparation of photovoltaic Cu<sub>x</sub>S and CuInS<sub>2</sub> thin films 13 p0076 A77-19087  
Meeting electric power needs with photovoltaic power systems 13 p0076 A77-19091  
Materials and processing approaches to cost competitive wind turbine rotor blades 14 p0157 A77-22144  
Advanced technologies for photovoltaic cell fabrication 14 p0165 A77-23300  
Advanced silicon solar cell production technology [AIAA PAPER 77-485] 14 p0172 A77-23905

## Solar thermal electric power systems -

Manufacturing cost estimation and systems optimization [ASME PAPER 76-WA/HT-14] 14 p0186 A77-26474  
Balance and optimization procedure for thermochemical cycles for hydrogen production 15 p0276 A77-33345

Thermochemical cycles utilizing sulfur for hydrogen production from water 15 p0276 A77-33353

The production of shale oil crude and its refining into military operational fuels 15 p0292 A77-35155

Materials consideration for the Bigas coal gasification pilot plant [ASME PAPER 76-PVP-41] 15 p0323 A77-38825  
Preliminary research on Ocean Energy Industrial Complexes 16 p0484 A77-49042

Low energy production processes in manufacturing of silicon solar cells 16 p0486 A77-49055

Design, fabrication, testing, and delivery of a solar energy collector system for residential heating and cooling [NASA-CR-150032] 13 p0086 A77-10638

Prospects for hydrogen production by water electrolysis to be competitive with conventional methods [BNL-20877] 13 p0087 A77-10648

The production and refining of crude oil into military fuels [AD-A024652] 13 p0095 A77-11207

Industrial development of silicon solar cells [NASA-TT-R-17139] 13 p0097 A77-11528

Net energy analysis: An energy balance study of fossil fuel resources. Summary report [PB-259159/2] 14 p0225 A77-19658

Economic feasibility: Fuel grade methanol from coal [TID-27156] 15 p0345 A77-22630

Economics and organization of metallurgical production: Effectiveness of the use of magnetic fields in melting alloy steels [BLL-M-25473-(5828.4F)] 15 p0359 A77-24245

The gas supplies of interstate natural gas pipeline companies, 1975 [PB-263598/5] 15 p0360 A77-24320

A framework for assessing environmental impacts of possible Antarctic mineral development, part 1 [PB-262750/3] 15 p0368 A77-24709

Research and development of low cost processes for integrated solar arrays [COO-2721-76-1] 15 p0383 A77-26670

Techniques for the analysis of total energy and labor of industrial plants [PB-264221/3] 15 p0385 A77-26697

Automated array assembly task, phase 1 [NASA-CR-153909] 15 p0391 A77-27505

Characterization of substances in products effluents and wastes from synthetic fuel production tests [BNWL-2131] 16 p0540 A77-31675

Investigation of test methods, material properties and processes for solar cell encapsulants [NASA-CR-155158] 16 p0550 A77-33347

## PRODUCTION MANAGEMENT

Evolution of the concept of the automobile from the standpoint of saving energy 13 p0051 A77-14562

Weekly petroleum statistics reports, 1974-1975 [PB-255920/1] 13 p0124 A77-14608

## PRODUCTION PLANNING

A review of the solar array manufacturing industry costing standards [NASA-CR-153401] 16 p0528 A77-30608

## PROJECT MANAGEMENT

Fossil energy research and development in ERDA 13 p0063 A77-17551

The economic viability of pursuing a space power system concept [AIAA PAPER 77-353] 13 p0066 A77-18258

Program definition for the development of geothermal energy. Volume 3: Appendixes [NASA-CR-153223] 15 p0371 A77-25614

Project Independence Evaluation System (PIES) documentation. Volume 6: Methodology for improving the price sensitivity of the PIES oil and gas supply curves [PB-264069/6] 16 p0516 A77-28606

Threshold capabilities of a pulsed MHD converter for the production of electric power with a resistive load 16 p0399 A77-40591

A half megawatt Pulse Forming Network (PFN) [AD-A039709] 16 p0526 A77-30373

**PULSE TIME MODULATION**

Shaping of laser pulses in an amplifying system receiving input signals with a variable spectrum 13 p0053 A77-15237

**PULSED LASERS**

Shaping of laser pulses in an amplifying system receiving input signals with a variable spectrum 13 p0053 A77-15237

Status of large neodymium glass lasers 14 p0168 A77-23503

Some results of MHD-laser investigation 15 p0328 A77-39549

Soft X-ray lasers [SAND-76-5542] 14 p0219 A77-19425

Heat-pipe bismuth laser; examination of laser action at 4722 Å in bismuth vapor [AD-A039568] 16 p0533 A77-31495

**PULSED RADIATION**

Pulsed energy and switching requirements for Tokamak ohmic heating [LA-OR-76-2473] 15 p0397 A77-27932

**PUMPING**

Water pumping - A practical application of solar energy 13 p0079 A77-19117

**PUMPS**

Reciprocating pump for conversion of liquid hydrogen to high pressure gaseous hydrogen 15 p0284 A77-33409

Geothermal hot water pump --- for use in reservoirs [PB-261741/3] 14 p0251 A77-21711

Geothermal hot water pump, appendix [PB-262030/0] 15 p0347 A77-22652

Installation in Dakar of a pump powered by solar cell panels 16 p0546 A77-32589

**PURSUIT TRACKING**

Performance optimization of an air-to-air missile design 15 p0289 A77-34298

**PYRAMIDAL BODIES**

Solar house heating system using reflective pyramid optical condensing system [COO-2769-4] 16 p0522 A77-29619

**PYRANOMETERS**

Accelerated response of thermopile pyranometers 13 p0019 A77-12405

A method for estimating hourly averages of diffuse and direct solar radiation under a layer of scattered clouds --- for solar collector design 13 p0019 A77-12412

Results from circumsolar radiation measurements [LBL-5292] 15 p0382 A77-26657

Instrumentation for measuring direct and diffuse insolation in testing thermal collectors [CONF-760832-23] 15 p0394 A77-27545

**PYROHELIONETERS**

Autonomous station for the acquisition and concentration of heliometric data 13 p0072 A77-19046

Instrumentation for measuring direct and diffuse insolation in testing thermal collectors [CONF-760832-23] 15 p0394 A77-27545

**PYROLYSIS**

Energy from solid wastes --- Book 13 p0003 A77-10698

Dutchess County, NY moves towards pyrolysis --- of solid wastes with fuel recovery 13 p0010 A77-11298

A preliminary assessment of the feasibility of deriving liquid and gaseous fuels from grown and waste organics 13 p0021 A77-12673

# SUBJECT INDEX

# RADIATION ABSORPTION

Stage efficiency in the analysis of thermochemical water decomposition processes 13 p0047 A77-13538

Hydrogen production using solar radiation 13 p0048 A77-13540

Perturbation analysis of second-order effects in kinetics of oil-shale pyrolysis 13 p0070 A77-18585

Demonstration of pyrolysis and materials recovery in San Diego, California 14 p0137 A77-20521

Entropy production, efficiency, and economy in the case of the thermochemical production of synthetic fuels - The sulfuric acid-hybrid process for thermochemical water decomposition 14 p0145 A77-21544

Clean fuels from biomass 14 p0167 A77-23390

Analysis of coal particles undergoing rapid pyrolysis --- in gasification and liquefaction processes 14 p0175 A77-24212

Reactions in the ZnSe thermochemical cycle for hydrogen production 14 p0178 A77-24854

Recovery of energy from solid waste - An answer to some of Southern California's problems 14 p0182 A77-26078

Mathematical modeling of in situ oil shale retorting 14 p0196 A77-28434

Photovoltaic properties of n-CdS/p-CdTe heterojunctions prepared by spray pyrolysis 14 p0198 A77-29023

Coal devolatilization and hydrogasification 14 p0200 A77-29450

The calcium-iodine cycle for the thermochemical decomposition of water 15 p0275 A77-33340

Feasibility studies of chemical reactions for thermochemical water splitting cycles of the iron-chlorine-, iron-sulfur- and manganese-sulfur-families 15 p0275 A77-33342

Laboratory investigations on thermochemical hydrogen production 15 p0276 A77-33348

Simple thermal decomposition reactions for storage of solar thermal energy 15 p0292 A77-35153

Torrax - A system for recovery of energy from solid waste. F. J. Page 15 p0293 A77-35163

Flash hydrolysis process for conversion of lignite to liquid and gaseous products 15 p0301 A77-36334

Preliminary economic analysis - Oil and power by COED-based coal conversion 15 p0301 A77-36338

Economics of ethylene production via pyrolysis of coal based Fischer-Tropsch hydrocarbons 15 p0301 A77-36339

Resource recovery and flash pyrolysis of municipal refuse 15 p0313 A77-37657

Large scale hydrogen production utilizing carbon in renewable resources 15 p0321 A77-38527

Thermolysis or electrolysis - Why we choose the latter --- water splitting for hydrogen production 15 p0321 A77-38528

Pyrolysis kinetics for oil-shale particles 16 p0401 A77-41316

Modelling of entrained-bed pulverized coal gasifiers 16 p0401 A77-41321

Mathematical method for determining reaction networks in chemical systems 16 p0418 A77-43093

Diagnostics for thermal cracking of coal volatiles in entrained-bed gasifiers [WSS/CI PAPER 76-25] 16 p0419 A77-43593

Thermal processing of municipal solid waste for resource and energy recovery --- Book 16 p0438 A77-47951

High temperature thermal energy storage system, Na2SO4 + SO3 reversibly yields Na2S2O7 16 p0450 A77-48764

Reversible oxidation of metal oxides for thermal energy storage 16 p0492 A77-49110

Basic studies of coal pyrolysis and hydrogasification [PB-254878/2] 13 p0096 A77-11511

Production of a hydrocarbon-type synthetic fuel from wood [NRC-15638] 13 p0127 A77-15210

Pyrolysis of oil shale: The effects of thermal history on oil yield [UCRL-77831] 13 p0129 A77-15499

Destroying chemical wastes in commercial scale incinerators. Facility report no. 2, Surface Combustion Division, Midland-Ross Corporation [PB-268232/6] 16 p0542 A77-32051

## Q

**QUALIFICATIONS**  
Testing and fabrication of solar absorbers for the D5A' satellite [CNES-MT-37] 13 p0111 A77-15110

**QUALITY CONTROL**  
The quality category in solar engineering 14 p0143 A77-21310

Assessment of high-efficiency solar cells performance 14 p0148 A77-21785

Geometric perfection of matrix polyurethane foam moldings for solar energy concentrators 15 p0316 A77-37767

Investigating the geometric quality of cast polyurethane-foam duplicates for solar-energy concentrators 16 p0437 A77-47423

High temperature gas turbine engine component materials testing program [PE-1765-7] 13 p0127 A77-15401

Studies of silicon p-n junction solar cells --- open circuit photovoltage [NASA-CR-149669] 14 p0215 A77-18557

A lightweight solar array study [NASA-CR-152676] 15 p0343 A77-22611

**QUANTITATIVE ANALYSIS**  
Quantitative studies on marine biodegradation of oil. III - Comparison of different crude oil residues and effects of sea water source 16 p0425 A77-44675

**QUIET ENGINE PROGRAM**  
NASA Quiet Clean General Aviation Turbofan (QCGAT) program status [NASA-TN-X-73564] 15 p0353 A77-23109

Static and wind-on tests of an upper-surface-blown jet-flap nozzle arrangement for use on the Quiet Clean Short-haul Experimental Engine (QCSEB) [NASA-TN-D-8476] 15 p0370 A77-25086

## R

**RADAR IMAGERY**  
Use of radar in geology 13 p0018 A77-12256

**RADIAL FLOW**  
On power-generating thermojunctions with radial flow of current --- for solar energy conversion 16 p0500 A77-50202

**RADIANT COOLING**  
Flight results of a cryogenic cooler designed for Meteosat [IAF PAPER 76-210] 13 p0003 A77-10942

**RADIANT FLUX DENSITY**  
Energetic calculation of the concentrating capacity of paraboloidal facets 13 p0051 A77-14579

Investigation of composite radiant-energy concentrators with conical radiation sources 14 p0143 A77-21313

Energy computation of concentrating capability of paraboloidal facets 15 p0290 A77-34973

**RADIANT HEATING**  
Solar assisted heat pumps: A possible wave of the future [NASA-CR-2771] 13 p0121 A77-14584

**RADIATION ABSORPTION**  
Solar absorption by each element in an absorber-coverglass array 16 p0423 A77-44487

# RADIATION DAMAGE

# SUBJECT INDEX

## RADIATION DAMAGE

Radiation effects on high efficiency silicon solar cells --- for spacecraft application  
16 p0416 A77-42892

## RADIATION DETECTORS

Spectral response of a laterally illuminated p-n junction --- as photodetector or photovoltaic energy converter  
13 p0062 A77-17478  
Fusion products detection system in MigmaCell II  
16 p0436 A77-47363

## RADIATION DISTRIBUTION

Isothermal surface in a radiation field --- in solar thermal energy devices  
13 p0014 A77-11918  
Radiant-vector distribution in the radiant field of a parabolocylindrical concentrator  
13 p0015 A77-11920  
Irradiation field formation on the receiver of 'precise' and 'unprecise' solar concentrators  
13 p0057 A77-16209  
Basis for developing a solar energy inventory  
14 p0179 A77-25360  
Sun power: An introduction to the applications of solar energy --- Book  
15 p0288 A77-33967  
Influence of the spatial inhomogeneity of the field and amplifying medium on the energy characteristics of a gas laser  
15 p0289 A77-34221  
Fundamentals of solar-energy survey development  
16 p0409 A77-41910  
Distribution of direct and total solar radiation availabilities for the USA  
16 p0471 A77-48926  
Use of calculated displaced shapes to define the reflected light pattern from a focused collector  
16 p0473 A77-48948

## RADIATION DOSAGE

Occupational radiation exposure at light water cooled power reactors, 1969-1975  
[PB-257054/7]  
13 p0125 N77-14740

## RADIATION EFFECTS

Radiation effects on high efficiency silicon solar cells  
13 p0064 A77-18072

## RADIATION MEASUREMENT

The determination of hourly insolation on an inclined plane using a diffuse irradiance model based on hourly measured global horizontal insolation  
16 p0501 A77-50206  
Results from circumsolar radiation measurements  
[LBL-5292]  
15 p0382 N77-26657

## RADIATION MEASURING INSTRUMENTS

A solar power radiometer  
[AD-A039995]  
16 p0539 N77-31658

## RADIATION PRESSURE

Solar sails --- for radiation pressure displacement guidance  
15 p0267 A77-32215

## RADIATION PROTECTION

Advanced vertical-junction silicon solar cells  
[AIAA PAPER 77-486]  
14 p0172 A77-23906

## RADIATION SOURCES

Investigation of composite radiant-energy concentrators with conical radiation sources  
14 p0143 A77-21313  
Composite concentrators with spherical radiation sources  
14 p0179 A77-25359  
Composite concentrators with spherical radiation sources --- in solar heating systems  
16 p0409 A77-41909

## RADIATIVE HEAT TRANSFER

Isothermal surface in a radiation field --- in solar thermal energy devices  
13 p0014 A77-11918  
The problem of use of solar energy specific features of radiative, heat, and mass transfer in solar installations  
13 p0057 A77-16204  
Annular-flow solar heater collector tubes  
[AIAA PAPER 77-190]  
14 p0135 A77-19886  
Combined cycles in single circuit solar refrigerating systems  
15 p0286 A77-33434

Studies into reduction of radiative heat losses of flat plate solar collectors  
16 p0417 A77-42962

The effect of dropwise condensation on glass solar properties  
16 p0422 A77-44485

Conjugate cycles of single-loop solar power and refrigeration plants  
16 p0427 A77-45547

Radiative heat transfer in cavity type axisymmetric collectors for high-temperature solar energy plants  
16 p0443 A77-48523

Predicted daily and yearly average radiative performance of optimal trapezoidal groove solar energy collectors  
16 p0472 A77-48943

A proposed method of rating the thermal performance of solar collectors  
16 p0473 A77-48946

Radiative characteristics of metallic particle coatings and their applications in selective solar energy collectors  
16 p0545 N77-32587

## RADIATIVE TRANSFER

Study of emittance distribution along the walls of a cellular low-loss cell in the case of a base surface with arbitrary emission indicatrix  
13 p0069 A77-18495

## RADIO FREQUENCY HEATING

Supplementary plasma heating studies in the atomic energy commission, France  
13 p0064 A77-17819  
Additional heating in JET --- plasma energy confinement in Joint European Tokamaks  
16 p0407 A77-41718

## RADIO RELAY SYSTEMS

Experience in using bimodal distribution curves to evaluate the reliability of systems supplying energy from renewable sources --- solar and wind systems for radio relay links  
14 p0201 A77-29535

## RADIO TELESCOPES

A small but important contribution to the German-American solar research programme 'Helios'  
15 p0323 A77-39125

## RADIOACTIVE ISOTOPES

Multipurpose insulation system for a radioisotope fueled Mini-Brayton Heat Source Assembly  
13 p0022 A77-12678  
Isotope heat source for dynamic power systems  
13 p0036 A77-12796  
On the application of radioisotope techniques for the study of phthalocyanine catalyzed electrochemical processes in fuel cells  
16 p0425 A77-45151  
Analysis of ceramic materials for impact members in isotopic heat sources  
14 p0210 N77-17246  
Experimental screening of carbon-base materials for impact members in isotopic heat sources  
[BML-X-673]  
15 p0396 N77-27901

## RADIOACTIVE MATERIALS

Development of a small radioisotopic heat source  
13 p0042 A77-12852  
Spherical radioisotope thermoelectric generators - An approach to high specific power devices  
13 p0042 A77-12857

## RADIOACTIVE WASTES

Disposal of toxic wastes. I - Electroplating and electrochemical machining wastes. II - Poisonous and radioactive wastes  
15 p0305 A77-36608  
Methods in environmental sampling for radionuclides  
[UCRL-77722]  
13 p0091 N77-10697  
Environmental survey of the reprocessing and waste management portions of the LWR fuel cycle: A task force report  
[PB-258316/9]  
14 p0209 N77-16879

## RADIOACTIVITY

Comparative discussion on measurements of atmospheric natural radioactivity and pollution by coal smoke particles  
15 p0294 A77-35349  
The flow of heat from the earth's interior  
16 p0408 A77-41800  
Determination of low activities of U-Ra-series elements by a liquid-scintillation spectrometer  
[BLL-SMRE-TRANS-6562-(8313.4)]  
15 p0371 N77-25485

## SUBJECT INDEX

## RANKINE CYCLE

- Modelling the atmospheric dispersal of radioactive pollutants beyond the first few hours of travel  
15 p0395 N77-27603
- RADIOISOTOPE BATTERIES**  
Test and evaluation of the Navy half-watt RTG --- Radioisotope Thermoelectric Generator  
13 p0042 A77-12853  
The low cost high performance generator /LCHPG/ --- space Radioisotope Thermoelectric Generators  
13 p0042 A77-12855  
Principal stages in the development of thermoelectric power in the USSR  
14 p0156 A77-22123  
The selenide isotope generators  
[AIAA PAPER 77-498]  
14 p0173 A77-23916  
Radioisotope power sources in the terrestrial and marine environment  
14 p0196 A77-28170  
An assessment of the materials needs for a Kr-85 fuel capsule  
16 p0462 A77-48855  
Terrestrial RTG designs featuring disc-shaped thermoelectric modules  
16 p0462 A77-48856  
Design of a spherical BTG --- Radioisotope Thermoelectric Generators  
16 p0462 A77-48857  
International Conference on Thermoelectric Energy Conversion, University of Texas, Arlington, Tex., September 1-3, 1976, Proceedings  
16 p0500 A77-49753
- RADIOLYSIS**  
Radiolytic hydrogen production from a laser fusion system  
13 p0035 A77-12795  
The aqueous homogeneous reactor as a source of hydrogen and of process heat  
15 p0274 A77-33329
- RADIOMETERS**  
A solar power radiometer  
[AD-A039995]  
16 p0539 N77-31658
- RADIUM**  
Determination of low activities of U-Ra-series elements by a liquid-scintillation spectrometer  
[BLL-SMRE-TRANS-6562-(8:13.4)]  
15 p0371 N77-25485
- RAIL TRANSPORTATION**  
Evolution of thermal traction - From the diesel engine to the gas turbine  
13 p0004 A77-10976  
Electric arc power collection for high-speed trains  
13 p0060 A77-16594  
Amtrak's newest turboliners  
14 p0138 A77-20699  
Will electricity power tomorrow's trains  
14 p0199 A77-29088  
Energy storage propulsion system for advanced concept train --- braking energy recovery  
14 p0200 A77-29467  
Application of gravitational energy exchange to tracked urban transit systems  
14 p0200 A77-29468  
Modelling of electric drive systems for KEW /flywheel/ vehicles  
14 p0200 A77-29469  
Report on Joint Conference Eno Foundation Board of Directors and Board of Consultants, October 13 and 14, 1976  
15 p0260 A77-31064  
Power plants and future fuels; Proceedings of the Conference, London, England, January 21, 22, 1975  
16 p0428 A77-45956  
Approaches leading to an efficient use of energy, illustrated with the aid of examples concerning the rail traffic and low-temperature heat requirements  
16 p0504 A77-51153  
Results of baseline tests of the EVA Metro sedan, Citi-car, Jet Industries Electra-van, CDA town car, and Otis P-500 van  
[NASA-TN-X-73638]  
14 p0236 N77-21549  
Fuel efficiency improvement in rail freight transportation: Multiple unit throttle control to conserve fuel  
[PB-262470/8]  
15 p0366 N77-24629  
Evaluation of rail rapid transit and express bus service in the urban commuter market  
[PB-265236/0]  
15 p0398 N77-28046
- RAMAN SPECTRA**  
Raman scattering and the characterisation of atmospheric aerosol particles  
15 p0262 A77-31487  
MHD combustor effluent chemistry measurements using Raman scattering  
16 p0425 A77-44825
- RAMJET ENGINES**  
The intermittent jet for supersonic conditions increased with passage to operating in a ramjet - A low cost engine  
15 p0339 N77-22130
- RAMS (PRESSES)**  
Hydraulic ram effect on composite fuel cell entry walls  
[AD-A024832]  
13 p0115 N77-13548
- RANDOM PROCESSES**  
Contribution to the solution of planning problems in electric power generation /effects of random disturbances/  
15 p0294 A77-35399
- RANKINE CYCLE**  
Solar powered organic Rankine cycle engines - Characteristics and costs  
13 p0036 A77-12798  
A unique Rankine-cycle heat pump system  
13 p0036 A77-12799  
Solar-powered Rankine-cycle heat pump system  
13 p0036 A77-12800  
Alternate fuel capability of Rankine cycle engines  
13 p0036 A77-12801  
Solar thermal power generation  
13 p0077 A77-19095  
Organic Rankine Cycle Engine development and solar energy utilization  
13 p0077 A77-19096  
Turbines and turbogenerators for solar power plants with thermodynamic cycles  
14 p0152 A77-21828  
The thermodynamic cycle of the ONEROL engine --- solar Rankine piston engine  
14 p0152 A77-21829  
Solar energy and the steam Rankine cycle for driving and assisting heat pumps in heating and cooling modes  
14 p0177 A77-24571  
Optimal overall efficiency for a solar radiation collector utilizing a two fluid Rankine Cycle to generate electrical power  
14 p0182 A77-26056  
Gas-fired heat pumps - An emerging technology  
14 p0195 A77-27891  
New options for satellite power systems /SPS/ [AIAA PAPER 77-1028]  
16 p0419 A77-43392  
Light commercial Brayton/Rankine space conditioning system  
16 p0445 A77-48716  
Development of a Stirling engine powered heat activated heat pump  
16 p0448 A77-48745  
An environmental assessment of liquid metal topping cycles --- in coal-fired fluidized bed processors for electric power generation  
16 p0452 A77-48780  
Development status - Binary Rankine cycle waste heat recovery system  
16 p0459 A77-48828  
600 kW Organic Rankine Cycle Waste Heat Power Conversion System  
16 p0459 A77-48829  
Combined diesel-organic Rankine-cycle power plant  
16 p0459 A77-48830  
Thermal energy storage  
16 p0461 A77-48841  
Reactor hybrid-Organic Rankine Cycle Electric Power Systems /ORCEPS/ for space applications  
16 p0463 A77-48858  
Optimum operating conditions for a cylindrical parabolic focusing collector/Rankine power generation cycle system  
16 p0468 A77-48905  
Comparative evaluation of solar heating alternatives [COO-2703-2]  
13 p0129 N77-15498  
Computer modeling of a regenerative solar-assisted Rankine power cycle  
14 p0218 N77-19112

## RAPID TRANSIT SYSTEMS

## SUBJECT INDEX

- Rankine cycle energy conversion system design considerations for low and intermediate temperature sensible heat sources [SAND-76-0363] 14 p0251 N77-21699
- Working fluid selection and preliminary heat exchanger design for a Rankine cycle geothermal power plant [PB-261564/9] 15 p0349 N77-22684
- Feasibility test on compounding the internal combustion engine for automotive vehicles, task 2 [COO-2690-1] 16 p0512 N77-28495
- Comparative thermodynamic performance of some Rankine/Brayton cycle configurations for a low-temperature energy application 16 p0532 N77-31207
- RAPID TRANSIT SYSTEMS**
- Transport of the future and the tasks of science 13 p0048 A77-13643
- Electric arc power collection for high-speed trains 13 p0060 A77-16594
- Aerodynamics as a subway design parameter 13 p0070 A77-18721
- Applications of new systems to urban transportation 14 p0137 A77-20392
- Application of gravitational energy exchange to tracked urban transit systems 14 p0200 A77-29468
- Modeling of electric drive systems for KEM /flywheel/ vehicles 14 p0200 A77-29469
- A hydrogen-powered mass transit system 15 p0282 A77-33400
- The politics of urban transportation innovation 15 p0287 A77-33600
- Urban transportation technology --- Book 15 p0324 A77-39467
- Competitive restraints on air travel - Ground modes and telecommunications 16 p0409 A77-41939
- A study of the effects of new transportation systems on urban transportation and environment by computer simulation 16 p0430 A77-46652
- Personal rapid transit research conducted at the Aerospace Corporation [PB-256846/7] 13 p0111 N77-12946
- Impact of a suburban rapid transit line of fuel consumption and cost for the journey-to-work. Analysis of the Philadelphia-Lindenwood high-speed line [PB-263048/1] 15 p0370 N77-25014
- Study of future paratransit requirements [PB-264082/9] 15 p0376 N77-26028
- Evaluation of rail rapid transit and express bus service in the urban commuter market [PB-265236/0] 15 p0398 N77-28046

# RECIPROCATION

# SUBJECT INDEX

Solar flux density distributions on central tower receivers 16 p0484 A77-49038

Central receiver solar thermal power system, phase 1 [SAN/1110-76/T2] 14 p0248 N77-21668

## RECIPROCATION

Analysis of the wind-driven reciprocator 14 p0183 A77-26088

## RECIRCULATIVE FLUID FLOW

Turbulent flow structures and recirculation patterns associated with cyclone combustors and their effect on flame stabilisation 15 p0288 A77-33838

## RECLAMATION

Application of LANDSAT-2 data to the implementation and enforcement of the Pennsylvania Surface Mining Conservation and Reclamation Act [E77-100C7] 13 p0085 N77-10590

Environmental survey of the reprocessing and waste management portions of the LWR fuel cycle: A task force report [PB-258316/9] 14 p0209 N77-16879

Energy recovery from solid waste: A review of current technology [PB-260633/3] 14 p0253 N77-22016

## RECOMBINATION REACTIONS

Reduction of grain boundary recombination in polycrystalline silicon solar cells 14 p0181 A77-25999

## RECTANGULAR GUIDES

Effect of two-dimensional inhomogeneities on the properties of framed MHD channels 16 p0428 A77-46088

## RECTIFIERS

Windmills stage a comeback --- review 13 p0048 A77-13624

A theory of control for a class of electronic power processing systems: Energy-storage dc-to-dc converters [NASA-CR-152696] 15 p0344 N77-22614

## RECYCLING

Energy from solid wastes --- Book 13 p0003 A77-10698

The role of recycling in conservation of metals and energy 13 p0061 A77-16825

Energy and environmental impacts of materials alternatives - An assessment of quantitative understanding 13 p0070 A77-18738

New life for old garbage - Resource and energy recovery from solid wastes 14 p0199 A77-29096

Waste economy and recycling: Problems and practice --- German book 15 p0273 A77-33303

Recovering metal from trash 15 p0287 A77-33529

The Garrett oil-from-waste process and resource recovery system 15 p0293 A77-35162

Recycling trends in the United States: A review [PB-254222/3] 13 p0085 N77-10391

## REDUCED GRAVITY

The International Heat Pipe Experiment --- Black Brant sounding rocket payload zero gravity experiment 13 p0120 N77-14389

## REDUCTION (CHEMISTRY)

Hydrogenation of lignite with synthesis gas 14 p0201 A77-29525

Chemical reduction of SO<sub>3</sub>, particulates and NO<sub>x</sub> emissions 15 p0294 A77-35188

On the application of radioisotope techniques for the study of phthalocyanine catalyzed electrochemical processes in fuel cells 16 p0425 A77-45151

## REFINING

A laboratory evaluation of precoat filtration parameters for the solvent refined coal process 13 p0059 A77-16474

The production of shale oil crude and its refining into military operational fuels 15 p0292 A77-35155

The ecology of a marine littoral receiving effluents from a petroleum refinery 16 p0433 A77-47173

The production and refining of crude oil into military fuels [AD-A024652] 13 p0095 N77-11207

Trends in refinery capacity and utilization: Petroleum refineries in the United States; foreign refinery exporting centers [PB-256966/3] 13 p0132 N77-15523

XRF analysis of some regenerated catalysts [MRL-TN-388] 15 p0376 N77-26247

Environmental considerations of selected energy conserving manufacturing process options. Volume 4: Petroleum refining industry report [PB-264270/0] 15 p0384 N77-26681

Destroying chemical wastes in commercial scale incinerators. Facility report no. 2, Surface Combustion Division, Midland-Ross Corporation [PB-268232/6] 16 p0542 N77-32051

## REFLECTANCE

Determination of average ground reflectivity for solar collectors 14 p0181 A77-25903

A new Chrome Black selective absorbing surface --- for solar radiation 16 p0406 A77-41585

Determination of average ground reflectivity for solar collectors 16 p0471 A77-48933

Investigation of high temperature performance of thin film, solar-thermal energy converters [PB-265554/6] 16 p0516 N77-28613

Processing on high efficiency solar collector coatings 16 p0526 N77-30286

## REFLECTORS

Performance of low cost solar reflectors for transferring sunlight to a distant collector 14 p0180 A77-25896

Potential of a solar collector with a stationary spherical reflector and a tracking absorber for electrical power production [SAND-76-8039] 15 p0345 N77-22636

## REFRACTORIES

Progress on the testing of refractories for directly-fired MHD air heater service. II 15 p0328 A77-39544

Impact of alternate fuels on industrial refractories and refractory insulation applications: An assessment [ORNL-TM-5592] 15 p0344 N77-22618

## REFRACTORY MATERIALS

Development of sodium/sulfur-cells 13 p0026 A77-12716

High-temperature ceramics for automobile gas turbines. II 13 p0063 A77-17591

Progress on the testing of refractories for directly-fired MHD air heater service 14 p0142 A77-21254

The French CNRS 1000 kW solar furnace - Description, performance characteristics, present utilization, and perspectives 15 p0262 A77-31473

Corrosion of potential MHD preheater materials in liquid slag and slag-seed 15 p0327 A77-39541

Design and performance of high temperature ceramic electrode modules --- in MHD generators 15 p0327 A77-39543

Development of a turbine rotor of silicon nitride 16 p0503 A77-50651

Practical reasons for investigating ion transport in high temperature insulating materials --- for energy conversion efficiency [CONF-760831-2] 14 p0227 N77-19935

Development and characterization of materials for open cycle MHD [BNWL-2004-3] 16 p0541 N77-31969

## REFRIGERANTS

Selecting refrigerant-absorbent fluid systems for solar energy utilization 14 p0168 A77-23448

Continuous solar air conditioning with ammonia/water absorption cycle 14 p0182 A77-26057

Modelling of a solar-operated absorption air conditioner system with refrigerant storage 16 p0475 A77-48963

- REGRESSION ANALYSIS**  
Regression study of solar radiation and electrical energy consumption 14 p0137 A77-20686  
The possibility of using regression models for calculating the effect of weather conditions on electric energy demand 16 p0411 A77-42259

## REGULATIONS

Regulatory reform of air transportation  
[AIAA PAPER 77-276] 13 p0065 A77-18215

State policies for geothermal development.  
Uncovering a major resource 14 p0252 A77-21728  
[PB-261744/7]

Legal and public policy setting for geothermal  
resource development in Hawaii 15 p0343 A77-22596  
[PB-262910/3]

Report of the Presidential task force on reform of  
Federal Energy Administration regulations,  
volume 1 15 p0347 A77-22649  
[PB-262181/1]

Report of the Presidential task force on reform of  
Federal Energy Administration regulations,  
volume 2. Table of contents. Appendixes 15 p0347 A77-22650  
[PB-262182/9]

Perspective on energy policy 15 p0348 A77-22674  
[PB-261736/3]

General Electric Company survey to define impact  
of statewide building codes on solar HVAC  
systems, commercial buildings. National Solar  
Demonstration Program 15 p0383 A77-26674  
[COO-2683-76-11]

Mid-term and long term energy trends 15 p0395 A77-27559  
[PB-264740/2]

National gas survey. Report to the federal power  
commission by the Supply-Technical Advisory Task  
force on the regulatory aspects of substitute gas 16 p0519 A77-29323  
[PB-265877/1]

Energy fact book, 1977 --- energy sources,  
technology, and conservation 16 p0522 A77-29624  
[AD-A038802]

Continuation of the adjustment as a production  
incentive to the maximum weighted average first  
sale price for domestic crude oil (Energy Action  
no. 11) 16 p0530 A77-30636  
[PB-266841/6]

Compilation of energy-related legislation. Volume  
1: Oil, gas, and electric power 16 p0534 A77-31608  
[GPO-80-323]

Compilation of energy-related legislation. Volume  
2: Other energy legislation 16 p0534 A77-31609  
[GPO-80-324]

Report of the Advisory Commission on Electric  
Power Alternatives 16 p0559 A77-33668  
[PB-268479/3]

Building energy conservation programs: A  
preliminary examination of regulatory activities  
at the state level 16 p0559 A77-33673  
[PB-268873/7]

**REINFORCING FIBERS**  
Software aspects of super composites ---  
composition selection to meet user requirements 13 p0053 A77-15301

**RELAY SATELLITES**  
Space-based solar power conversion and delivery  
systems study. Volume 1: Executive summary 13 p0129 A77-15494  
[NASA-CR-150146]

**RELIABILITY ANALYSIS**  
R&M - Today's heating and cooling vs. solar energy 13 p0002 A77-10482

Regression study of solar radiation and electrical  
energy consumption 14 p0137 A77-20686

Some preliminary considerations on photovoltaic  
conversion of solar energy 14 p0164 A77-23299

Experience in using bimodal distribution curves to  
evaluate the reliability of systems supplying  
energy from renewable sources --- solar and wind  
systems for radio relay links 14 p0201 A77-29535

Critical comments concerning the application of  
the availability concept in power plant technology 15 p0265 A77-31850

Integration of solar generation into electric  
utility systems 16 p0404 A77-41562  
[AIAA 77-1020]

Dynamic modeling and sensitivity analysis of solar  
thermal energy conversion systems 16 p0461 A77-48845

**RELIABILITY ENGINEERING**  
Satellite communications for off-shore oil  
operations using WESTAR 13 p0053 A77-15130

Crash test of a liquid hydrogen automobile 15 p0282 A77-33397

## REMOTE REGIONS

A power plant of the Aerosolec type 14 p0153 A77-21839

**REMOTE SENSORS**  
Remote sensing of an underground coal-burn cavity  
with a wide-band induction system 13 p0007 A77-11050

Tracking pollutants from a distance 13 p0067 A77-18370

Utilization of remote sensing techniques to detect  
land use effects on wildland water quality 13 p0071 A77-18984

The uses of air photography /2nd edition/ --- Book 15 p0295 A77-35675

Regional energy availability from conversion of  
solid waste 15 p0304 A77-36433

Energy and aerospace /Sixty-fifth Wilbur and  
Orville Wright Memorial Lecture/ --- aerospace  
contributions to energy conservation 15 p0304 A77-36434

New themes for space: Mankind's future needs and  
aspirations; Proceedings of the Bicentennial  
Space Symposium, Washington, D.C., October 6-8,  
1976 16 p0430 A77-46627

Use of a carbon dioxide laser in remote detection  
of petroleum oil pollution at sea 16 p0433 A77-47080

Remote sensing of geothermic activities of the  
volcanoes Aetna, Stromboli and Vesuv by means of  
infra-red NOAA-VHRR-satellite data --- Italy 13 p0104 A77-12485

**REMOTELY PILOTED VEHICLES**  
Development of a small, low cost turbojet engine  
with thrust augmentation --- for RPV 16 p0434 A77-47347

**REPORTS**  
Advanced coal gasification system for electric  
power generation --- pollution monitoring  
[FE-1514-176] 13 p0088 A77-10653

**RESEARCH AIRCRAFT**  
Hypersonic technology-approach to an expanded  
program 13 p0051 A77-14597

**RESEARCH AND DEVELOPMENT**  
Energy: Mathematics and models; Proceedings of the  
Conference, Alta, Utah, July 7-11, 1975 13 p0008 A77-11233

ERDA's gas turbine development program for the  
next decade 13 p0011 A77-11324

Application of advanced technology to future  
long-range aircraft 13 p0016 A77-12194  
[SAWE PAPER 1126]

An energy center in Sri Lanka --- UN rural energy  
development program 13 p0021 A77-12669

Benefits of hydrogen production research 13 p0032 A77-12768

Survey of hydrogen energy application projects 13 p0033 A77-12778

Current status of the magnetic fusion program 13 p0035 A77-12792

The sigma high energy advanced fuel direct  
conversion fusion power plant 13 p0035 A77-12794

The ERDA Photovoltaic Systems Definition Project 13 p0038 A77-12815

A summary of solar heating and cooling of  
buildings /SHACOB/ - Phase I demonstration  
planning studies 13 p0039 A77-12821

ERDA's Bicentennial Thermionic Research and  
Technology Program 13 p0042 A77-12861

NASA thermionic-conversion program 13 p0043 A77-12863

Operational experience with small wind units 13 p0044 A77-12873

NASA electric propulsion program 13 p0045 A77-13033  
[AIAA PAPER 76-1068]

Can Canada harness the wind 13 p0053 A77-15047

Energy research for physicists 13 p0054 A77-15350

Energy research in the UK 13 p0055 A77-15812

## SUBJECT INDEX

## RESEARCH FACILITIES

Fossil energy research and development in ERDA  
13 p0063 A77-17551

Alkali metal space power technology applicable to  
national energy research and development  
[AIAA PAPER 77-289] 13 p0065 A77-18223

Technical highlights in general aviation  
[AIAA PAPER 77-312] 13 p0066 A77-18237

Overview of the ERDA fusion power program  
13 p0068 A77-18446

Research at the EURATOM-CCF Center --- on solar  
energy  
13 p0080 A77-19126

The technology base for large MHD superconducting  
magnets  
14 p0140 A77-21233

Overview of energy research and development  
administration inertial confinement fusion program  
14 p0146 A77-21744

International cooperation on development of  
hydrogen technologies  
14 p0171 A77-23717

Our energy future: The role of research,  
development, and demonstration in reaching a  
national consensus on energy supply --- Book  
14 p0179 A77-25224

Basic research problems in the generation of  
electrochemical energy for powering small  
private vehicles  
14 p0180 A77-25721

Recent results in the research area 'energetics'  
with respect to nonnuclear energy research  
14 p0200 A77-29300

Effects of selected R&D options on fuel usage in  
the commercial air system  
14 p0201 A77-29472

Photovoltaic systems --- solar energy conversion  
research for military applications  
15 p0288 A77-34112

The EPA role in energy research and development  
15 p0291 A77-35148

Development of the satellite solar power station  
15 p0296 A77-35815

A simple model for solar energy economics in the U.K.  
15 p0298 A77-36245

Energy research overview - Alternatives for energy  
development  
[AAS 75-280] 15 p0304 A77-36555

Research needs report: Energy conversion research  
--- Book  
15 p0313 A77-37646

Federal Fuels from Biomass Energy Program  
15 p0315 A77-37670

Energy R&D modeling for budgetary decisions  
15 p0319 A77-38218

Superconducting magnet development for the MHD  
program  
15 p0331 A77-39569

Solar thermal electricity - Power tower dominates  
research  
16 p0400 A77-40647

Adapting the experience of DOD/Industry to  
developing fusion power reactors  
[AIAA 77-1019] 16 p0404 A77-41561

The NASA Energy Conservation Program  
[AIAA PAPER 77-1005] 16 p0405 A77-41571

Photovoltaics - The semiconductor revolution comes  
to solar  
16 p0407 A77-41638

The roles of aerospace organizations in energy  
development or can aerospace success bring  
success in energy  
[AIAA PAPER 77-1001] 16 p0408 A77-41855

Creating a welcome for aerospace energy technology  
16 p0413 A77-42561

Introduction to the ERDA electric and hybrid  
demonstration program --- electric and hybrid  
vehicle research and development  
16 p0420 A77-43675

Advanced fuel cell technology and applications  
16 p0447 A77-48735

ERDA Fuel Cell Applied Research Program  
16 p0447 A77-48736

Development of the High Seasonal Performance  
Factor Gas Heat Pump --- for space heating  
16 p0448 A77-48744

NASA Thermionic-Conversion program  
16 p0466 A77-48886

Present state and perspective of solar energy  
applications in Mexico  
16 p0469 A77-48911

Overview of Canadian activities in renewable  
energy resources  
16 p0469 A77-48912

Recent Canadian activities in solar heating  
16 p0469 A77-48915

Recent Canadian activities in wind power  
16 p0470 A77-48916

Report on United States international cooperation  
in solar energy technology development  
16 p0495 A77-49132

Georgia Tech 400 KWth solar thermal test facility  
16 p0498 A77-49158

Research and development for Canadian nuclear power  
[AECL-5314] 13 p0097 A77-11533

An analysis of the technology role in US power  
during the mid-range period  
[AD-A024042] 13 p0102 A77-11927

Outlook for research and development in the  
underground gasification of coal  
[PB-256155/3] 13 p0109 A77-12555

Inventory of energy research and development (1973  
- 1975), volume 5  
[GPO-64-734] 13 p0121 A77-14579

Geothermal B and D project report  
[ANCR-1283] 13 p0124 A77-14605

Assessment of the role of magnetic mirror devices  
in fusion power development  
[ERDA-76-74] 14 p0213 A77-17872

Development scenario for laser fusion  
[UCRL-76980] 14 p0216 A77-18575

Fossil energy research program of the Energy  
Research and Development Administration, FY 1977  
[ERDA-76-63] 14 p0222 A77-19611

Description of the solar energy B and D programs  
in many nations  
[SAN/1122-76/1] 14 p0225 A77-19648

Assessment of laser-driven fusion  
[PB-260691/1] 14 p0234 A77-20880

Influence of selected Federal statutes on energy  
development  
[BNWL-2084 (RAP-5)] 15 p0346 A77-22638

Recommendations for a US geothermal research plan.  
Volume 2: Executive summary  
[PB-261568/0] 15 p0346 A77-22642

Recommendations for a geothermal utilization plan,  
Volume 3  
[PB-261569/8] 15 p0346 A77-22643

Perspective on energy policy  
[PB-261736/3] 15 p0348 A77-22674

JPL basic research review --- research and  
advanced development  
[NASA-CR-152689] 15 p0357 A77-23894

Our energy future: The role of research,  
development, and demonstration in reaching a  
national consensus on energy supply  
[PB-263761/9] 15 p0367 A77-24635

The analysis of subsidence associated with  
geothermal development. Volume 2: Research  
report  
[PB-263693/4] 15 p0369 A77-24715

RANN utilization experience (case studies J2  
through 41) --- research applied to national needs  
[PB-263683/5] 15 p0370 A77-25027

National program plan for research and development  
in solar heating and cooling  
[ERDA-76-144] 16 p0514 A77-28597

A half megawatt Pulse Forming Network (PFN)  
[AD-A039709] 16 p0526 A77-30373

Survey of satellite power stations  
[DSE/2071-1] 16 p0532 A77-31225

National benefits/costs of enhanced oil recovery  
research  
[FE-2021-4] 16 p0538 A77-31649

The reporting of federal research and development  
resources applied to innovation  
[PB-266765/7] 16 p0541 A77-32009

NASA authorization, 1978, volume 1, part 2  
[GPO-92-082] 16 p0542 A77-32031

NASA authorization, 1978, volume 1, part 3  
[GPO-92-294] 16 p0542 A77-32032

RESEARCH FACILITIES

The use of geothermal energy at military  
installations  
[AD-A034241] 15 p0366 A77-24626

- Study of Lyndon B. Johnson Space Center utility systems  
[NASA-TM-58196] 15 p0388 N77-27161
- Engineering analysis and testing of water-trickle solar collector  
[ORO-4927-76-2] 15 p0391 N77-27506
- RESEARCH MANAGEMENT**
- Energy R&D modeling for budgetary decisions  
15 p0319 A77-38218
- Daedalophobia - Diagnosis and prognosis --- solar energy utilization obstacles in Canada

# RETROFITTING

# SUBJECT INDEX

Energy management guide for light industry and commerce. EPIC energy management series [PB-263121/6] 15 p0356 N77-23616

Energy and resource planning group [UCRL-50029-76] 15 p0372 N77-25634

Optimal drawdown strategy for strategic petroleum reserves [PB-265838/3] 16 p0512 N77-28569

FFA: Final reports on oil and gas resources, reserves, and productive capacities [GPO-80-748] 16 p0534 N77-31606

Mineral resources: Potentials and problems [USGS-CIEC-698] 16 p0544 N77-32563

**RETROFITTING**

Compatible building design --- for solar heating retrofits 16 p0423 A77-44497

The Lowell Observatory experimental solar heating module 16 p0476 A77-48976

Design and construction of a residential solar heating system at Fermilab 16 p0476 A77-48977

Residential solar heating retrofit in the urban environment 16 p0478 A77-48992

A status report on the USAFA solar energy program 16 p0478 A77-48993

Energy conservation through residential solar retrofit 16 p0479 A77-48994

Project Sunshower - San Jose State University dormitory retrofit to solar-assisted water heating 16 p0479 A77-48996

Solar retrofit applications for public buildings 16 p0479 A77-48997

System performance of first residential solar installation in Charlottesville, Virginia, U.S.A. - Retrofitted indoor swimming pool 16 p0479 A77-48999

Economic and institutional rationale for solar retrofitting - Case example: 'Project Sunshower' 16 p0495 A77-49131

**REUSABLE LAUNCH VEHICLES**

Technology requirements for advanced earth-orbital transportation systems: Summary report --- single stage to orbit vehicles [NASA-CR-2867] 16 p0550 N77-33255

**REUSE**

Estimating procedures associated with aircraft modifications [SAWE PAPER 1101] 13 p0016 A77-12181

**REVENUE**

Evaluating revenue sources for public transit - A new frontier for environmental planners 13 p0070 A77-18723

**REVIEWING**

Energy and technology review [UCRL-52000-76-8] 15 p0345 N77-22627

Geothermal technoecosystems and water cycles in arid lands [PB-263091/1] 15 p0354 N77-23592

Review of solar cooling [CONF-760842-9] 15 p0393 N77-27535

An overview of concepts for aircraft drag reductions 16 p0543 N77-32092

In-situ coal gasification: Status of technology and environment impact [PB-268576/6] 16 p0548 N77-32613

Overview and review of motor gasoline desulfurization, volume 1 [BERC/RI-76/17-VOL-1] 16 p0551 N77-33377

**REYNOLDS NUMBER**

The influence of the Reynolds number on the profiles of velocity and concentration in free jets of different density 13 p0069 A77-18500

**RHENIUM**

The NASA thermionic-conversion /TEC-ART/ program 16 p0438 A77-47960

**RIBBONS**

Alternative strategies for implementing silicon-ribbon technology for photovoltaic applications 13 p0039 A77-12819

Silicon ribbon growth by a capillary action shaping technique [NASA-CR-149815] 14 p0227 N77-19898

Silicon ribbon growth by a capillary action shaping technique [NASA-CR-149814] 14 p0227 N77-19899

**RIGID ROTORS**

Potential aerodynamic analysis of horizontal-axis windmills [AIAA PAPER 77-132] 14 p0135 A77-19848

Self-regulating composite bearingless wind turbine 16 p0491 A77-49095

**RING STRUCTURES**

Energy storage - An interference assembled multiring superflywheel 16 p0450 A77-48761

**RISK**

Risk management of liquefied natural gas installations 13 p0002 A77-10451

**RIVERS**

Predicting the rate of warming of rivers below hydroelectric installations 16 p0437 A77-47749

Characterization and evaluation of wastewater sources United States Steel Corporation, Clairton Works, Pittsburgh, Pennsylvania, 28-31 January 1976 [PB-255586/0] 13 p0116 N77-13566

**ROCKET ENGINE DESIGN**

Laser propulsion --- rocket heat engine design [IAF PAPER 76-166] 13 p0003 A77-10931

**ROCKS**

Thermal properties of subsurface rocks in the Ukraine 16 p0443 A77-48647

Large-scale thermal storage in rock - Construction, utilization, and economics 16 p0451 A77-48769

Energy extraction characteristics of hot dry rock geothermal systems 16 p0455 A77-48798

High-temperature energy storage in native rocks 16 p0492 A77-49104

Heat extraction from hot dry rock masses [PB-256775/8] 13 p0116 N77-13556

Preliminary assessment of a geothermal energy reservoir formed by hydraulic fracturing [LA-UR-76-1672] 14 p0221 N77-19597

Preliminary study of the importance of hydrothermal reactions on the temperature history of a hot, dry rock geothermal reservoir [PB-262391/6] 14 p0252 A77-21731

Geothermal chemistry activities at LASL [LA-6448-PR] 15 p0344 N77-22623

Heat extraction from hot, dry rock masses [PB-265116/4] 16 p0516 N77-28609

**ROLLER BEARINGS**

A small but important contribution to the German-American solar research programme 'Helios' 15 p0323 A77-39125

**ROOM TEMPERATURE**

Contribution of the heat carried by solar radiation to the thermal balance of a room during the cold season and its effect on domestic fuel consumption 13 p0063 A77-17558

Design and performance studies on a solar room heater 15 p0255 A77-30314

**ROTARY STABILITY**

Whirl stability of the pendulously supported flywheel system [ASME PAPER 77-APM-20] 15 p0323 A77-38831

**ROTATING DISKS**

Flywheel energy storage. I - Basic concepts 15 p0323 A77-39314

**ROTATING ELECTRICAL MACHINES**

Thermal performance of the rotor of the MIT-EPRI 3 MVA superconducting alternator --- cryogenic cooling 14 p0144 A77-21384

Heat transfer and resistance in rotating pipes /Review/ 16 p0402 A77-41361

Large-scale applications of superconductivity 16 p0414 A77-42475

**ROTATING FLUIDS**

Fluidisation and gas combustion in a rotating fluidised bed 15 p0264 A77-31674

## ROTATING MIRRORS

- Calorimetry of large solar concentrators  
13 p0038 A77-12814

## ROTOR AERODYNAMICS

- Numerical solution for the unsteady lifting characteristics of variable pitch cross-flow wind turbines  
13 p0044 A77-12871
- Design consideration for the Darrieus rotor --- wind turbines  
13 p0044 A77-12872
- Dual optimum aerodynamic design for a conventional windmill  
13 p0048 A77-13704
- Aerodynamics of the Darrieus rotor  
13 p0050 A77-14559
- Optimum wind-energy conversion systems  
14 p0155 A77-21936
- The application of laminated wooden blades to a two-meter Darrieus type vertical axis wind turbine  
14 p0156 A77-22142
- Wind energy in practical use: wheels, rotors, mills, wind power plants --- German book  
15 p0271 A77-33114
- A new series of aerofoil sections suitable for aircraft propellers  
15 p0298 A77-36157
- Effects of wind fluctuations on windmill behaviour  
16 p0410 A77-42073
- Segmented and self-adjusting wind turbine rotors  
16 p0468 A77-48902
- Some dynamic problems of rotating windmill systems  
13 p0084 A77-10271

## ROTOR BLADES

- Dual optimum aerodynamic design for a conventional windmill  
13 p0048 A77-13704
- Possibilities for utilizing wind energy  
13 p0056 A77-15853
- Rotor/generator isolation for wind turbines [AIAA 77-372]  
14 p0180 A77-25782
- Wind power - Pipe dream or reality  
16 p0442 A77-48503
- Application of laminated wooden blades to a two-meter Darrieus type vertical axis wind turbine [SAND-75-0284]  
16 p0521 A77-29612

## ROTOR BLADES (TURBOMACHINERY)

- Potential aerodynamic analysis of horizontal-axis windmills [AIAA PAPER 77-132]  
14 p0135 A77-19848
- Materials and processing approaches to cost competitive wind turbine rotor blades  
14 p0157 A77-22144
- Two general methods for the unsteady aerodynamic analysis of horizontal-axis windmills  
16 p0467 A77-48896
- Experimental data and theoretical analysis of an operating 100 kW wind turbine  
16 p0467 A77-48898
- Segmented and self-adjusting wind turbine rotors  
16 p0468 A77-48902
- Early operation experience on the ERDA/NASA 100 kW wind turbine --- rotor blade loads [NASA-TM-X-71601]  
13 p0086 A77-10640
- The optimum configuration of rotor blades for horizontal wind energy converters [NASA-TT-P-17379]  
14 p0210 A77-17562
- Dynamic blade loading in the ERDA/NASA 100 kW and 200 kW wind turbines [NASA-TM-73711]  
16 p0528 A77-30599

## ROTOR SPEED

- Antrak's newest turboliners  
14 p0138 A77-20699
- Flywheel energy storage. II - Magnetically suspended superflywheel  
15 p0323 A77-39315
- Variable speed wind turbines for high wind energy conversions  
16 p0410 A77-42074

## ROTOES

- Optimization and characteristics of a sailing windmill rotor [PB-259898/5]  
14 p0234 A77-20622
- Optimization and characteristics of a Sailing windmill rotor [NSF/RANN/GI-41891/FE/75/4]  
16 p0558 A77-33652

## RUBBER

- Accelerated heat-aging studies on fluororubber in various media  
15 p0264 A77-31750

## ROMANIA

- Hydrogen economy analysis using decision theory  
14 p0247 A77-21663

## RUNNING

- Pace and grade related to the oxygen and energy requirements, and the mechanics of treadmill running  
15 p0396 A77-27689

## RURAL AREAS

- An energy center in Sri Lanka --- UN rural energy development program  
13 p0021 A77-12669
- Preliminary work on photovoltaic solar electric generator for rural electrification at Universiti Sains Malaysia  
14 p0153 A77-21840
- A farm energy system employing hydrogen storage  
15 p0278 A77-33366
- Wind power for India  
16 p0423 A77-44498
- ERDA/USDA Agricultural Solar Thermal Energy Program  
16 p0470 A77-48921
- Technical and socio-economic aspects of solar energy and rural development in developing countries  
16 p0494 A77-49128
- Rural energy centre for Africa using solar, wind and biogas energies  
16 p0496 A77-49139
- Wind-powered hydrogen electric systems for farm and rural use [PB-259318/4]  
14 p0226 A77-19667

## S

## SAFETY

- Hydrogen safety problems  
14 p0245 A77-21640
- Safety flywheel [NASA-CASE-RQN-10888-1]  
15 p0342 A77-22484

## SAFETY DEVICES

- Crash test of a liquid hydrogen automobile  
15 p0282 A77-33397
- Prototype hydrogen automobile using a metal hydride  
15 p0282 A77-33398
- Hydrogen combustion. Part 1: Investigation of hydrogen flame control methods [CTI-IV-75-01449]  
14 p0235 A77-21204

## SAFETY FACTORS

- Development of a small radioisotopic heat source  
13 p0042 A77-12852
- The importation of liquefied natural gas  
14 p0194 A77-27607
- Temperature excursions during loss of magnet coolant accidents with thermalization of energy of large superconducting solenoids  
16 p0411 A77-42160
- Engine performance and fire-safety characteristics of water-containing diesel fuels [AD-A036011]  
15 p0377 A77-26330

## SAFETY MANAGEMENT

- Risk management of liquefied natural gas installations  
13 p0002 A77-10451
- Hydrogen safety problems --- fuel systems hazard prevention  
15 p0283 A77-33402
- Safety considerations for high temperature thermal energy storage in fluoride salts  
16 p0451 A77-48768
- Report of the Army Scientific Advisory Panel Ad Hoc Group on fire-safe fuels [AD-A023763]  
13 p0095 A77-11208
- Bibliography on Liquefied Natural Gas (LNG) safety [NASA-TM-X-73408]  
13 p0127 A77-15208
- Energy recovery from municipal solid waste, an environmental and safety mini-overview survey [ATR-76(7518)-7]  
15 p0369 A77-25011

## SAILS

- Comparative wind tunnel investigation of sail profiles for windmills [VTH-191]  
13 p0111 A77-13012

## SAILWINGS

- Optimization and characteristics of a sailing  
windmill rotor  
[PB-259898/5] 14 p0234 N77-20622

## SALINITY

- Exploring stability criteria of solar ponds  
[ASME PAPER 76-WA/HT-62] 14 p0187 A77-26489  
Salt requirement and stability of solar ponds  
16 p0482 A77-49027  
Plan for developing moderate temperature/low  
salinity geothermal resources  
[ANCR-1318] 14 p0223 N77-19614

## SALTON SEA (CA)

- Geothermal development and the Salton Sea  
14 p0194 A77-27352  
Using Salton Sea Geothermal brines for electrical  
power: A review of progress in chemistry and  
materials technology - 1976 Status  
16 p0469 A77-48908  
On shallow-hole temperature measurements. A test  
study in the Salton Sea geothermal field  
[PB-262643/0] 15 p0343 N77-22602

## SALTS

- Molten salt thermal energy storage for utility  
peaking loads  
16 p0451 A77-48765  
Safety considerations for high temperature thermal  
energy storage in fluoride salts  
16 p0451 A77-48768  
Demand sensitive energy storage in molten salts  
16 p0491 A77-49102  
Thermal energy storage with saturated aqueous  
solutions  
16 p0493 A77-49111  
Effect of mechanical cooling devices on ambient  
salt concentration  
[PB-256679/2] 13 p0125 N77-14631  
Storage of thermal energy in molten salts and metals  
[NASA-TT-F-17412] 14 p0220 N77-19574

## SAMPLING

- Development of procedures for the measurement of  
fugitive emissions  
[PB-263992/0] 15 p0368 N77-24671

## SAN JUAN MOUNTAINS (CO)

- Analysis of LANDSAT B imagery as a tool for  
evaluating, developing, and managing the natural  
resources of New Mexico  
[E77-10090] 14 p0214 N77-18511

## SANDWICH STRUCTURES

- Optimization of composite flywheel design  
15 p0260 A77-31044  
Resistance of superconducting-normal  
metal-superconducting sandwiches  
[LBL-5473] 15 p0341 N77-22393

## SATELLITE ANTENNAS

- On the feasibility of small power satellites  
15 p0298 A77-36264  
Antenna design for offshore satellite links  
16 p0442 A77-48493  
On the active and passive CETI from earth  
satellite orbit --- communication with  
extraterrestrial intelligence  
[IAF PAPER A-77-48] 16 p0507 A77-51524

## SATELLITE CONFIGURATIONS

- Space-based solar power conversion and delivery  
systems study. Volume 3: Economic analysis of  
space-based solar power systems  
[NASA-CR-150148] 13 p0129 N77-15496

## SATELLITE CONTROL

- UK, T5 ion engine thrust vector control  
considerations  
[AIAA PAPER 76-1064] 13 p0045 A77-13030

## SATELLITE DESIGN

- Photovoltaic, gravitationally-stabilized  
solid-state, satellite solar power station  
/GSSNPS/  
[AIAA PAPER 77-511] 14 p0173 A77-23927  
Solar cell equipment with concentrating mirrors  
and radiator surfaces  
15 p0324 A77-39494

## SATELLITE LIFETIME

- KIPS - Kilowatt Isotope Power System --- for use  
in satellites  
13 p0041 A77-12837

## SATELLITE OBSERVATION

- Geothermal flux through palagonitized tephra,  
Surtsey, Iceland - The Surtsey  
temperature-data-relay experiment via Landsat-1  
13 p0048 A77-13648

Space: A resource for earth - An AIAA review ---  
Book

- 15 p0269 A77-32440  
Introductory remarks on space observations of  
long-term climatic changes produced by  
escalating energy use  
[IAF PAPER A-77-01] 16 p0507 A77-51508

## SATELLITE ORBITS

- The ATS-6 power system - Hardware implementation  
and orbital performance  
13 p0040 A77-12831

## SATELLITE POWER TRANSMISSION (TO EARTH)

- Photovoltaic and thermal energy conversion for  
solar powered satellites  
[IAF PAPER 76-117] 13 p0003 A77-10913  
Satellite power systems for large-scale power  
generation  
[IAF PAPER 76-118] 13 p0003 A77-10914  
Microwave transmission system for space power  
13 p0014 A77-11818  
Transportation options for solar power satellites  
13 p0040 A77-12829  
Satellite solar power stations and energy relay  
satellites  
13 p0052 A77-14901  
Solar power satellites - Opportunity and challenge  
[AIAA PAPER 77-291] 13 p0065 A77-18224  
A microwave energy converter with a reversing  
magnetic field  
14 p0139 A77-21154

- Space power systems - What environmental impact  
14 p0146 A77-21757

## Powersat - An astronomical energy solution

- 14 p0176 A77-24520

## The development of a satellite solar power station

- 14 p0203 A77-29577

## Space solar power - The transportation challenge

- for Space Shuttle  
15 p0266 A77-32054

## Microwave energy transmission

- [AIAA PAPER 77-529] 15 p0266 A77-32063

## Solar power in space - Energy for the year 2000

## Critical areas: Satellite power systems concepts

- [NASA-TM-X-74694] 15 p0362 N77-24585

## SATELLITE SOLAR ENERGY CONVERSION

- Feasibility of a satellite solar power station  
/SSPS/  
13 p0047 A77-13504

## SUBJECT INDEX

## SATELLITE SOLAR POWER STATIONS

Space solar power - An available energy source 13 p0056 A77-15946

Solar power from satellites 14 p0146 A77-21751

Hardened solar photovoltaics [AIAA PAPER 77-484] 14 p0172 A77-23904

Gallium arsenide concentrator system [AIAA PAPER 77-487] 14 p0172 A77-23907

A solar power system with gallium arsenide solar cells [AIAA PAPER 77-519] 14 p0174 A77-23932

Advanced high efficiency wraparound contact solar cell [AIAA PAPER 77-521] 14 p0174 A77-23934

The development of a satellite solar power station 14 p0203 A77-29577

Development of the satellite solar power station 15 p0296 A77-35815

Closed Brayton cycle turbines for satellite solar power stations 15 p0296 A77-35816

On the feasibility of small power satellites 15 p0298 A77-36264

Solar power in space - Energy for the year 2000 16 p0399 A77-40519

Satellite solar power - Will it pay off [AIAA 77-1027] 16 p0404 A77-41567

New options for satellite power systems /SPS/ [AIAA PAPER 77-1028] 16 p0419 A77-43392

Space-based solar power study near completion 16 p0442 A77-48480

Solar power satellites - A system overview 16 p0463 A77-48868

Power satellite construction location considerations --- orbital assembly for solar energy conversion 16 p0463 A77-48869

Design and analysis of a 5000-MW GaAlAs satellite power system 16 p0464 A77-48871

Space power system design and development from an economic point of view 16 p0464 A77-48872

The evolution of the photovoltaic, gravitationally stabilized, solid-state satellite solar power station 16 p0464 A77-48874

Space-borne power conversion into a microwave beam and its impact on the environment of the upper atmosphere 16 p0464 A77-48875

Optimizing a low cost satellite energy system 16 p0465 A77-48877

Past experience - Basis for future advanced power systems for communications satellites [IAF PAPER 77-22] 16 p0506 A77-51390

Space-based solar power conversion and delivery systems study. Volume 1: Executive summary [NASA-CR-150146] 13 p0129 A77-15494

Initial technical, environmental, and economic evaluation of space solar power concepts. Volume 1: Summary [NASA-TM-X-74309] 14 p0207 A77-16442

Initial technical environmental, and economic evaluation of space solar power concepts. Volume 2: Detailed report [NASA-TM-X-74310] 14 p0207 A77-16443

Space-based power conversion and power relay systems: Preliminary analysis of alternate systems [NASA-CR-150171] 14 p0207 A77-16447

**SATELLITE SOLAR POWER STATIONS**

Energy - Ecospace --- space law aspects of U.S. and U.S.S.R. solar power proposals [IAF PAPER ISL-76-59] 13 p0004 A77-10970

Transportation options for solar power satellites 13 p0040 A77-12829

Small space station electrical power system design concepts 13 p0040 A77-12835

Feasibility of a satellite solar power station /SSPS/ 13 p0047 A77-13504

Satellite solar power stations and energy relay satellites 13 p0052 A77-14901

Space solar power - An available energy source 13 p0056 A77-15946

Solar power satellites - Opportunity and challenge [AIAA PAPER 77-291] 13 p0065 A77-18224

Perspectives on Satellite Solar Power [AIAA PAPER 77-352] 13 p0066 A77-18257

The economic viability of pursuing a space power system concept [AIAA PAPER 77-353] 13 p0066 A77-18258

The construction of satellite solar power stations from non-terrestrial materials [AIAA PAPER 77-354] 13 p0066 A77-18259

Effect of solar-radiation density and angular size of radiation source on efficiency of solar power plants 14 p0143 A77-21312

Solar power from satellites 14 p0146 A77-21751

A rationale for large space-based solar power systems [AIAA PAPER 77-510] 14 p0173 A77-23926

Photovoltaic, gravitationally-stabilized solid-state, satellite solar power station /GSS4PS/ [AIAA PAPER 77-511] 14 p0173 A77-23927

Powersat - An astronomical energy solution 14 p0176 A77-24520

Gravitationally stabilized satellite solar power station in orbit 14 p0196 A77-28421

Alternative approaches to space-based power generation 14 p0199 A77-29066

The development of a satellite solar power station 14 p0203 A77-29577

Solar power satellite transportation 14 p0205 A77-30016

Space solar power - The transportation challenge --- for Space Shuttle [AIAA PAPER 77-529] 15 p0266 A77-32054

Microwave energy transmission [AIAA PAPER 77-540] 15 p0266 A77-32063

Fabrication and assembly of large composite structures in space [AIAA PAPER 77-543] 15 p0266 A77-32065

Assessment of satellite power stations [AIAA PAPER 77-552] 15 p0266 A77-32069

Solar electric power generating stations in space - XXI century energy or a utopia 15 p0269 A77-32470

## SHREDDING

## SUBJECT INDEX

## SHREDDING

Fine shredding of municipal solid waste  
[PB-257105/7] 13 p0133 N77-15919

## SHROUDED TURBINES

Flap-augmented shrouds for aerogenerators  
14 p0183 A77-26085

Potential application of radial splitter diffuser  
to shrouded wind turbines 14 p0199 A77-29071

Compact shrouds for wind turbines  
16 p0416 A77-42891

## SHROUDS

Compact shrouds for wind turbines  
16 p0416 A77-42891

## SIBERIA

The relation between isotopic composition of argon  
and carbon in natural gases  
[NASA-TM-75134] 16 p0531 N77-30680

## SIDE-LOOKING RADAR

Use of radar in geology  
13 p0018 A77-12256

## SIGNAL ANALYSIS

Shaping of laser pulses in an amplifying system  
receiving input signals with a variable spectrum  
13 p0053 A77-15237

## SIGNAL PROCESSING

Development of signal processing algorithms for  
ultrasonic detection of coal seam interfaces  
[NASA-CR-150024] 13 p0085 N77-10610

## SIGNAL RECEPTION

On the active and passive CETI from earth  
satellite orbit --- communication with  
extraterrestrial intelligence  
[IAP PAPER A-77-48] 16 p0507 A77-51524

## SILICA GEL

Fractionation and structural characterization of  
coal liquids  
13 p0C69 A77-18582

## SILICATES

Exploration of molecular sieve zeolites for the  
cooling of building with solar energy  
[PB-266055/3] 16 p0517 N77-28620

## SILICON

Alternative strategies for implementing  
silicon-ribbon technology for photovoltaic  
applications 13 p0039 A77-12819

Deposition of polycrystalline silicon solar cells  
13 p0076 A77-19082

The silicon ribbon solar cell  
13 p0076 A77-19083

Improving MIS silicon solar cells by HF-treatment  
of the insulating oxide layer 14 p0151 A77-21819

100 kilowatt-hours per day with RTC silicon solar  
cells 14 p0153 A77-21835

Temperature dependence of the 10.6-microns  
reflectivity of ITO-coated silicon --- selective  
absorber for solar energy conversion application  
14 p0200 A77-29246

Electronic properties of amorphous silicon in  
solar cell operation 15 p0257 A77-30717

Low-cost solar cells based on large-area  
unconventional silicon 15 p0258 A77-30730

Silicon solar cells on zone-melted  
silicon/graphite substrates 16 p0426 A77-45303

Enhancement of diffusion length in EFG ribbon  
solar cells under illumination --- Edge-defined  
Film-fed Growth 16 p0503 A77-50293

Industrial development of silicon solar cells  
[NASA-TT-F-17139] 13 p0097 N77-11528

Dip coating process: Silicon sheet growth  
development for the large-area silicon sheet  
task of the low-cost silicon solar array project  
[NASA-CR-149242] 13 p0105 N77-12513

Analysis of epitaxial drift field N on P silicon  
solar cells [NASA-TM-X-73563] 13 p0106 N77-12523

Low reflectivity solar cells  
[AD-A025922] 13 p0108 N77-12539

Status of the ERDA/NASA photovoltaic tests and  
applications project [NASA-TM-X-73567] 13 p0114 N77-13537

Demonstration of the feasibility of automated  
silicon solar cell fabrication [NASA-CR-135095] 13 p0129 N77-15492

Silicon ribbon growth by a capillary action  
shaping technique [NASA-CR-149815] 14 p0227 N77-19898

Silicon ribbon growth by a capillary action  
shaping technique [NASA-CR-149814] 14 p0227 N77-19899

Analysis of GaAs and Si solar energy hybrid systems  
[NASA-CR-2800] 14 p0229 N77-20564

Solar breeder: Energy payback time for silicon  
photovoltaic systems [NASA-CR-153060] 15 p0362 N77-24581

Temperature dependence of the photovoltaic  
performance of Si cells under blue, white, and  
near-bandgap irradiation [UCRL-76203] 15 p0381 N77-26652

Development of a high efficiency thin silicon  
solar cell [NASA-CR-153905] 15 p0391 N77-27502

Automated array assembly task, phase 1  
[NASA-CR-153909] 15 p0391 N77-27505

Development of low cost thin film polycrystalline  
silicon solar cells for terrestrial applications  
[PB-266057/9] 16 p0517 N77-28618

Development of standardized specifications for  
silicon solar cells [NASA-CR-135233] 16 p0520 N77-29604

Sensitivity of solar cell performance to  
atmospheric variables. 1: Single cell  
16 p0527 N77-30534

Silicon solar cell testing in concentrated  
sunlight and simulated sunlight 16 p0527 N77-30540

Energy requirement for the production of silicon  
solar arrays [NASA-CR-153409] 16 p0528 N77-30604

Solar silicon via improved and expanded  
metallurgical silicon technology [NASA-CR-153415] 16 p0528 N77-30606

Automated fabrication of back surface field  
silicon solar cells with screen printed  
wraparound contacts [NASA-CR-135202] 16 p0546 N77-32590

SILICON ALLOYS  
Development status of lithium-silicon/iron sulfide  
load leveling batteries 16 p0448 A77-48741

Improved negative electrodes for lithium/iron  
sulfide batteries 16 p0448 A77-48742

SILICON CARBIDES  
Photoelectric and electrical properties of n-SiC -  
n-CdS heterojunctions 16 p0442 A77-48518

SILICON DIOXIDE  
Solution of silica in Green River oil shale  
14 p0169 A77-23558

Advanced vertical-junction silicon solar cells  
[AIAA PAPER 77-486] 14 p0172 A77-23906

Study of silica scaling from geothermal brines  
[PB-262890/7] 15 p0357 N77-23626

SILICON FILMS  
On black solar cells or the tetrahedral texturing  
of a silicon surface 13 p0004 A77-11000

- Optimal overall efficiency for a solar radiation collector utilizing a two fluid Rankine Cycle to generate electrical power 14 p0182 A77-26056
- Experimental evaluation of a stationary spherical reflector tracking absorber solar energy collector [ASME PAPER 76-WA/HT-10] 14 p0186 A77-26470
- Experimental evaluation of a cylindrical parabolic solar collector [ASME PAPER 76-WA/HT-13] 14 p0186 A77-26473
- Optical and thermal performance analysis of three line focus collectors [ASME PAPER 76-WA/HT-15] 14 p0186 A77-26475

# SUBJECT INDEX

# SOLAR COLLECTORS CONTD

Double-exposure collectors with mirrors for solar-heating systems  
 [ASME PAPER 76-WA/HT-16] 14 p0186 A77-26476  
 A self-contained solar powered tracking device  
 [ASME PAPER 76-WA/HT-26] 14 p0186 A77-26477  
 Performance of flat-plate collectors with planar reflectors  
 [ASME PAPER 76-WA/HT-27] 14 p0186 A77-26478  
 Solar heating thermal storage feasibility  
 [ASME PAPER 76-WA/HT-36] 14 p0187 A77-26483  
 A pressurized liquid concept for solar-thermal energy storage for the 24-hour continuous operation of an energy conversion system  
 [ASME PAPER 76-WA/HT-38] 14 p0187 A77-26484  
 Radiant transmittance of V-corrugated transparent sheets with application to solar collectors  
 [ASME PAPER 76-WA/SOL-1] 14 p0188 A77-26506  
 Performance measurements of a cylindrical glass honeycomb solar collector compared with predictions  
 [ASME PAPER 76-WA/SOL-3] 14 p0188 A77-26508  
 Heat transfer considerations of a nonconvecting solar pond heat exchanger  
 [ASME PAPER 76-WA/SOL-4] 14 p0188 A77-26509  
 An economic analysis of thermic diode solar panels  
 [ASME PAPER 76-WA/SOL-7] 14 p0188 A77-26512  
 Solar heating in the United States  
 [ASME PAPER 76-WA/SOL-8] 14 p0188 A77-26513  
 The New Mexico Department of Agriculture solar heated and cooled building  
 [ASME PAPER 76-WA/SOL-10] 14 p0189 A77-26515  
 Development of compound parabolic concentrators for solar thermal applications  
 [ASME PAPER 76-WA/SOL-11] 14 p0189 A77-26516  
 Heat pipes in flat plate solar collectors  
 [ASME PAPER 76-WA/SOL-12] 14 p0189 A77-26517  
 Experimental measurements and system implications of the performance of flat plate solar collector configurations  
 [ASME PAPER 76-WA/SOL-14] 14 p0189 A77-26519  
 Performance evaluation on the Owens-Illinois Sunpack solar energy collector  
 [ASME PAPER 76-WA/SOL-16] 14 p0189 A77-26521  
 Optimal mass flow rates through flat plate solar collector panels  
 [ASME PAPER 76-WA/SOL-19] 14 p0190 A77-26524  
 Analysis of thermal performance of 'Solaris' water-trickle solar collector  
 [ASME PAPER 76-WA/SOL-21] 14 p0190 A77-26526  
 An experimental and analytical investigation of a solar water heater  
 [ASME PAPER 76-WA/SOL-22] 14 p0190 A77-26527  
 Thermal simulation of a building with solar assisted closed loop unitary heat pumps  
 [ASME PAPER 76-WA/SOL-23] 14 p0190 A77-26528  
 Indoor test methods to determine the effect of vacuum on the performance of a tubular flat plate collector --- for solar energy conversion  
 [ASME PAPER 76-WA/SOL-24] 14 p0190 A77-26529  
 Solar collectors - Technology and principles of operation  
 14 p0197 A77-28676  
 Plastics in systems of solar technology - A survey  
 14 p0197 A77-28677  
 Possibilities and economic limits concerning solar heating  
 14 p0197 A77-28679  
 Servo positioning power tower collectors for solar heat conversion to electricity  
 14 p0198 A77-28811  
 Evaluation of cadmium stannate films for solar heat collectors  
 14 p0198 A77-29021  
 Recent results in the research area 'energetics' with respect to nonnuclear energy research  
 14 p0200 A77-29300  
 Selective behavior and selective layer deposition in the case of light-transparent covers --- for solar collectors  
 14 p0202 A77-29564  
 The selectivity of absorbing layers --- of solar collector materials  
 14 p0202 A77-29565  
 Corrosion problems related to the employment of aluminum in collector construction  
 14 p0202 A77-29566  
 Collectors, pipelines, and heat storage units made of plastics  
 14 p0202 A77-29567

The consideration of climatic data in the prediction of solar-system performance --- for energy conversion  
 14 p0202 A77-29569  
 Heat transfer problems in flat plate collectors  
 14 p0202 A77-29570  
 The determination of the performance characteristics of solar collectors  
 14 p0203 A77-29573  
 Wavelength-selective surfaces for solar energy utilization  
 14 p0204 A77-29583  
 A comparison of solar photothermal coatings  
 14 p0204 A77-29584  
 Improved black nickel coatings for flat plate solar collectors  
 14 p0204 A77-29585  
 Development of solar tower program in the United States  
 14 p0204 A77-29591  
 Optical and thermal characteristics of a solar collector with a stationary spherical reflector and a tracking absorber  
 14 p0204 A77-29594  
 Solar collectors using total internal reflections  
 14 p0204 A77-29596  
 Design application of the Hottel-Whillier-Bliss equation --- for flat-plate solar collector heat testing  
 15 p0255 A77-30309  
 Calculation of long term solar collector heating system performance  
 15 p0255 A77-30311  
 Solar-heated-air receivers --- of solar/gas turbine electrical generation plant design  
 15 p0255 A77-30312  
 Optimum solar collector operation for maximizing cycle work output  
 15 p0255 A77-30313  
 Design and performance studies on a solar room heater  
 15 p0255 A77-30314  
 Comparison of long-term flat-plate solar collector performance calculations based on averaged meteorological data  
 15 p0256 A77-30315  
 Solar flux density distributions on central tower receivers  
 15 p0256 A77-30318  
 Non-focussing solar concentrators of easy manufacture  
 15 p0256 A77-30322  
 Optimization of silicon solar cell design for use under concentrated sunlight  
 15 p0257 A77-30714  
 Lighting with sunlight using sun tracking concentrators  
 15 p0260 A77-31245  
 Solar-thermal energy systems  
 15 p0262 A77-31472  
 Solar-thermal power systems  
 15 p0262 A77-31474  
 High level concentration of sunlight on silicon solar cells  
 15 p0267 A77-32208  
 Cooling with solar energy  
 15 p0268 A77-32401  
 Novel development for economic solar-energy utilization  
 15 p0268 A77-32402  
 A solar generator --- for cold-steam turbine operations  
 15 p0268 A77-32403  
 Inhibited ethylene glycol as the solar nexus  
 15 p0270 A77-32601  
 Corrosion prevention in aluminum solar systems  
 15 p0270 A77-32602  
 Corrosion problems in solar energy systems  
 15 p0270 A77-32603  
 Fabrication of solar energy concentrators based on polyurethane foams using new polyol and isocyanate compounds  
 15 p0271 A77-32973  
 Solar tower characteristics  
 15 p0274 A77-33333  
 Combination of focusing concentrators and focusing lenses  
 15 p0286 A77-33431

- The use of lasers for the inspection of heliotechnical reflectors 15 p0286 A77-33432
- Paraboloid-hyperboloid concentrating systems and their accuracy 15 p0286 A77-33433
- Applied solar energy: An introduction /2nd edition/ --- Book 15 p0286 A77-33445
- Features of systems for transmission of concentrated solar radiation 15 p0290 A77-34972
- Energy computation of concentrating capability of paraboloidal facets 15 p0290 A77-34973

## SUBJECT INDEX

## SOLAR COLLECTORS CONTD

Using lasers to inspect solar-energy reflectors  
16 p0427 A77-45545

Paraboloid-hyperboloid concentrating systems and their accuracy  
16 p0427 A77-45546

Circumferential variations of bore heat flux and outside surface temperature for a solar collector tube  
16 p0429 A77-46426

Some problems involved in the development of a solar thermionic power plant  
16 p0436 A77-47421

Investigating the geometric quality of cast polyurethane-foam duplicates for solar-energy concentrators  
16 p0437 A77-47423

Concentration of diffuse radiation --- by solar collectors  
16 p0437 A77-47424

Analyzing multifacet concentrating systems --- solar energy application  
16 p0437 A77-47425

A tower-type solar power plant - Configuration and thermal-regime stability of receivers and steam generators  
16 p0437 A77-47426

Solar energy installation for the project 'Motto di Lena' in Minusio/Tessin  
16 p0441 A77-48257

Shortened focusing concentrators and focusing wedges --- solar energy technology  
16 p0442 A77-48521

Contribution to procedures for testing Silazan resin coatings --- for solar concentrators  
16 p0443 A77-48522

Radiative heat transfer in cavity type axisymmetric collectors for high-temperature solar energy plants  
16 p0443 A77-48523

Solar powered steam generation  
16 p0459 A77-48832

High temperature solar collector with an Archimedes concentrator  
16 p0460 A77-48833

Development status of the fixed mirror solar concentrator  
16 p0460 A77-48834

Considerations for using solar concentrators in photovoltaic systems  
16 p0460 A77-48835

An assessment of mechanical energy storage for solar systems  
16 p0460 A77-48839

Dynamic modeling and sensitivity analysis of solar thermal energy conversion systems  
16 p0461 A77-48845

Deterministic insolation estimates for solar total energy systems  
16 p0462 A77-48847

Optimum operating conditions for a cylindrical parabolic focusing collector/Rankine power generation cycle system  
16 p0468 A77-48905

Space construction base operations in support of solar power satellite development  
16 p0468 A77-48907

The current technology for solar heating and cooling  
16 p0470 A77-48919

The climatology of available solar energy for Canada  
16 p0471 A77-48924

Determination of average ground reflectivity for solar collectors  
16 p0471 A77-48933

Methods for estimating total flux in the direct solar beam at any time  
16 p0471 A77-48934

Solar collectors --- for heating and cooling of buildings  
16 p0471 A77-48935

The use of planar reflectors for increasing the energy yield of flat-plate collectors  
16 p0472 A77-48937

Performance and analysis of 'Solaris' water-trickle solar collector  
16 p0472 A77-48939

Performance of an evacuated tubular collector using non-imaging reflectors  
16 p0472 A77-48940

A method of comparing flat-plate air and liquid solar collectors for use in space heating applications  
16 p0472 A77-48941

Performance of air-cooled flat plate collectors  
16 p0472 A77-48942

Predicted daily and yearly average radiative performance of optimal trapezoidal groove solar energy collectors  
16 p0472 A77-48943

Thermal, fluid flow and mechanical performance characteristics of a subatmospheric pressure, distributed flow flat plate collector  
16 p0473 A77-48945

A proposed method of rating the thermal performance of solar collectors  
16 p0473 A77-48946

A site sensitive solar collector evaluator  
16 p0473 A77-48947

Use of calculated displaced shapes to define the reflected light pattern from a focused collector  
16 p0473 A77-48948

Mathematical modeling of solar concentrators  
16 p0473 A77-48949

Design considerations for parabolic-cylindrical solar collectors  
16 p0473 A77-48950

Reduced drag, paraboloid type, solar energy collectors  
16 p0473 A77-48951

An analytical and experimental evaluation of the plano-cylindrical Fresnel lens solar concentrator  
16 p0473 A77-48952

Characteristics of the concentrated solar flux produced by the FMSC prototype --- Fixed Mirror Solar Concentrator  
16 p0474 A77-48953

Collector with cusplike compound parabolic concentrator and selective absorber  
16 p0474 A77-48955

Optical and thermal design considerations for ideal light collectors  
16 p0474 A77-48956

Solar process heat from concentrating flat-plate collectors  
16 p0474 A77-48957

A compound parabolic concentrator array optimized for northern climates --- cold weather effects on solar collectors  
16 p0474 A77-48958

Performance of an air-cooled ammonia-water absorption air conditioner at low generator temperatures --- compatible with flat-plate solar collectors  
16 p0475 A77-48962

Comparative performance of solar heating with air and liquid systems  
16 p0475 A77-48967

Application of solar principles in designing a low cost system for warehouse heating  
16 p0476 A77-48969

A competitively-priced solar home, using concentrating collectors  
16 p0477 A77-48978

A non-technical evaluation of four different concrete wall solar collector configurations  
16 p0478 A77-48990

Solar retrofit of a home in Granton, Ontario  
16 p0479 A77-48995

A design procedure for solar air heating systems  
16 p0480 A77-49006

A simplified method for calculating required solar collector array size for space heating  
16 p0480 A77-49007

An averaging technique for predicting the performance of a solar energy collector system  
16 p0480 A77-49008

Minimum cost sizing of solar heating systems  
16 p0480 A77-49010

Cost effective solar heating of houses with seasonal storage of energy  
16 p0481 A77-49016

Solar thermal system requirements  
16 p0481 A77-49017

Solar energy for process heat  
16 p0481 A77-49020

Smith multimodule solar-electric plant  
16 p0482 A77-49023

# SUBJECT INDEX

# SOLAR PONDS (HEAT STORAGE)

Heat pumps in solar installations 15 p0337 A77-39987

The BBC Solarwatt system --- for domestic hot water supply 15 p0337 A77-39989

Possibilities and limitations concerning the economy of solar heating systems 15 p0337 A77-39990

The atypical Mathew solar house at Coos Bay, Oregon 16 p0405 A77-41576

Simulation analysis of passive solar heated buildings - Preliminary results 16 p0406 A77-41582

Solar energy - Promises and pitfalls [AIAA PAPER 77-1022] 16 p0409 A77-41856

The 'wind-wall' - An integrated wind/solar system 16 p0410 A77-42075

The architecture of a passive system of diurnal radiation heating and cooling 16 p0423 A77-44488

Lessons learned from Atlanta /towns/ solar experiment --- solar heating and cooling for school 16 p0423 A77-44491

Earth, an open system - The use of solar energy 16 p0432 A77-46788

Solar energy installation for the project 'Motto di Lena' in Minusio/Tessin 16 p0441 A77-48257

Experimental evaluation of a solar/wind-powered space heating and hot water heating system in the Pacific Northwest 16 p0462 A77-48849

The United States National Program for the demonstration of solar heating and cooling in buildings - Progress report 16 p0470 A77-48918

ERDA/USDA Agricultural Solar Thermal Energy Program 16 p0470 A77-48921

Solar collectors --- for heating and cooling of buildings 16 p0471 A77-48935

Thermic diode solar panels - A brief summary 16 p0472 A77-48936

Cooling subsystem design in CSU Solar House III 16 p0475 A77-48964

A solar heated and cooled office building 16 p0475 A77-48966

Comparative performance of solar heating with air and liquid systems 16 p0475 A77-48967

Experimental evaluation of a solar house heating system in Quebec 16 p0475 A77-48968

A solar home for low income families 16 p0476 A77-48970

Design and construction of a residential solar heating system at Ferilab 16 p0476 A77-48977

A competitively-priced solar home, using concentrating collectors 16 p0477 A77-48978

Solar heating and cooling in a commercial building 16 p0477 A77-48983

Solar assisted heat pump air conditioning system 16 p0477 A77-48985

Operational analysis of a solar optimized heat pump 16 p0478 A77-48986

The solar fan - Solar induced draft air conditioning system 16 p0478 A77-48988

A passive solar heated house - Design and construction 16 p0478 A77-48989

A non-technical evaluation of four different concrete wall solar collector configurations 16 p0478 A77-48990

Climate based solar house design - Hot and humid Charleston, S.C. 16 p0478 A77-48991

A status report on the USAFA solar energy program 16 p0478 A77-48993

Solar retrofit of a home in Granton, Ontario 16 p0479 A77-48995

Solar retrofit applications for public buildings 16 p0479 A77-48997

A retrofit solar heating system constructed with salvaged and readily available components designed for self-installation by low income families 16 p0479 A77-48998

Performance of a solar heating system utilizing phase-change energy storage 16 p0480 A77-49004

Microcomputer processor for monitoring of solar heated buildings 16 p0481 A77-49015

A solar/Stirling total energy system 16 p0481 A77-49021

The feasibility of solar house heating - A study in applied economics 16 p0493 A77-49117

Effect of solar home heating on electric utilities 16 p0494 A77-49123

Economic study of solar total energy 16 p0494 A77-49124

Solar energy application considerations for housing in depressed communities 16 p0494 A77-49126

Solar high technology and architecture 16 p0495 A77-49129

Some institutional problems of residential solar heating 16 p0495 A77-49130

Description of Provident House, King City, Ontario 16 p0495 A77-49133

User needs vs. technical demands, or the art of tradeoff in making a good, inexpensive solar home 16 p0495 A77-49134

Perceptual assessment of a new energy concept 16 p0496 A77-49138

The Crain solar house - A case study in the architectural and engineering design process as applied to solar housing for public sale 16 p0496 A77-49140

Report on the design, construction, and marketing of two solar heated SPEC houses 16 p0496 A77-49141

Minimum Energy Building - The first winter's operation --- solar heated building 16 p0496 A77-49144

The performance of homemade solar collectors at the Stockton State College 'Energy House' 16 p0497 A77-49151

Residential application of photovoltaic energy systems 16 p0497 A77-49155

Initial operation of a solar heating and cooling system in a full-scale solar building test facility 16 p0498 A77-49164

Economics of solar heating with homeowner-type financing 16 p0501 A77-50210

Solar energy and the residence - Some systems aspects 16 p0502 A77-50213

Heating with solar energy 16 p0506 A77-51370

Solar house heating system using reflective pyramid optical condensing system [COO-2769-4] 16 p0522 A77-29619

Assessment of a single-family residence solar heating system in a suburban development setting. Project Phoenix [PB-263192/7] 16 p0530 A77-30632

The economics of solar home heating [GPO-85-329] 16 p0534 A77-31603

**SOLAR INSTRUMENTS**

Accelerated response of thermopile pyranometers 13 p0019 A77-12405

Solar properties of materials and testing of solar systems 15 p0294 A77-35318

**SOLAR PONDS (HEAT STORAGE)**

Exploring stability criteria of solar ponds [ASHE PAPER 76-WA/HT-62] 14 p0187 A77-26489

Heat transfer considerations of a nonconvecting solar pond heat exchanger [ASHE PAPER 76-WA/SOL-4] 14 p0188 A77-26509

The economics of industrial process heat from solar energy 15 p0302 A77-36345

## SOLAR POSITION

## SUBJECT INDEX

- Solar ponds - Low cost solar energy management systems 16 p0408 A77-41851
- Stratified density solar collection ponds - Physical factors, results of previous investigations, and suggested experiments 16 p0418 A77-42964
- ERDA Solar Thermal Energy Program for industrial process heat 16 p0470 A77-48922
- Shallow solar ponds for industrial process heat - The ERDA-Schio project 16 p0482 A77-49024
- A generalized numerical model for predicting energy transfers and performance of large solar ponds 16 p0482 A77-49025
- Experience with a prototype solar pond for space heating 16 p0482 A77-49026

# SUBJECT INDEX

# SPECTRAL REFLECTANCE

Spherical radioisotope thermoelectric generators -  
 An approach to high specific power devices 13 p0042 A77-12857

Fuel cells --- electrochemical energy conversion 13 p0055 A77-15804

Radiation effects on high efficiency silicon solar cells 13 p0064 A77-18072

Alkali metal space power technology applicable to national energy research and development [AIAA PAPER 77-289] 13 p0065 A77-18223

The economic viability of pursuing a space power system concept [AIAA PAPER 77-353] 13 p0066 A77-18258

Space battery technology for the 1980s [AIAA PAPER 77-482] 14 p0172 A77-23902

Status of the NASA Space Power Program [AIAA PAPER 77-505] 14 p0173 A77-23922

Solar cell equipment with concentrating mirrors and radiator surfaces 15 p0324 A77-39494

Electrochemical energy conversion. II - Utilities, marine and space applications 16 p0400 A77-40686

Radiation effects on high efficiency silicon solar cells --- for spacecraft application 16 p0416 A77-42892

The electrical power system for Spacelab 16 p0432 A77-46789

Tests and evaluation of multihundred watt thermoelectric generators at JPL 16 p0462 A77-48854

Design of a spherical RTG --- Radioisotope Thermoelectric Generators 16 p0462 A77-48857

Reactor hybrid-Organic Rankine Cycle Electric Power Systems /ORCEPS/ for space applications 16 p0463 A77-48858

Technology for power in space 16 p0463 A77-48865

Past experience - Basis for future advanced power systems for communications satellites [IAF PAPER 77-22] 16 p0506 A77-51390

A new cycle for optimum energy storage in interplanetary missions [IAF PAPER 77-141] 16 p0507 A77-51444

Automatic optimization of operating modes in thermionic electrical power generators [IAF PAPER 77-142] 16 p0507 A77-51445

Test program for transmitter experiment package and heat pipe system for the communications technology satellite [NASA-TN-X-3455] 13 p0095 N77-11268

NASA Office of Aeronautics and Space Technology Summer Workshop. Volume 4: Power technology panel [NASA-TN-X-73964] 13 p0117 N77-13913

The ATS-6 power system: Hardware implementation and orbital performance [NASA-TP-1023] 16 p0543 N77-32229

**SPACECRAFT PROPULSION**

Laser propulsion --- rocket heat engine design [IAF PAPER 76-166] 13 p0003 A77-10931

UK, T5 ion engine thrust vector control considerations [AIAA PAPER 76-1064] 13 p0045 A77-13030

Energy storage in orbital and interplanetary missions [DGLR PAPER 76-189] 13 p0059 A77-16551

Near-term chemically-propelled space transport systems --- to space colonies 15 p0295 A77-35810

Advanced fuel fusion application to manned space propulsion 16 p0436 A77-47367

Extraterrestrial resources and astronautics --- Russian book 16 p0499 A77-49400

Future space experiments with levitated capacitor for thermonuclear microexplosions [IAF PAPER 77-ST-11] 16 p0508 A77-51575

Investigation of beamed energy concepts for propulsion. Volume 1: Systems studies [AD-A034995] 15 p0377 N77-26491

Technology requirements for advanced earth-orbital transportation systems: Summary report --- single stage to orbit vehicles [NASA-CR-2867] 16 p0550 N77-33255

## SPACECRAFT RADIATORS

Status of development and application of gas-stabilized heat-pipe radiators [DGLR PAPER 76-192] 13 p0060 A77-16557

Axially grooved heat pipes - 1976 [AIAA PAPER 77-747] 15 p0324 A77-39512

Development of a low temperature phase change material package --- for spacecraft thermal control [AIAA PAPER 77-762] 15 p0325 A77-39514

Heat pipes, volume 2 --- conference proceedings, Bologna, 31 Mar. - 2 Apr. 1976 [ESA-SP-112-VOL-2] 13 p0119 N77-14378

Extended cryogenic performance of Lobar Wick heat pipe/radiator 13 p0119 N77-14379

Heat pipe and space radiator developments 13 p0120 N77-14391

## SPACECRAFT STABILITY

Gravitationally stabilized satellite solar power station in orbit 14 p0196 A77-28421

## SPACELAB

Space shuttle missions of the 80's; Proceedings of the Twenty-first Annual Meeting, Denver, Colo., August 26-28, 1975. Parts 1 & 2 15 p0304 A77-36526

The electrical power system for Spacelab 16 p0432 A77-46789

AMPS - subsatellite assessment study, volume 1 [ASB-ORV-91-76-VOL-1] 15 p0354 N77-23175

## SPARK GAPS

Increasing the electrical strength of the interelectrode gap in an MHD generator 16 p0428 A77-46091

## SPARK IGNITION

A guide for the conversion to and maintenance of hydrogen-fueled, spark-ignited engines 13 p0033 A77-12779

Studies on realization of normal combustion of hydrogen in spark-ignition engines by reduction of temperature of residual burnt gases 14 p0195 A77-28050

Computer predicted compression ratio effects on NOx emissions from a methanol fueled SI engine 16 p0444 A77-48706

Guide for the conversion to and maintenance of hydrogen-fueled, spark-ignited engines [TEER-1036] 16 p0511 N77-28324

## SPATIAL DISTRIBUTION

Use of a Lowry-type spatial allocation model in an urban transportation energy study 15 p0265 A77-31899

## SPECIFIC HEAT

Thermal energy storage by the sulfuric acid-water system 16 p0492 A77-49108

Detecting structural heat losses with mobile infrared thermography. Part 4: Estimating quantitative heat loss at Dartmouth College, Hanover, New Hampshire [AD-A031803] 14 p0228 N77-20393

## SPECIFIC IMPULSE

Laser propulsion --- rocket heat engine design [IAF PAPER 76-166] 13 p0003 A77-10931

## SPECIFICATIONS

Technology evaluation report, commercial buildings [COO-2683-76-1] 14 p0232 N77-20603

## SPECTRAL ENERGY DISTRIBUTION

Thermodynamic constraints, effective temperatures and solar cells 14 p0147 A77-21779

The solar spectrum at typical clear weather days --- for optimal energy conversion cell performance 16 p0501 A77-50212

Influence of the direct spectral solar energy distribution on the normal total absorptivity of spectral selective surfaces 16 p0502 A77-50219

Effects of spectral variations on silicon cell output [SAND-76-9142] 15 p0381 N77-26653

**SPECTRAL REFLECTANCE**

Progress in development and application of selective surfaces --- for solar collectors 13 p0072 A77-19052

Ellipsometry in the study of selective radiation-absorbing surfaces --- for solar energy 16 p0406 A77-41581

## SPECTRAL SENSITIVITY

## SUBJECT INDEX

- Spectral reflectance of TiN/x/ and ZrN/x/ films as selective solar absorbers 16 p0423 A77-44492
- Reflection coefficient for a back-surface glass mirror --- of solar collectors 16 p0488 A77-49072
- SPECTRAL SENSITIVITY**  
Influence of the direct spectral solar energy distribution on the normal total absorptivity of spectral selective surfaces 16 p0502 A77-50219
- SPECTRUM ANALYSIS**  
Raman scattering and the characterization of atmospheric aerosol particles 15 p0262 A77-31487
- SPECULAR REFLECTION**  
Performance of low cost solar reflectors for transferring sunlight to a distant collector 14 p0180 A77-25896
- Low reflectivity solar cells [AD-A025922] 13 p0108 N77-12539
- SPEED CONTROL**  
Amtrak's newest turboliners 14 p0138 A77-20699
- SPHERICAL SHELLS**  
Optical study of fixed spherical solar collectors 16 p0505 A77-51161
- SPIN STABILIZATION**  
Photovoltaic, gravitationally-stabilized solid-state, satellite solar power station /GSS4PS/ [AIAA PAPER 77-511] 14 p0173 A77-23927
- SPINNERS**  
The nuclear spinner for Satcom applications --- comparing nuclear and solar power supplies 13 p0041 A77-12838
- SPIRALS (CONCENTRATORS)**  
Solergy collector concept --- immobile reflective surface for solar collection using spiral concentrator 13 p0073 A77-19061
- SPRAYED COATINGS**  
Analytical and experimental treatment of a spray-on selective coating - Application to collector design 16 p0487 A77-49064
- Efficient sprayed In2O3:Sn n-type silicon heterojunction solar cell 16 p0503 A77-50292
- SPRINGS (WATER)**  
A surface thermal anomaly in the region of Chaudes-Aigues /France/ detected on aerial thermographs 13 p0014 A77-11591
- Utilization of heat of geothermal springs and waste hot waters in freon-operated power plants 14 p0175 A77-24207
- SPUTTERING**  
Selective black absorbers using RF-sputtered Cr2O3/Cr cermet films 15 p0265 A77-31951
- STABILITY DERIVATIVES**  
Electromechanical stabilization system 16 p0511 A77-28211
- STABILIZATION**  
Investigation of excitation control for wind-turbine generator stability [NASA-TN-73745] 16 p0535 A77-31614
- STACKS**  
Some considerations in determining oxides of nitrogen in stack gases by chemiluminescence analyzer 13 p0062 A77-17541
- Determination of SO2 concentrations from a coal-burning power plant stack by Fourier spectrometry 15 p0296 A77-36024
- Stack gas cleanup --- scrubber systems for high-sulfur coal 15 p0317 A77-37939
- Atmospheric pollution due to multi-stack emissions of medium and large-capacity thermal or thermoelectric plants 16 p0420 A77-44178
- Fuel cell stacks [AD-A037586] 15 p0380 A77-26641
- STAINLESS STEELS**  
Sulfidation of 310 stainless steel at sulfur potentials encountered in coal conversion systems 15 p0337 A77-40028
- Corrosion behavior of materials for coal-gasification applications 15 p0337 A77-40029
- Metal dusting corrosion in coal gasification environments 15 p0337 A77-40042
- Stainless steel panel for selective absorption of solar energy and the method of producing said panel [NASA-CASE-MFS-23518-2] 16 p0535 A77-31611
- STANDARDIZATION**  
Standards support and environmental impact statement. Volume 1: Proposed standards of performance for petroleum refinery sulfur recovery plants [PB-257975/3] 14 p0213 N77-17647
- Development of standardized specifications for silicon solar cells [NASA-CR-135233] 16 p0520 A77-29604
- STANDARDS**  
Development and implementation of standards for solar heating and cooling applications 16 p0469 A77-48913
- Interfacing building design and solar energy research and standards 16 p0494 A77-49120
- Design guidelines for energy conserving systems [PB-268989/1] 16 p0559 A77-33670
- STANNATES**  
Evaluation of cadmium stannate films for solar heat collectors 14 p0198 A77-29021
- Cadmium stannate selective optical films for solar energy applications [PB-254879/0] 13 p0090 A77-10678
- Cadmium stannate selective optical films for solar energy applications [PB-261850/2] 15 p0348 A77-22672
- STAR TRACKERS**  
The advantages of sun tracking for planar silicon solar cells 14 p0181 A77-25904
- STARTING**  
Some features of start-up of alkali metal heat pipes 13 p0119 A77-14383
- STATIC TESTS**  
Static and wind-on tests of an upper-surface-blown jet-flap nozzle arrangement for use on the Quiet Clean Short-haul Experimental Engine (QCSSE) [NASA-TN-D-8476] 15 p0370 A77-25086
- STATIONARY ORBITS**  
Perspectives on Satellite Solar Power [AIAA PAPER 77-352] 13 p0066 A77-18257
- Captation and concentration of solar energy 13 p0074 A77-19063
- Advanced photovoltaic power systems [AIAA PAPER 77-506] 14 p0173 A77-23923
- STATIONKEEPING**  
Power source requirements of electric propulsion systems used for north-south stationkeeping of communication satellites 13 p0040 A77-12833
- UK, T5 ion engine thrust vector control considerations [AIAA PAPER 76-1064] 13 p0045 A77-13030
- STATISTICAL ANALYSIS**  
Higher electric power use reduces energy consumption for same gross national product 13 p0011 A77-11334
- Concerning world oil resources. II - Statistical logistic models /King Hubbert's models/ 13 p0011 A77-11339
- Analysis of a Delphi study on hydrogen --- questionnaire survey on future energy utilization 15 p0284 A77-33411
- Statistical investigation of the operational efficiency of solar and evaporative cooling devices in Turkmenian conditions 15 p0286 A77-33435
- Statistical investigation into the effectiveness of solar- and evaporative-cooler operation under the conditions of Turkmenia 16 p0427 A77-45548

# SUBJECT INDEX

# STIRLING CYCLE

- Energy statistics: A supplement to the summary of national transportation statistics  
[PB-269301/8] 16 p0559 N77-33672
- STATISTICAL DISTRIBUTIONS**  
Distribution of direct and total solar radiation availabilities for the USA 16 p0471 A77-48926
- GDIST: A computer code for analysis of statistical distributions of physical data  
[PB-266762/4] 16 p0533 N77-31589

The importation of liquefied natural gas  
 14 p0194 A77-27607  
 Answer House story --- utilizing solar cooling and  
 solar heating 15 p0333 A77-39664  
 Compact shrouds for wind turbines 16 p0416 A77-42891  
 Solar collectors --- for heating and cooling of  
 buildings 16 p0471 A77-48935  
 A solar home for low income families 16 p0476 A77-48970  
 The solar fan - Solar induced draft air  
 conditioning system 16 p0478 A77-48988  
 A passive solar heated house - Design and  
 construction 16 p0478 A77-48989  
 Reinforced pillow solar water heater 16 p0493 A77-49114  
 Solar high technology and architecture 16 p0495 A77-49129  
 Description of Provident House, King City, Ontario  
 16 p0495 A77-49133  
 Self sufficient energy integrated design and  
 construction method for low cost-self help  
 housing programs 16 p0495 A77-49137  
 Perceptual assessment of a new energy concept  
 16 p0496 A77-49138  
 Composites for large space structures  
 [IAF PAPER 77-65] 16 p0507 A77-51416  
 Battery-flywheel hybrid electric power system for  
 near term application. Volume 2: System design  
 [UCID-17098-VOL-2] 14 p0228 A77-20443  
 Design and modeling of solar sea power plants by  
 geometric programming  
 [COO-2895-11] 14 p0231 A77-20585  
 Sandia vertical-axis wind turbine program  
 [SAND-76-0338] 14 p0250 A77-21686  
 Design problems associated with the use of  
 evacuated glass receivers for solar collectors  
 [CONF-7606128-1] 15 p0393 A77-27536  
 Lightweight reflector assembly  
 [NASA-CASE-NPO-13707-1] 16 p0518 A77-28933  
 Current fusion power plant design concepts  
 [BNWL-2013] 16 p0549 A77-32894

**STRUCTURAL DESIGN CRITERIA**  
 Energy savings obtained by applying the findings  
 of construction physics. II 16 p0441 A77-48259  
 Geothermal R and D project report, 1 January - 31  
 March 1976 14 p0222 A77-19607  
 [ANCR-1319]  
 Modular 5 MW geothermal power plant design  
 considerations and guidelines 14 p0222 A77-19612  
 [UCRL-13684]  
 Advanced technology fuel cell program  
 [EPRI-EM-335] 15 p0391 A77-27508  
 Conceptual design study for a laser fusion hybrid  
 [UCRL-78682] 15 p0397 A77-27926  
 Engineering study of the module/array interface  
 for large terrestrial photovoltaic arrays  
 [ERDA/JPL-954698-77/1] 16 p0528 A77-30609

**STRUCTURAL ENGINEERING**  
 Dimensioning of the solar heating system in the  
 Zero Energy House in Denmark 15 p0256 A77-30319  
 Energy savings by application of knowledge of  
 building physics. I - Wall permeability and its  
 significance for the atmospheric conditions in  
 the building interior, the design and the  
 thermal characteristics of windows, problems  
 concerning the permeability of the joints  
 15 p0261 A77-31373

**STRUCTURAL RELIABILITY**  
 Development of a small radioisotopic heat source  
 13 p0042 A77-12852

**STRUCTURAL STRAIN**  
 Selection of structural materials for hydrogen  
 pipelines and storage vessels 14 p0243 A77-21625

**STRUCTURAL WEIGHT**  
 Estimating procedures associated with aircraft  
 modifications 13 p0016 A77-12181  
 [SAWE PAPER 1101]  
 Ultralightweight solar array for Naval Sea Control  
 Systems 13 p0040 A77-12828

Nuclear-powered Hysat spacecraft: Comparative  
 design study [ERDA-SNS-3063-8] 13 p0094 A77-11108  
 Attic concentrator type solar energy collector  
 [BNL-50493] 13 p0098 A77-11539  
 Innovative Aircraft Design Study (IADS) task 2,  
 volume 1 [AD-A041234] 16 p0531 A77-31141

**SUBMILLIMETER WAVES**  
 Electron concentration measurements in combustion  
 MHD flows by submillimeter laser interferometry  
 16 p0425 A77-44821

**SUBROUTINES**  
 OPTINO - A method for process evaluation applied  
 to the thermochemical decomposition of water  
 15 p0320 A77-38526

**SUBSIDENCE**  
 Potential land subsidence at geothermal  
 development sites 15 p0286 A77-33525  
 Comprehensive ground control study of a mechanized  
 longwall operation. Volume 2: Special reports.  
 1: Physical properties of coal and coal measure  
 rocks. 2: Bearing capacity of roof and floor  
 rocks. 3: Response of borehole pressure cells.  
 4: Installation of subsurface instrumentation  
 [PB-262476/5] 15 p0368 A77-24711  
 The analysis of subsidence associated with  
 geothermal development. Volume 1: Handbook  
 [PB-263692/6] 15 p0369 A77-24714  
 The analysis of subsidence associated with  
 geothermal development. Volume 2: Research  
 report [PB-263693/4] 15 p0369 A77-24715  
 The analysis of subsidence associated with  
 geothermal development. Volume 3: Information  
 bank [PB-263694/2] 15 p0369 A77-24716

**SUBSONIC AIRCRAFT**  
 The next-generation subsonic transport  
 [SAWE PAPER 1127] 13 p0016 A77-12195  
 Energy and economic trade offs for advanced  
 technology subsonic aircraft 14 p0201 A77-29471  
 Hydrogen-fueled subsonic aircraft: A perspective  
 13 p0084 A77-10344

**SUBSONIC FLOW**  
 Effect of nonuniform conductivity in the boundary  
 layer at the electrode wall on local  
 characteristics of an MHD generator with a  
 diagonal electrode configuration and a subsonic  
 stream 13 p0001 A77-10423  
 Acoustic properties of subsonic MHD channel  
 13 p0054 A77-15668  
 Subsonic MHD-diffuser performance with high blockage  
 15 p0331 A77-39567  
 The intermittent jet for supersonic conditions  
 increased with passage to operating in a ramjet  
 - A low cost engine 15 p0339 A77-22130

**SUBSTITUTES**  
 Economy-wide impacts of interfuel substitution:  
 Substitution of electricity for imported oil  
 [BNL-50538] 15 p0369 A77-24998

**SUBSTRATES**  
 Thermally induced migration of hydrocarbon oil  
 15 p0268 A77-32375  
 A performance evaluation of various coatings,  
 substrate materials, and solar collector systems  
 [NASA-TM-X-73355] 13 p0128 A77-15489  
 The 275 deg C microcircuitry: Resistors,  
 capacitors, conductors, substrates, and bonding  
 [SAND-76-0611] 15 p0389 A77-27312

**SUBURBAN AREAS**  
 Impact of a suburban rapid transit line of fuel  
 consumption and cost for the journey-to-work.  
 Analysis of the Philadelphia-Lindenwood  
 high-speed line [PB-263048/1] 15 p0370 A77-25014

**SUGAR BEETS**  
 Systems study of fuels from sugar cane, sweet  
 sorghum, and sugar beets [TID-27032] 14 p0211 A77-17570  
 Systems study of fuels from sugarcane, sweet  
 sorghum, sugar beets, and corn [TID-27336] 15 p0377 A77-26324

# SUBJECT INDEX

# SULFUR OXIDES

## SUGAR CANE

- Biomass energy for Hawaii. Volume 1 - Summary and background. Volume 2 - Sugar operations. Volume 3 - Mixed municipal refuse. Volume 4 - Terrestrial and marine plantations --- Book 16 p0428 A77-46250
- Systems study of fuels from sugar cane, sweet sorghum, and sugar beets [TID-27032] 14 p0211 A77-17570
- Systems study of fuels from sugarcane, sweet sorghum, sugar beets, and corn [TID-27336] 15 p0377 A77-26324

## SUGARS

- Enzymatic hydrolysis of cellulosic wastes to fermentable sugars for alcohol production 15 p0315 A77-37666

## SULFATES

- Aerosol formation during coal combustion - Condensation of sulfates and chlorides on flyash 13 p0054 A77-15778
- General Motors Sulfate Dispersion Experiment - Assessment of the EPA HIWAY model 13 p0071 A77-18882
- Automotive sulfate emissions 15 p0290 A77-34629

## SULFIDES

- Development of compact lithium/iron disulfide electrochemical cells 13 p0026 A77-12715
- Lithium-aluminum/metal sulfide batteries [AIAA PAPER 77-483] 14 p0172 A77-23903
- Sulfidation of 310 stainless steel at sulfur potentials encountered in coal conversion systems 15 p0337 A77-40028
- The design and development of a 30 kW-hr lithium-aluminum/iron sulfide electric vehicle battery 16 p0446 A77-48726

## SULFONIC ACID

- New materials for fluorosulfonic acid electrolyte fuel cells [AD-A036588] 15 p0380 A77-26640

## SULFUR

- Development of sodium/sulfur-cells 13 p0026 A77-12716
  - Sodium/sulphur battery development in the United Kingdom 13 p0026 A77-12717
  - Some studies on sodium/sulfur cells 13 p0055 A77-15813
  - Assessing low sulfur coal resources in Montana and Wyoming 13 p0058 A77-16374
  - Batch autoclave studies of catalytic hydrodesulfurization of coal 14 p0145 A77-21617
  - Sodium/sulphur battery design and development for motive power applications 14 p0161 A77-22905
  - Thermochemical cycles utilizing sulfur for hydrogen production from water 15 p0276 A77-33353
  - Some UK progress in sodium sulphur technology --- battery for electric motor vehicles [SAE PAPER 770280] 16 p0424 A77-44563
  - A new design for the high-performance sodium-sulfur battery [SAE PAPER 770281] 16 p0424 A77-44564
  - Mathematical modelling of coal combustion in fluidized beds with sulphur emission control by limestone or dolomite 16 p0508 A77-51587
  - Heat pipes for the temperature range from 200 to 600 C --- noting sulfur with iodine additive as working fluid 13 p0119 A77-14381
  - Availability of potential coal supply through 1985 by quality characteristics [PB-256680/0] 13 p0121 A77-14573
  - Some studies on a solid state sulfur probe for coal gasification systems [NASA-TN-78428] 16 p0534 A77-31605
- ## SULFUR COMPOUNDS
- Sulfur compounds in oils from the Western Canada Tar Belt 14 p0169 A77-23553
  - The Westinghouse Sulfur Cycle for the thermochemical decomposition of water 15 p0277 A77-33354

- Development progress on the Sulfur Cycle Water Decomposition System --- for hydrogen production 16 p0457 A77-48813
- Feasibility studies of chemical reactions for thermochemical water splitting cycles of the iron-chlorine-, iron-sulfur- and manganese-sulfur families 14 p0238 A77-21572

- The Westinghouse sulfur cycle for the thermochemical decomposition of water 14 p0238 A77-21587
- Hydrogen production by water decomposition using a combined electrolytic thermochemical cycle 14 p0238 A77-21589

## SULFUR DIOXIDES

- Sulphur pollution and emission charges 13 p0005 A77-11033
  - Is nuclear energy economically viable --- competition with coal 13 p0045 A77-12933
  - SO2 control technologies - Commercial availabilities and economics 14 p0191 A77-27279
  - State of the art of particulate and SO2 removal on coal fired boilers 15 p0293 A77-35167
  - Synthetic additives for SO2 removal from combustion gas in a fluidized-bed coal combustor 15 p0293 A77-35168
  - A method for evaluating SO2 abatement strategies 15 p0293 A77-35169
  - Determination of SO2 concentrations from a coal-burning power plant stack by Fourier spectrometry 15 p0296 A77-36024
  - Economic and energy considerations in MHD seed regeneration --- for sulfur oxides removal in coal-fired power plants 15 p0332 A77-39574
  - Further studies on the oxidation of sulfur dioxide in coal-fired power plant plumes 15 p0333 A77-39657
  - Absorption of sulfur dioxide into aqueous sodium hydroxide and sodium sulfite solutions 16 p0412 A77-42407
  - Atmospheric pollution due to multi-stack emissions of medium and large-capacity thermal or thermoelectric plants 16 p0420 A77-44178
  - Catalytic action of combustion-product deposits in the oxidation of SO2 to SO3 within the combustion chambers and exhaust channels of thermoelectric plants 16 p0420 A77-44179
  - Status of sulfur dioxide removal systems for the electric utility industry 16 p0504 A77-51144
  - The air quality and economic implications of supplementary control systems in Illinois --- considering electric power plant fuels [PB-255699/1] 13 p0101 A77-11588
  - Standards support and environmental impact statement. Volume 1: Proposed standards of performance for petroleum refinery sulfur recovery plants [PB-257975/3] 14 p0213 A77-17647
- ## SULFUR OXIDES
- Hydrogen production via thermochemical cycles based on sulfur chemistry 13 p0048 A77-13541
  - Thermodynamic analysis of the formation of the oxides of nitrogen and sulfur in fuel combustion products 15 p0269 A77-32506
  - Formation of sulfuric anhydride and nitrogen oxides in boilers at variable operating modes 15 p0272 A77-33174
  - Chemical reduction of SO3, particulates and NOx emissions 15 p0294 A77-35188
  - Operation results of the desulfurization plant for a thermal power station 15 p0299 A77-36279
  - A 1977 approach to sulfur oxide emissions [ASME PAPER 77-JPGC-PWR-1] 16 p0508 A77-51621
  - Proceedings: Symposium on Flue Gas Desulfurization, volume 1 [PB-255317/0] 13 p0110 A77-12597

Hot fuel gas desulfurization  
[PB-257036/4] 13 p0133 N77-15539

Control of oxides of sulfur from stationary  
sources in the south coast air basin of California  
[PB-261754/6] 15 p0348 N77-22668

Oxidation of sulfur dioxide in power plant plumes  
[BNL-21658] 15 p0386 N77-26713

Report of the Hearing Panel: National Public  
hearing on Power Plant Compliance with Sulfur  
Oxide Air Pollution Regulations  
[PB-264891/3] 15 p0396 N77-27625

**SULFURIC ACID**

Entropy production, efficiency, and economy in the  
case of the thermochemical production of  
synthetic fuels - The sulfuric acid-hybrid  
process for thermochemical water decomposition  
14 p0145 A77-21544

Electrochemical neutralization of acid mine water  
16 p0420 A77-43651

Irreversibilities, heat penalties, and economics  
for the methanol/sulfuric acid process --- for  
hydrogen production 16 p0457 A77-48814

Thermal energy storage by the sulfuric acid-water  
system 16 p0492 A77-49108

**SUMMER**

Summer performance results obtained from  
simultaneously testing ten solar collectors  
outdoors  
[NASA-TM-X-73594] 14 p0229 N77-20563

**SUNLIGHT**

Theoretical maximum for energy from direct and  
diffuse sunlight 13 p0064 A77-17845

Lighting with sunlight using sun tracking  
concentrators 15 p0260 A77-31245

Solar assisted heat pumps: A possible wave of the  
future  
[NASA-CR-2771] 13 p0121 N77-14584

Photovoltaic energy conversion using concentrated  
sunlight  
[SAND-76-5759] 14 p0225 N77-19647

Preliminary report on simulation of a heliostat  
field  
[EBDA-TR-158] 14 p0226 N77-19782

Silicon solar cell development for  
concentrated-sunlight, high-temperature  
applications  
[SAND-76-5311] 15 p0380 N77-26647

Results from circumsolar radiation measurements  
[LBL-5292] 15 p0382 N77-26657

Silicon solar cell testing in concentrated  
sunlight and simulated sunlight 16 p0527 N77-30540

**SUPERCHARGERS**

Performance and NOx emissions modeling of a jet  
ignition prechamber stratified charge engine  
[SAE PAPER 760161] 13 p0016 A77-12150

Effects of a thermal reactor on the energy  
efficiency of a turbocharged, stratified charge  
engine  
[AD-A026059] 13 p0128 N77-15409

**SUPERCONDUCTING MAGNETS**

Experiment on MHD generator with a large-scale  
superconducting magnet /ETL Mark V/  
13 p0049 A77-13728

Pulsed energy conversion with a dc superconducting  
magnet 13 p0081 A77-19293

The technology base for large MHD superconducting  
magnets 14 p0140 A77-21233

All-round technical and economic investigations of  
open-cycle industrial MHD generator channels and  
superconducting magnet systems 14 p0142 A77-21266

Air Force applications of lightweight  
superconducting machinery 14 p0144 A77-21360

Superconducting machinery for Naval ship propulsion  
14 p0144 A77-21361

Superconducting induction coil for a doublet  
Tokamak experimental fusion power reactor  
14 p0144 A77-21376

Superconducting magnets for an MHD test facility  
and base load power plant 14 p0144 A77-21379

Ultra high-current superconducting cables for a  
2.2-tesla, 300-kilojoule energy storage magnet  
14 p0144 A77-21391

Armature of the MIT-EPRI superconducting generator  
14 p0157 A77-22575

PULSAR - A flux compression stage for coal-fired  
power plants 14 p0190 A77-26544

Progress in switching technology for HETS systems  
--- Magnetic Energy Transfer and Storage  
15 p0303 A77-36377

Experiment on MHD generator with a large scale  
superconducting magnet /ETL Mark V/  
15 p0325 A77-39527

Superconducting magnet development for the MHD  
program 15 p0331 A77-39569

Cryogenic design for large superconductive energy  
storage magnets 16 p0411 A77-42156

Temperature excursions during loss of magnet  
coolant accidents with thermalization of energy  
of large superconducting solenoids 16 p0411 A77-42160

Applications of superconducting magnets to energy  
with particular emphasis on fusion power  
16 p0411 A77-42161

Large-scale applications of superconductivity  
16 p0412 A77-42475

Design study of superconducting magnets for a  
combustion magnetohydrodynamic (MHD) generator  
[NASA-CR-135178] 14 p0234 A77-20886

Ultra high-current superconducting cables for a  
2.2-Tesla, 300-kilojoule energy storage magnet  
[LA-UR-76-1809] 14 p0235 N77-21325

Superconducting energy storage development for  
electric utility systems  
[LA-UR-76-2294] 15 p0381 N77-26649

Superconducting magnetic energy storage  
[LA-UR-76-2047] 15 p0397 N77-27933

**SUPERCONDUCTING POWER TRANSMISSION**

High speed superconducting generator  
14 p0144 A77-21383

Thermal performance of the rotor of the MIT-EPRI 3  
MVA superconducting alternator --- cryogenic  
cooling 14 p0144 A77-21384

Superconducting a.c. generators - Progress on the  
design of a 1300 MW, 3000 rev/min generator  
14 p0144 A77-21386

Ultra high-current superconducting cables for a  
2.2-tesla, 300-kilojoule energy storage magnet  
14 p0144 A77-21391

Element rating and coupling harmonics in a  
superconductive energy transfer system  
16 p0411 A77-42164

Large-scale applications of superconductivity  
16 p0412 A77-42475

Experimental study of several modes of operation  
of a laboratory section of a three-phase  
superconducting power transmission cable  
16 p0438 A77-47753

Non-nuclear energy technology. Low temperature  
cable for power transmission  
[BNFT-PB-T-76-01] 14 p0210 N77-17372

Assessment and study of existing concepts and  
methods of cryogenic refrigeration for  
superconducting transmission cables  
[COO-2552-6] 14 p0214 N77-18352

Ultra high-current superconducting cables for a  
2.2-Tesla, 300-kilojoule energy storage magnet  
[LA-UR-76-1809] 14 p0235 N77-21325

Brookhaven superconducting cable test facility  
[BNL-21780] 14 p0236 N77-21331

Studies of helical conductor models for  
superconducting ac power transmission  
[BNL-21784] 14 p0236 N77-21332

Cryogenic power transmission technology:  
Cryogenic dielectrics  
[ORNL-TM-5498] 15 p0341 N77-22297

Resistance of superconducting-normal  
metal-superconducting sandwiches  
[LBL-5473] 15 p0341 N77-22393

The turbo-generator with superconducting field  
winding in transient operation  
[BLL-BIS-10351] 15 p0360 N77-24381

- Comparative cost study of the processes for producing niobium-tin (Nb<sub>3</sub>Sn) superconducting tapes for their application to power transmission lines  
[ERDA-76-160] 15 p0387 N77-26999
- Cryogenic power transmission technology:  
Cryogenic dielectrics

Space power system design and development from an economic point of view 16 p0464 A77-48872

Summary of the role of planning and analysis in the development of the Federal solar energy program 16 p0470 A77-48923

Simulation study of solar heat pump systems 16 p0477 A77-48982

Unified simulation capability for solar heating and cooling system analysis 16 p0479 A77-49003

A design procedure for solar air heating systems 16 p0480 A77-49006

A structural design process for solar energy systems 16 p0480 A77-49012

Smith multimodule solar-electric plant 16 p0482 A77-49023

Turntable solar arrays 16 p0483 A77-49033

Economic aspects of Ocean Thermal Energy Conversion 16 p0484 A77-49041

A parametric study of critical fuel costs for solar heating in North America 16 p0493 A77-49118

User needs vs. technical demands, or the art of tradeoff in making a good, inexpensive solar home 16 p0495 A77-49134

A design procedure for solar air heating systems 16 p0501 A77-50209

Utility distribution systems in Iceland [AD-A026956] 13 p0126 N77-14957

Integrating community utilities for resource conservation [PB-256898/8] 13 p0133 N77-15923

A non-tracking solar energy collector system [NASA-CASR-WFO-13813-1] 14 p0220 N77-19579

Technical and economic feasibility of thermal energy storage [COO-2558-1] 14 p0222 N77-19605

Wind-powered hydrogen electric systems for farm and rural use [PB-259318/4] 14 p0226 N77-19667

Regional variations of solar radiation with application to solar energy system design [PB-259379/6] 14 p0226 N77-19708

Central receiver solar thermal system, phase 1, CPRL item 10 [SAN/1108-76/2] 14 p0231 N77-20591

Economic and technical feasibility study for energy storage flywheels [ERDA-76-65] 14 p0249 N77-21685

Design techniques for modular integrated utility systems --- energy production and conversion efficiency [NASA-TM-X-58189] 14 p0253 N77-22005

Geohydrological environmental effects of geothermal power production, phase 2A [PB-261687/8] 15 p0347 N77-22653

Program document for Energy Systems Optimization Program 2 (ESOP2) Volume 1: Engineering manual [NASA-CR-151422] 15 p0372 N77-25631

Experimental two-phase liquid-metal magneto-hydrodynamic generator program [AD-A035245] 15 p0387 N77-26988

Study of Lyndon B. Johnson Space Center utility systems [NASA-TM-58196] 15 p0388 N77-27161

Engineering analysis and testing of water-trickle solar collector [ORO-4927-76-2] 15 p0391 N77-27506

Performance of a solar heating system utilizing phase-change energy storage [CONF-760842-11] 15 p0393 N77-27540

Technical review and analysis of the total utility demonstration plant design and operational concept [AD-A037016] 15 p0398 N77-28040

Engineering study of the module/array interface for large terrestrial photovoltaic arrays [ERDA/JPL-954698-77/1] 16 p0528 N77-30609

NASA thermionic-conversion program [NASA-TM-X-73644] 16 p0535 N77-31612

Systems studies of energy conservation: Methane produced from coalbeds, volume 1 [MERC/CR-77/4-VOL-1] 16 p0558 N77-33660

**SYSTEMS MANAGEMENT**

Electric load management and energy conservation 14 p0137 A77-20685

**SYSTEMS STABILITY**

Solar pond stability experiments 16 p0482 A77-49028

## T

**TABLES (DATA)**

Study of the cost/benefit tradeoffs for reducing the energy consumption of the commercial air transportation system [NASA-CR-137926] 13 p0126 N77-15007

Study of the cost/benefit tradeoffs for reducing the energy consumption of the commercial air transportation system [NASA-CR-137927] 13 p0126 N77-15008

**TANKER SHIPS**

The importation of liquefied natural gas 14 p0194 A77-27607

Being prepared for future Argo Merchants --- tanker oil spill prevention 16 p0425 A77-45228

Ship steel weldments for low temperature service [PB-256997/8] 13 p0103 N77-12203

Destator test program evaluation [AD-A034260] 15 p0360 N77-24410

**TANKS (CONTAINERS)**

Automotive hydride tank design 15 p0282 A77-33399

A study to obtain verification of Liquid Natural Gas (LNG) tank loading criteria [AD-A025716] 13 p0120 N77-14492

**TANTALUM OXIDES**

The sawtooth coverslide - A new means of coupling light into solar cells 15 p0298 A77-36263

**TAR SANDS**

Shale oil, tar sands, and related fuel sources --- Book 14 p0169 A77-23551

Sulfur compounds in oils from the Western Canada Tar Belt 14 p0169 A77-23553

Characterization of synthetic liquid fuels --- analytical separation and spectroscopic techniques 14 p0169 A77-23554

Characterization of a Utah tar sand bitumen 14 p0170 A77-23561

The Asphalt Ridge tar-sand deposits 14 p0193 A77-27347

Field experiment of in-situ oil recovery from a Utah tar sand by reverse combustion 14 p0193 A77-27348

Recovery of bitumen from oil-impregnated sandstone deposits of Utah 14 p0194 A77-27349

The origin of the oil sand bitumens of Alberta - A chemical and a microbiological simulation study 16 p0438 A77-47765

# SUBJECT INDEX

# TECHNOLOGY ASSESSMENT

Production and processing of US tar sands: An environmental assessment [PB-266266/6] 16 p0513 N77-28575

**TARGET ACQUISITION**  
Performance optimization of an air-to-air missile design 15 p0289 A77-34298

**TECHNOLOGICAL FORECASTING**  
ERDA's gas turbine development program for the next decade 13 p0011 A77-11324

The next-generation subsonic transport [SAWE PAPER 1127] 13 p0016 A77-12195

# TECHNOLOGY UTILIZATION

# SUBJECT INDEX

Technology transfer from foreign direct investment in the United States. Report of a seminar series [PB-263012/7] 15 p0358 N77-24018

Hawaii technology utilization experiment [UCID-17343] 15 p0398 N77-28038

Proceedings of the ASPE/MSFC Symposium on Engineering and Productivity Gains from Space Technology [NASA-CR-2019] 16 p0525 N77-30273

ERDA/NASA-MSFC solar heating and cooling development and demonstration program 16 p0525 N77-30274

Early use of solar energy in buildings. A study of barriers and incentives to the widespread use of solar heating and cooling systems [PB-267832/4] 16 p0539 N77-31663

Spinoff 1977: An annual report [NASA-TM-74908] 16 p0561 N77-34049

**TECHNOLOGY UTILIZATION**

Prospects for coal as a direct fuel and its potential through application of liquefaction and gasification technology 13 p0008 A77-11241

Prospects for solar energy utilization in Iran - Photothermal methods 13 p0013 A77-11532

Application of advanced technology to future long-range aircraft [SAWR PAPER 1126] 13 p0016 A77-12194

Alkali metal space power technology applicable to national energy research and development [AIAA PAPER 77-289] 13 p0065 A77-18223

The application of aerospace technology to solar thermal electric power generation [AIAA PAPER 77-294] 13 p0065 A77-18226

Photovoltaic effect applications 13 p0075 A77-19080

Solar energy in Switzerland 13 p0080 A77-19127

Principles of atomic central heating 14 p0136 A77-20102

Operational chemical storage cycles for utilization of solar energy to produce heat or electric power 14 p0158 A77-22646

Applications of cryogenic technology. Volume 8 --- Book 14 p0159 A77-22868

Superalloys - Their use and requirements in advanced energy systems 14 p0196 A77-28322

Solar technology: Solar energy in practical application /3rd revised and enlarged edition/ --- German book 15 p0271 A77-33113

Combined utilization of nuclear and organic fuels 15 p0272 A77-33159

Analysis of a Delphi study on hydrogen --- questionnaire survey on future energy utilization 15 p0284 A77-33411

Space Congress, 14th, Cocoa Beach, Fla., April 27-29, 1977, Proceedings 15 p0294 A77-35301

The University of Florida solar house 15 p0294 A77-35317

Thin films in energy systems --- for energy conserving structural materials 15 p0306 A77-36673

Application of solar energy in Belgium - Study of a flat plate collector --- Flemish book on materials, applications and design parameters 15 p0324 A77-39499

Electrochemical energy conversion. II - Utilities, marine and space applications 16 p0400 A77-40686

The roles of aerospace organizations in energy development or can aerospace success bring success in energy [AIAA PAPER 77-1001] 16 p0408 A77-41855

Large-scale applications of superconductivity 16 p0412 A77-42475

Aerospace and HVACER: Spinoff '77 - Reaping the dividends --- Heating, Ventilation, Air Conditioning, and Refrigeration 16 p0427 A77-45918

The space station and space industrialization [AAS 76-050] 16 p0430 A77-46633

Practicability study of Stirling total energy systems 16 p0465 A77-48882

Commercial applications of solar total energy systems 16 p0468 A77-48904

Solar thermal system requirements 16 p0481 A77-49017

Utilization of geothermal energy [UTIAS-REVIEW-40] 13 p0087 N77-10644

SEASAT - A candidate ocean industry economic verification experiments [NASA-CR-149228] 13 p0104 N77-12476

Thin film solar cells for terrestrial applications [PB-255606/6] 13 p0109 N77-12553

National benefits associated with commercial application of fuel cell powerplants [ERDA-76-54] 13 p0123 N77-14597

Flywheel-heat engine power for an energy-economic personal vehicle [BNWL-2006] 14 p0214 N77-18448

Coal technology program [ORNL-5159] 14 p0216 N77-18568

Navy applications for terrestrial photovoltaic solar power [AD-A030529] 14 p0218 N77-18590

Energy storage: User needs and technology applications [CONF-760212-SUMM] 14 p0222 N77-19604

Commercial application of laser fusion [LA-UR-76-1459] 14 p0227 N77-19872

Modern technology electrolysis for power application --- concerning hydrogen production 14 p0239 N77-21598

Multi-mission uses for prop-fan propulsion 15 p0339 N77-22127

Applications of aerospace technology to petroleum exploration. Volume 1: Efforts and results [NASA-CR-152694] 15 N77-22741

Applications of aerospace technology to petroleum exploration. Volume 2: Appendices [NASA-CR-152693] 15 p0351 N77-22742

Space benefits: The secondary application of aerospace technology in other sectors of the economy [NASA-CR-152685] 15 p0352 N77-23010

Ceramic applications in the advanced Stirling automotive engine [NASA-TM-X-73632] 15 p0354 N77-23487

NASA Technology Utilization House technical support package [NASA-TM-X-74686] 15 p0358 N77-24011

RAWN utilization experience (case studies 32 through 41) --- research applied to national needs [PB-263683/5] 15 p0370 N77-25027

Identifying and analyzing methods for reducing the energy consumption of helicopters [NASA-CR-144953A] 15 p0388 N77-27104

Advanced technology fuel cell program [EPRI-EM-335] 15 p0391 N77-27508

Hawaii technology utilization experiment [UCID-17343] 15 p0398 N77-28038

Cell and module test procedures seen from the manufacturer and the user point of view 16 p0527 N77-30537

Mineral resources: Potentials and problems [USGS-CIRC-698] 16 p0544 N77-32563

**TELECOMMUNICATION**

Competitive restraints on air travel - Ground modes and telecommunications 16 p0409 A77-41939

**TELEVISION RECEIVERS**

Use of solar generators in Africa for broadcasting equipment 15 p0256 A77-30320

**TEMPERATE REGIONS**

Investigation into the use of large-scale total-energy systems in mild and warm climates 16 p0401 A77-41318

**TEMPERATURE**

Preliminary study of the importance of hydrothermal reactions on the temperature history of a hot, dry rock geothermal reservoir [PB-262391/6] 14 p0252 N77-21731

Focused solar collector analysis with axially varying input due to shadowing from adjacent collectors [SAND-76-5061] 15 p0345 N77-22635

# SUBJECT INDEX

# TEMPERATURE PROFILES

## TEMPERATURE CONTROL

Flight results of a cryogenic cooler designed for Meteosat  
[IAF PAPER 76-210] 13 p0003 A77-10942

Optimal control of flow in low temperature solar heat collectors  
13 p0019 A77-12409

Status of development and application of gas-stabilized heat-pipe radiators  
[DGLR PAPER 76-192] 13 p0060 A77-16557

Temperature optimization for power production of infinite heat transfer solar absorbers  
13 p0073 A77-19055

The heat pipe heat bridge and thermal controller  
[AIAA PAPER 77-751] 15 p0311 A77-37264

The multistage heat pipe radiator - An advancement in passive cooling technology  
[AIAA PAPER 77-760] 15 p0312 A77-37271

Cryogenic temperature control by means of energy storage materials --- for long space voyages  
[AIAA PAPER 77-763] 15 p0312 A77-37273

A precise satellite thermal control system using cascaded heat pipes  
[AIAA PAPER 77-777] 15 p0312 A77-37282

Axially grooved heat pipes - 1976  
[AIAA PAPER 77-747] 15 p0324 A77-39512

Development of a low temperature phase change material package --- for spacecraft thermal control  
[AIAA PAPER 77-762] 15 p0325 A77-39514

Comparison of measurements and predictions of the fluid mechanics and thermal behavior of MHD channel slag layers  
15 p0330 A77-39564

Thermal energy management techniques in spacecraft design and their potential for terrestrial applications  
16 p0439 A77-47969

Development of space applications of heat pipes at Aérospatiale  
13 p0120 N77-14390

Development of thermal control methods for specialized components and scientific instruments at very low temperatures (follow-on)  
[NASA-CR-150152] 13 p0127 N77-15347

The design of a solar energy collection system to augment heating and cooling for a commercial office building  
[NASA-TM-X-72753] 14 p0207 N77-16446

Plan for developing moderate temperature/low salinity geothermal resources  
[ANCR-1318] 14 p0223 N77-19614

Magnetic heat pumping  
[NASA-CASE-LEW-12508-2] 16 p0543 N77-32435

## TEMPERATURE DISTRIBUTION

Transient performance characteristics of a high temperature distributed solar collector field  
13 p0037 A77-12810

Recovery of heat energy from deep or shallow aquifers  
14 p0175 A77-24206

Some aspects of heat and mass transfer in geothermal wells  
14 p0175 A77-24209

Storage tanks - A numerical experiment --- for solar heating  
14 p0180 A77-25898

Investigation of the flow and the temperature distribution in the vapor duct of a high-temperature heat pipe  
15 p0306 A77-36708

Study of the characteristics of convective heat transfer in cylindrical solar energy receivers by solving the conjugate problem of heat exchange  
15 p0316 A77-37771

Investigation of convective heat-transfer characteristics in cylindrical solar receivers by solution of the conjugate heat-exchange problem  
16 p0437 A77-47427

Natural convection phenomena in inclined cells with finite side-walls - A numerical solution --- solar energy absorption cells  
16 p0500 A77-50201

Velocity and temperature distributions of coal-slag layers on magnetohydrodynamic generators walls  
[NASA-TN-D-8396] 14 p0207 N77-16445

Performance characteristics of a high-pressure, moderate temperature, electrolysis system  
14 p0238 N77-21595

## TEMPERATURE EFFECTS

A new hydrogen storage electrode  
13 p0047 A77-14539

Efficiency tests on a linear parabolic concentrator for medium and high temperatures  
13 p0077 A77-19104

Details of hydrogen-burning thermonuclear reactions  
14 p0168 A77-23457

Development of nickel-zinc batteries for aircraft  
14 p0195 A77-28148

Temperature dependence of the 10.6-microns reflectivity of ITO-coated silicon --- selective absorber for solar energy conversion application  
14 p0200 A77-29246

Performance of n+/p silicon solar cells in concentrated sunlight  
15 p0258 A77-30729

Thermally induced migration of hydrocarbon oil  
15 p0268 A77-32375

Water electrolysis under pressure - Improvement of energy efficiency by temperature increase  
15 p0277 A77-33360

Fundamentals of coal gasification  
15 p0308 A77-36809

Electrical conductivity of molten coal slags containing potassium seed  
15 p0330 A77-39565

Comparative kinetics of high-temperature reaction between H<sub>2</sub>S and selected metal oxides  
16 p0424 A77-44608

The storability of Li/SO<sub>2</sub> cells  
16 p0447 A77-48730

Temperature effects of crude oil in the upper intertidal zone  
[PB-255956/5] 13 p0110 N77-12581

Thermal effects on biodegradation of pollutants in water  
[PB-261512/8] 15 p0350 N77-22709

Thermal barrier coating on high temperature industrial gas turbine engines  
[NASA-CR-135147] 15 p0390 N77-27496

Electrical 2-omega-cm 0.046-cm-thick silicon solar cells as a function of intensity and temperature  
[NASA-CR-155166] 16 p0553 N77-33604

## TEMPERATURE GRADIENTS

Geothermal sources and their utilization  
13 p0055 A77-15803

Thermal energy of oceans  
14 p0153 A77-21833

Computing residuals in geothermal research by I.R. scanning  
16 p0431 A77-46768

## TEMPERATURE INVERSIONS

On evaluating the energy capacity and lifetime of fracture dominated geothermal reservoirs  
16 p0454 A77-48796

## TEMPERATURE MEASUREMENT

The status of instrumentation and process control techniques for in situ coal gasification  
14 p0191 A77-26790

A consideration of catalytic effects on Pt-Pt/Rh thermocouples in combustion systems involving hydrogen as a fuel  
15 p0283 A77-33407

Synergistic effects of shadowing on a solar collector matrix  
[SAND-76-0012] 13 p0122 N77-14587

On shallow-hole temperature measurements. A test study in the Salton Sea geothermal field  
[PB-262643/0] 15 p0343 N77-22602

## TEMPERATURE PROFILES

Results of some geothermal studies in Singhbhum thrust belt, India  
13 p0013 A77-11499

Simulation of fluidized bed combustors. I - Combustion efficiency and temperature profile --- for coal-fired gas turbines  
14 p0145 A77-21698

Gas-solid heat transfer coefficients in beds of crushed oil shale  
14 p0196 A77-28472

High temperature solar collector with an Archimedes concentrator  
16 p0460 A77-48833

**TENNESSEE VALLEY (AL-KY-TN)**  
 Study of the feasibility of a regional solid waste derived fuel system in the Tennessee Valley Authority service area [PB-259764/9] 14 p0227 N77-19956

**TERMINAL FACILITIES**  
 Emergency power plant of rapid availability for the Berlin-Tegel airport 13 p0001 A77-10324

**TERMINOLOGY**  
 National gas survey. Report to the federal power commission by the Supply-Technical Advisory Committee Study Subgroup on reserves and resources classifications [PB-265878/9] 16 p0519 N77-29324

**TERNARY ALLOYS**  
 Thermal storage in metals 16 p0492 A77-49105

**TERRAIN ANALYSIS**  
 Determination of average ground reflectivity for solar collectors 16 p0471 A77-48933

**TERRESTRIAL RADIATION**  
 Microwave radiometry of land and water areas on the earth surface from onboard aircraft laboratories 16 p0433 A77-47201

**TEST EQUIPMENT**  
 Solar properties of materials and testing of solar systems 15 p0294 A77-35318  
 Small scale tests on control methods for some liquefied natural gas hazards [AD-A033522] 15 p0341 N77-22293

**TEST FACILITIES**  
 Superconducting magnets for an MHD test facility and base load power plant 14 p0144 A77-21379  
 East Mesa Geothermal Component Test Facility 14 p0178 A77-25136  
 The behavior of iron titanium hydride test beds - Long-term effects, heat transfer and modeling 15 p0280 A77-33386  
 Conceptual heliostat field design for the ERDA 5 Megawatt Solar Thermal Test Facility at Sandia, Albuquerque 15 p0318 A77-38209  
 Initial generator tests with revised ambient-temperature liquid-metal MHD facility 15 p0326 A77-39538  
 Heliostat field design for the ERDA 5 Megawatt Solar Thermal Test Facility 16 p0484 A77-49040  
 Georgia Tech 400 Kwth solar thermal test facility 16 p0498 A77-49158  
 Georgia Tech high temperature solar test facility 16 p0500 A77-49745  
 Development scenario for laser fusion [UCRL-76980] 14 p0216 N77-18575  
 InterTechnology Corporation proposed systems level plan for solar heating and cooling, commercial buildings. Volume 3: National solar demonstration program [COO-2688-76-6-VOL-3] 14 p0224 N77-19634  
 Performance and analysis of SOLARIS water-trickle solar collector [CONF-760821-9] 14 p0232 N77-20599  
 Brookhaven superconducting cable test facility [BNL-21780] 14 p0236 N77-21331  
 Photovoltaic system test facility electromagnetic interference measurements [NASA-TM-X-73640] 15 p0343 N77-22608  
 ERDA/Lewis research center photovoltaic systems test facility [NASA-TM-X-73641] 15 p0343 N77-22609  
 Development of the solar power central receiver concept [SAND-76-8677] 15 p0344 N77-22624  
 Planning and design of additional East Mesa Geothermal Test Facilities. Phase 1B, Volume 2: Procurement package [SAND/1140-1/2-VOL-2] 16 p0558 N77-33657

**TEST VEHICLES**  
 Baseline test data for the EVA electric vehicle --- low energy consumption automobiles 13 p0025 A77-12704

Results of baseline tests of the EVA Metro sedan, Citi-car, Jet Industries Electra-van, CDA town car, and Otis P-500 van [NASA-TM-X-73638] 14 p0236 N77-21549

**TETHERED BALLOONS**  
 The Tethered Balloon Current Generator - A space shuttle-tethered subsatellite for plasma studies and power generation 14 p0184 A77-26200  
 Utilization of wind energy for electrical power supplies to ESSOR stationary platforms --- tropospheric tethered balloon experiment 16 p0427 A77-45610

**TEXAS**  
 Geology and potential uses of the geopressure resources of the Gulf Coast [UCID-17163] 14 p0215 N77-18562  
 Proceedings of Second Geopressured Geothermal Energy Conference. Volume 4: Surface technology and resource utilization [CONF-760222-P4] 14 p0248 N77-21675  
 Proceedings of Second Geopressured Geothermal Energy Conference. Volume 3: Reservoir Research and Technology [CONF-760222-P3] 14 p0249 N77-21678  
 The phasing out of natural gas and oil for electric power generation, southwest power pool and Electric Reliability Council of Texas. Part 2: Technical and economic evaluation of various possible electric utility natural gas reduction programs, 1975 - 1990 [PB-263505/0] 15 p0356 N77-23617  
 Development of an assessment methodology for geopressurized zones of the upper Gulf Coast based on a study of abnormally pressured gas fields in south Texas [COO-2687-5] 15 p0361 N77-24571

**TEXTILES**  
 Environmental considerations of selected energy conserving manufacturing process options. Volume 9: Textile industry report [PB-264275/9] 15 p0384 N77-26686

**THERMAL ABSORPTION**  
 Solar powered absorption cycle simulation using real and stochastic weather data [ASME PAPER 76-WA/SOL-6] 14 p0188 A77-26511  
 Energy conversion and storage by CDE /concentration difference energy/ engine and system 16 p0459 A77-48831  
 Thermal energy storage with saturated aqueous solutions 16 p0493 A77-49111  
 Optimization of absorption air-conditioning for solar energy applications [NASA-CR-150176] 14 p0210 N77-17560

**THERMAL BATTERIES**  
 Investigation of energy parameters of low-temperature ring thermopiles 16 p0409 A77-41902  
 Energy output and service life characteristics of high-voltage low-temperature thermopiles 16 p0442 A77-48517

**THERMAL BOUNDARY LAYER**  
 Laser anemometry in high velocity, high temperature boundary layers 15 p0288 A77-33708  
 Boundary layer measurements of temperature and electron number density profiles in a combustion MHD generator 15 p0288 A77-33710  
 A simplified technique for determining the boundary layer voltage loss in MHD generators 16 p0416 A77-42897

**THERMAL CONDUCTIVITY**  
 Results of some geothermal studies in Singbhum thrust belt, India 13 p0013 A77-11499  
 The integral formulation of the thermoelectric figure-of-merit - Effects of lattice thermal conduction 13 p0042 A77-12850  
 Structural heat conductivity of fiber metal wicks for heat pipes 13 p0050 A77-14326  
 A central solar energy utilization system 13 p0057 A77-16210

## THERMAL EXPANSION

## SUBJECT INDEX

A thermodynamic analysis of HYCSOS, a hydrogen conversion and storage system 15 p0280 A77-33387

Conceptual heliostat field design for the ERDA 5 Megawatt Solar Thermal Test Facility at Sandia, Albuquerque 15 p0318 A77-38209

Energy recovery by the incineration of solid waste - Development, present status and experiences in Germany 15 p0334 A77-39675

Solar generators - Utilization of solar energy for power-supply applications 15 p0336 A77-39980

Thermal storage for electric utilities [AIAA 77-1009] 16 p0403 A77-41556

Design considerations on a thermal energy storage Stirling engine automobile [SAE PAPER 770080] 16 p0424 A77-44558

Molten salt thermal energy storage for utility peaking loads 16 p0451 A77-48765

Investigation of metal fluoride thermal energy storage materials 16 p0451 A77-48767

Safety considerations for high temperature thermal energy storage in fluoride salts 16 p0451 A77-48768

Large-scale thermal storage in rock - Construction, utilization, and economics 16 p0451 A77-48769

Thermal energy storage 16 p0461 A77-48841

Integration of high temperature thermal energy storage into a solar thermal Brayton cycle power plant 16 p0461 A77-48842

Solar thermal conversion to electricity utilizing a central receiver, open cycle gas turbine design 16 p0461 A77-48844

Solar thermal system requirements 16 p0481 A77-49017

Survey of the applications of solar thermal energy to industrial process heat 16 p0481 A77-49019

A central receiver solar system applicable to central power stations 16 p0483 A77-49036

Collector field design for a central receiver solar thermal power plant 16 p0484 A77-49039

Extension of the Hottel-Whillier-Bliss model to the analysis of combined photovoltaic/thermal flat plate collectors 16 p0486 A77-49057

High temperature thermal energy storage 16 p0491 A77-49099

Chemical methods of storing thermal energy 16 p0491 A77-49100

Survey of high temperature thermal energy storage [SAND-75-8063] 13 p0088 A77-10655

Research on solar energy storage subsystems utilizing the latent heat of phase change of paraffin hydrocarbons for the heating and cooling of buildings [PB-254665/3] 13 p0091 A77-10689

Selected aspects of waste heat management: A state-of-the-art study [PB-255697/5] 13 p0100 A77-11563

Conference proceedings, Energy from the Oceans, Fact or Fantasy [PB-256093/6] 13 p0108 A77-12547

Maritime and construction aspects of Ocean Thermal Energy Conversion (OTEC) plant ships [PB-255639/7] 13 p0109 A77-12552

Dual purpose nuclear power plants for military installations [AD-A026141] 13 p0132 A77-15521

Central receiver solar thermal power system, phase 1 [SAN/1110-76/T1] 14 p0216 A77-18570

Economic evaluation of mixture and pure fluid cycles in ocean thermal energy conversion systems [ORO-4918-8] 14 p0217 A77-18578

Ocean thermal energy conversion opportunities [BNWL-SA-5808] 14 p0217 A77-18581

Computer modeling of a regenerative solar-assisted Rankine power cycle 14 p0218 A77-19112

Storage of thermal energy in molten salts and metals [NASA-TT-F-17412] 14 p0220 A77-19574

Potential national benefits of geothermal electrical energy production from hydrothermal resources in the West [BNWL-SA-5798] 14 p0220 A77-19583

Technical and economic feasibility of thermal energy storage [COO-2558-1] 14 p0222 A77-19605

Energy resources alternatives competition [COO-2698-1] 14 p0224 A77-19635

Discovery of reaction sequences for thermochemical water splitting [AD-A029959] 14 p0228 A77-20191

Central receiver solar thermal system, phase 1, CPRL item 10 [SAN/1108-76/2] 14 p0231 A77-20591

Design of an ocean thermal energy plant ship to produce ammonia via hydrogen 14 p0237 A77-21564

A thermodynamic analysis of HYCSOS, a hydrogen conversion and storage system 14 p0242 A77-21622

Thermal energy storage for building heating and cooling applications [ORNL-TM-5700] 15 p0344 A77-22617

Development of the solar power central receiver concept [SAND-76-8677] 15 p0344 A77-22624

Molten salt thermal energy storage systems: Salt selection [COO-2888-1] 15 p0365 A77-24609

United States special format report: Report of the Phoenix Corporation, city of Colorado Springs Solar Heating Project [SE-4578-76/1] 15 p0373 A77-25647

Survey of technology for storage of thermal energy in heat transfer salt [ORNL-TM-5682] 15 p0392 A77-27513

Nonbiological photochemical energy conversion, can it compete [SAND-76-5763] 15 p0393 A77-27541

Central receiver solar thermal power system, phase 1 [SAN/1110-76/2] 15 p0394 A77-27551

ERDA's central receiver solar thermal power system studies 16 p0526 A77-30279

NASA thermionic-conversion program [NASA-TM-X-73644] 16 p0535 A77-31612

Low-temperature thermal energy storage [ORNL-TM-5795] 16 p0536 A77-31631

Survey of the applications of solar thermal energy systems to industrial process heat. Volume 3: Solar thermal energy systems analysis and preliminary assessment of related nontechnical issues [TID-27348-VOL-3] 16 p0537 A77-31638

Survey of the applications of solar thermal energy systems to industrial process heat. Volume 2: Industrial process heat survey [TID-27348-VOL-2] 16 p0537 A77-31639

Low to high temperature energy conversion system [NASA-CASE-RPO-13510-1] 16 p0545 A77-32581

**THERMAL EXPANSION**

Development of a high efficiency thin silicon solar cell [NASA-CR-153905] 15 p0391 A77-27502

**THERMAL INSULATION**

Optimal thermal insulation as an investment-computational problem 13 p0009 A77-11268

Thermal evaluation of a house using a movable-insulation heating and cooling system 13 p0019 A77-12407

Multipurpose insulation system for a radioisotope fueled Mini-Brayton Heat Source Assembly 13 p0022 A77-12678

Practical aspects of solar heating - A review of materials use in solar heating applications 13 p0049 A77-13743

Energy savings by application of knowledge of building physics. I - Wall permeability and its significance for the atmospheric conditions in the building interior, the design and the thermal characteristics of windows, problems concerning the permeability of the joints 15 p0261 A77-31373

# THERMAL STRESSES

# SUBJECT INDEX

Effect of nitrogenous bases on the thermal stability of jet fuels  
[NASA-TN-75131] 15 p0388 N77-27243

**THERMAL STRESSES**  
Calculation of thermal stresses in ceramic elements of the refractory channel walls of a magnetohydrodynamic generator 15 p0263 A77-31540  
Laboratory investigation of high temperature alloy failure mechanisms 15 p0271 A77-32608

**THERMALIZATION (ENERGY ABSORPTION)**  
Temperature excursions during loss of magnet coolant accidents with thermalization of energy of large superconducting solenoids 16 p0411 A77-42160

**THERMIONIC CONVERTERS**  
Advanced thermionic converter development 13 p0043 A77-12862  
NASA thermionic-conversion program 13 p0043 A77-12863  
Thermionic energy conversion technology - Present and future [AIAA PAPER 77-500] 14 p0173 A77-23918  
Some questions concerning the creation of a solar thermionic converter system 15 p0315 A77-37765  
Some problems involved in the development of a solar thermionic power plant 16 p0436 A77-47421  
The NASA thermionic-conversion /TEC-ART/ program 16 p0438 A77-47960  
Environmental assessment of advanced energy conversion technologies 16 p0452 A77-48778  
NASA Thermionic-Conversion program 16 p0466 A77-48886  
Thermionic converter studies at Thermo Electron 16 p0466 A77-48887  
Thermionic converter performance with oxide collectors 16 p0466 A77-48888  
Status of research on advanced thermionic converters 16 p0466 A77-48889  
Low arc drop hybrid mode thermionic converter 16 p0466 A77-48890  
Solar thermionic power systems for terrestrial applications 16 p0466 A77-48893  
Increased central station power plant efficiency with a thermionic topping system 16 p0467 A77-48894  
Evaluation of MHD-thermionic-steam cycles 16 p0467 A77-48895  
Comparative evaluation of technical and economic indices for MHD and thermionic toppers for steam turbine facilities 16 p0469 A77-48909  
NASA thermionic-conversion program [NASA-TN-X-73644] 16 p0535 N77-31612  
High efficiency thermionic converter studies [NASA-CR-135263] 16 p0546 N77-32592

**THERMIONIC DIODES**  
An economic analysis of thermic diode solar panels [ASME PAPER 76-WA/SOL-7] 14 p0188 A77-26512

**THERMIONIC EMISSION**  
Thermionic emission characteristics of seeded coal slags 14 p0140 A77-21229

**THERMIONIC POWER GENERATION**  
Anomalous current-voltage characteristics observed during reactor tests of multielement thermionic assemblies 13 p0018 A77-12361  
Thermionic topping for central station power plants 13 p0034 A77-12787  
Thermionic topping of a steam power plant 13 p0034 A77-12789  
Heat pipe nuclear reactor for space power 13 p0036 A77-12797  
ERDA's Bicentennial Thermionic Research and Technology Program 13 p0042 A77-12861  
NASA thermionic-conversion program 13 p0043 A77-12863  
Effect of solar-radiation density and angular size of radiation source on efficiency of solar power plants 14 p0143 A77-21312

Thermionic energy conversion technology - Present and future [AIAA PAPER 77-500] 14 p0173 A77-23918  
Automatic optimization of operating modes in thermionic electrical power generators [IAF PAPER 77-142] 16 p0507 A77-51445

**THERMOCHEMICAL PROPERTIES**  
Experimental demonstration of an iron chloride thermochemical cycle for hydrogen production 13 p0032 A77-12772  
Test and evaluation of the Navy half-watt RTG --- Radioisotope Thermoelectric Generator 13 p0042 A77-12853  
Hydrogen production using nuclear heat 13 p0057 A77-16211  
Hydrogen production from water by means of chemical cycles 13 p0058 A77-16471  
Thermochemistry of some six-membered cyclic and polycyclic compounds related to coal 16 p0442 A77-48489  
Development of a sulfur-iodine thermochemical water-splitting cycle for hydrogen production 16 p0457 A77-48812  
Development progress on the Sulfur Cycle Water Decomposition System --- for hydrogen production 16 p0457 A77-48813  
Recent developments in the engineering and chemistry of the ZnSe thermochemical hydrogen cycle 16 p0457 A77-48815  
Irreversibilities in thermochemical cycles for hydrogen production by water decomposition 16 p0457 A77-48816  
Chemical methods of storing thermal energy 16 p0491 A77-49100  
Effectiveness of heat-emitting coatings with variable degree of blackness 13 p0111 A77-12893  
Discovery of reaction sequences for thermochemical water splitting [AD-A029959] 14 p0228 A77-20191  
Preliminary assessment of economics of hydrogen production from Lawrence Livermore Laboratory ZnSe thermochemical cycle [UCRL-13711] 16 p0536 A77-31626

**THERMOCHEMISTRY**  
Design analyses of a methane-based chemical heat pipe 13 p0028 A77-12737  
Thermochemical energy storage systems 13 p0028 A77-12738  
Nuclear driven water decomposition plant for hydrogen production 13 p0035 A77-12791  
Stage efficiency in the analysis of thermochemical water decomposition processes 13 p0047 A77-13538  
Hydrogen production via thermochemical cycles based on sulfur chemistry 13 p0048 A77-13541  
Thermal alteration of young kerogen in relation to petroleum genesis 13 p0053 A77-15044  
Thermo-chemical production of hydrogen 13 p0075 A77-19074  
Entropy production, efficiency, and economy in the case of the thermochemical production of synthetic fuels - The sulfuric acid-hybrid process for thermochemical water decomposition 14 p0145 A77-21544  
Thermochemical production of hydrogen - Myth or reality 15 p0270 A77-32593  
Progress in the Los Alamos Scientific Laboratory Program to develop thermochemical processes for hydrogen production 15 p0275 A77-33341  
Discovery of reaction sequences for thermochemical water splitting --- in hydrogen production cycles 15 p0275 A77-33343  
A thermochemical data bank for cycle analysis --- water decomposition for hydrogen production 15 p0276 A77-33346  
The compatibility of containment materials for thermochemical hydrogen production 15 p0276 A77-33347

# SUBJECT INDEX

# TRANSPORT AIRCRAFT

Solar tower characteristics 15 p0274 A77-33333

Solar flux density distributions on central tower receivers 16 p0484 A77-49038

Wind tunnel measurements of the tower shadow on models of the ERDA/NASA 100 KW wind turbine tower [NASA-TM-X-73548] 13 p0114 A77-13534

Solar tower characteristics 14 p0237 A77-21562

Vibration characteristics of a large wind turbine tower on non-rigid foundations [NASA-TM-X-73670] 15 p0378 A77-26613

**TOXIC HAZARDS**

Disposal of toxic wastes. I - Electroplating and electrochemical machining wastes. II - Poisonous and radioactive wastes 15 p0305 A77-36608

**TOXICITY**

JP-4 and JP-9 fuel toxicity studies using water fish and aufwuchs [AD-A027594] 13 p0127 A77-15213

Aerosol research and development related to health hazards analysis [LA-6539-PR] 15 p0385 A77-26703

**TRACE CONTAMINANTS**

XRF analysis of some regenerated catalysts [NRL-TN-388] 15 p0376 A77-26247

**TRACKING (POSITION)**

Design of a tracking system for a solar-energy installation 13 p0015 A77-11919

An automatic solar disk tracking system for incident energy measurements 14 p0138 A77-20749

A self-contained solar powered tracking device [ASME PAPER 76-WA/HT-26] 14 p0186 A77-26477

The sun-tracking control of solar collectors using high-performance step motors 15 p0291 A77-35030

Mount for continuously orienting a collector dish in a system adapted to perform both diurnal and seasonal solar tracking [NASA-CASE-MPS-23267-1] 14 p0228 A77-20401

Sun tracking solar energy collector [NASA-CASE-NPO-13921-1] 15 p0363 A77-24590

**TRACKING NETWORKS**

The linear Fresnel lens solar concentrator: Transverse tracking error effects [NASA-CR-2889] 16 p0521 A77-29606

**TRACKING STATIONS**

Optical and thermal characteristics of a solar collector with a stationary spherical reflector and a tracking absorber [SAND-76-8663] 14 p0248 A77-21674

**TRADEOFFS**

Trade-off analyses for multi-objective transportation plans 13 p0102 A77-11911

**TRANSFER FUNCTIONS**

Transfer function analysis of heat pipes 13 p0119 A77-14385

**TRANSFER ORBITS**

An energy management guidance scheme applicable to the interim upper stage --- for orbital transfer maneuvers [AD-A034005] 15 p0353 A77-23143

**TRANSIENT HEATING**

A two-dimensional finite difference solution for the transient thermal behavior of tubular solar collector 13 p0083 A77-10105

Numerical solutions for transient heating and withdrawal of fluid in a liquid-dominated geothermal reservoir [PB-261562/3] 14 p0252 A77-21726

**TRANSIENT LOADS**

The turbo-generator with superconducting field winding in transient operation [BLL-BTS-10351] 15 p0360 A77-24381

**TRANSIENT RESPONSE**

Transient performance characteristics of a high temperature distributed solar collector field 13 p0037 A77-12810

An algorithm for solving the problem of the optimal control of transient processes in an electrical energy system 16 p0437 A77-47752

Preliminary report on the CTS transient event counter performance through the 1976 spring eclipse season [NASA-TM-X-73487] 13 p0083 A77-10116

**TRANSISTORS**

Effect of components on converters --- solar cell array transistor and thyristor performance 14 p0153 A77-21841

Miniature applications for photovoltaic generators 14 p0155 A77-21853

**TRANSITION METALS**

Coal liquefaction with soluble transition-metal complexes 13 p0070 A77-18584

**TRANSMISSION CIRCUITS**

Microwave transmission system for space power 13 p0014 A77-11818

Pulsed energy and switching requirements for Tokamak ohmic heating [LA-UR-76-2473] 15 p0397 A77-27932

**TRANSMISSION EFFICIENCY**

Characteristics of a system for transmitting concentrated solar radiation 13 p0051 A77-14578

Waveguide high pass filter for thermal conversion of solar energy 13 p0073 A77-19054

Microwave energy transmission [AIAA PAPER 77-540] 15 p0266 A77-32063

Features of systems for transmission of concentrated solar radiation 15 p0290 A77-34972

An analytical study of the maximal heat-carrying capacity of heat pipes 16 p0411 A77-42260

Anik B, the new Canadian domestic satellite 16 p0499 A77-49249

**TRANSMISSION LINES**

Comparative cost study of the processes for producing niobium-tin (Nb3 Sn) superconducting tapes for their application to power transmission lines [ERDA-76-160] 15 p0387 A77-26999

Power transmission project [BNL-22202] 16 p0551 A77-33426

**TRANSMISSIONS (MACHINE ELEMENTS)**

Improving automobile fuel economy with advanced transmissions 16 p0444 A77-48704

Continuously-variable transmission concepts suitable for flywheel hybrid automobiles 16 p0444 A77-48705

**TRANSMITTANCE**

Radiant transmittance of V-corrugated transparent sheets with application to solar collectors [ASME PAPER 76-WA/SOL-1] 14 p0188 A77-26506

**TRANSMITTER RECEIVERS**

Test program for transmitter experiment package and heat pipe system for the communications technology satellite [NASA-TM-X-3455] 13 p0095 A77-11268

**TRANSMITTERS**

Transmitter experiment package for the communications technology satellite [NASA-CR-135035] 15 p0360 A77-24332

**TRANSPARENCY**

Radiant transmittance of V-corrugated transparent sheets with application to solar collectors [ASME PAPER 76-WA/SOL-1] 14 p0188 A77-26506

**TRANSPONDERS**

Anik B, the new Canadian domestic satellite 16 p0499 A77-49249

**TRANSPORT AIRCRAFT**

The next-generation subsonic transport [SAWE PAPER 1127] 13 p0016 A77-12195

Layout and flight performance of a hypersonic transport /HST/ [DGLR PAPER 76-198] 13 p0060 A77-16575

Fuel consumption of civil jet transport aircraft 13 p0062 A77-17234

Energy utilization factor in civil transport aircraft 15 p0307 A77-36788

The liquid hydrogen option for the subsonic transport - A status report 16 p0458 A77-48819

LH2 airport requirements study [NASA-CR-2700] 13 p0083 A77-10032

# SUBJECT INDEX

Hydrogen-fueled subsonic aircraft: A perspective  
13 p0084 N77-10344

Energy consumption characteristics of transports  
using the prop-fan concept  
[NASA-CR-137937] 13 p0118 N77-14029

Energy consumption characteristics of transports  
using the prop-fan concept: Summary report  
[NASA-CR-137938] 13 p0118 N77-14030

Some early perspectives on ground requirements of  
liquid hydrogen air transports  
14 p0243 N77-21628

Innovative Aircraft Design Study (IADS) task 2,  
volume 1  
[AD-A041234] 16 p0531 N77-31141

An evaluation of very large airplanes and  
alternative fuels: Executive summary  
[AD-A042112] 16 p0550 N77-33154

**TRANSPORT PROPERTIES**

Organization of long range transport of air  
pollution monitoring in Europe  
13 p0071 A77-18754

An analytical study of the maximal heat-carrying  
capacity of heat pipes  
16 p0411 A77-42260

Energy and Physics: General Conference of the  
European Physical Society  
[AD-A026962] 13 p0131 N77-15511

**TRANSPORT THEORY**

Transport theory of 3M high-performance  
thermoelectric materials  
13 p0042 A77-12848

**TRANSPORTATION**

A derived demand model of energy demand in the  
transportation sector  
15 p0319 A77-38217

Conference report: Energy Conservation in  
Transportation and Construction  
[PB-255857/5] 13 p0100 N77-11562

Analysis of fiscal year 1977 DOT program by policy  
and RD and D management objectives. Program  
levels for fiscal years 1975, 1976, 1977, volume 1  
[PB-255401/2] 13 p0117 N77-13922

Increased fuel economy in transportation systems  
by use of energy management - second year's  
program  
[PB-257177/6] 13 p0133 N77-15930

Transportation-related data bases extracted from  
the national index of energy and environmental  
data bases. Part 1: Digest of detailed data  
base descriptions  
[UCID-17316-PT-1] 15 p0387 N77-27036

Transportation-related data bases extracted from  
the national index of energy and environmental  
data bases. Part 2: Detailed data base  
descriptions  
[UCID-17316-PT-2] 15 p0387 N77-27037

Hydrogen-via-electricity: A candidate  
transitional transportation energy system concept  
[ERDA-77-13] 16 p0514 N77-28596

Some thoughts on optimizing long-distance heat  
transport systems and their storage facilities  
[AD-A038253] 16 p0516 N77-28608

Quarterly report to US House and Senate Committees  
on Appropriations (3rd)  
[PB-265490/3] 16 p0517 N77-28616

Energy statistics: A supplement to the summary of  
national transportation statistics  
[PB-269301/8] 16 p0559 N77-33672

**TRANSPORTATION ENERGY**

Air transportation energy efficiency -  
Alternatives and implications  
[SAWE PAPER 1124] 13 p0016 A77-12192

An alternative fuel for cars --- hydrogen  
production and storage  
13 p0050 A77-14530

Energy consumption in various modes of  
transportation  
13 p0050 A77-14561

Evolution of the concept of the automobile from  
the standpoint of saving energy  
13 p0051 A77-14562

Air transportation and fuel consumption  
13 p0051 A77-14563

Energy recovery in railway and road transportation  
13 p0051 A77-14564

Alternate fuels for road vehicles of the future  
13 p0051 A77-14584

Transport systems guarantee efficient utilization  
of energy resources  
13 p0053 A77-15048

Problems of transportation power plants  
14 p0136 A77-20004

Commuter van programs - An assessment  
14 p0137 A77-20391

Applications of new systems to urban transportation  
14 p0137 A77-20392

The design and development of a hybrid-electric  
urban transit vehicle  
14 p0159 A77-22876

A comparison between the primary energy  
consumption of electric and gasoline powered  
vehicles  
14 p0159 A77-22885

Basic requirements for the various items of  
equipment for supplying energy to electrically  
driven road vehicles from the point of view of  
the user  
14 p0160 A77-22890

Comparison of an electric versus a gasoline  
powered utility truck in two years of a service  
test program  
14 p0160 A77-22891

Development of a high performance and lightweight  
hybrid flywheel/battery powered electric vehicle  
drive  
14 p0160 A77-22898

Development of large size nickel-zinc cells for  
electric vehicles  
14 p0161 A77-22911

The DDO bus, a suburban bus with electric drive,  
supplied either from overhead wire or from battery  
14 p0161 A77-22913

Basic research problems in the generation of  
electrochemical energy for powering small  
private vehicles  
14 p0180 A77-25721

The application of linear programming methods to  
the problem of choosing required reserves of  
energy for controlled plants  
14 p0196 A77-28255

Energy storage propulsion system for advanced  
concept train --- braking energy recovery  
14 p0200 A77-29467

Application of gravitational energy exchange to  
tracked urban transit systems  
14 p0200 A77-29468

Modeling of electric drive systems for KEW  
/flywheel/ vehicles  
14 p0200 A77-29469

Efficient energy utilization  
15 p0264 A77-31578

Use of a Lowry-type spatial allocation model in an  
urban transportation energy study  
15 p0265 A77-31899

Development of a liquid hydrogen car  
15 p0282 A77-33394

The auto option --- bus usage in urban areas  
15 p0310 A77-36983

Running out of steam. III --- alternatives to  
internal combustion engine  
15 p0310 A77-36984

Hydrogen-via-Electricity - A candidate  
transitional transportation energy system concept  
[AIAA 77-1034] 16 p0405 A77-41570

Have energy, will travel --- alternative aviation  
energy sources in the future  
16 p0409 A77-41933

The impact of the energy crisis on the demand for  
fuel efficiency - The case of general aviation  
16 p0410 A77-42038

Cryogenic fuel systems for motor vehicles  
16 p0411 A77-42166

Synthetic fuels and combustion  
16 p0439 A77-48159

The zinc-bromine battery - Possible candidate for  
electric vehicles and load leveling  
16 p0446 A77-48725

The design and development of a 30 kW-hr  
lithium-aluminum/iron sulfide electric vehicle  
battery  
16 p0446 A77-48726

Design of a current technology electric vehicle  
16 p0446 A77-48727

Flywheel module for electric vehicle regenerative  
braking  
16 p0447 A77-48728

## SUBJECT INDEX

## URBAN TRANSPORTATION

## UNSTEADY FLOW

- Two general methods for the unsteady aerodynamic analysis of horizontal-axis windmills  
16 p0467 A77-48896

## URANIUM

- Analysis of LANDSAT B imagery as a tool for evaluating, developing, and managing the natural resources of New Mexico  
[E77-10090] 14 p0214 A77-18511
- United States special format report: Performance of the Sohio Solar Water Heating System using large area plastic collectors (Grants, New Mexico) [SAN/1038-76/1] 15 p0365 A77-24606
- Determination of low activities of U-Ba-series elements by a liquid-scintillation spectrometer [BIL-SMRE-TRANS-6562-(8313.4)] 15 p0371 A77-25485
- Oil, gas, uranium, and thorium: Supply and depletion, with special reference to California [UCRL-52180] 16 p0536 A77-31628

## URANIUM ISOTOPES

- Field ionization for laser isotope separation [EPRI-NP-334] 16 p0552 A77-33512

## URBAN DEVELOPMENT

- A progress report on the national program for solar heating and cooling  
14 p0170 A77-23656
- Hydrogen in the seaward advancement of industrial societies --- offshore energy production  
15 p0285 A77-33417
- Types of city development, energy supply, and possibilities for optimization  
15 p0338 A77-40349
- Solar energy and urban settlements  
16 p0494 A77-49127
- Growth effects of major land use projects. Volume 2: Compilation of land use based emission factors [PB-255302/2] 13 p0092 A77-10709

## URBAN PLANNING

- Increase in the efficiency of heat and power systems using large artificial accumulators of heat  
13 p0064 A77-17939
- Lumiducts for Ecopolis --- urban solar light collection and transmission system  
13 p0079 A77-19116
- Decision making in the utilisation of the organic fraction of municipal wastes  
15 p0299 A77-36272
- Waste resources - Problems and promise --- for urban energy conversion [ASME PAPER 77-ENAS-49] 16 p0432 A77-46890
- Thermal processing of municipal solid waste for resource and energy recovery --- Book  
16 p0438 A77-47951
- Solar energy and urban settlements  
16 p0494 A77-49127
- Resource recovery technology for urban decision-makers [PB-252458/5] 13 p0093 A77-10964
- Design of municipal services in support of high rise office buildings [PB-262532/5] 15 p0370 A77-25021
- RAWN utilization experience (case studies 32 through 41) --- research applied to national needs [PB-263683/5] 15 p0370 A77-25027
- Weather, climate and human settlements [WHO-448] 15 p0387 A77-27038
- Heat transportation by hot water pipe-lines at 90 deg C [AD-A038301] 16 p0512 A77-28453
- Federal assistance programs and energy development-impacted municipalities [PB-265804/5] 16 p0519 A77-29026

## URBAN RESERARCH

- Detailed geographic analysis of residential energy consumption  
13 p0043 A77-12864
- Municipal solid waste as a resource for energy recovery and conservation  
15 p0313 A77-37655
- Description of Provident House, King City, Ontario  
16 p0495 A77-49133
- Development of a multi-disciplinary ERTS user program in the state of Ohio [E77-10045] 13 p0104 A77-12475
- URBAN TRANSPORTATION**
- The fuel efficiency potential of a flywheel hybrid vehicle for urban driving  
13 p0020 A77-12664

- Load leveling with electric vehicles in the urban environment  
13 p0024 A77-12701
- Selection of driving cycles for electric vehicles of the 1990's  
13 p0024 A77-12702
- Performance of a hydrogen-powered transit vehicle  
13 p0033 A77-12781
- Transport of the future and the tasks of science  
13 p0048 A77-13643
- Energy recovery in railway and road transportation  
13 p0051 A77-14564
- Transport systems guarantee efficient utilization of energy resources  
13 p0053 A77-15048
- Aerodynamics as a subway design parameter  
13 p0070 A77-18721
- Evaluating revenue sources for public transit - A new frontier for environmental planners  
13 p0070 A77-18723
- Economic and social impact of solar powered transportation systems  
13 p0079 A77-19120
- Commuter van programs - An assessment  
14 p0137 A77-20391
- Applications of new systems to urban transportation  
14 p0137 A77-20392
- The design and development of a hybrid-electric urban transit vehicle  
14 p0159 A77-22876
- Hybrid propulsion systems for electric road vehicles for short range public passenger transport test and operational experience - Prospects  
14 p0159 A77-22881
- User experience with the Enfield car --- electric motor vehicle  
14 p0159 A77-22884
- Flywheel-electric hybrid vehicle  
14 p0159 A77-22886
- Development cost effective battery electric road vehicles  
14 p0160 A77-22889
- Opportunities for battery powered road vehicles  
14 p0160 A77-22892
- Studies of electric vehicle drives, illustrated by the example of an urban estate car  
14 p0160 A77-22893
- The M.A.N. electrobus experience gained in large-scale tests  
14 p0160 A77-22900
- Impacts of future use of electric cars in US cities  
14 p0161 A77-22902
- The DUO bus, a suburban bus with electric drive, supplied either from overhead wire or from battery  
14 p0161 A77-22913
- Energy storage propulsion system for advanced concept train --- braking energy recovery  
14 p0200 A77-29467
- Application of gravitational energy exchange to tracked urban transit systems  
14 p0200 A77-29468
- A development of high efficiency electric mini-cars  
14 p0201 A77-29470
- Report on Joint Conference Eno Foundation Board of Directors and Board of Consultants, October 13 and 14, 1976  
15 p0260 A77-31064
- Use of a Lowry-type spatial allocation model in an urban transportation energy study  
15 p0265 A77-31899
- Modification techniques and performance characteristics of hydrogen-powered IC engines - State of the art, 1975  
15 p0282 A77-33396
- The politics of urban transportation innovation  
15 p0287 A77-33600
- A comparison of operational economics of transportation vehicles operated on gasoline and coal-generated hydrogen

The marketability of integrated energy/utility systems  
[PB-266042/1] 16 p0523 N77-29626

Integrated utility systems: Feasibility study and conceptual design at the University of Florida  
[PB-266043/9] 16 p0523 N77-29627

Assessment of energy storage systems suitable for use by electric utilities, volume 3  
[EPRI-EM-264-VOL-3] 16 p0537 N77-31636

Study of electric and gas utilities and the public service commission of Nevada  
[PB-268481/9] 16 p0547 N77-32605

Application of the Alstom/Exxon alkaline fuel cell system to utility power generation  
[EPRI-EM-384] 16 p0557 N77-33643

**UTILITY AIRCRAFT**

The dynamics of STOL /The Daniel and Florence Guggenheim Lecture/ --- utility aircraft for short haul service in remote areas  
[TCAS PAPER 76-01] 13 p0081 A77-19247

**UTILIZATION**

Metal hydrides as hydrogen storage media and their applications  
[BNL-21648] 14 p0231 N77-20589

Survey of the applications of solar thermal energy systems to industrial process heat. Volume 3: Solar thermal energy systems analysis and preliminary assessment of related nontechnical issues  
[TID-27348-VOL-3] 16 p0537 N77-31638

## V

**V GROOVES**

Radiant transmittance of V-corrugated transparent sheets with application to solar collectors  
[ASME PAPER 76-WA/SOL-1] 14 p0188 A77-26506

**V/STOL AIRCRAFT**

The competitive market for commercial VSTOL  
[AIAA 77-573] 15 p0290 A77-34933

Variable cycle engines for V/STOL fighters  
15 p0339 N77-22117

**VACUUM DEPOSITION**

Growth and characterization of thin-film compound semiconductor photovoltaic heterojunctions  
14 p0162 A77-22978

**VACUUM EFFECTS**

Indoor test methods to determine the effect of vacuum on the performance of a tubular flat plate collector --- for solar energy conversion  
[ASME PAPER 76-WA/SOL-24] 14 p0190 A77-26529

**VACUUM MELTING**

Economics and organization of metallurgical production: Effectiveness of the use of magnetic fields in melting alloy steels  
[BLL-M-25473-(5828.4F)] 15 p0359 N77-24245

**VACUUM SYSTEMS**

A tubular evacuated solar collector utilizing a heat pipe as absorber  
16 p0417 A77-42961

Use of getters in evacuated solar collectors  
16 p0487 A77-49069

**VACUUM TUBES**

A fixed collector employing reversible vee-trough concentrator and a vacuum tube receiver for high temperature solar energy systems  
13 p0038 A77-12813

**VALUE ENGINEERING**

The quality category in solar engineering  
14 p0143 A77-21310

Payback of solar systems --- cost effectiveness evaluation by dynamic economical model  
16 p0493 A77-49115

**VALVES**

Investigation of the causes of stuck servovalves in U.S. Army hydraulic systems using MIL-H-46170 'Hydraulic Fluid, Rust Inhibited, Fire Resistant, Synthetic Hydrocarbon Base'  
[ASLE PREPRINT 77-AM-2A-1] 15 p0296 A77-35956

**VAPOR DEPOSITION**

Preparation of CdS/InP solar cells by chemical vapor deposition of CdS  
14 p0205 A77-29893

Vapor-phase fabrication of massive structures in space  
[AIAA PAPER 77-542] 15 p0270 A77-32597

High-efficiency GaAlAs/GaAs heterostructure solar cells grown by metalorganic chemical vapor deposition  
16 p0408 A77-41741

Investigation of high temperature performance of thin film, solar-thermal energy converters  
[PB-265554/6] 16 p0516 N77-28613

**VAPOR PHASES**

Investigation of gas-controlled heat pipes with reservoirs of constant and variable volume  
13 p0050 A77-14327

Hydrogen production with HOT ELLY --- high temperature vapor phase-electrolysis of water  
15 p0269 A77-32404

**VAPOR PRESSURE**

The test reference year: A collection of hourly values of interesting weather elements. III - Conversion of the air pressure for other altitudes, equations of the vapor pressure of water, calculation of the position of the sun --- for heating and air conditioning systems design  
16 p0441 A77-48258

Heat-pipe bismuth laser; examination of laser action at 4722 Å in bismuth vapor  
[AD-A039568] 16 p0533 N77-31495

**VAPOR TRAPS**

Reliability study of vapor recovery systems at service stations  
[PB-267613/8] 16 p0560 N77-33700

**VAPORIZING**

Crystallization and vaporization studies on synthetic coal slag compositions  
14 p0140 A77-21228

Coal gasification --- by destructive distillation and coke residue gasification processes  
15 p0262 A77-31471

**VAPORS**

Vapor recovery analysis  
[PB-262846/9] 15 p0368 N77-24667

**VARIABLE CYCLE ENGINES**

Evaluation of propulsive lift enhancement and variable cycle engines for advanced tactical aircraft  
[AIAA PAPER 77-885] 15 p0321 A77-38575

**VARIABLE GEOMETRY STRUCTURES**

Variable geometry for high performance aircraft engines  
13 p0062 A77-17264

Variable Geometry and Multicycle Engines  
[AGARD-CP-205] 15 p0339 N77-22112

Variable geometry in the gas turbine - the variable pitch fan engine  
15 p0339 N77-22128

The pros and cons of variable geometry turbines  
15 p0340 N77-22140

Potential improvements in engine performance using a variable geometry turbine  
15 p0340 N77-22141

Variable flow turbines  
15 p0340 N77-22142

Experience with a one stage variable geometry axial turbine  
15 p0340 N77-22143

**VARIABLE PITCH PROPELLERS**

Variable geometry in the gas turbine - the variable pitch fan engine  
15 p0339 N77-22148

**VARIATIONS**

Regional variations of solar radiation with application to solar energy system design  
[PB-259379/6] 14 p0226 N77-19708

**VEGETATION**

Waste heat vs conventional systems for greenhouse environmental control: An economic assessment  
[ORNL-TN-5069] 13 p0088 N77-10656

**VEGETATION GROWTH**

Fuels from biomass - Energy outlay versus energy returns: A critical appraisal  
15 p0322 A77-38673

Can we control the carbon dioxide in the atmosphere  
15 p0322 A77-38674

Design, operation and economics of the Energy Plantation  
16 p0497 A77-49154

## VELOCITY DISTRIBUTION

## SUBJECT INDEX

## VELOCITY DISTRIBUTION

Velocity and temperature distributions of coal-slag layers on magnetohydrodynamic generators walls  
[NASA-TN-D-8396] 14 p0207 N77-16445

**VENTILATION**  
Aerospace and HVAC&R: Spincff '77 - Reaping the dividends --- Heating, Ventilation, Air Conditioning, and Refrigeration 16 p0427 A77-45918  
The solar fan - Solar induced draft air conditioning system 16 p0478 A77-48988

**VERTICAL TAKEOFF AIRCRAFT**  
Energy aspects of VTOL aircraft in comparison with other air and ground vehicles 16 p0419 A77-43333

**VIBRATION DAMPING**  
Emissions from compressor stations --- noise pollution 15 p0287 A77-33545

**VIBRATION EFFECTS**  
Vibration characteristics of a large wind turbine tower on non-rigid foundations  
[NASA-TM-X-73670] 15 p0378 N77-26613

**VIBRATION TESTS**  
Test and evaluation of the Navy half-watt RTG --- Radioisotope Thermoelectric Generator 13 p0042 A77-12853

**VIBRATIONAL SPECTRA**  
Acoustic properties of subsonic MHD channel 13 p0054 A77-15668

**VIKING 1 SPACECRAFT**  
SNAP 19 Viking RTG mission performance 13 p0041 A77-12840

**VIRGINIA**  
Evaluation and targeting of geothermal energy resources in the southeastern United States  
[VPI-SU-5103-1] 14 p0225 N77-19642

**VISCOUS FLUIDS**  
Thermal explosion of moving reacting fluids of variable viscosity 13 p0052 A77-14980

**VOLATILITY**  
Coal devolatilization and hydrogasification 14 p0200 A77-29450  
Diagnostics for thermal cracking of coal volatiles in entrained-bed gasifiers  
[WSS/CI PAPER 76-25] 16 p0419 A77-43593

**VOLCANOES**  
Heat transport in geothermal systems 14 p0174 A77-24203  
Remote sensing of geothermic activities of the volcanoes Aetna, Stromboli and Vesuv by means of infra-red NOAA-VHRR-satellite data --- Italy 13 p0104 N77-12485

**VOLCANOLOGY**  
LANDSAT (ERTS) used as a basis for geological volcanological mapping in the central Andes  
[NASA-TM-75024] 15 p0390 N77-27474

**VOLT-AMPERE CHARACTERISTICS**  
A multilayer iron-thionine photogalvanic cell 13 p0007 A77-11108  
Operation of ITO/Si heterojunction solar cells 13 p0014 A77-11762  
Influence of doped-layer parameters on photoelectric characteristics of silicon photovoltaic cells 13 p0014 A77-11916  
Anomalous current-voltage characteristics observed during reactor tests of multielement thermionic assemblies 13 p0018 A77-12361  
Performance and cost analysis of photovoltaic power systems for on-site residential applications 13 p0038 A77-12816  
Study of the electrical characteristics of the boundary layer on the metal surfaces in the channels of an open cycle MHD generator 13 p0054 A77-15666  
Preparation and characteristics of CuGaSe<sub>2</sub>/CdS solar cells 13 p0069 A77-18517  
An analysis of silicon solar cell parameters for terrestrial applications 13 p0076 A77-19081  
Ceramic thin film CdTe solar cell 14 p0135 A77-19635

Curve of current delivered from MHD generator to a conventional power grid by inverter system 14 p0141 A77-21253

Silicon solar cell development 14 p0148 A77-21784

Assessment of high-efficiency solar cells performance 14 p0148 A77-21785

A novel cover slide for solar cells 14 p0148 A77-21789

Photovoltaic properties of thin-film Cu<sub>2</sub>S-CdS heterojunctions 14 p0149 A77-21801

Improvement of the efficiency of M-S solar cells by interfacial modifications 14 p0151 A77-21818

Open-circuit voltage of silicon solar cells 14 p0151 A77-21820

Effect of components on converters --- solar cell array transistor and thyristor performance 14 p0153 A77-21841

High efficiency n-CdS/p-InP solar cells prepared by the close-spaced technique 14 p0156 A77-22081

Growth and characterization of thin-film compound semiconductor photovoltaic heterojunctions 14 p0162 A77-22978

Improved theory of the silicon p-n junction solar cell 14 p0166 A77-23364

Thermionic energy conversion technology - Present and future [AIAA PAPER 77-500] 14 p0173 A77-23918

Theoretical and experimental validation of new sources of electrical energy 14 p0176 A77-24457

Design considerations for high-intensity solar cells 14 p0179 A77-25591

Performance limitations of silicon solar cells 15 p0257 A77-30711

Electronic properties of amorphous silicon in solar cell operation 15 p0257 A77-30717

Collection efficiency of heterojunction solar cells 15 p0258 A77-30722

Silicon solar cells on unidirectionally recrystallized metallurgical silicon 15 p0258 A77-30731

Indium-tin-oxide-silicon heterojunction photovoltaic devices 15 p0259 A77-30735

Intensity effects in SnO<sub>2</sub>-Si heterojunction solar cells 15 p0259 A77-30736

Large-area high-efficiency AlGa/As-GaAs solar cells 15 p0259 A77-30738

InP-CdS solar cells 15 p0259 A77-30740

High level concentration of sunlight on silicon solar cells 15 p0267 A77-32208

High-efficiency and high-peak-power InP transferred-electron oscillators 15 p0289 A77-34366

The sawtooth coverslide - A new means of coupling light into solar cells 15 p0298 A77-36263

Photovoltaic properties and junction formation in CuInSe<sub>2</sub> 15 p0305 A77-36584

Some questions concerning the creation of a solar thermionic converter system 15 p0315 A77-37765

Axial field limitations in MHD generators 15 p0328 A77-39552

Calculation of end effects in open-cycle MHD power generators 15 p0329 A77-39558

CuInS<sub>2</sub> thin-film homojunction solar cells 16 p0399 A77-40567

Upper limit of efficiency for photovoltaic solar cells 16 p0399 A77-40568

The power conversion efficiency of the gold-Rhodamine B-gold photoelectrochemical cell 16 p0406 A77-41583

# SUBJECT INDEX

# WASTE ENERGY UTILIZATION

The interaction of batteries and fuel cells with electrical distribution systems - Line commutated converter interface 16 p0414 A77-42634

Hydrogen and electricity from water and light 16 p0430 A77-46609

Some problems involved in the development of a solar thermionic power plant 16 p0436 A77-47421

On the analysis and design of grid structures for p-n junction solar cells 16 p0497 A77-49156

The dependence of current output of the Ti-Ti SnO<sub>2</sub>/Pt iron-thickine photogalvanic cell on photostationary state composition --- Totally Illuminated, Thin Layer 16 p0502 A77-50220

N-CdS/n-GaAs voltage-enhanced photoanode --- in photoelectrochemical solar cell 16 p0503 A77-50287

Efficient sprayed In<sub>2</sub>O<sub>3</sub>:Sn n-type silicon heterojunction solar cell 16 p0503 A77-50292

**VOLTAGE CONVERTERS (DC TO DC)**  
Use of heat pipes in electronic hardware 16 p0526 A77-30293

**VOLTAGE REGULATORS**  
Linear model of a dissipative PWM shunt regulator --- Pulse Width Modulation 13 p0080 A77-19172

Voltage consolidation and control circuits for multiple-electrode MHD generators 14 p0141 A77-21252

The interaction of batteries and fuel cells with electrical distribution systems - Force commutated converter interface 16 p0414 A77-42635

Exact 60 cycle power generation at any speed --- for windmill applications 16 p0450 A77-48759

**VOLTBATTERS**  
On the nature of fluctuations in an open cycle magnetohydrodynamic generator 13 p0117 A77-13841

**VORTEX GENERATORS**  
Vortex kinetic energy concentrator 13 p0044 A77-12870

**VOYAGER PROJECT**  
Tests and evaluation of multihundred watt thermoelectric generators at JPL 16 p0462 A77-48854

## W

**WAKES**  
Investigation of excitation control for wind-turbine generator stability [NASA-TM-73745] 16 p0535 A77-31614

**WALL FLOW**  
Replenishment processes and flow train interaction --- in MHD generators 14 p0139 A77-21223

Influence of flow nonuniformity on plasma instability at the channel wall 15 p0269 A77-32520

Experimental investigation of multiple-loaded diagonal conducting wall generators 15 p0325 A77-39529

**WALL TEMPERATURE**  
Effects of one-sided heat input and removal on axially grooved heat pipe performance [AIAA PAPER 77-191] 14 p0135 A77-19887

Calculation of thermal stresses in ceramic elements of the refractory channel walls of a magnetohydrodynamic generator 15 p0263 A77-31540

Comparison of measurements and predictions of the fluid mechanics and thermal behavior of MHD channel slag layers 15 p0330 A77-39564

A non-technical evaluation of four different concrete wall solar collector configurations 16 p0478 A77-48990

Natural convection phenomena in inclined cells with finite side-walls - A numerical solution --- solar energy absorption cells 16 p0500 A77-50201

**WANKEL ENGINES**  
Whatever happened to the Wankel engine 15 p0272 A77-33125

Performance, emissions, and physical characteristics of a rotating combustion aircraft engine [NASA-CR-135119] 15 p0376 A77-26134

**WASHING**  
Evaluation of molten scrubbing for fine particulate control [PB-266092/6] 16 p0517 A77-28642

**WASTE DISPOSAL**  
Energy from wastes 13 p0006 A77-11038

Controlled tipping of combustion residues 13 p0008 A77-11175

Dutchess County, NY moves towards pyrolysis --- of solid wastes with fuel recovery 13 p0010 A77-11298

Operation of the Westinghouse Coal Gasification Process Development Unit 13 p0023 A77-12689

Energy and environment post-2000 13 p0050 A77-14560

An analysis of the role of energy in solid waste utilization and disposal 14 p0182 A77-26070

Sewage sludge treatment and disposal --- Book 15 p0298 A77-36127

Disposal of toxic wastes. I - Electroplating and electrochemical machining wastes. II - Poisonous and radioactive wastes 15 p0305 A77-36608

Energy recovery by the incineration of solid waste - Development, present status and experiences in Germany 15 p0334 A77-39675

'Co-disposal' for solid wastes and sewage sludge 16 p0427 A77-45873

Fluidized-bed incineration of waste materials 16 p0434 A77-47216

Modern incineration - A proven way for recovery of energy and metals 16 p0434 A77-47220

Steam recovery - An alternative for intermediate size regions --- solid waste disposal 16 p0434 A77-47222

Pollution control in geothermal energy 16 p0452 A77-48772

Resource recovery technology for urban decision-makers [PB-252458/5] 13 p0093 A77-10964

Pollutant potential of raw and chemically fixed hazardous industrial wastes and flue gas desulfurization sludges [PB-256691/7] 13 p0133 A77-15540

Fine shredding of municipal solid waste [PB-257105/7] 13 p0133 A77-15919

Fuel and energy production by bioconversion of waste materials: State-of-the-art [PB-258499/3] 14 p0219 A77-19279

Control of waste and water pollution from power plant flue gas cleaning systems [PB-259211/1] 14 p0227 A77-19953

Waste POL disposal through energy recovery [AD-A031783] 14 p0235 A77-20957

Contamination of groundwater by heavy metals from the land disposal of fly ash [COO-2727-4] 15 p0357 A77-23631

The potential for reusable homogeneous containers [PB-265100/8] 16 p0518 A77-29007

Physical properties of western coal waste materials [PB-266724/4] 16 p0530 A77-30657

Destroying chemical wastes in commercial scale incinerators. Facility report no. 2, Surface Combustion Division, Midland-Ross Corporation [PB-268232/6] 16 p0542 A77-32051

Thermodynamic analysis of an oil reclamation process [PB-268524/6] 16 p0548 A77-32619

Preliminary design study of a baseline MHD [NASA-TM-X-58193] 16 p0561 A77-34050

Evaluation of the disposal of flue gas desulfurization wastes in mines and the ocean: Initial assessment [PB-269270/5] 16 p0561 A77-34058

**WASTE ENERGY UTILIZATION**  
Energy from solid wastes --- Book 13 p0003 A77-10698

Energy from wastes 13 p0006 A77-11038

Fuel economy potential of a combined engine cooling and waste heat driven automotive air-conditioning system 13 p0020 A77-12665

A preliminary assessment of the feasibility of deriving liquid and gaseous fuels from grown and waste organics 13 p0021 A77-12673

Steam station repowering - A near-term method of energy conservation 13 p0022 A77-12679

Thermionic topping for central station power plants 13 p0034 A77-12787

PULSAR, an unconventional topping stage --- MHD generation with metallic armature produced magnetic flux compression 13 p0034 A77-12788

Thermionic topping of a steam power plant 13 p0034 A77-12789

Energy recovery in railway and road transportation 13 p0051 A77-14564

Improved use of energy --- through waste and solar energy utilization 13 p0079 A77-19123

Influence of coal type and drying upon MHD power plants and components 14 p0140 A77-21231

Applications of the rapid devolatilization of coal in MHD power cycles 14 p0141 A77-21249

Wide-range control of a thermal interconnection network --- waste incineration utilization supplying pipelined steam heat 14 p0145 A77-21545

On the production of town gas from off-gases of the chemical processing industry 14 p0164 A77-23099

Utilization of heat of geothermal springs and waste hot waters in freon-operated power plants 14 p0175 A77-24207

Gasification of coal and its future aspects regarding the use of heat from high-temperature nuclear reactors 14 p0175 A77-24210

Design studies of the hydrogasification of coal 14 p0175 A77-24214

Drying of refuse-derived fuel for energy recovery from municipal solid waste 14 p0182 A77-26071

A method for increasing the efficiency of the electric generating process 14 p0183 A77-26087

Design considerations for heat recovery system for DD-963 class ship [ASME PAPER 77-GT-106] 14 p0197 A77-28616

Efficient energy utilization 15 p0264 A77-31578

Hydrogen production from nuclear waste energy 15 p0274 A77-33331

The outlook for more efficient fuel utilization in generation of process heat 15 p0294 A77-35400

Energy recovery from municipal and industrial waste 15 p0305 A77-36605

Energy recovery by the incineration of solid waste - Development, present status and experiences in Germany 15 p0334 A77-39675

California's aqueduct offers peaking power to Los Angeles 16 p0400 A77-40893

Investigation into the use of large-scale total-energy systems in mild and warm climates 16 p0401 A77-41318

Thermal storage for electric utilities [AIAA 77-1009] 16 p0403 A77-41556

Energy conservation by symbiosis 16 p0408 A77-41852

Design of a low cost space heating system using warm geothermal or industrial effluents [ASME PAPER 77-DE-26] 16 p0432 A77-46909

Steam recovery - An alternative for intermediate size regions --- solid waste disposal 16 p0434 A77-47222

Sludge processing to optimize digestibility and energy production 16 p0439 A77-48100

Biphase turbines for diesel bottoming --- waste heat recovery 16 p0449 A77-48755

Performance of absorption cycle operating with low thermal-potential energy sources for direct-contact cooling applications 16 p0450 A77-48756

Feasibility of hydrogen production by direct water splitting at high temperature  
14 p0240 N77-21606

An investigation of hydrogen production from water at high temperatures  
14 p0240 N77-21607

Developing and testing of a wastewater recycler and heater  
[NASA-CR-154846] 16 p0531 N77-31040

**WATER VAPOR**

Electric energy from atmospheric water vapor  
13 p0077 A77-19097

Hydrogen production with HOT ELLY --- high temperature vapor phase-electrolysis of water  
15 p0269 A77-32404

Energy from humid air  
[AIAA PAPER 77-730] 15 p0311 A77-37253

Geothermal energy - Tapping nature's boiler room  
16 p0437 A77-47600

Hydrogen production from water utilizing solar heat at high temperatures  
16 p0501 A77-50205

**WATER WAVES**

Hydrodynamic basis of wave-energy converters of channel form  
15 p0267 A77-32211

**WATERWAVE ENERGY**

Power resource estimate of ocean surface waves  
13 p0071 A77-18790

**WATERWAVE ENERGY CONVERSION**

The atmosphere and the oceans as energy sources  
13 p0005 A77-11036

Harnessing the ocean waves, swells and tides  
14 p0183 A77-26091

Energy from the oceans - Requirements and capabilities  
15 p0272 A77-33141

Sea water - The energy elixir --- ocean thermal, tide and wave energy conversion  
15 p0320 A77-38446

The oceans as a source of electricity  
16 p0412 A77-42401

Wave power --- potentially available in New Zealand  
16 p0418 A77-43011

Ocean wave power  
16 p0499 A77-49349

**WAVE DIFFRACTION**

On the theory and solar application of inductive grids --- wave diffraction modeling and far IR measurement  
16 p0419 A77-43556

**WAVE REFLECTION**

Optical study of fixed spherical solar collectors  
16 p0505 A77-51161

**WAVEGUIDE FILTERS**

Waveguide high pass filter for thermal conversion of solar energy  
13 p0073 A77-19054

**WEAR INHIBITORS**

Antiwear additives, wear studies on chemical addition agents for imparting an effective lubricating response in polysiloxane (silicone) fluids  
[AD-A033527] 15 p0340 N77-22270

**WEATHER**

Weather, climate and human settlements  
[WMO-448] 15 p0387 N77-27038

**WEATHER MODIFICATION**

Introductory remarks on space observations of long-term climatic changes produced by escalating energy use  
[IAF PAPER A-77-01] 16 p0507 A77-51508

**WEATHER STATIONS**

Insolation data for solar energy conversion derived from satellite measurements of earth radiance  
16 p0471 A77-48930

**WEATHERING**

Weatherability of solar energy utilization materials: Preliminary discussions  
[CONF-76C821-11] 14 p0225 N77-19650

**WEATHERPROOFING**

The weatherability of solar energy utilization materials - Preliminary discussions  
16 p0487 A77-49070

**WEIGHT REDUCTION**

Estimating procedures associated with aircraft modifications  
[SAWE PAPER 1101] 13 p0016 A77-12181

Theoretical aspects of optimization of aviation gas turbine engine design variables  
13 p0063 A77-17762

Air Force applications of lightweight superconducting machinery  
14 p0144 A77-21360

Composite technology - The boom is under way --- rotorcraft materials  
15 p0287 A77-33616

Development of lightweight compound parabolic concentrators for solar thermal electric and process heat applications  
16 p0483 A77-49011

**WEIGHTLESSNESS**

Industrial development in zero-G  
15 p0295 A77-35812

A zero g variable conductance heat pipe using bubble pump injection  
[AIAA PAPER 77-752] 15 p0311 A77-37265

**WELD STRENGTH**

Ship steel weldments for low temperature service  
[PB-256997/8] 13 p0103 N77-12203

**WELDED STRUCTURES**

Development and testing of solar water-heating boilers manufactured by diffusion welding  
15 p0316 A77-37773

Development and testing of solar water-heater boilers fabricated by diffusion welding  
16 p0437 A77-47429

**WELDING**

Energy conditions of welding with solar radiation  
16 p0421 A77-44274

Studies of technological processes by solar energy under cosmic simulated conditions  
[IAF PAPER 77-54] 16 p0506 A77-51411

**WELLS**

Pressure drawdown and buildup analyses in geothermal reservoirs  
13 p0030 A77-12753

Problems related to operating thermal wells subject to scaling in Hungary  
14 p0163 A77-23035

Flow in geothermal hot water wells  
14 p0163 A77-23037

Interaction of hot water reservoirs and deep wells  
14 p0163 A77-23038

Recovery of heat energy from deep or shallow aquifers  
14 p0175 A77-24206

Some aspects of heat and mass transfer in geothermal wells  
14 p0175 A77-24209

Fracturing oil shale for in situ retorting experiments  
14 p0193 A77-27341

Underground coal gasification - A status report  
16 p0441 A77-48473

Geothermal well stimulation with a secondary fluid  
16 p0454 A77-48795

Workshop on Geothermal Reservoir Engineering  
[PB-261319/8] 14 p0251 N77-21709

Geothermal down-well pumping system  
[PB-261857/7] 14 p0252 N77-21732

Geothermal hot water pump, appendix  
[PB-262030/0] 15 p0347 N77-22652

Thermal conductivity measurement and prediction from geophysical well log parameters with borehole application  
[PB-262372/6] 15 p0347 N77-22654

The Hawaii geothermal project, initial phase 2 progress report  
[PB-263120/8] 15 p0355 N77-23594

**WESTAR SATELLITES**

Satellite communications for off-shore oil operations using WESTAR  
13 p0053 A77-15130

**WETTING**

Wetting and surface properties of refrigerants to be used in heat pipes --- surface tension and wall contact angles  
13 p0119 N77-14386

# SUBJECT INDEX

# WINDMILLS (WINDPOWERED MACHINES)

**WHEAT**  
Interpretation of Pennsylvania agricultural land use from EHTS-1 data [B77-10111] 14 p0215 N77-18525

**WICKS**  
Investigation of the thermophysical characteristics of low-temperature heat pipes with metal-fiber wicks 13 p0050 A77-14321  
Structural heat conductivity of fiber metal wicks for heat pipes 13 p0050 A77-14326  
Investigation of the effective heat conductivity of metal-fiber wicks for low-temperature heat pipes 16 p0500 A77-49988  
Computer program grade 2 for the design and analysis of heat-pipe wicks [NASA-CR-137954] 13 p0118 N77-14375  
Extended cryogenic performance of Lobar Wick heat pipe/radiator 13 p0119 N77-14379

**WILDERNESS**  
Utilization of remote sensing techniques to detect land use effects on wildland water quality 13 p0071 A77-18984

**WIND (METEOROLOGY)**  
Status of the ERDA/Sandia 17-metre Darrieus turbine design [SAND-76-5683] 14 p0217 N77-18576  
International Symposium on Wind Energy Systems [AD-A034871] 15 p0366 N77-24627  
Study of Alaskan wind power and its possible applications [NSF/RANN/SE/AER74-00239/PR-26] 15 p0382 N77-26664

**WIND DIRECTION**  
Distribution of some hydrocarbons in ambient air near Delft and the influence on the formation of secondary air pollutants 15 p0271 A77-32954

**WIND EFFECTS**  
The wind and its effect on the heating requirements 13 p0009 A77-11266  
Reduced drag, paraboloid type, solar energy collectors 16 p0473 A77-48951

**WIND MEASUREMENT**  
Wind power studies: Field measurement priorities for numerical analysis of wind energy [UCRL-50034-76-3] 14 p0249 N77-21681

**WIND PRESSURE**  
Wind power studies: Regional wind energy measurements [UCRL-50034-76-4] 15 p0392 N77-27527

**WIND PROFILES**  
Siting of wind driven apparatus 13 p0043 A77-12865  
The use of built form to enhance the output of wind collectors --- building design for wind concentration 16 p0490 A77-49090  
Wind tunnel measurements of the tower shadow on models of the ERDA/NASA 100 KW wind turbine tower [NASA-TM-X-73548] 13 p0114 N77-13534

**WIND TUNNEL TESTS**  
Wind tunnel investigation of devices to reduce bus aerodynamic drag [AIAA PAPER 77-307] 13 p0066 A77-18232  
Comparative wind tunnel investigation of sail profiles for windmills [VTH-191] 13 p0111 N77-13012  
Wind tunnel measurements of the tower shadow on models of the ERDA/NASA 100 KW wind turbine tower [NASA-TM-X-73548] 13 p0114 N77-13534  
Wind tunnel performance data for the Darrieus wind turbine with NACA 0012 blades [SAND-76-0130] 14 p0214 N77-18057

**WIND TUNNELS**  
Study of the application of solar chemical dehumidification system to wind tunnel facilities of NASA Lewis Research Center at Cleveland, Ohio [NASA-CR-149886] 14 p0227 N77-20116

**WIND VARIATIONS**  
Wind structure in strong winds below 150 m 16 p0410 A77-42071  
Effects of wind fluctuations on windmill behaviour 16 p0410 A77-42073

**WIND VELOCITY**  
Estimating wind power feasibility 13 p0010 A77-11315  
A new generation scheme for large wind energy conversion systems 13 p0043 A77-12868  
Wind driven field modulated generator systems 13 p0044 A77-12869  
New England wind power...coastal or mountain 13 p0058 A77-16250  
Aspects of surface wind behaviour 14 p0165 A77-23357  
Energy content of winds in the high plains region of southwestern U.S. 16 p0490 A77-49089

**WIND VELOCITY MEASUREMENT**  
On the energy pattern factor in wind measurements --- power source potential 15 p0322 A77-38788

**WINDING**  
Thermal performance of the rotor of the MIT-EPRI 3 MVA superconducting alternator --- cryogenic cooling 14 p0144 A77-21384  
The turbo-generator with superconducting field winding in transient operation [BLL-BTS-10351] 15 p0360 N77-24381

**WINDMILLS (WINDPOWERED MACHINES)**  
Windmills stage a comeback --- review 13 p0048 A77-13624  
Dual optimum aerodynamic design for a conventional windmill 13 p0048 A77-13704  
Wind-power generation on a large scale - A design idea 13 p0050 A77-14531  
Aerodynamics of the Darrieus rotor 13 p0050 A77-14559  
Possibilities for utilizing wind energy 13 p0056 A77-15853  
Windmills change direction --- British system utilizing offshore windmills and depleted North Sea fields 13 p0060 A77-16620  
Potential aerodynamic analysis of horizontal-axis windmills [AIAA PAPER 77-132] 14 p0135 A77-19848  
Wind energy for human needs 14 p0145 A77-21400  
Optimum wind-energy conversion systems 14 p0155 A77-21936  
Balancing power supply from wind energy converting systems 14 p0166 A77-23361  
Flap-augmented shrouds for aerogenerators 14 p0183 A77-26085  
Windmill optimization 14 p0183 A77-26086  
Aerodynamic design of a conventional windmill using numerical optimization 14 p0199 A77-29070  
Wind energy in practical use: Wheels, rotors, mills, wind power plants --- German book 15 p0271 A77-33114  
A theory and experimental investigation of ducted wind turbines 16 p0410 A77-42072  
Effects of wind fluctuations on windmill behaviour 16 p0410 A77-42073  
The 'wind-wall' - An integrated wind/solar system 16 p0410 A77-42075  
Economic competitiveness of windmills 16 p0417 A77-42898  
Wind energy - Bounty in the breeze 16 p0418 A77-43123  
The effect of aerofoil characteristics on windmill performance 16 p0438 A77-47880  
Exact 60 cycle power generation at any speed --- for windmill applications 16 p0450 A77-48759  
Two general methods for the unsteady aerodynamic analysis of horizontal-axis windmills 16 p0467 A77-48896  
The use of built form to enhance the output of wind collectors --- building design for wind concentration 16 p0490 A77-49090

- An immiscible fluid - Heat of fusion energy storage system 16 p0493 A77-49113
- Closed Brayton cycle using hydrogen as a work fluid [BNL-20899] 13 p0085 A77-10542
- Heat pipes for the temperature range from 200 to 600 C --- noting sulfur with iodine additive as working fluid 13 p0119 A77-14381
- Working fluid selection and preliminary heat exchanger design for a Rankine cycle geothermal power plant [PB-261564/9] 15 p0349 A77-22684

## WYOMING

- Assessing low sulfur coal resources in Montana and Wyoming 13 p0058 A77-16374
- Draft environmental assessment of application by ERDA for a special land use permit for use of public lands in Wyoming for in situ coal gasification experiments [UCID-17011] 13 p0100 A77-11572
- The spatial characteristics of three Wyoming fuels [AD-A030873] 14 p0233 A77-20612

## X

## X RAY ANALYSIS

- XRF analysis of some regenerated catalysts [NRL-TN-388] 15 p0376 A77-26247

## X RAY DIFFRACTION

- Evaluation of the calcium aluminate bond phase in refractory castables as related to their use in synthane gasifier [PB-266854/9] 16 p0525 A77-30255

## X RAY FLUORESCENCE

- XRF analysis of some regenerated catalysts [NRL-TN-388] 15 p0376 A77-26247

## X RAY LASERS

- Soft X-ray lasers [SAND-76-5542] 14 p0219 A77-19425

## X-15 AIRCRAFT

- Hypersonic technology-approach to an expanded program 13 p0051 A77-14597

## XENON LAMPS

- Silicon solar cell testing in concentrated sunlight and simulated sunlight 16 p0527 A77-30540

## Y

## YAG LASERS

- Analysis of the sun pumped laser cone optics [AD-A034284] 15 p0361 A77-24483

## YELLOWSTONE NATIONAL PARK (ID-MT-WY)

- Thermographic mosaic of Yellowstone National Park p0001 A77-10121
- Geothermal significance of magnetotelluric sounding in the eastern Snake River Plain-Yellowstone region 15 p0310 A77-36999

## YTTRIUM COMPOUNDS

- Photoelectrolysis with YFeO<sub>3</sub> electrodes --- water splitting using solar energy 16 p0399 A77-40553

## Z

## Z-37 AIRCRAFT

- The propulsion system of the aircraft Z-37. I 14 p0156 A77-22121

## ZINC COMPOUNDS

- Evaluation of a 1 kWh zinc chloride battery system [PB-260683/8] 14 p0236 A77-21356
- Engineering design and cost analysis of chlorine storage concepts for a zinc-chlorine load-leveling battery [PB-262016/9] 14 p0252 A77-21727

## ZINC SELENIDES

- Reactions in the ZnSe thermochemical cycle for hydrogen production 14 p0178 A77-24854
- Recent developments in the engineering and chemistry of the ZnSe thermochemical hydrogen cycle 16 p0457 A77-48815

- Preliminary assessment of economics of hydrogen production from Lawrence Livermore Laboratory ZnSe thermochemical cycle [UCRL-13711] 16 p0536 A77-31626

## ZINC TELLURIDES

- Cathodes for photodriven hydrogen generators - ZnTe and CdTe 15 p0296 A77-35921

## ZIRCONIUM ALLOYS

- Thermal barrier coating on high temperature industrial gas turbine engines [NASA-CR-135147] 15 p0390 A77-27496

## ZIRCONIUM HYDRIDES

- Uranium zirconium hydride reactor space power systems [IAF PAPER 76-256] 13 p0004 A77-10953

## ZIRCONIUM NITRIDES

- Spectral reflectance of TiN/x/ and ZrN/x/ films as selective solar absorbers 16 p0423 A77-44492

## ZONE MELTING

- Silicon solar cells on zone-melted silicon/graphite substrates 16 p0426 A77-45303

# PERSONAL AUTHOR INDEX

ENERGY / A Continuing Bibliography (Issue 16)

JANUARY 1978

## Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g. NASA report, translation, NASA contractor report). The issue, page and accession numbers are located beneath and to the right of the title, e.g. 13 p0095 N77-11399. Under any one author's name the accession numbers are arranged in sequence with the IAA accession numbers appearing first.

## A

# CORPORATE SOURCE INDEX

ENERGY / A Continuing Bibliography (Issue 16)

JANUARY 1978

## Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of *Energy*. If applicable a report number is also included as an aid in identifying the document.

## A

- ABCOR, INC., CAMBRIDGE, MASS.  
Growth effects of major land use projects.  
Volume 2: Compilation of land use based  
emission factors  
[PB-255302/2] 13 p0092 N77-10709
- ACADEMIA R. P. R., BUCHAREST.  
Hydrogen economy analysis using decision theory  
14 p0247 N77-21663
- ACE-FEDERAL REPORTERS, INC., WASHINGTON, D. C.  
Creating energy choices for the future  
[CONF-751228-P1] 13 p0087 N77-10647
- Energy technologies for the west: Possible  
effects of Energy Technology on Land, Water,  
and Air Resources  
[TID-27444] 16 p0556 N77-33632
- ACRES AMERICAN, INC., BUFFALO, N. Y.  
Underground pumped storage research priorities  
[PB-254413/8] 13 p0089 N77-10667
- ACUREX CORP., MOUNTAIN VIEW, CALIF.  
Alternate petroleum based fuels for naval fleet  
usage: potential availability, cost, and  
system impact  
[AD-A041980] 16 p0551 N77-33372
- ADAPT SERVICE CORP., READING, MASS.  
Effect of mechanical cooling devices on ambient  
salt concentration  
[PB-256679/2] 13 p0125 N77-14631
- ADDIS TRANSLATIONS INTERNATIONAL, PORTOLA VALLEY,  
CALIF.  
Underground fuel gasification  
[UCRL-TRANS-10998] 13 p0088 N77-10659
- Hybrid drive with kinetic energy store as  
vehicle drive  
[UCRL-TRANS-11018] 13 p0120 N77-14486
- ADELAIDE UNIV. (AUSTRALIA).  
The photosynthetic production of hydrogen  
14 p0239 N77-21602
- ADVISORY GROUP FOR AEROSPACE RESEARCH AND  
DEVELOPMENT, PARIS (FRANCE).  
Variable Geometry and Multicycle Engines  
[AGARD-CP-205] 15 p0339 N77-22112
- AEG-TELEFUNKEN, FRANKFURT AM MAIN (WEST GERMANY).  
Non-nuclear energy technology. Low temperature  
cable for power transmission  
[BHFT-PE-T-76-01] 14 p0210 N77-17372
- AEG-TELEFUNKEN, HAMBURG (WEST GERMANY).  
Experimental study of the theoretical and  
technological possibilities to manufacture  
solar cells using GaAs-layers on  
GaAs-structures  
[BHFT-PE-W-76-10] 14 p0212 N77-17584

- AEROJET NUCLEAR CO., IDAHO FALLS, IDAHO.  
Geothermal R and D project report  
[ANCR-1283] 13 p0124 N77-14605
- Conceptual study for total utilization of an  
intermediate temperature geothermal resource  
[ANCR-1260] 14 p0211 N77-17579
- AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).  
Hydrocarbon fuels from solar energy via the alga  
Botryococcus brauni  
[ARL/MECH-ENG-148] 16 p0513 N77-28576
- AEROSPACE CORP., EL SEGUNDO, CALIF.  
Photovoltaic, gravitationally-stabilized  
solid-state, satellite solar power station  
/GSS4PS/  
[AIAA PAPER 77-511] 14 p0173 A77-23927
- Personal rapid transit research conducted at the  
Aerospace Corporation  
[PB-256846/7] 13 p0111 N77-12946
- Research plan for achieving reduced automotive  
energy consumption  
[PB-255929/2] 13 p0121 N77-14495
- Penetration analysis and margin requirements  
associated with large-scale utilization of  
solar power plants  
[PB-257546/2] 14 p0208 N77-16459
- AEROSPACE CORP., GERMANTOWN, MD.  
Energy recovery from municipal solid waste, an  
environmental and safety mini-overview survey  
[ATR-76 (7518)-7] 15 p0369 N77-25011
- Geothermal energy, an environmental and safety  
mini-overview survey  
[ATR-77 (7518)-1] 16 p0514 N77-28590
- AEROSPACE CORP., LOS ANGELES, CALIF.  
Control of waste and water pollution from power  
plant flue gas cleaning systems  
[PB-259211/1] 14 p0227 N77-19953
- AEROTHERM ACUREX CORP., MOUNTAIN VIEW, CALIF.  
Evaluation of molten scrubbing for fine  
particulate control  
[PB-266092/6] 16 p0517 N77-28642
- AIA RESEARCH CORP., WASHINGTON, D. C.  
Early use of solar energy in buildings. A study  
of barriers and incentives to the widespread  
use of solar heating and cooling systems  
[PB-267832/4] 16 p0539 N77-31663
- Early use of solar energy in buildings. A study  
of barriers and incentives to the widespread  
use of solar heating and cooling systems  
[PB-267832/4] 16 p0554 N77-33618
- AIR FORCE ACADEMY, COLO.  
Solar heating retrofit of military family housing  
[AD-A030843] 14 p0226 N77-19659
- The spatial characteristics of three Wyoming fuels  
[AD-A030873] 14 p0233 N77-20612
- AIR FORCE AERO PROPULSION LAB., WRIGHT-PATTERSON  
AFB, OHIO.  
The impact of JP-4/JP-8 conversion on aircraft  
engine exhaust emissions  
[AD-A026546] 13 p0112 N77-13234
- Potential improvements in engine performance  
using a variable geometry turbine  
15 p0340 N77-22141
- Demonstration testing of a Vuilleumier  
cryocooler with an integral  
[AD-A042786] 16 p0547 N77-32599
- Investigation of GaAs solar cell potential  
performance and cost  
[AD-A040736] 16 p0553 N77-33612
- AIR FORCE CIVIL ENGINEERING CENTER, TYNDALL AFB, FLA.  
Waste POL disposal through energy recovery  
[AD-A031783] 14 p0235 N77-20957

- AIR FORCE FLIGHT DYNAMICS LAB., WRIGHT-PATTERSON AFB, OHIO.**  
Hypersonic technology-approach to an expanded program  
13 p0051 A77-14597
- AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OHIO.**  
An energy management guidance scheme applicable to the interim upper stage  
[AD-A034005] 15 p0353 N77-23143  
Analysis of the sun pumped laser cone optics  
[AD-A034284] 15 p0361 N77-24483
- AIR PRODUCTS AND CHEMICALS, INC., ALLENTOWN, PA.**  
An exploratory study to determine the integrated technological air transportation system ground requirements of liquid-hydrogen-fueled subsonic, long-haul civil air transports  
[NASA-CR-2699] 13 p0083 N77-10033  
Assessment and study of existing concepts and methods of cryogenic refrigeration for superconducting transmission cables  
[COO-2552-6] 14 p0214 N77-18352
- AIRCO, INC., MURRAY HILL, N. J.**  
Comparative cost study of the processes for producing niobium-tin (Nb<sub>3</sub>Sn) superconducting tapes for their application to power transmission lines

- Gravity and ground magnetic surveys of the central mineral mountains, Utah, volume 6  
[PB-268423/1] 16 p0544 N77-32578

## V

- VIRGINIA POLYTECHNIC INST. AND STATE UNIV., BLACKSBURG.  
Evaluation and targeting of geothermal energy resources in the southeastern United States  
[VPI-SU-5103-1] 14 p0225 N77-19642
- Hydrogen-powered highway vehicles: Applications and optimum form of fuel storage  
14 p0242 N77-21616
- VIRGINIA UNIV., CHARLOTTESVILLE.  
Performance and analysis of SOLARIS water-trickle solar collector  
[CONF-760821-9] 14 p0232 N77-20599
- Analysis of thermal performance of Solaris water-trickle solar collector  
[CONF-761117-17] 15 p0382 N77-26668
- Evaluation of Solaris water-trickle solar collector and demonstration of annual cycle collection and storage of solar heated water  
[CONF-761143-1] 15 p0382 N77-26669
- Engineering analysis and testing of water-trickle solar collector  
[ORO-4927-76-2] 15 p0391 N77-27506
- VOORHEES (ALAN M.) AND ASSOCIATES, INC., MCLEAN, VA.  
Study of future paratransit requirements  
[PB-264082/9] 15 p0376 N77-26028

## W

- WASHINGTON STATE UNIV., PULLMAN.  
An investigation of condensation heat transfer in a closed tube containing a soluble noncondensable gas  
[NASA-CR-149095] 13 p0085 N77-10465
- Societal implications of energy scarcity. Social and technological priorities in steady state and constricting systems  
[PB-253097/0] 13 p0099 N77-11556
- WASHINGTON UNIV., SEATTLE.  
Assessing the relationship between urban form and travel requirements: A literature review and conceptual framework  
[PB-254988/9] 13 p0102 N77-11923
- Electric power development in the Pacific Northwest Region: Institutional commitments and alternatives, phase 1  
[PB-262382/5] 15 p0348 N77-22671

- WATER PURIFICATION ASSOCIATES, CAMBRIDGE, MASS.  
Water requirements for steam-electric power generation and synthetic fuel plants in the western United States  
[PB-268067/7] 16 p0540 N77-31667
- WATERLOO UNIV. (ONTARIO).  
WATSON: A solar heating simulation and economic evaluation program  
[NP-21307] 15 p0364 N77-24603
- Determining the technical and economic feasibility of utilizing solar energy for heating buildings in Canada  
[NP-21308] 15 p0365 N77-24611
- Studies on methods of reducing heat losses from flat plate solar collectors  
[COO-2597-2] 15 p0395 N77-27554
- WAYNE STATE UNIV., DETROIT, MICH.  
An experimental study supported by a computer simulation in a prechamber CFR diesel engine leading to a modified cetane scale for rating low ignition quality fuels  
16 p0525 N77-30259
- WENDELL ASSOCIATES, MCLEAN, VA.  
Federal assistance programs and energy development-impacted municipalities  
[PB-265804/5] 16 p0519 N77-29026
- WEST VIRGINIA UNIV., MORGANTOWN.  
Simulation of fluidized bed combustors. I - Combustion efficiency and temperature profile  
14 p0145 A77-21698
- The use of an interactive energy model for technology assessment with special reference to underground coal gasification  
[PB-255543/1] 13 p0098 N77-11545
- WESTERN FOREST PRODUCTS LAB., VANCOUVER (BRITISH COLUMBIA).  
Energy self-sufficiency prospects for the British Columbia forest products industry  
[VP-X-166] 15 p0363 N77-24591
- WESTERN ONTARIO UNIV., LONDON.  
Microbial hydrogen production  
14 p0239 N77-21601
- WESTINGHOUSE ELECTRIC CORP., EAST PITTSBURGH, PA.  
Silicon solar photovoltaic power stations  
[AIAA 77-1021] 16 p0404 A77-41563
- WESTINGHOUSE ELECTRIC CORP., LESTER, PA.  
Advanced coal gasification system for electric power generation  
[FE-1514-176] 13 p0088 N77-10653
- WESTINGHOUSE ELECTRIC CORP., LIMA, OHIO.  
High power study, superconducting generators  
[AD-A031620] 15 p0342 N77-22408
- WESTINGHOUSE ELECTRIC CORP., PITTSBURGH, PA.  
Liquid-metal magnetohydrodynamic system evaluation  
13 p0034 A77-12784
- Nuclear driven water decomposition plant for hydrogen production  
13 p0035 A77-12791
- Hydrogen production by water decomposition using a combined electrolytic-thermochemical cycle  
15 p0277 A77-33356
- Silicon solar photovoltaic power stations  
[AIAA 77-1021] 16 p0404 A77-41563
- Hydrogen production by water decomposition using a combined electrolytic thermochemical cycle  
14 p0238 N77-21589
- Hydrogen generation process  
[FE-2262-3] 16 p0533 N77-31337
- Analysis and forecast of electrical distribution system materials. Volume 3: Appendix  
[CONS/2050-1-VOL-3-APP] 16 p0551 N77-33430
- Study of the auxiliaries for lead-acid battery systems for peaking power  
[CONS/2114-3] 16 p0556 N77-33634
- WESTINGHOUSE RESEARCH LABS., PITTSBURGH, PA.  
Design of closed-cycle MHD generator with nonequilibrium ionization and system  
15 p0303 A77-36387
- Thin film solar cells for terrestrial applications  
[PB-255606/6] 13 p0109 N77-12553
- The Westinghouse sulfur cycle for the thermochemical decomposition of water  
14 p0238 N77-21587
- Energy Conversion Alternatives Study (ECAS), Phase 2. Volume 1: Summary and combined gas-stream turbine plant with an integrated low-BTU gasifier  
[NASA-CR-134942-VOL-1] 15 p0379 N77-26628

- Energy Conversion Alternatives Study (ECAS),  
Phase 2. Volume 2: Summary and combined  
gas-steam turbine plant using coal derived  
liquid fuel  
[NASA-CR-134942-VOL-2] 15 p0379 N77-26629
- Energy Conversion Alternatives Study (ECAS),  
Phase 2. Volume 3: Summary and advanced  
steam plant with pressurized fluidized bed  
boilers  
[NASA-CR-134942-VOL-3] 15 p0379 N77-26630
- Thin film solar cells for terrestrial applications  
[PB-265983/7] 16 p0523 N77-29635
- WILSON, JONES, HORTON AND LYNCH, SAN MATEO, CALIF.  
Santa Clara, California, community center,  
commercial solar demonstration legal  
alternatives, implications, and financing of  
solar heating and cooling by a municipal  
corporation  
[SAN/1083-76/1] 15 p0394 N77-27549
- WISCONSIN UNIV., MADISON.  
Increased fuel economy in transportation systems  
by use of energy management: Second year's  
program. Executive summary  
[PB-256117/3] 13 p0108 N77-12536
- A design procedure for solar heating systems  
13 p0128 N77-15485
- Increased fuel economy in transportation systems  
by use of energy management - second year's  
program  
[PB-257177/6] 13 p0133 N77-15930
- Discovery of reaction sequences for  
thermochemical water splitting  
[AD-A029959] 14 p0228 N77-20191
- Discovery of reaction sequences for  
thermochemical water splitting  
14 p0238 N77-21575
- What is past is prologue: Future directions in  
Tokamak power reactor design research  
[UWPDH-175] 15 p0358 N77-23951
- Calculation of monthly average insolation on  
tilted surfaces  
[CONF-760842-15] 15 p0387 N77-27057
- Parametric study of critical fuel costs for  
solar heating in North America  
[CONF-760842-12] 15 p0392 N77-27533
- Simulation study of several solar heating  
systems with offpeak auxiliary  
[CONF-760842-13] 15 p0393 N77-27534
- Review of solar cooling  
[CONF-760842-9] 15 p0393 N77-27535
- Performance of a solar heating system utilizing  
phase-change energy storage  
[CONF-760842-11] 15 p0393 N77-27540
- Design procedure for solar air heating systems  
[CONF-760842-14] 16 p0514 N77-28589
- WORLD METEOROLOGICAL ORGANIZATION, GENEVA  
(SWITZERLAND).  
Weather, climate and human settlements  
[WMO-448] 15 p0387 N77-27038
- WORMSER SCIENTIFIC CORP., STAMFORD, CONN.  
Solar house heating system using reflective  
pyramid optical condensing system  
[COO-2769-4] 16 p0522 N77-29619
- WYLE LABS., INC., HUNTSVILLE, ALA.  
Assembly and testing of a 1.8 by 3.7 meter  
Fresnel lens solar concentrator  
[NASA-CR-150300] 15 p0378 N77-26610
- WYOMING UNIV., LARAMIE.  
Evaluation of wind-energy sites from aeolian  
geomorphologic features mapped from LANDSAT  
imagery. First results  
[ERDA/NSF-00598/75/T1] 14 p0218 N77-18667

## X

- XEROX ELECTRO-OPTICAL SYSTEMS, PASADENA, CALIF.  
Thermal energy storage demonstration unit for  
Vuilleumier cryogenic cooler  
[AD-A040895] 16 p0553 N77-33613

## Y

- YARDNEY ELECTRIC CORP., PAWCATUCK, CONN.  
Design and cost study of a zinc/nickel oxide  
battery for electric vehicle propulsion  
[ANL-K-76-3543-1] 16 p0556 N77-33635

# CONTRACT NUMBER INDEX

ENERGY / A Continuing Bibliography (Issue 16)

JANUARY 1978

## Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be found.

# REPORT/ACCESSION INDEX

ENERGY / A Continuing Bibliography (Issue 16)

JANUARY 1978

## Typical Report / Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (\*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche. A plus sign (+) indicates a document that cannot be microfiched but for which one-to-one facsimile is available.

# **PUBLIC COLLECTIONS OF NASA DOCUMENTS**

## **DOMESTIC**

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

### **CALIFORNIA**

University of California, Berkeley

### **COLORADO**

University of Colorado, Boulder

### **DISTRICT OF COLUMBIA**

Library of Congress

### **GEORGIA**

Georgia Institute of Technology, Atlanta

### **ILLINOIS**

The John Crerar Library, Chicago

### **MASSACHUSETTS**

Massachusetts Institute of Technology, Cambridge

### **MISSOURI**

Linda Hall Library, Kansas City

### **NEW YORK**

Columbia University, New York

### **OKLAHOMA**

University of Oklahoma, Bizzell Library

### **PENNSYLVANIA**

Carnegie Library of Pittsburgh

### **WASHINGTON**

University of Washington, Seattle

NASA publications (those indicated by an "\*" following the accession number) are also received by the following public and free libraries:

### **CALIFORNIA**

Los Angeles Public Library

San Diego Public Library

### **COLORADO**

Denver Public Library

### **CONNECTICUT**

Hartford Public Library

### **MARYLAND**

Enoch Pratt Free Library, Baltimore

### **MASSACHUSETTS**

Boston Public Library

### **MICHIGAN**

Detroit Public Library

### **MINNESOTA**

Minneapolis Public Library

### **MISSOURI**

Kansas City Public Library

St. Louis Public Library

### **NEW JERSEY**

Trenton Public Library

### **NEW YORK**

Brooklyn Public Library

Buffalo and Erie County Public Library

Rochester Public Library

New York Public Library

### **OHIO**

Akron Public Library

Cincinnati Public Library

Cleveland Public Library

Dayton Public Library

Toledo Public Library

### **TENNESSEE**

Memphis Public Library

### **TEXAS**

Dallas Public Library

Fort Worth Public Library

### **WASHINGTON**

Seattle Public Library

### **WISCONSIN**

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York 10017.

## **EUROPEAN**

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "\*", from ESA - Space Documentation Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.

## NASA CONTINUING BIBLIOGRAPHY SERIES

NUMBER	TITLE	FREQUENCY
NASA SP-7011	AEROSPACE MEDICINE AND BIOLOGY Aviation medicine, space medicine, and space biology	Monthly
NASA SP-7037	AERONAUTICAL ENGINEERING Engineering, design, and operation of aircraft and aircraft components	Monthly
NASA SP-7039	NASA PATENT ABSTRACTS BIBLIOGRAPHY NASA patents and applications for patent	Semiannually
NASA SP-7041	EARTH RESOURCES Remote sensing of earth resources by aircraft and spacecraft	Quarterly
NASA SP-7043	ENERGY Energy sources, solar energy, energy conversion, transport, and storage	Quarterly
NASA SP-7500	MANAGEMENT Program, contract, and personnel management, and management techniques	Annually
